BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS

(ISSN 0006-291X)

Published three times per month by Academic Press, 6277 Sea Harbor Drive, Orlando, FL 32887-4900

1997: Volumes 230-241. Price: \$2100.00 U.S.A. and Canada; \$2550.00 all other countries

1998: Volumes 242-253. Price: \$2495.00 U.S.A. and Canada; \$2994.00 all other countries.

All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send change of address to *Biochemical and Biophysical Research Communications*, 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

Periodicals postage paid at Orlando, FL, and at additional mailing offices.

ALL RIGHTS RESERVED

No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher. *Exceptions:* It is the policy of Academic Press that authors need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

The appearance of the code at the bottom of the first page of an article in this journal indicates the Publisher's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1997 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Cumulative Subject Index  
Volumes 230–241<sup>1</sup>

- A**
- A20 protein  
inhibition of NF- $\kappa$ B activation independently of binding to 14-3-3 proteins, **238**, 590
- A170 stress protein  
60-kDa, induction in peritoneal macrophages by low micromolar levels of H<sub>2</sub>O<sub>2</sub> and proteasome inhibitors (mouse), **232**, 33  
phosphorylation by casein kinase II-like activity in macrophages (mouse), **241**, 157
- Abasic sites  
C<sup>1</sup>-oxidized, formation in alkylperoxyl radical-damaged plasmid DNA, **237**, 1
- ABC transporters  
link of phospholipid transmembrane migration to, evidence from rare inherited disorder of phosphatidylserine externalization, **241**, 548  
peroxisomal  
ALDRP, cDNA cloning and mRNA expression (human), **239**, 261  
PMP69, primary structure (human), **237**, 152  
role in mediation of anti-estrogenic activity (human), **235**, 669
- Accessory gland components  
on surface of laid Medfly eggs, analysis, **240**, 657
- ACE, *see* Peptidyl-dipeptidase A
- 2-(2'-Acetamidobenzyl)-3-(3'-indolyl)-quinoline  
dual inhibition of *Leishmania donovani* DNA topoisomerases, **230**, 171
- 4-Acetyonyl-4-hydroxy-2-methylbut-2-en-1,4-olide  
biosynthesis from 4-hydroxy-3,5-dimethylbenzoate by *Pseudomonas* sp. HH35 but not *Rhodococcus rhodochrous* N75, **238**, 197
- Acetyl-L-carnitine  
cerebral uptake, PET study (rhesus monkey), **231**, 488
- Acetylcholine  
vesicles containing, exocytotic mechanism in pheochromocytoma cells, comparison with catecholamine-containing vesicles (rat), **239**, 57
- Acetylcholine receptor currents  
potentiation by serum factor via differential signal transduction pathways (*Xenopus* oocytes), **238**, 565
- Acetylcholinesterase  
amyloid fibril formation induced by, inhibition by anti-AChE monoclonal antibody, **232**, 652  
purified from electric eel, inhibition by polycyclic aromatic hydrocarbons, **238**, 367
- Acetyl-CoA carboxylase  
intracellular localization (rat), **233**, 253
- $\beta$ 1,6N-Acetylglucosaminyltransferase, *see*  $\beta$ -1,3-Galactosyl-O-glycosyl-glycoprotein  $\beta$ -1,6N-acetylglucosaminyltransferase
- N-Acetylglucosaminyltransferase III  
gene transfection, downregulation of swine xenoantigen (pig), **235**, 359; *erratum*, **238**, 686
- N-Acetylserotonin  
inhibition of lipid peroxidation and role in retinal physiology, **233**, 778
- N-Acetyltransferase  
NAT1 locus, identification of allele NAT1\*17 (human), **233**, 584
- Achromobacter xylosoxidans* KF701  
catechol 2,3-dioxygenase gene, characterization, **238**, 430
- $\alpha$ <sub>1</sub>-Acid glycoprotein  
related protein JB70, gene expression in *Euglena gracilis* (rat), **234**, 544
- Acinar cells  
pancreatic, *see* Pancreatic acinar cells  
parotid, permeabilized, Ca<sup>2+</sup> release from intracellular stores in, monitoring with Mag-fura-2 and Calcium Green C<sub>18</sub> (rat), **240**, 189
- Acinar secretory granules  
parotid, Cl<sup>-</sup> conductance in, modulation by GTP-binding protein G<sub>s</sub> (rat), **238**, 638
- Acini  
pancreatic, amylase secretion, effect of sphingosine and ceramide (rat), **235**, 197
- ACNU, *see* 1-(4-Amino-2-methyl-5-pyrimidinyl)methyl-3-(2-chloroethyl)-3-nitrosourea
- Acquired immune deficiency syndrome  
associated Kaposi's sarcoma cells, secretion of neurotrophic growth factors (human), **233**, 408  
derived B cells, modulation of macrophage inflammatory protein-1 $\alpha$  and receptor (human), **235**, 576
- ActA surface protein  
oligoproline regions, defined docking sites for actin-based motility (*Listeria monocytogenes*), **231**, 686
- ACTH receptor, *see* Adrenocorticotropin hormone receptor
- Actin  
ADP-ribosylation, effect of NO (HL-60 cells), **232**, 827  
bradykinin-induced reorganization in HaCaT keratinocytes, **237**, 257  
cleaved, defective mechanochemical properties, restoration by native tropomyosin, **237**, 121  
effect on activation of neutrophil NADPH oxidase in cell-free system (human), **230**, 206  
expression by marrow stromal osteoblasts, effects of estrogen (mouse), **233**, 30  
folding, role of chaperonin containing TCP-1 (*Caenorhabditis elegans*), **241**, 687  
gene expression in cells expressing exogenous  $\beta$ -amyloid precursor protein, **231**, 615  
interaction with single molecule of heavy meromyosin, scanning force microscopic study, **234**, 178  
lipopolysaccharide-induced phosphorylation in monocytes (human), **241**, 670  
monocyte chemotactic protein-4-induced reorganization in human eosinophils via pertussis toxin-sensitive G protein, **240**, 32  
nuclear accumulation in isolated rat hepatocytes, induction by adenine nucleotides, **240**, 697  
paracrystals, myosin-coated glass beads suspended from, accelerative sliding, **237**, 427  
polymerization  
regulation of integrin-mediated neutrophil adhesion and rigidity (human), **238**, 910  
regulation by L-selectin via activation of Rac2 (human), **231**, 802  
stress fibers, formation in dedifferentiated MDCK-C7 cell lines, **241**, 541  
subdomain I, calcium-sensitive binding site for gelsolin, localization; implications for severing process (rabbit), **233**, 61

<sup>1</sup> Boldface numbers indicate volume; lightface numbers indicate pagination.

## Actin-based motility

ABM-1 and ABM-2 homology sequences, docking sites defined by oligopropylene regions (human, *Listeria*), **231**, 686

## Actin-binding protein

endothelial, 71-kDa domain, expression in *Escherichia coli*, phosphorylation with cAMP-dependent protein kinase, and proteolysis by calpain (human), **232**, 555

## Actin cytoskeleton

reorganization in human astrogloma cells, mediation by adenosine A<sub>3</sub> receptor, **241**, 297

## Actin filaments

denaturation, effects of nucleotides, **236**, 798

derangement by 2-chloroadenosine, role in induction of apoptosis of C2C12 myoblastic cells, **238**, 361

formation, effect of NO (HL-60 cells), **232**, 827

## sliding

effect of SH2 cysteine mutations in myosin II (*Dictyostelium*), **234**, 701  
velocity, effect of myosin subfragment 1 bound to glass surface (chicken), **230**, 76

 $\alpha$ -Actinin

C-terminal region, binding to N-terminal Z repeat 5 of connectin-titin, **235**, 1

Actinomycin C<sub>1</sub>, *see* DactinomycinActinomycin D, *see* Dactinomycin

## Activating receptor of NK cells

NKR-PIA, binding to chitobiose core of incompletely glycosylated N-linked glycans and to linear chitoooligomers, **238**, 149

## Activating transcription factor/CRE site

and GC box, in housekeeping Na,K-ATPase  $\alpha$ 1 subunit gene, synergism between, role in constitutive expression, **241**, 169

Activator protein-1, *see* AP-1

## Activin

types  $\beta_C$  and  $\beta_E$ , gene linkage and liver-specific expression pattern in adult tissues (mouse), **231**, 655

## Activin A

regulation of growth and prostatic marker expression in androgen-sensitive prostate cancer cell line LNCaP (human), **234**, 362

and all-*trans*-retinoic acid, cooperative enhancement of functional activity of L-type Ca<sup>2+</sup> channels in C1300 neuroblastoma cells, **241**, 363

## Acute leukemic T cells

Jurkat, expression of mammalian homologues of *trp* gene from *Drosophila* (human), **239**, 279

## Acute lymphoblastic leukemia cells

pre-B cell, Nalm-6

lymphotoxin beta isoforms expressed in, identification (human), **238**, 273  
 $\alpha\beta$ -mediated migration, support by L1 adhesion molecule (human), **232**, 236

## Acute myeloid leukemia

insulin-like growth factor II gene imprinting (human), **231**, 466

## Acute promyelocytic leukemia cells

NB4, retinoic acid-induced differentiation and retinoylation of proteins, enhancement by *N*-4-hydroxyphenylretinamide (human), **232**, 432

## Acute renal failure

myoglobinuric, rat kidney with, regulation and immunohistochemical analysis of stress protein heme oxygenase-1, **240**, 93

## ACV synthetase

*Penicillium chrysogenum*, amino acid activating domains, expression in *Aspergillus nidulans*, **237**, 166

*N*-Acylaminoethyl lactosides

glycosylation in melanoma B16 cells: priming of glycosphingolipid synthesis (mouse), **241**, 698

## Acyl-CoA oxidase

peroxisomal branched-chain, gene assignment to chromosome 3p21·1-p14·2 (human), **231**, 767

## Acyl-CoA thioesterase

hACTE-III, enzymatic activity, enhancement by direct binding with HIV Nef, **238**, 234

1-Acyl-*sn*-glycerol-3-phosphate acyltransferase

cDNA cloning and expression (mouse), **237**, 663

## Acylphosphatase

differential migration of isozymes from cytoplasm to nucleus during apoptosis (K562 and Jurkat cells), **231**, 717

muscle isozyme, in cultured dystrophic dermal fibroblasts (human), **230**, 327

## Adaptive responses

to hypoxic stress, basic loop helix/PAS domain transcription factors HIF-1 $\alpha$  and HLF/EPAS involved in, cardiac expression (rat), **240**, 552

## Adenine nucleotides

induction of nuclear accumulation of G-actin in isolated hepatocytes (rat), **240**, 697

## Adenine-propenal

formation by hydroxyl radical damage of DNA, **238**, 317

## Adenosine

role in granule exocytosis by natural killer cells (mouse), **231**, 264

Adenosine A<sub>3</sub> receptor agonists

effects on cell spreading, actin cytoskeleton, and Bcl-x<sub>L</sub> distribution in human astrogloma cells, **241**, 297

protective effect against apoptosis of HL-60 and U-937 cells induced by A<sub>3</sub> antagonists, **232**, 317

## Adenosine deaminase

coformycin tight-binding interaction with, role of N-3 sugar moiety, **236**, 88  
identification as Grb3-3 binding protein, **237**, 735

## Adenosine kinase

gene cloning and expression (human, rat), **231**, 645

*S*-Adenosylhomocysteine hydrolase

promoter activity in transiently transfected CHO cells, **240**, 580

*S*-Adenosylmethionine

as source of deoxyadenosyl radical, biotin synthase as member of family of enzymes using, **236**, 402; *erratum*, **240**, 246

## Adenovirus

avian, induction of ion channels in model bilayer lipid membranes, **236**, 750  
E1A, apoptosis induced by, induction of ubiquitin conjugating enzyme for topoisomerase II $\alpha$  degradation during, analysis (MA1 cells), **239**, 823

mediated gene expression via tetracycline-controllable transactivator with nuclear localization signal, **230**, 426

mediated gene therapy of gastric carcinoma, with cancer-specific gene expression *in vivo*, **231**, 775

mediated inducible vesicular stomatitis G protein gene expression, in VSV-G pseudotyped retroviral packaging, **232**, 379

mediated transduction with human glial cell line-derived neurotrophic factor gene, prevention of MPTP-induced dopamine depletion in murine striatum, **238**, 569

transfer of C-type natriuretic peptide gene into cultured VSMC, induction of G1 growth inhibition (rat), **239**, 889

transfer of genes into senescent cells via highly expressed  $\alpha\beta$ 5 integrin, **240**, 88

## Adenylate cyclase

associated protein CAP, proline-rich region, association with EF-1 $\alpha$  and ribosomal protein L3 (*Saccharomyces cerevisiae*), **232**, 503

coupling of chimeric D<sub>2</sub>/D<sub>1</sub> dopamine receptor to, **237**, 394

role in somatostatin inhibition of interleukin 6 release from cortical type I astrocytes (rat), **235**, 242

stimulation in muscle cells by 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> via GTP-independent mechanism involving phosphorylation of G<sub>i</sub> (chicken), **234**, 125

## Adenylate cyclase II

phorbol ester-induced sensitization, relation to phosphorylation of Thr 1057, **237**, 251

## Subject Index

## Adenylate kinase

activation by denaturants via increase in conformational flexibility at active sites, **238**, 382

inhibition by vitamin C (rabbit muscle), **233**, 386

Adenylyl cyclase, *see* Adenylate cyclase

## Adhalin

structure and expression during late stages of muscle differentiation *in vitro* (mouse), **235**, 227

## Adhesin

K99 pilus, expression by enterotoxigenic *Escherichia coli*, induction by norepinephrine, **232**, 682

## Adipocytes

## 3T3-L1

adipogenesis, homeobox gene expression during, **237**, 470

differentiation, binding of conserved region in first intron of insulin receptor gene to nuclear proteins during, **240**, 701

insulin-responsive, mammalian target of rapamycin in, expression, enzyme activity, and subcellular localization, **241**, 704

leptin mRNA expression and secretion, regulation by thyroid hormone, **232**, 822

ob gene expression, enhancement by TGF- $\beta$  and inhibition by pro-inflammatory cytokines, **240**, 382

phosphatidylinositol 3'-kinase activation by insulin, inhibition by phenylarsine oxide, **239**, 316

SNAP-23 binding to syntaxin 4, inhibition by Munc18c (mouse), **234**, 257

trafficking kinetics of insulin-regulated membrane aminopeptidase in, **239**, 247

$\alpha$ 2A-adrenergic receptor expression (human), **235**, 765

glycerol release, effect of selective inhibition of cyclic AMP phosphodiesterase III (rat), **236**, 665

insulin-induced glucose transport and GLUT4 recruitment, inhibition by myosin-derived peptide C109 bound to GLUT-4 vesicles (rat), **240**, 409

lipolytic effect of leptin *in vitro*: possible autocrine/paracrine action (mouse), **240**, 590

marrow stromal, osteocalcin gene expression and protein production (mouse), **231**, 442

from preadipocyte differentiation, subsequent ob gene expression and leptin secretion (rat), **230**, 360

precursors, adipose differentiation of primary culture in defined medium, inhibition by prostaglandin F<sub>2 $\alpha$</sub>  receptor agonists (rat), **233**, 200

UCP-2 gene expression, upregulation by PPAR agonists (mouse), **238**, 606

## Adipokinetic hormone

AKH/RPCH family members, distinct sequences in corpus cardiacum (beetle), **230**, 16

isolation and characterization as AKH/RPCH family member (*Melanoplus sanguinipes*), **239**, 763

## Adipose tissue

aquaporin with glycerol permeability, molecular cloning and expression (human), **241**, 53

brown, *see* Brown adipose tissue

GLUT4 expression, effects of diet and age (rat), **235**, 89

hormone-sensitive lipase, partial purification and identification (chicken), **236**, 94

leptin gene expression, leptin receptor-mediated autocrine regulation (rat), **240**, 492

leptin production, increase after midpregnancy (mouse), **240**, 213

macrophage migration inhibitory factor, identification (rat), **235**, 94

ob gene expression, and circulating leptin peptide concentrations, developmental changes (mouse), **238**, 44

peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression bovine, **239**, 857

human, **233**, 320

and plasma and placenta, leptin gestational profile (rat), **240**, 798

## Adiposity

and plasma leptin concentration, maternal, relationship to leptin concentration in milk (human), **240**, 742

## ADP

effect on ion-conductive properties of chloroplast H<sup>+</sup>-ATPase reconstituted into bilayer membrane (spinach), **232**, 461

induced GPIIb/IIIa-mediated platelet aggregation, attenuation by high shear stress combined with blocking of von Willebrand factor binding to GPIIb/IX, **233**, 796

## ADP-ribosylation

endogenous, G<sub>ai</sub> protein in ciliary body, stimulation by NO (bovine), **235**, 482

G actin, effect of NO (HL-60 cells), **232**, 827

## ADP-ribosyl cyclase

distinct types in cardiac muscle: PKC regulation of sarcoplasmic reticulum form (dog, rat), **234**, 252

stimulation by retinoic acid and triiodothyronine in VSMC (rat), **238**, 847

## Adrenal chromaffin cells

internalization of short-chain isoprenyl diphosphates (bovine), **238**, 7

## Adrenal gland

D-aspartic acid localization (postnatal rat), **235**, 433

corticosteroid secretion, regulation by Substance P, cellular mechanism (newt), **233**, 395

differential expression of HSP70-1 gene in cortex and medulla of thermally stressed rat, **233**, 550

expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279

leptin receptor mRNA splice variants, localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383

norepinephrine biosynthesis and turnover in medulla, modification by atrial natriuretic factor (rat), **238**, 343

 $\alpha$ <sub>2</sub>-Adrenergic receptor

and dopamine D<sub>2</sub> receptor and  $\beta$ <sub>2</sub>-adrenoceptor, coexpression in *Xenopus* oocytes for ligand identification, **233**, 853

subtype  $\alpha$ <sub>2</sub>-C2, specific recognition with monoclonal antibodies against third intracellular loop (human), **233**, 166

subtype  $\alpha$ <sub>2</sub>-C10, expression in preadipocytes and adipocytes (human), **235**, 765

 $\beta$ <sub>2</sub>-Adrenergic receptor

and dopamine D<sub>2</sub> receptor and  $\alpha$ <sub>2</sub>-adrenoceptor, coexpression in *Xenopus* oocytes for ligand identification, **233**, 853

 $\beta$ <sub>1</sub>-Adrenergic receptor

genetic variation, association with coronary heart disease among Japanese, **232**, 728

 $\beta$ -Adrenergic-receptor kinase

interaction with amino terminus of G protein  $\beta$  subunit, **240**, 425

 $\beta$ -Adrenergic-receptor kinase I

phosphorylation activity, role of Asp278 (human), **239**, 548

## Adrenocortical carcinoma

*IGF2* polymorphic region in, splicing (human), **239**, 878

## Adrenocortical cells

transformed by c-Ha-ras<sup>61</sup> oncogene, overproduced Ras p21 in, transfer of geranylgeranyl and farnesyl moieties to, analysis (rat), **231**, 789

## Adrenocorticotrophic hormone

release in pituitary tumor cells, effects of divalent cations and calcimimetic ( $\pm$ )NPS 568, **238**, 866

secretion, inhibition by glucocorticoids, mechanism (rat), **235**, 295

## Adrenocorticotropin hormone receptor

gene structure and promoter characterization (human), **230**, 7

## Adrenodoxin reductase

from spinach leaves, reduction of nitrobenzene, **241**, 794

## Adrenoleukodystrophy protein

deficiency, associated abnormal metabolism of very-long-chain fatty acids (mouse), **232**, 631

- Adrenoleukodystrophy-related protein  
cDNA cloning and mRNA expression (human), **239**, 261
- Adrenomedullin  
effect on cAMP accumulation and atrial natriuretic peptide gene expression in cardiomyocytes (rat), **230**, 311
- Adrenomedullin receptor  
rat, homologous human receptor gene with high expression in heart and immune system, molecular cloning, **240**, 183
- $\gamma$ -Aduccin  
gene polymorphism in genetic hypertension and mapping to rat chromosome 1q55, **237**, 685
- Advanced glycation end products  
carboxymethyllysine and pentosidine, immunohistochemical localization in lipofuscin pigments of Alzheimer's disease and aged neurons, **236**, 327  
effect on glycoprotein alterations in retinal microvascular cells (bovine), **235**, 281  
formation of vesperlysines A, B, and C as crosslinked products in Maillard reaction of lysine or proteins with glucose, **232**, 227  
generation of active oxygen species under UV A irradiation, **235**, 306  
increased formation, and inhibition by aminoguanidine, in diabetic rat lens, **241**, 352  
induction of VEGF expression by retinal Müller cells (human), **236**, 712  
receptor for, gene expression in type II alveolar epithelial cells (rat), **238**, 512  
stimulation of MAP kinase and proliferation in VSMC (rabbit), **239**, 111
- Affinity chromatography  
phosphopeptide, for identification of signaling components in tyrosine kinase cascades, **234**, 748
- Affinity labeling  
avian ecto-ATPases, **238**, 728
- Affinity separation  
magnetic microbead-based, and fluorescence detection, *in vitro* selection of DNA ligands to chloroaromatics using, **234**, 117
- Agarose beads  
asialofetuin-coupled, mouse sperm binding to, **238**, 95
- AGEs, *see* Advanced glycation end products
- Aging  
and Alzheimer's disease, lipofuscin pigments of affected neurons, immunohistochemical localization of pentosidine and carboxymethyllysine in, **236**, 327  
associated mtDNA deletions in different species and tissues, comparison (human, rat), **230**, 630  
crystalline lens, associated cleavage of amino acid residues from N-terminal region of  $\alpha$ A- and  $\alpha$ B-crystallins (human), **231**, 373  
effects on  
autoregulation of 112-kDa estrogen receptor expression (mouse), **231**, 683  
GLUT4 expression in skeletal muscle and adipose tissue (rat), **235**, 89  
linoleic acid metabolism in cultured adult cardiomyocytes (rat), **237**, 142  
mitochondrial DNA fragmentation into minicircles (human heart), **226**, 369; *erratum*, **232**, 832  
mitochondria in lymphocytes: enhanced activation of permeability transition (mouse), **240**, 68  
skeletal muscle, effect on L-type  $\text{Ca}^{2+}$  channel receptor modulation in response to insulin-like growth factor-1 receptor (rat), **235**, 784
- Agouti-related protein  
expression and identification as antagonist of human MC-3 and MC-4 receptors (COS-7 cells), **237**, 629
- AIDS, *see* Acquired immune deficiency syndrome
- Air pollutants  
particulate, exposure of human and rat alveolar macrophages, differential oxidative response to, **240**, 669
- Alanine transaminase  
elevated levels in posttransfusion hepatitis of unknown etiology, isolation of DNA virus associated with, **241**, 92
- N*- $\beta$ -Alanyl-5-S-glutathionyl-dopa  
inhibition of protein-tyrosine kinase, **237**, 423
- Albumin  
glycated, stimulation of fibronectin and collagen IV production by glomerular endothelial cells under normoglycemic conditions (rat), **239**, 91  
glycosylated fragments, identification as glycoproteins in colloids of senescent pituitary glands (pig), **234**, 712
- Alcaligenes faecalis*  
maleate *cis-trans* isomerase gene cloning and characterization, **239**, 74
- Alcohol dehydrogenase  
active center, model, FT-IR study, **231**, 473
- Aldehyde dehydrogenase  
activity and nucleotide binding, role of conserved Gly229 and Gly234 (*Vibrio harveyi*), **238**, 448  
constitutively expressed in hepatic cytosol, cDNA cloning (rat), **236**, 527  
microsomal, mRNA, extrahepatic expression in *chlch* and *14CoS/14CoS* mice, **233**, 631
- Aldehydic compounds  
lipid peroxidation products, cellular response: GST-P induction by 4-hydroxy-2-nonenal (rat), **236**, 505
- Aldolase A  
gene encoding, identification as target for TR2 orphan receptor (human), **235**, 205
- Aldose B  
sequence requirement for replication initiation, functional correlation with transcriptional regulation (rat hepatoma cells), **237**, 707
- Aldosterone  
secretion by adrenal gland, regulation by Substance P, cellular mechanism (newt), **233**, 395
- Alginate  
bovine chondrocytes cultured in, collagen synthesis, inhibition by deoxycycline, **237**, 107
- Alginate-poly(L)lysine-alginate membrane  
SK2 hybridoma cells microencapsulated with, immunological studies after allogeneic transplantation (rabbit), **230**, 524
- Alkaline phosphatase  
in isolation of intraepithelial lymphocytes from small intestine villi tip and crypt regions (mouse), **241**, 797
- Alkylation  
DNA, activity of Hoechst 33258 analogs for, **231**, 94
- Alkylperoxyl radicals  
plasmid DNA damaged by, formation of C'-oxidized abasic sites in, **237**, 1
- Allergens  
Bet v 4, molecular characterization, expression in *Escherichia coli*, and epitope analysis (birch pollen), **239**, 197  
Der p1, induction of NF- $\kappa$ B activation via interference with I $\kappa$ B $\alpha$  function in asthmatic bronchial epithelial cells (human), **236**, 522
- 2-(Allylthio)pyrazine  
inhibition of iNOS expression and endothelial NO formation, role in protective effect in murine model of endotoxemia, **239**, 310
- Alternative splicing  
dystrophin gene 5' region in skeletal muscle: analysis of transcripts (human), **239**, 895  
GTP cyclohydrolase I RNA in dopa-responsive dystonia (human), **234**, 316  
Na<sup>+</sup>/Ca<sup>2+</sup> exchanger in guinea pig cochlea, **233**, 737  
*Pax6* in bovine eye, and evolutionary conservation of intron sequences, **240**, 196  
placenta growth factor RNA generated by, identification and characterization (human), **235**, 493  
primary Fas transcript generating soluble Fas antagonists, suppression in failing ventricular myocardium (human), **239**, 794  
prion protein exon 1, tissue-specific (bovine), **233**, 650  
steroid receptor coactivator-1: SRC-1E as major isoform mediating thyroid hormone action, **236**, 83

## Subject Index

*Alteromonas*

melanogenic marine sp., characterization of pluripotent polyphenol oxidase with tyrosinase and laccase activities. **240**, 787

## Aluminum

Al<sup>3+</sup>, voltage-dependent effects on channel activities in hippocampal neurons (rabbit, rat). **232**, 84

## Aluminum tolerance

protein with activity of, *ALU1-P* gene encoding, isolation (*Arthrobacter viscosus*). **239**, 835

## Alveolar structures

mammary gland, development in whole-organ culture, effect of estrogen (mouse). **232**, 340

## Alzheimer's disease

amyloid  $\beta$  peptide fragment 25–35, effects on membrane lipid peroxidation. **233**, 760

amyloid precursor protein, processing during H<sub>2</sub>O<sub>2</sub>-induced apoptosis in neuronal cells (human). **235**, 845

brain supernatants, detection of apolipoprotein E/dimeric soluble amyloid  $\beta$  complexes. **240**, 715

differential role of synaptic vesicle and presynaptic plasma membrane proteins. **236**, 239

mitochondrial DNA mutations in. **241**, 221

NACP protein associated with, differential regulation during megakaryocyte differentiation (hamster, human). **237**, 611

neurons, and aged neurons, lipofuscin pigments of, immunohistochemical localization of pentosidine and carboxymethyllysine. **236**, 327

and other neurodegenerative diseases with distinct tau-related pathology, cerebrospinal fluid tau levels. **236**, 262

p53 changes in brain. **232**, 418

presenilins 1 and 2 associated with, amyloid fibril formation of mutant peptides. **235**, 249

sporadic, plasma glutamyl aminopeptidase reduction. **231**, 526

## Amadori product

N<sup>ε</sup>-(carboxymethyl)lysine formation from, mediation by hydroxyl radical. **234**, 167

## Amidine

cationic lipid for delivery of plasmid DNA into mammalian cells. **236**, 126

## Amiloride

and clonidine and gabexate mesylate, competitive inhibition of swine kidney copper amine oxidase. **240**, 150

human nasal epithelium sodium channels sensitive to, variation from classical epithelial Na<sup>+</sup> channels. **237**, 488

inhibition of melibiose transporter in *Escherichia coli*. **233**, 147

## Amination

reductive, chloroplast fructose-1,6-bisphosphatase, cysteine residues involved in, characterization (rapeseed). **232**, 388

## Amine oxidase (copper-containing)

swine kidney, competitive inhibition by amiloride, clonidine, and gabexate mesylate. **240**, 150

## Amino acid repeats

hemopexin-like, in human vitronectin, recognition by *Streptococcus pyogenes*. **234**, 445

## Amino acids

aromatic residues in adipokinetic hormone–red pigment-concentrating hormone in corpus cardiacum (beetle). **230**, 16

availability, regulation of mRNA levels of bovine renal G protein-coupled receptor. **238**, 107

cleavage from N-terminal region of  $\alpha$ A- and  $\alpha$ B-crystallins in crystallin lens during aging (human). **231**, 373

intrinsic factor residues 25–44, as location of receptor binding site (rat). **231**, 348

## D-Amino acids

peptide with, isolation from heart, structural determination, and bioactivity (*Aplysia kurodai*). **240**, 354

## Amino acid sequence

acyl-CoA thioesterase III acting as Nef-binding protein (human). **238**, 234

1-acyl-*sn*-glycerol-3-phosphate acyltransferase (mouse). **237**, 663

adhalin (mouse). **235**, 227

adipokinetic hormone (*Melanoplus sanguinipes*). **239**, 763

adrenomedullin receptor homologue (human). **240**, 183

aldehyde dehydrogenase from hepatic cytosol (rat). **236**, 527

amphiphysin II isoforms (human). **236**, 178

aquaporin 8 (rat testis). **237**, 714

aquaporin 9 with glycerol permeability (human adipose tissue). **241**, 53

aquaporin with permeability to water and urea (mouse). **240**, 324

aspartate aminotransferase (*Thermus aquaticus* YT1). **239**, 810

b1p RING finger protein (rat brain). **240**, 8

birch pollen Bet v 4 allergen. **239**, 197

Ca<sup>2+</sup>/calmodulin-dependent protein kinase II  $\gamma_E$  isoform (human pancreatic islets). **236**, 473

calcium-binding protein associated with calcareous corpuscles (*Echinococcus granulosus*). **237**, 451

calcium-modulated rod outer segment membrane guanylate cyclase (bovine). **234**, 666

calpain htra-3, homology with *Caenorhabditis elegans* tra-3 (human). **239**, 845

carbonyl reductase, inducible and noninducible enzymes (rat). **230**, 518

CBF-A, CAR box-binding protein, (mouse muscle cell). **237**, 617

CCK-A receptor (mouse). **236**, 630

CDEP protein with ezrin-like and Dbl homology domains (human). **241**, 369

CDP-D-glucose 4,6-dehydratase (*Azotobacter vinelandii*). **240**, 153

chaperonin  $\alpha$  and  $\beta$  subunits (*Sulfolobus* sp. strain 7). **236**, 727

chemoattractant-like receptor CMKRL3 (rat). **241**, 390

chitin synthase with myosin motor-like domain (*Aspergillus nidulans*). **236**, 75

CIS family genes (human). **239**, 439

cortistatin-like peptide (human). **232**, 157

CREM sequences (dog). **237**, 74

$\gamma$ S-crystallins  $\gamma$ S1 and  $\gamma$ S2 (lip shark). **240**, 51

cyanovirin-N (*Nostoc ellipsosporum*). **238**, 223

*p*-cymene methyl hydroxylase (*Pseudomonas aureofaciens*). **233**, 502

cytochrome b<sub>s</sub>, soluble and membrane-bound forms (pig). **240**, 80

cytochrome b<sub>s</sub> (rat brain). **236**, 641

cytochrome P450 3A30 (*Fundulus heteroclitus*). **236**, 306

cytochrome P450 4C8 from termite *Mastotermes darwiniensis*. **241**, 579

cytochrome P450 4T1 (rainbow trout liver). **236**, 302

DEC1 bHLH protein expressed in differentiated embryo chondrocytes (human). **236**, 294

*dnaJ* homologue gene-encoded (*Synechococcus* sp. PCC7942). **236**, 461

DNA polymerase  $\alpha$  (*Leishmania donovani*). **234**, 95

Dpkn gene product, identification of putative kinase domain with high homology to protein kinase N (*Drosophila melanogaster*). **232**, 126

DVL-3 predicted sequence (human). **239**, 510

elongin regulatory subunits (*Drosophila melanogaster*, *Saccharomyces cerevisiae*). **241**, 334

ES1 photoreceptor-specific protein (zebrafish). **237**, 84

FEG-1 G protein-coupled receptor (human endothelial cells). **240**, 737

F<sub>1</sub>F<sub>0</sub>-ATPase major subunits (*Methanosarcina barkeri*). **241**, 427

*ftsZ* gene product (*Brevibacterium flavum*). **236**, 383

$\alpha$ -globin chains  $\alpha^A$  and  $\alpha^D$  (pigeon). **234**, 450

glucose-regulated zinc finger protein (human mesangial cells). **238**, 179

glutathione reductase gene exon 1, predicted sequence (mouse). **237**, 419

glycosylation-inhibiting factor subunit, N-terminal sequence (bovine, porcine brain). **237**, 46

## G protein-coupled receptors

bovine kidney. **238**, 107

GPR40–GPR43 (human). **239**, 543

## Subject Index

- with homology to neuropeptide and chemoattractant receptors expressed during bone development, **233**, 336
- Gu/RNA helicase II-binding protein (human), **234**, 335
- heat shock cognate protein HSC70 (*Pleurodeles waltl*), **238**, 159
- heat-stable serine protease inhibitor protein purified from ovaries of desert locust, N-terminal analysis, **238**, 357
- hemocyanin dioxygen-binding functional unit (*Rapana thomasiana*), **238**, 403
- hepatitis C virus genotype 5a coding region, **236**, 44
- hepatitis C virus hypervariable region 1 quasispecies, differences in immune complexed and non-complexed particles, **240**, 677
- hepatoma-derived growth factor (murine testis), **238**, 26
- HIF-1 $\alpha$  (rat), **240**, 552
- hippocampus abundant gene transcript 1 HiAT1 (mouse), **238**, 126
- histidyl-tRNA synthetase mutants (*Escherichia coli*), **237**, 192
- HMG-like protein Pf16 (*Plasmodium falciparum*), **234**, 101
- HRP-1 and -2 (murine testis), **238**, 26
- human homologue of mouse jerky gene product, **236**, 389
- hyaluronidase (human plasma), **236**, 10
- 2-hydroxymuconic semialdehyde dehydrogenase PhnG (*Pseudomonas* sp. DJ77), **240**, 41
- 2-hydroxy-pent-2,4-dienoate hydratase (*Pseudomonas* sp. DJ77), **238**, 56
- 25-hydroxyvitamin D<sub>3</sub> 1 $\alpha$ -hydroxylase (human), **239**, 527
- iodothyronine deiodinase, chicken type I, **241**, 459
- JNK2- $\alpha$ 1 from brain (chicken embryo), **234**, 489; *erratum*, **236**, 538
- leader peptidase I (*Azotobacter vinelandii*), **239**, 393
- lebocin 4 (*Bombix mori*), **238**, 769
- Limk2 (mouse), **241**, 243
- MAL proteolipid-related proteins, alignment, **232**, 618
- MAN2B2 mouse homologue of  $\alpha$ -D-mannosidase, **241**, 439
- mandibular organ inhibiting hormone (*Libinia emarginata*), **237**, 694
- monocarboxylate transporter MCT3 (chick retinal pigment epithelium), **234**, 90
- MUC3, novel 59-amino acid tandem repeat region (human), **238**, 143
- mucin homologue rMuc5AC (rat), **236**, 789
- Müllerian-inhibiting substance type II receptor, **237**, 741
- murine brain-specific serine protease mBSSP-3 with Kringle-like domain and scavenger receptor cysteine-rich motifs, **239**, 386
- NADH:ubiquinone oxidoreductase subunits (human), **241**, 589
- NAP4: ligand for SH3 domain of adaptor protein Nck, **239**, 488
- neuropeptide Y receptor subtype zYc cloned from zebrafish, **241**, 749
- [NiFe] hydrogenase, N-terminal sequence (*Desulfovibrio vulgaris*), **240**, 75
- norbin (rat brain), **240**, 766
- obtusifolios 14 $\alpha$ -demethylase (wheat), **230**, 381
- olfactory receptors expressed in male germ line (human), **237**, 283
- orphan G protein-coupled receptor GPR41 (rat lung), **234**, 190
- P2Y<sub>5</sub>-like receptor (human), **236**, 106
- peptidylglycine  $\alpha$ -hydroxylating monooxygenase (sea anemone), **241**, 509
- peroxisome proliferator receptor  $\gamma$ 2 isoform, partial sequence (human), **233**, 320
- phosphoinositide 3-kinase HsC2-PI3K (human), **233**, 537
- pH-sensitive human H<sup>+</sup>/peptide cotransporter regulatory factor, **237**, 577
- potassium channels KH1 and KH2 (human), **241**, 675
- P<sub>2X</sub> receptors, transmembrane and extracellular regions (rat), **236**, 670
- proopiomelanocortin-derived peptides from pituitary (rainbow trout), **238**, 653
- proteasomal subunit GPROS-28 (chicken), **234**, 216
- putative carboxylesterase in intestine (human), **233**, 117
- putative evolutionarily conserved membrane protein encoded by maternally expressed gene *Xen1* (*Xenopus laevis*), **238**, 899
- putative peroxisomal ABC-transporter PMP69 (human), **237**, 152
- Qip1 homologue of importin- $\alpha$  (human), **234**, 48
- qTBP42, telomeric and tetraplex DNA-binding protein (rat liver), **237**, 617
- reticulocalbin family protein binding crotoxin, partial sequence (guinea pig), **239**, 18
- retinal degeneration B gene deduced sequences (*Drosophila*, human, mouse), **236**, 559
- Rgs12 and Rgs14 (rat), **233**, 770
- RNase H1 (*Drosophila melanogaster*), **240**, 844
- RNB6 protein highly expressed in neonatal brain (rat), **237**, 307; *erratum*, **241**, 611
- Rtrp3 from rat, comparison with Htrp3, **240**, 167
- S(1-5) epidermal growth factor-like protein interacting with DA41 (rat), **237**, 245
- salt-tolerant protein (rat), **229**, 134; *erratum*, **240**, 244
- scavengase p20 (*Escherichia coli*), **233**, 848
- scavenger receptor class B type 1 (rat ovary), **234**, 499
- SH2-domain-containing protein related to phosphatidylinositol polyphosphate 5-phosphatase SHIP (human), **239**, 697
- sigma receptor type 1 (mouse), **241**, 535
- SNAP-23 (mouse adipocytes), **234**, 257
- SSI-2 and SSI-3 (human), **237**, 79
- steroid receptor coactivator-1 splicing variants, **236**, 83
- Sulfolobus solfataricus* trpE and trpG gene products expressed in *Escherichia coli*, **230**, 306
- TAFII<sub>11</sub> (rat PC12 cells), **234**, 230
- Tcof1 (mouse), **238**, 1
- Tetrahymena* 14-nm filament protein/citrate synthase expressed in *E. coli*, **237**, 205
- thyrotropin receptor from ovine brain, **238**, 173
- TT virus N22 clone, predicted sequence (human), **241**, 92
- VAF1: mouse homologue of ERC-55, **233**, 765
- V-ATPase subunit A (*Desulfurococcus*), **234**, 341
- vitamin D<sub>3</sub> 25-hydroxylase (porcine liver), **241**, 491
- ZF3 cDNA clone predicted sequence: zinc-finger structure in eIF-5 (maize), **236**, 510
- $\delta$ -(L- $\alpha$ -Aminoadipyl)-L-cysteinyl-D-valine synthetase, *see* ACV synthetase
- p-Aminobenzamidine
- competitive inhibition of nitric-oxide synthase (murine brain), **232**, 88
- $\gamma$ -Aminobutyric acid receptor
- alternatively spliced 8-amino-acid exon of  $\gamma$ 2 subunit gene for, polymorphisms and intron sequences flanking, **238**, 683
- GABA<sub>A</sub>, expression in neurons derived from teratocarcinoma cell line (human), **237**, 719
- inhibitory postsynaptic potentials mediated by, acute effects of 25-hydroxy-cholesterol (rat brain), **237**, 68
- 3-Amino-1,4-dimethyl-5H-pyrido[4,3-b]indole
- mutagenic, isolated from tryptophan pyrolysate, interaction with d(CGATCT)<sub>2</sub>; intercalation model based on NMR experiments, **240**, 803
- 2-Aminoethyl-methanethiosulfonate
- effect on fast inactivation in inactivation-defective human heart sodium channel: analysis of IFM-ICM mutation, **233**, 606
- Aminoguanidine
- inhibition of advanced glycation end product formation in diabetic rat, **241**, 352
- $\alpha$ -Amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid receptor currents, *see* AMPA receptor currents
- 1-(4-Amino-2-methyl-5-pyrimidinyl)methyl-3-(2-chloroethyl)-3-nitrosourea
- posttranscriptional regulation of MRP/GS-X pump and  $\gamma$ -glutamylcysteine synthetase expression in glioma cells (human), **239**, 51
- Aminoleptin
- type I collagen, cleavage in depolymerization by recombinant catalytic domain of collagenase-3 (mouse), **230**, 202
- Amlexanox
- binding of calcium-binding proteins in lung extract, comparison to cromolyn (bovine), **240**, 341
- AMPA receptor currents
- potentiation by serum factor via differential signal transduction pathways (*Xenopus* oocytes), **238**, 565

## Amphiphilic compounds

modulation of serine base exchange enzyme activity (rat), **241**, 73

## Amphiphysin

isoform, cDNA cloning and tissue-specific expression of multiple splice variants (human), **236**, 178

## Amphiregulin

mRNA, induction by gastrin in stomach (rat), **235**, 520

## Amplified restriction fragment length polymorphisms

based RNA fingerprinting, using single restriction enzyme recognizing 4-bp sequence, **234**, 516

## AMP-PNP

inhibition of ecto-ATPase in endothelial cells (bovine pulmonary artery), **233**, 442

*m*-AMSA, *see* Amsacrine

## Amsacrine

effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636

## Amylase

secretion from pancreatic acini, effect of sphingosine and ceramide (rat), **235**, 197

## Amyloid

 $\beta$  peptide

A $\beta$ (1-40), elevated levels, induction of CREB phosphorylation at Ser-133 via p44/42 MAP kinase-dependent pathway in PC12 cells, **232**, 637

A $\beta$ (25-35), effects on membrane lipid peroxidation, **233**, 760

A $\beta$  3-pyroglyutamyl peptide from vascular deposits, isolation, chemical characterization, and quantitation, **237**, 188

dimeric soluble, apoE complexes with, detection in Alzheimer's disease brain supernatants, **240**, 715

modulation of NO production in macrophages (human), **240**, 391

 $\beta$  precursor protein

amino-terminal region, role in neurite outgrowth in neocortical explant culture (rat), **236**, 59

direct binding in yeast cells to human presenilin, **239**, 480

exogenous, cells expressing, actin gene expression, **231**, 615

gene promoter constructs preferentially expressed in CNS and testis of transgenic mice, **240**, 759

processing during H<sub>2</sub>O<sub>2</sub>-induced apoptosis in neuronal cells (human), **235**, 845

 $\beta$  protein

generation in NG108-15 cells, suppression by prolyl endopeptidase inhibitor, **235**, 641

long-term elevation of Ca<sup>2+</sup> in astrocytes induced by, prevention by tetrapeptide antagonist (rat), **235**, 479

toxicity, role of RAGE protein (rat), **237**, 37

deposits in systemic amyloidosis, detection of oxidative stress (human), **232**, 497

## fibril formation

acetylcholinesterase-induced, inhibition by anti-AChE monoclonal antibody, **232**, 652

mutant 410 Cys→Tyr and 141 Asn→Ile peptides, in Alzheimer's disease-associated presenilins 1 and 2, **235**, 249

## Amyloidosis

dialysis-associated, protein constituents from, protection by  $\alpha_2$ -macroglobulin (human), **231**, 48

hemodialysis-associated, stromelysin-mediated pathology in, role of  $\beta_2$ -microglobulin:  $\beta_2$ -m induction of stromelysin production in synovial fibroblasts, **239**, 621

## Anandamide

reversible hydrolysis and synthesis by recombinant rat fatty-acid amide hydrolase, **237**, 512

## Anandamide amidohydrolase inhibitors

cerebral, neuronal, and basophilic types (rat), **231**, 82

## Anandamides

metabolism, effect of fatty acid sulfonyl fluorides (rat), **231**, 217

## Androgen receptor

expression in androgen-sensitive prostate cancer cell line LNCaP, stimulation by activin A (human), **234**, 362

nuclear-cytoplasmic distribution in androgen-responsive LNCaP cells, role of 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **235**, 539

## Androgen responsive element

in 5' far upstream flanking region of prostate-specific antigen gene (human), **231**, 784

## Anemia

Fanconi, complementation groups A and D, DNA repair defect, correction (human), **230**, 587

## Angiogenesis

in gastric ulcer healing, VEGF role (human), **234**, 493

promotion by interleukin-15 *in vivo* (mouse), **233**, 231

## Angiogenin

detection, quantitation, and localization by immunological assays (bovine), **232**, 323

human, binding to bovine endothelial cells, effect of interaction with copper, **236**, 604

nuclear translocation in cultured umbilical artery endothelial cells via microtubule- and lysosome-independent mechanisms (human), **238**, 305

## Angiostatin

recombinant murine, suppression of tumor growth, **236**, 651

## Angiotensin II

effects on oxidized LDL uptake by macrophages via proteoglycan-mediated pathway (mouse), **239**, 63

effects on renal and vascular endothelin-1 expression and functional endothelin-converting enzyme activity *in vivo* (rat), **238**, 861

mediated tyrosine phosphorylation and dephosphorylation of PLC- $\gamma$ 1, role of intracellular calcium (rat), **232**, 540

mediation of cell hypertrophy in vascular smooth muscle culture from hypertensive Ren-2 transgenic rat, mechanism, **240**, 367

stimulation of proliferation of osteoblast-rich populations of cells from rat calvariae, **230**, 176

upregulation of angiotensin receptor type 2 mRNA in rat cortical cells, **239**, 633

## Angiotensin IV

stimulation of anterior pituitary cell proliferation *in vitro* (rat), **232**, 292

Angiotensin-converting enzyme, *see* Peptidyl-dipeptidase A

## Angiotensinogen

antisense inhibition in hepatoma cell culture, enhancement by cationic liposome delivery, **232**, 794

deficient mouse, stretch-induced MAP kinase activation in cardiomyocytes, **235**, 36

promoter, hepatic activation, role of ATF-like element (human), **237**, 158

## Angiotensin II receptor

antagonist losartan, inhibition of LDL lipid peroxidation and atherosclerosis in apolipoprotein E-deficient mice, **236**, 622

G-protein coupled receptor homologous to, isolation from mouse and NH15-CA2 cells and expression during bone development (rat), **233**, 336

mRNA, upregulation by angiotensin II in rat cortical cells, **239**, 633

## 8-Anilino-1-naphthalenesulfonate

stimulation of hemolytic activity of cytolysins (sea anemone), **232**, 422

## Animal models

vitamin Q<sub>10</sub> activities, **234**, 296

## Anisomycin

induction of IL-6 gene expression and activation of NF- $\kappa$ B (human), **233**, 507

## Annexins

I, II, V, and VI, presence and Ca<sup>2+</sup> transport activity in large unilamellar vesicles, **237**, 499

- V, conformational adaptation upon binding to liposomes, **234**, 111; *erratum*, **237**, 202
- V, localization in adult and neonatal heart (pig, rat), **238**, 622
- Announcements
- International Young Scientist Program at 17th International Congress of Biochemistry and Molecular Biology, Monterey, California, and San Francisco, California, August 1997, **232**, 266, 584, 833; **233**, 294, 577, 863; **234**, 288, 537
- Symposium on Drug Metabolism: Towards the Next Millennium, London, United Kingdom, August 1997, **235**, 443, 860; **236**, 229, 539, 834
- Anoxia-reoxygenation
- induced cell lysis and loss of respiration and ion transport, effects of cryoprotectants (rabbit), **234**, 275
- AnpI protein
- glycosylation in Golgi apparatus, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682
- Antazoline
- effect on Arg-induced glucagon secretion from isolated islets (rat), **236**, 162
- Antenatal Bartter syndrome
- ROMK gene mutations, association with impaired K<sup>+</sup> channel function (human), **230**, 641
- Anthrakin
- downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328
- Antibacterial peptides
- detection on laid egg chorion of Medfly *Ceratitis capitata*, **240**, 657
- Antibacterials
- insect, 5-S-GAD, inhibition of protein-tyrosine kinase, **237**, 423
- Antibiotics
- antitumor, synthesis, implications of coformycin N-3 sugar moiety role in tight-binding interaction with adenosine deaminase, **236**, 88
- diffusion pathways in outer membrane of *Pseudomonas aeruginosa*, **238**, 457
- EF-Tu-targeted, resistance profile of elongation factor Tu1 (*Planobispora rosea*), **230**, 320
- extrusion, in *Pseudomonas aeruginosa*, role of *mex* operon-encoded proteins, **233**, 611
- Antibodies
- to advanced glycation end products, in analysis of AGE levels in streptozotocin-diabetic rat and effects of aminoguanidine treatment, **241**, 352
- anti-CD3, Jurkat T cell apoptosis induced by, mediation by membrane-anchored FasL, **238**, 670
- antipeptide, as probes of subunit-dependent structural changes in regulatory domain of phosphorylase kinase  $\gamma$ -subunit, **230**, 179
- anti-SS-A/Ro 60-kDa peptide Fab fragments from infiltrating salivary gland lymphocytes of Sjögren's syndrome patient, molecular cloning, **232**, 101
- to Ca<sup>2+</sup>, Mg<sup>2+</sup>-dependent endonuclease, detection of specific class of chromatin-bound endonuclease with, **236**, 423
- to dystrophin and utrophin/dystrophin related protein, concomitant use for reduction of misdiagnosis of Duchenne/Becker muscular dystrophy, **241**, 232
- to HIV-1 p17 protein, cross-reaction with human superoxide dismutase 2, **230**, 184
- to recombinant LECT2, in detection of LECT2 expression in human hepatocytes, **237**, 116
- scFv-421, targeted to p53, characterization, **230**, 242
- to sialyl Lewis X, in detection of sulfated sialyl Lewis X on endothelial cells of high endothelial venules (mouse), **230**, 546; *erratum*, **233**, 576
- Antigenicity
- synthetic *Toxoplasma gondii* SAG1 peptides for infected cell-specific CTL, correlation with peptide binding to HLA-A2, **236**, 257
- Antigens
- 56–58-kDa, transplant coronary artery disease-associated, molecular cloning and expression (human), **236**, 716
- 105-kDa sperm unique antigen, distribution on epididymal mature spermatozoa (goat), **231**, 662
- A33, posttranslational modifications (human), **236**, 682
- HLA-A2, binding of synthetic *Toxoplasma gondii* SAG1 peptides to, correlation with antigenicity for infected cell-specific CTL, **236**, 257
- Ku autoantigens, downregulation during cellular senescence (WI-38 cells), **238**, 712
- prostate-specific, *see* Prostate-specific antigen
- pupa-specific, on *Sarcophaga peregrina* hemocyte surface, monoclonal antibodies against, **236**, 497
- seminal vesicle autoantigens, genomic structure (mouse), **231**, 106
- sialyl Lewis A, mucin carrying, effect on E-selectin (human), **234**, 559
- sialyl Lewis X, expression on cell surface of untransfected COS cells, **237**, 400
- sialyl Lewis x and Lewis x, epitopes, distinct substrate specificities of human  $\alpha$ -1,3-fucosyltransferases for *in vivo* synthesis of, **237**, 131
- soluble protein, immunoadjuvancy of liposomes in induction of immune responses to, relationship to surface charge, **240**, 793
- SS-A/Ro, 60-kDa peptide from infiltrating salivary gland lymphocytes of Sjögren's syndrome patient, Fab fragments binding, molecular cloning, **232**, 101
- T, large, SV40, transcriptional activation of human c-myc gene, **235**, 153
- xenoantigen, downregulation by *N*-acetylglucosaminyltransferase III gene transfection (pig), **235**, 359; *erratum*, **238**, 686
- Antimoniales
- resistance, reversal in multidrug-resistant human KB carcinoma cells, **236**, 586
- Antimycin A
- and hypoxia, induced cellular injury and death, protective effects of depletion of ER calcium stores (rabbit kidney), **240**, 57
- Antioxidant enzymes
- mRNA, renal cortical expression in normal and diabetic rats, **235**, 598
- Antioxidant response elements
- role in nrf/small Maf heterodimer mediation of induction of phase II detoxifying enzyme genes, **236**, 313
- Antisense oligodeoxynucleotides
- K-ras-targeted, inhibition of anchorage-independent growth of *ras*-transformed cells on PolyHEMA surface (rat), **231**, 735
- Antisense oligonucleotides
- AP-1 gene-targeted, overexpression effects in *Tsc2* gene mutant rat model of renal carcinoma, **241**, 24
- conjugation to cationic liposomes, enhancement of antisense inhibition of angiotensinogen in hepatoma cell culture, **232**, 794
- discrimination between two muscular Na<sup>+</sup> channel isoforms (human), **234**, 235
- enhanced HIV-1 inhibition by DLS delivery system, **237**, 566
- in vivo* transfer efficiency into myocardium with HVJ-liposome method, **231**, 540
- Antisense pentadecadeoxynucleotides
- targeted against c-myc mRNA, inhibition of telomerase in human leukemic cell lines, **241**, 775
- Antisense phosphorothioate oligonucleotides
- liposomally endocapsulated, inhibition of influenza virus RNA polymerase and nucleoprotein genes in clone 76 cells, **232**, 545
- Antiserum
- IL-13, generation (rat), **235**, 529
- Antituberculosis drugs
- high-throughput screening, recombinant *Mycobacterium aurum* expressing *E. coli*  $\beta$ -galactosidase in, **240**, 536
- Antiviral drugs
- anti-hepatitis B virus, efficacy in HBV transgenic mouse, monitoring by semi-quantitative PCR of serum viral DNA, **241**, 43
- Antizyme
- region necessary for negative regulation of polyamine transport, identification, **238**, 415

## Aorta

extracellular signal-regulated kinase and c-Jun NH<sub>2</sub>-terminal kinase activities *in vivo* in hypertensive rat, **236**, 199

## AP-1

*cis*-acting element, role in transcriptional regulation of  $\Delta^9$ -desaturase gene (*Histoplasma capsulatum*), **230**, 457

c-Jun/AP-1, mediation of oxidant-initiated apoptosis in glomerular mesangial cells (rat), **240**, 496

enhancement of gene expression, dependence on orientation of AP-1 element (LLC-PK1 cells), **238**, 285

glucocorticoid receptor-mediated repressive function toward, alleviation by Bcl-2, **233**, 781

mRNA and protein expression during renal carcinogenesis and effects of overexpression of antisense oligonucleotides (Eker rat), **241**, 24

and NF- $\kappa$ B, LPS-induced interleukin-8 gene expression mediated by, redox regulation in astrocytoma U373 cells (human), **232**, 568

## AP-2

interaction with synaptotagmin, regulation by inositol high polyphosphates, **240**, 128

## Apamin

Ca<sup>2+</sup>-dependent K<sup>+</sup> current sensitive to, and hyperpolarization, in human endothelial cells, **236**, 340

## APEASPFIRFamide peptide

structure and myoactivity (*Caenorhabditis elegans*), **231**, 591

## APG-1

developmentally regulated expression in male germ cells (mouse), **233**, 113

## Aphidicolin

effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636

## Apoaequorin

as bioluminescent reporter protein using coelenterazine analogues as substrates, **233**, 349

## APOBEC-1

plasma lipid levels in mice lacking, effects of apo E deficiency, **236**, 375

## Apolipoprotein A-I

disulfide-linked dimer, activation of lecithin cholesterol acyltransferase, **232**, 345

human, rabbits transgenic for, impaired endothelial derived vasorelaxation in, **241**, 205

oligomeric, levels in HDLs from hypercholesterolemic chickens, **239**, 570

promoter, transactivation in HEPG2 cells by NFY transcription factor (human), **231**, 140

## Apolipoprotein B

secretion by McA-RH7777 rat hepatoma cells, effect of suppression of protein-tyrosine-phosphatase LAR, **237**, 367

## Apolipoprotein E

complexes with dimeric soluble amyloid  $\beta$ , detection in Alzheimer's disease brain supernatants, **240**, 715

## deficiency

effect on plasma lipid levels in mice lacking APOBEC-1, **236**, 375

related LDL lipid peroxidation and atherosclerosis, inhibition by losartan (mouse), **236**, 622

modulation of NO production in macrophages (human), **240**, 391

## Apoptosis

in absence of poly(ADP-ribose) polymerase (mouse), **233**, 518

adenovirus E1A-induced, induction of ubiquitin conjugating enzyme for topoisomerase II $\alpha$  degradation during, analysis (MA1 cells), **239**, 823

androgen-responsive LNCaP cells, by 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **235**, 539

in brains of Alzheimer's disease patients, role of p53, **232**, 418

cells undergoing, interaction with phagocytes, associated production of pro-inflammatory cytokines (mouse), **239**, 799

c-Myc-induced, CHO cells, role of tissue transglutaminase induction or activation of preexisting enzyme, **236**, 280

dexamethasone-induced, lymphoblastoid cells, effect of rapamycin (mouse), **230**, 386

differential migration of acylphosphatase isozymes from cytoplasm to nucleus in, analysis in K562 and Jurkat cells, **231**, 717

doxorubicin-induced, cytotoxic mechanism, effect of concentration, **230**, 254

embryos (sea urchin), **240**, 359

endothelial cells, signal transduction in, role of integrin  $\beta$ 4 (human umbilical vein), **233**, 182

## Fas-mediated

effects on receptor tyrosine kinase signal transduction in breast epithelial cells, **230**, 89

inhibition by osmotic cell shrinkage (Jurkat T cells), **236**, 517

in mtDNA-depleted HeLa cells, blockage by Bcl-2, **237**, 659

5-fluorouracil/interferon- $\gamma$ -induced, mechanisms (COLO 201 cells), **240**, 376

gastric epithelial cells, induction by *Helicobacter pylori* accompanied by increased Bak expression, **239**, 626

geranylgeranoic acid-induced, mitochondrial membrane potential loss (human), **230**, 58

## glomerular mesangial cells

oxidant-initiated, role of c-Jun/AP-1 and NF- $\kappa$ B (rat), **240**, 496

role of RGD-containing peptides in adult kidney (human), **234**, 594

heat-induced, restriction by Bcl-x<sub>L</sub> overexpression in FL5.12 cells, **241**, 164

hepatocytes in primary culture, Fas/Apo-1(CD95)-induced, inhibition by cAMP (rat), **232**, 20

## HL-60 cells

induction by 5-O-( $\beta$ -glucopyranosyl)-2-nitrobenzyl-caged L-leucyl-L-leucine methyl ester, **233**, 211

induction by retinoid X receptor  $\alpha$ , role of Bcl-2 pathway (human), **230**, 251

infected with agent of human granulocytic ehrlichiosis, **232**, 298

HL-60 and U-937 cells, induced by adenosine A<sub>3</sub> receptor antagonists, protective effect of A<sub>3</sub> agonists, **232**, 317

## hydrogen peroxide-induced

neuronal cells, processing of Alzheimer's amyloid precursor protein during, analysis (human), **235**, 845

T98G cells, suppressive role of p125FAK protein-tyrosine kinase, **241**, 769

induced TAFII<sub>31</sub> gene expression in differentiated PC12 cells deprived of NGF, **234**, 230

induction, and abrogation of tumorigenesis *in vivo*, by class of synthetic peptides (mouse), **240**, 208

induction by HGF in transformed rat liver epithelial cells, **236**, 396

induction by insulin-like growth factor binding protein-3 in breast cancer cells, **237**, 690; *erratum*, **240**, 246

## inhibition by

Bcl-2, mechanism: alleviation of trans-repressive function of glucocorticoid receptor and inhibition of activation of CPP32-like cysteine proteases, **233**, 781

cytotoxic necrotizing factor 1 in epithelial cells, relationship to promotion of phagocytosis, **241**, 341

17 $\beta$ -estradiol in endothelial cells (bovine, human), **237**, 372

IFN- $\gamma$ , and IFN- $\gamma$  upregulation of anti-apoptotic genes, in IL-3-dependent hematopoietic cells, **239**, 401

lamin proteolysis during, two proteases involved in, characteristics and localization, **233**, 96

leukemia U937 cells, caspase-3-like activity during, effect of geranylgeraniol (human), **234**, 641

leukemic cells, lactoferricin-induced, role of reactive O<sub>2</sub> species (human), **237**, 624

myoblastic C2C12 cells, induction by 2-chloroadenosine via alteration of actin cytoskeleton, **238**, 361

myofibroblastic cells isolated from rat palatal mucosa, induction by basic fibroblast growth factor, **240**, 21

## Subject Index

- and necrosis: breakthroughs and views, **236**, 1
- nerve growth factor withdrawal-induced, role in CPP32 activation in embryo (mouse), **231**, 770; *erratum*, **237**, 202
- neuronal cells
- hydrogen peroxide-induced, processing of Alzheimer's amyloid precursor protein during, analysis (human), **235**, 845
  - in Parkinson's disease, role of mtDNA, **235**, 158
  - tamoxifen-induced, stimulation by estrogens *in vitro*, nongenomic mechanism (GT1-7 cells), **240**, 464
- and p53-independent growth inhibition, 2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone-induced in tumor cells: synergism with genistein, **239**, 467
- p53-mediated, telomerase activity in immortalized endothelial cells undergoing, analysis (human), **241**, 642
- peroxynitrite-induced, in HL-60 cells, role of reactive oxygen species, **230**, 115
- radiation-induced, promotion by GML overexpression, **241**, 481
- regulation, role of calcium, **239**, 357
- related genes, expression by human neutrophils, **233**, 700
- relationship to tau phosphorylation and cytoarchitecture, analysis in NGF-deprived PC12 cells, **240**, 687
- replication factor C large subunit cleavage in, mediation by CPP32-like protease, **233**, 343
- role in cisplatin-resistant L1210 cellular response to drug treatment (mouse), **234**, 573
- role in terminal differentiation of keratinocytes (human), **238**, 886
- role of cellular proteolytic machinery, review, **230**, 481
- T cells
- induced by ionizing radiation and dexamethasone, mediation by *c-fos* proto-oncogene (mouse), **241**, 519
  - Jurkat, requirement of cell-cell contact for induction of, analysis, **238**, 670
  - and telophase arrest, blocking mitosis exit, induction by staurosporine in human Chang liver cells, **236**, 594
  - transforming growth factor- $\beta$ -induced, attenuation in hepatocytes by calpain inhibitors (rat), **231**, 457
  - tumor necrosis factor-mediated, role in cytotoxicity of cytokines to colon carcinoma cells (mouse), **233**, 270
  - UVB-induced, in SV40-transformed human keratinocytes, role of CPP32 and interleukin-1 $\beta$ -converting enzyme, **236**, 194
  - vascular endothelial cells, role of hemodynamic forces, **231**, 586
- Apoptosis-inducing factor
- vascular, purification from hemorrhagic snake venom, **235**, 59
- Apoptosis signal-regulating kinase 1
- molecular cloning and characterization (mouse), **239**, 905
- Aqualysin I
- carboxy-terminal pro-sequence, effect on folding of protease domain on secretion by yeast, **231**, 535
- Aquaporins
- AQP1, water channel activity, regulation by arginine vasopressin and atrial natriuretic peptide (*Xenopus laevis*), **238**, 392
  - AQP2, gene transcription, regulation by GATA-3 (rat), **232**, 65
  - AQP8
    - testis-expressed, cloning and functional expression (rat), **237**, 714
    - urea- and water-permeable, expressed in colon, placenta, liver, and heart, cloning (mouse), **240**, 324  - AQP9, with glycerol permeability, molecular cloning from adipose tissue and expression (human), **241**, 53
  - homologs, immunolocalization in lacrimal glands (mouse), **238**, 891
- Arachidonate
- peroxisomal  $\beta$ -oxidation, metabolites produced during, movement to microsomes for conversion into linoleate (rat), **233**, 438
- Arachidonate 12-lipoxygenase
- pineal gland, diurnal change (rat), **238**, 229
- Arachidonic acid
- and leukotriene B<sub>4</sub>, regulation of intracellular calcium release channel function, **237**, 413
  - mobilization of intracellular calcium independent of IP<sub>3</sub> generation and via insertion at plasma membrane (Ehrlich ascites tumor cells), **241**, 312
  - stimulation of prostate cancer cell growth, role of 5-lipoxygenase (human), **235**, 418
- Arachidonic acid hydroperoxide
- as inhibitor of neuronal Na<sup>+</sup>/K<sup>+</sup>-ATPase, **235**, 374
- 2-Arachidonoylglycerol
- inhibition of depolarization-induced increase in intracellular free calcium in neuroblastoma×glioma hybrid NG108-15 cells, **233**, 207
- Arachidonyl ethanolamide
- activation of parvocellular part of hypothalamic paraventricular nucleus, **237**, 724
- Arginase II
- chromosomal gene localization and tissue mRNA distribution (human), **233**, 487
- Arginine
- citrulline-argininosuccinate-arginine cycle, coupling to Ca<sup>2+</sup>-signaling in pancreatic  $\beta$ -cells (rat), **235**, 619
  - human melanocortin 5 receptor Arg-272, role in low affinity for  $\alpha$ -MSH, **236**, 489
  - induced glucagon secretion from isolated rat islets, effects of insulin secretagogues with imidazoline structure, **236**, 162
  - invariant Arg<sup>91</sup> in cytochrome C, role in rupture of liposomes, **238**, 140
  - nonenzymatic generation of nitric oxide by reaction with hydrogen peroxide, **233**, 150
  - vascular effects (porcine endothelial cells), **234**, 35
- Arginine vasopressin
- mRNA, identification in aortic smooth muscle cells (rat), **231**, 831
  - regulation of aquaporin 1 water channel activity (*Xenopus laevis*), **238**, 392
- Argininosuccinate
- citrulline-argininosuccinate-arginine cycle, coupling to Ca<sup>2+</sup>-signaling in pancreatic  $\beta$ -cells (rat), **235**, 619
- Arrestin
- mammalian, related protein, immunodetection in *Euglena gracilis*, **233**, 601
- Arsenicals
- resistance, reversal in multidrug-resistant human KB carcinoma cells, **236**, 586
- Arsenite
- activation of p70S6 kinase in adult rat cardiomyocytes: roles for PI 3-kinase and p38 MAP kinase, **238**, 207
- ART, *see* Agouti-related protein
- Arterial pressure
- systemic, reduction by [tyr<sup>1</sup>]-nociceptin by naloxone-insensitive mechanism (rat), **234**, 309
- Arteries
- injury, effect of ACE inhibitors (rabbit), **231**, 577
- Arthrobacter viscosus*
- ALU1-P* gene encoding protein with aluminum tolerance activity, isolation, **239**, 835
- Aryldialkylphosphatase
- plasma, inhibition by cigarette smoke extract by modification of enzyme's free thiols (human), **236**, 289
- Arylesterase
- activity of thioesterase I (*Escherichia coli*), **231**, 452
- Aryl hydrocarbon receptor
- and cell cycle-regulating genes, mRNA expression, coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
  - mediated induction of *Cyp1a-1* gene expression in mouse hepatoma Hepa-1c1c7 cells, effects of myristicin, **233**, 619
- Ascites hepatoma cells
- MAPK phosphatase 1 and 2 genes, characteristic expression (rat), **239**, 746

## Subject Index

- Ascorbate stabilization  
stimulation in  $\rho^0$ HL-60 cells by CoQ<sub>10</sub> increase at plasma membrane, **234**, 79
- Ascorbic acid  
inhibition of adenylate kinase (rabbit muscle), **233**, 386  
role in energy-dependent release of insulin from pancreatic cells (guinea pig), **231**, 820  
as stimulatory cofactor for mitochondrial glycerol-3-phosphate dehydrogenase (guinea pig, rat), **239**, 457
- L-Ascorbic acid  
DNA damaged by, effect of mitochondrial endonuclease G (bovine), **235**, 291
- Asialofetuin  
coupled beads, mouse sperm binding to, **238**, 95
- Aspartase, *see* Aspartate ammonia-lyase
- D-Aspartate  
immunohistochemical localization in pineal gland (rat), **231**, 505
- Aspartate aminotransferase  
cloning and sequencing (*Thermus aquaticus* YT1), **239**, 810
- Aspartate ammonia-lyase  
activity enhancement by gene truncation (*Escherichia coli*), **238**, 411
- Aspartic acid  
Asp151 in  $\alpha$ A-crystallin from aged lens, inversion induced by conformation formed by domain after Ala155 (human), **239**, 918  
Asp196 in first extracellular loop of VIP1 receptor, role in VIP binding and VIP-stimulated cAMP production (human), **230**, 289  
Asp278 of human  $\beta$ -adrenergic-receptor kinase 1, role in phosphorylation activity, **239**, 548
- D-Aspartic acid  
localization during postnatal development of adrenal gland (rat), **235**, 433
- Aspergillus nidulans*  
expression of amino acid activating domains of ACV synthetase of *Penicillium chrysogenum*, **237**, 166  
gene encoding chitin synthase with myosin motor-like domain, isolation, **236**, 75  
precursor tRNA 3'-end processing nuclease, purification and characterization, **233**, 354
- Asthma  
bronchial epithelial cells from patients, der p1 induction of NF- $\kappa$ B activation via interference with I $\kappa$ B $\alpha$  function, **236**, 522  
eosinophils from patients treated with or without prednisolone, PAF-induced chemotaxis, **237**, 146  
eotaxin expression and eosinic inflammation (human), **236**, 299
- Astrocytes  
brain-derived neurotrophic factor and nerve growth factor synthesis in culture, upregulation by dopaminergic transmitters (mouse), **238**, 468  
cerebellar, MAP kinase activation by HIV-1 Tat protein (rat), **238**, 800  
cortical type I, interleukin-6 release, effect of somatostatin (rat), **235**, 242
- Astrocytoma cells, *see also* Glioblastoma cells  
1321N1, nucleotide-promoted second messenger signaling responses in cells expressing P2Y receptor (human), **235**, 717  
lack of mediation by 6H1 orphan receptor proposed for p2y5 receptor, **236**, 455
- U373  
lipopolysaccharide-induced interleukin-8 gene expression mediated by NF- $\kappa$ B and AP-1, redox regulation (human), **232**, 568  
motility, dynamic characterization (human), **232**, 267
- Astroglial cells  
hypoxic, release of NO and prostaglandin-E<sub>2</sub>, modulation by interleukin-1 $\beta$  (human), **238**, 916
- Astrogloma cells  
cell spreading, actin cytoskeleton, and Bcl-x<sub>L</sub> distribution, effects of adenosine A<sub>3</sub> receptor agonist (human), **241**, 297
- ATF/CRE site  
and GC box, in housekeeping Na,K-ATPase  $\alpha$ 1 subunit gene, synergism between, role in constitutive expression, **241**, 169
- ATF-like element  
role in hepatic activation of human angiotensinogen promoter, **237**, 158
- Atherogenesis  
role of oligomerization of apolipoprotein A-I in HDLs from hypercholesterolemia chickens, **239**, 570
- Atherosclerosis  
experimental, peroxynitrite formation in, nitrotyrosine bound to  $\beta$ -VLDL-apoproteins as biomarker of, evaluation (rabbit), **232**, 332  
and LDL lipid peroxidation, in apolipoprotein E-deficient mice, inhibition by losartan, **236**, 622
- Atopic dermatitis  
macrophage migration inhibitory factor role as essential immunoregulatory cytokine in, analysis (human), **240**, 173
- ATP  
autotaxin binding: identification of photoaffinity attachment sites, **236**, 449  
bacterial proteases dependent on, characterization, **241**, 613  
binding and hydrolysis, role in assembly and proteolytic activity of HsIVU protease in *Escherichia coli*, **238**, 581  
chiral discrimination by deoxycytidine kinase (mouse), **239**, 329  
effects on denaturation of F-actin, **236**, 798  
efflux from *Saccharomyces cerevisiae*  
effect of ATP-binding cassette–multidrug resistance proteins, **230**, 22  
role of Sac1p, **236**, 50  
extracellular, induction of  
cAMP-dependent differentiation of HL-60 cells, **232**, 626; *erratum*, **236**, 223  
nuclear and cytosolic Ca<sup>2+</sup> signaling in rat kidney inner medullary collecting duct cells, **234**, 224  
induction of conformational transition of DnaA protein (*Escherichia coli*), **232**, 130  
induction of nuclear accumulation of G-actin in isolated hepatocytes, **240**, 697  
inositol phosphate formation induced by, enhancement in chromaffin cells by neuropeptide Y (bovine), **239**, 287  
and oxytocin, electrophysiological responses in human sweat gland cell line monolayers, **234**, 30  
potassium channels sensitive to, in rat  
modulation by insulin in skeletal muscle fibers, **232**, 536  
subunit Kir6.1 localization in mitochondria, **241**, 693  
produced from (ADP-ribose)<sub>n</sub> catabolism, role in DNA repair, **236**, 265  
role in carnitine binding to plasma membranes, **231**, 249
- ATPase  
ATPase–GTPase, identification of nucleolar phosphoprotein p130 as, **230**, 370  
P-glycoprotein, modulation by C219, **230**, 398  
related activity of DNA helicase II, inhibition by chemotherapeutic agents (human), **236**, 636  
vacuolar-type hyperthermophilic, of *Desulfurococcus*, stabilizing residues and functional domains in, **234**, 341
- ATP-binding cassette–multidrug resistance protein  
effect on ATP efflux of *Saccharomyces cerevisiae*, **230**, 22
- ATP-gated ion channel  
P2X<sub>2</sub> receptor, molecular assembly of extracellular domain, **240**, 618
- ATP $\gamma$ S  
inhibition of ecto-ATPase in endothelial cells (bovine pulmonary artery), **233**, 442
- ATP synthase  
intramolecular rotation, dynamic and crystallographic studies on thermophilic F1, **240**, 247  
protonophoric activity in coupled submitochondrial particles from platelets (horse), **235**, 469
- Atrial natriuretic peptide  
gene expression in cardiomyocytes, effect of adrenomedullin (rat), **230**, 311  
local synthesis in intestine (eel), **238**, 817

- modification of biosynthesis and turnover of norepinephrine in adrenal medulla (rat), **238**, 343
- regulation of aquaporin 1 water channel activity (*Xenopus laevis*), **238**, 392
- Aurintricarboxylic acid
- stimulation of erbB4 tyrosine phosphorylation in neuroblastoma cells (human), **230**, 266
- Autoantigens
- Ku, downregulation during cellular senescence (WI-38 cells), **238**, 712
- seminal vesicle, genomic structure (mouse), **231**, 106
- Autocrine loop
- fibroblast growth factor 2, interference of dextran derivative CMDB7 with, role in inhibition of breast epithelial HBL100 cell proliferation, **239**, 424; *erratum*, **241**, 804
- Autocrine/paracrine regulation
- role in *in vitro* lipolytic effect of leptin in mouse adipocytes, **240**, 590
- Autocrine regulation
- growth in fetal and adult human fibroblasts, **237**, 348
- Autolysis
- protease Q stability against, **240**, 839
- Automated sequencing
- and RT-PCR, mutation detection in glycogen storage disease type II by, **241**, 414
- Auto-oxidation
- 1,2-dimethylhydrazine, induced proliferation of mouse fibroblasts: role of iron and free radicals, **234**, 44
- Autotaxin
- nucleotide binding: identification of photoaffinity attachment sites, **236**, 449
- Axis formation
- secondary axis induction by FK 506-binding protein homologue in *Xenopus* embryos and inhibition by coexisting BMP-4 signaling, **239**, 585
- Azotobacter vinelandii*
- lep* nucleotide sequence and genetic complementation, **239**, 393
- rfbG* gene encoding CDP-D-glucose 4,6-dehydratase, identification and mutational analysis, **240**, 153
- Azoxymethane
- induced formation of aberrant crypt foci in colon, effect of intestinal bacteria (rat), **238**, 753
- B**
- B7.3
- putative B-lymphocyte surface molecule, association with protein kinase activity, **228**, 489; *erratum*, **231**, 868
- Bacillus* sp. AR9
- mesophilic, thermostable D-hydantoinase isolated from, **234**, 485; *erratum*, **237**, 759
- Bacillus subtilis*
- multidrug transporter Bmr, broad ligand specificity of transcriptional regulator for, analysis, **239**, 269
- Baclofen
- enhancement of Gs-coupled receptor-mediated cAMP production in *Xenopus* oocytes expressing rat brain cortex poly (A)<sup>+</sup> RNA, **241**, 476
- Bacteria
- overexpression of GroEL-like chaperonin in symbiotic interactions of weevil *Sitophilus oryzae* and its endosymbiotic bacteria, **239**, 769
- Bactericidal permeability increasing protein
- and lipopolysaccharide binding protein, conservation of genomic organization of genes encoding (human), **236**, 427
- Bacteriophages
- $\phi$ Lf, gene VI coding for 10-kDa minor coat protein, identification, **239**, 752
- M13, filamentous, display of HIV-1 Tat protein, **235**, 806
- P22, tailspike protein, side-chain specificity of temperature-sensitive folding mutation sites, **233**, 857
- T4, presynaptic filament, binding to gene 32 single-stranded DNA-binding protein, **231**, 600
- T7
- binary system, in activation of transient transgene expression in zebrafish embryo, **237**, 492
- $\epsilon$  sequence, function as initiator of translation of CAT mRNA in *E. coli*, **236**, 253
- Bacteriorhodopsin
- photocycle, cooperativity-induced optical anisotropy changes during, **233**, 532
- Bacterioruberins
- from Antarctic bacterium *Micrococcus roseus*, temperature-dependent biosynthesis, structure, and interaction with synthetic membranes, **239**, 85
- Bacteroides fragilis*
- effect on formation of azoxymethane-induced aberrant crypt foci in colon (rat), **238**, 753
- Baculoviruses
- display of green fluorescent protein and rubella virus envelope proteins, **238**, 717
- expression system with Sf21 and High Five cells for fungal cellobiohydrolase, **233**, 25
- recombinant mouse DNA methyltransferase expressed in, purification and characterization, **230**, 280
- Sf21 cell expression system
- functional human decorin production and purification, **232**, 91
- recombinant murine angiostatin produced in, suppression of tumor growth, **236**, 651
- Bak
- increased expression, association with *Helicobacter pylori* induction of apoptosis in gastric epithelial cells, **239**, 626
- Band 4.1 superfamily
- ezrin-like domain, and Dbl homology domain of Rho family, molecular cloning and characterization of human CDEP protein containing, **241**, 369
- Band 7.2b protein
- from erythrocyte membranes, binding to calpromotin (human), **232**, 294
- Barbiturates
- induced benzophenanthridine alkaloid formation via gene transcript accumulation in California poppy, **241**, 606
- Barbituric acid
- induced benzophenanthridine alkaloid formation via gene transcript accumulation in California poppy, **241**, 606
- Barium
- and calcimimetic ( $\pm$ )NPS 568, effects on adrenocorticotrophic hormone release in pituitary tumor cells, **238**, 866
- Bark
- cinnamon, bacterial endotoxin inhibitor derived from, **234**, 506
- Basic fibroblast growth factor
- binding domains, identification in proteoglycan macrophage colony-stimulating factor (human), **230**, 392
- binding of rat Golgi sialoglycoprotein MG160 expressed in *Pichia pastoris*, role of complex carbohydrates and sialic acid, **234**, 68
- induction of apoptosis in myofibroblastic cells isolated from rat palatal mucosa, **240**, 21
- simultaneous application of TGF- $\beta$  with, induction of persistent skin fibrosis in newborn mice, **237**, 292; *erratum*, **240**, 507
- Basic helix-loop-helix/PAS domain
- transcription factors with, involved in adaptive responses to hypoxic stresses, cardiac expression: HIF-1 $\alpha$  and HLF/EPAS (rat), **240**, 552
- Basic helix-loop-helix/PAS proteins
- BMAL-1, cDNA cloning, tissue-specific expression, and variants with alternative translation initiation site usage (human), **233**, 258
- Basigin
- gene knockout mice, sensory and memory function abnormalities, **236**, 733
- Basophils
- eotaxin as potent chemotaxin (human), **231**, 365

## Subject Index

## Bax protein

heat-induced expression in FL5.12 cells, and apoptosis induction, effects of *Bcl-x<sub>L</sub>* overexpression, **241**, 164

## Bbf

and p300, increased interaction between, okadaic acid stimulation of H ferritin transcription by, **240**, 179

## B-cell lymphoma cells

RL, lymphotoxin beta isoforms expressed in, identification (human), **238**, 273

## B cells

from AIDS and Burkitt's lymphoma patients, macrophage inflammatory protein-1 $\alpha$  and receptor modulation, **235**, 576

ASK.0, calcium-dependent activation of protein-tyrosine kinase Syk, stimulation by platelet-activating factor (human), **239**, 23

Epstein-Barr virus-transformed, LAZ-388, lymphotoxin beta isoforms expressed in, identification (human), **238**, 273

putative surface molecule B7.3, association with protein kinase activity (human), **228**, 489; *erratum*, **231**, 868

( $\pm$ )-BCH189, *see* 2',3'-Dideoxy-3'-thiacytidine

## Bcl-2

and c-Myc, CHO cells stably transfected with, activity and expression of tissue transglutaminase, **236**, 280

direct interaction with carnitine palmitoyltransferase I (mouse), **231**, 523

expression in HL-60 cells infected with agent of human granulocytic ehrlichiosis, **232**, 298

heat-induced expression in FL5.12 cells, and apoptosis induction, effects of *Bcl-x<sub>L</sub>* overexpression, **241**, 164

inhibition of apoptosis, mechanism: alleviation of trans-repressive function of glucocorticoid receptor and inhibition of activation of CPP32-like cysteine proteases, **233**, 781

levels in Parkinson's disease and incidental Lewy body disease: upregulation as early event in neurodegeneration, **240**, 84

role in retinoid X receptor  $\alpha$ -induced apoptosis of HL-60 cells (human), **230**, 251

Bcl-x<sub>L</sub>

distribution in human astroglia cells, mediation by adenosine A<sub>3</sub> receptor, **241**, 297

overexpression, effects on heat-induced apoptosis and hsp70, bcl-2, and Bax protein levels in FL5.12 cells, **241**, 164

## Beads

asialofetuin-coupled, mouse sperm binding to, **238**, 95

## BENE protein

identification as part of MAL proteolipid-related protein family, **232**, 618

## Benzophenanthridine alkaloids

barbiturate-induced formation via gene transcript accumulation in California poppy, **241**, 606

## Benzo[a]pyrene

effect on cell proliferation, and c-myc and growth factor expression in placental choriocarcinoma cells (human), **231**, 117

## 4S-Benzo[a]pyrene-binding protein

comparison with glycine N-methyltransferase (rat liver), **233**, 300; letter to editor, **237**, 758

## Benzo[a]pyrene diol epoxide

activity of four allelic forms of glutathione S-transferase hGSTP1-1 for, analysis, **238**, 397

## Benzoquinones

inhibition of expression of inducible NOS gene (C6 glial cells), **239**, 367

## Benzoyl peroxide

downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328

## Benzyl-methanethiosulfonate

restoration of fast inactivation in inactivation-defective human heart sodium channel: analysis of IFM-ICM mutation, **233**, 606

## Berberine-bridge-forming enzyme

*bbeI* gene encoding, mRNA accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606

## Beta cells

granule peptides, effects on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580

## pancreatic

Ca<sup>2+</sup>-signaling, coupling to citrulline-argininosuccinate-arginine cycle (rat), **235**, 619

INS-1, NO-dependent inhibition of insulin secretion, temporal relationship to tetrahydrobiopterin synthesis (rat), **233**, 66

insulinoma-derived, expression of functional leptin receptor mediating proliferative response (rat), **238**, 851

MIN6, proliferation, induction by leptin via activation of MAP kinase, **241**, 765

 $\beta$ -Helices

fibrils, from model peptide, **235**, 675

## Bet v 4 allergen

molecular characterization, expression in *Escherichia coli*, and epitope analysis (birch pollen), **239**, 197

bFGF, *see* Basic fibroblast growth factor

*Bifidobacterium adolescentis*

effect on formation of azoxymethane-induced aberrant crypt foci in colon (rat), **238**, 753

## Biglycan

gene promoter in osteosarcoma cells, regulation by cAMP (human), **235**, 413

## Bilateral striatal necrosis

and MELAS syndrome, associated T3308C mutation in mitochondrial ND1 gene (human), **238**, 323

## Bile

methyl mercury secretion, inhibitory effect of selenium (rat), **239**, 862

## Binding constants

formation of mammalian protein synthesis initiation complexes, **230**, 27

## Bioluminescence

apoequorin, *Oplophorus luciferase*, and *Renilla luciferase* used as reporter proteins with coelenterazine analogues as substrates, **233**, 349

*lux* operon of *Photobacterium leiognathi*, *luxZ* gene enhancing, linkage to *pkl* gene encoding pyruvate kinase 1, **239**, 228

## Biotin

biotin-hydrophobic tetrapeptide-peptide nucleic acid molecule, synthesis, uptake, and intracellular metabolism, **236**, 323

excess, efficient L-glutamate production in presence of, by *dtsR* gene-disrupted *Brevibacterium lactofermentum* mutant, **234**, 157

## Biotin-dependent transcarboxylase

-smooth muscle regulatory light chain fusion protein, replacement in myosin subfragment 1 for binding to glass surface, **230**, 76

## Biotin synthase

member of family of enzymes using S-adenosylmethionine as source of deoxy-adenosyl radical, **236**, 402; *erratum*, **240**, 246

## 2,6-Bis(3,4-dihydroxyphenyl)-methylenecyclohexanone

induced apoptosis and p53-independent growth inhibition in tumor cells: synergism with genistein, **239**, 467

## Bisindolylmaleimide 1

inhibition of telomerase in nasopharyngeal cancer cells in culture (human), **241**, 730

## Bis-pivaloyloxymethyl-9-(2-phosphonylmethoxyethyl)-adenine

anti-hepatitis B virus efficacy in HBV transgenic mouse, monitoring by semi-quantitative PCR of serum viral DNA, **241**, 43

## Black rot

role of *gumD* gene of *Xanthomonas campestris*, **233**, 265

## Bladder carcinoma cells

radiation-resistant phenotype, role of signal transduction pathway (human), **230**, 196

## BLM protein

translocation into nucleus by nuclear localization signal, **240**, 348

## Blood

glucose level in hyperglycemic KK mouse, effect of triiodothyronine, **235**, 790

## Blood-brain barrier

asymmetrical uptake of L-carnitine (porcine brain capillary endothelial cells), **241**, 127

## Blood group ABO

Indian Bombay phenotype, role of *FUT1* missense mutation and *FUT2* deletion, **238**, 21

molecular analysis of *O* alleles at locus for, in populations of different ethnic origin, **234**, 779

Blood pressure, *see also* Hypertension

decrease by alleles of spontaneously hypertensive rat at loci on chromosomes 4 and 13, **238**, 586

regulation, role of S-nitrosohemoglobin in fetal circulation (human), **239**, 875 and related traits, loci on chromosomes 1, 10, and 18 (rat), **235**, 343

## B-lymphoblastoid cells

defective transcripts of Werner's syndrome gene, downregulation in WS patients, **236**, 151

## B lymphocytes

activation by HIV-1 Tat protein (human), **237**, 461

## BMAL-1

cDNA cloning, tissue-specific expression, and variants with alternative translation initiation site usage (human), **233**, 258

## Bone

destruction in rheumatoid arthritis via osteoclastogenesis induced by synovial fibroblasts (human), **240**, 279

development, G-protein coupled receptor expressed during, with homology to neuropeptide and chemoattractant receptors, isolation from mouse and NH15-CA2 cells, **233**, 336

ectopic formation, induction by recombinant human BMP-2 and *Xenopus* BMP-4/T heterodimer *in vivo*, comparison, **239**, 575

mass loss due to estrogen deficiency, analysis in transgenic mouse overexpressing osteoblast stimulating factor-1, **238**, 528

in middle ear, role in *goosecoid* gene expression in branchial region after retinoic acid treatment of embryo *in vivo* (mouse), **235**, 748

## osteoclastic resorption

effect of concanavalin A (rabbit), **234**, 600

regulation by glucose (chicken), **235**, 646

P2Y receptor subtype expression, comparison with brain (human), **237**, 297; *erratum*, **240**, 507

## Bone cells

synthesis of transforming growth factor and TGF receptor types I and II, increase by 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **239**, 734

## Bone marrow

wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102

## Bone marrow cells

cocultures with calvarial cells, osteoclast-like cell formation in, stimulatory effects of Ca<sup>2+</sup>-ATPase inhibitors and calcium ionophore (mouse), **237**, 111

gene transduction by Epstein-Barr-virus-based vectors coupled with cationic or HVJ-liposomes (human), **238**, 795

osteoclast generation and resorption, role of M-CSF (pig), **231**, 231

## stromal

ERK-1 and -2 activation by FGF-2 and PDGF-BB (human), **238**, 134

growth and differentiation, opposing effects of BMP3 and TGF- $\beta$ 1 (human), **241**, 787

## Bone morphogenetic protein-2

human recombinant, and recombinant *Xenopus* BMP-4/T heterodimer, comparison of ectopic osteoinduction *in vivo*, **239**, 575

intracellular signals inhibiting myogenic differentiation and inducing osteoblast differentiation in C2C12 myoblasts, role of Smad 1 and Smad5, **238**, 574

role in phenotypic maturation of clonal osteoblastic cell line from p53 null mouse calvariae, **231**, 196

## Bone morphogenetic protein-3

effects on bone marrow stromal cell growth and differentiation, comparison to effects of TGF- $\beta$ 1 (human), **241**, 787

## Bone morphogenetic protein-4

coexisting signaling, inhibition of secondary axis induction by FK 506-binding protein homologue in *Xenopus* embryos, **239**, 585

Met/HGF-receptor family member expression in related pattern, in gastrulae ectoderm (*Xenopus*), **231**, 191

murine gene, transcriptional regulation, role of E-box in 5'-flanking promoter region involving USF, **240**, 136

## Bone morphogenetic protein-4/7 heterodimer

induction of mesoderm (*Xenopus laevis*), **232**, 153

recombinant *Xenopus*, and recombinant human BMP-2, comparison of ectopic osteoinduction *in vivo*, **239**, 575

## Bone morphogenetic protein type II receptor

cDNA cloning and genomic organization (mouse), **235**, 499

## Boric acid solution

effect on cartilage metabolism (chicken embryo), **234**, 263

## Botulinum E toxin

light chain, inability to cleave SNAP-23 and partial impairment of insulin stimulation of GLUT4 translocation in 3T3-L1 cells, **237**, 388

## Bovine serum albumin

tryptophan residues exposed to peroxynitrite, oxidative modification, **234**, 82

## Bradykinin

induction of actin reorganization and enhancement of cell motility in HaCaT keratinocytes, **237**, 257

## Brain

[2-<sup>11</sup>C]acetyl-L-carnitine uptake, PET study (rhesus monkey), **231**, 488

adrenoleukodystrophy-related protein mRNA expression (human), **239**, 261

## Alzheimer's disease

mitochondrial DNA mutations, **241**, 221

p53 changes, **232**, 418

supernatants, detection of apolipoprotein E/dimeric soluble amyloid  $\beta$  complexes, **240**, 715

basic helix-loop-helix/PAS protein BMAL-1 expression (human), **233**, 258

CAG trinucleotide-repeat-containing genes, cloning (mouse), **240**, 239

calcyphosine gene expression, loss in mouse and other rodents, **232**, 407

calmodulin and plasma membrane Ca<sup>2+</sup>-ATPase, protein half-lives (rat), **237**, 163

cationic liposome-mediated *in vivo* gene transfer into, efficiency, enhancement by cytoplasmic gene expression system (mouse), **234**, 15

cytochrome b<sub>5</sub>, identification of two homologous forms (rat), **236**, 641

desert locust *Schistocerca gregaria*, identification of two peptides, **241**, 530

developing, JNK2- $\alpha$ 1 gene expression (chicken embryo), **234**, 489; *erratum*, **236**, 538

electroencephalogram, effect of cortistatin-like peptide hCS-17 (human), **232**, 157

endothelin receptor type B-like gene enriched in, cloning and characterization (human), **233**, 559

estrogen receptor of 112-kDa, expression in cortex (mouse), **231**, 683

expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279

GABA receptor-mediated inhibitory postsynaptic potentials in tissue slices, acute effects of 25-hydroxycholesterol (rat), **237**, 68

ganglioside biosynthesis and synapse formation in cortex, upregulation by synthetic ceramide analog L-PDMP in cortical neurons *in vitro* (rat), **237**, 595

glycogenin and glycogen synthase activity and glycogen content during development (chicken), **240**, 142

leptin receptor splice variants Ob-Ra, b, and e, detection and quantitation (mouse), **238**, 648; *erratum*, **241**, 803

## Subject Index

Brain (*continued*)

- long-chain acyl-CoA hydrolase cDNA, molecular cloning and expression (rat), **232**, 198
- Machado-Joseph disease gene product identification (human), **233**, 476
- metabolic pathways, deuterium distribution in lactate as tracer (rat), **237**, 650
- 1-methyl-1,2,3,4-tetrahydroisoquinoline-synthesizing enzyme isolation, implications in Parkinson's disease (rat), **236**, 676
- MPTP-induced dopamine depletion in striatum, prevention by adenovirus-mediated transduction of human glial cell line-derived neurotrophic factor gene (mouse), **238**, 569
- neonatal, RNB6 protein highly expressed in, cDNA cloning; member of Ena/VASP family (rat), **237**, 307; *erratum*, **241**, 611
- neuronal damage due to middle cerebral artery occlusion, protective effects of endogenous IL-1 receptor antagonist (rat), **234**, 211
- normal, expression of kinase-defective *Eph*-related receptor (human), **235**, 487
- P2Y receptor subtype expression, comparison with bone (human), **237**, 297; *erratum*, **240**, 507
- presenilin 1 gene expression (*Microcebus murinus*), **228**, 430; *erratum*, **231**, 520
- protein inhibitor of neuronal nitric-oxide synthase, distribution (rat), **238**, 617
- RGS4* mRNA distribution, *in situ* hybridization analysis (mouse), **241**, 281
- Rgs12* and *Rgs14* cDNAs, isolation and expression analysis (rat), **233**, 770
- RING finger protein bfp, identification and cloning (rat), **240**, 8
- D-serine origin and turnover (mouse, rat), **235**, 26
- specific serine protease, with Kringle-like structure and three scavenger receptor cysteine-rich motifs, molecular cloning (mouse), **239**, 386
- sphingomyelinase activity in cortex, enhancement in senescence-accelerated mouse-P/10 with advancing age, **237**, 583
- thioredoxin reductase activity, effect of selenium deficiency (rat), **234**, 293
- trpl* homologue *Rtrp3* cloning, expression, and characterization (rat), **240**, 167
- TSH receptor derived from, cloning and expression (sheep), **238**, 173
- very-long-chain fatty acid accumulation in adrenoleukodystrophy protein-deficient mouse, **232**, 631
- wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102
- Brain-derived neurotrophic factor
  - effects on glucose levels in obese diabetic and normal mice, **238**, 633
  - synthesis by astrocytes in culture, upregulation by dopaminergic transmitters (mouse), **238**, 468
- Brain finger protein
  - RING finger family, identification and cloning (rat), **240**, 8
- Branched-chain fatty acids
  - metabolism in peroxisomes, role of sterol carrier protein X: specific reaction with 3-oxo-pristanoyl-CoA (rat), **236**, 565
- Branched-chain  $\beta$ -ketothiolase
  - peroxisomal sterol carrier protein X identification as, and SCPx specific reaction with 3-oxo-pristanoyl-CoA, **236**, 565
- Branching morphogenesis
  - lung, role of cell/epimorphin interaction, **234**, 522
- Breast cancer
  - expression of *dishevelled DVL-3* gene, **239**, 510
  - putative preventive role of dietary isoflavones, **233**, 579
  - sporadic, relaxation of insulin-like growth factor II gene imprinting, **235**, 123
- Breast cancer cells
  - apoptosis and p53-independent growth inhibition induced by 2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone: synergism with genistein, **239**, 467
- BT-20
  - cell culture density-dependent expression of  $\alpha_2$ -macroglobulin receptor/LDL receptor-related protein, **240**, 122
  - 15-lipoxygenase, characterization (human), **231**, 111
  - dishevelled DVL-3* gene expression, **239**, 510

## MCF-7

- apoptosis induction by insulin-like growth factor binding protein-3, **237**, 690; *erratum*, **240**, 246
- BRCA2* expression, changes during cell cycle, **234**, 247
- calnexin expression in cells grown as colonies and as monolayer, **238**, 66
- growth induced by estrogenic pesticides, synergistic inhibitory effects of curcumin and genistein, **233**, 692
- growth induced by estrogenic pesticides, synergistic inhibitory effects of curcumin and genistein (human), **233**, 692
- interaction with endothelium, regulation by hepatocyte growth factor/scatter factor, **233**, 1
- NOR-1 and related nuclear receptor genes, effects of retinoic acids, **231**, 417
- radiation-induced micronuclei formation, role of serum concentration and cell cycle distribution, **237**, 678
- MCF-7 and MDA-MB-435, differential display of reticulocalbin, **231**, 283
- MDA-468, endogenous p53<sup>273 His</sup> mutant in, regulation of DNA binding and transcription, **232**, 14
- MDA-MB-231
  - aryl hydrocarbon receptor and cell cycle-regulating gene mRNA expression, coregulation by TGF- $\beta_1$ , **241**, 86
  - heat shock protein induction and DNA binding by heat shock factors, effects of quercetin, **239**, 851
  - IL-6 gene expression induction and NF- $\kappa$ B activation by cycloheximide and anisomycin, **233**, 507
- T47D
  - monocyte chemotactic protein-1 synthesis, inhibition by progesterone, **239**, 557
  - opioid binding, effect of taxol, **235**, 201
- Breast cells
  - epithelial
    - BRCA2* expression, changes during cell cycle, **234**, 247
    - proliferation, inhibition by dextran derivative CMDB7 by interference with FGF2 autocrine loop, **239**, 424; *erratum*, **241**, 804
    - phosphoinositide 3-kinase HsC2-PI3K identification and cDNA cloning, **233**, 537
- Brevibacterium flavum*
  - ftsZ* gene cloning, sequencing, and characterization, **236**, 383
- Brevibacterium lactofermentum*
  - disR* gene-disrupted mutant, fatty acid requirements for growth and L-glutamate production in presence of excess biotin, **234**, 157
- Bridging ligands
  - His61 imidazolate bridge of Cu,Zn-superoxide dismutase, rupture in reduced crystalline enzyme, **241**, 119
- BRL49653
  - upregulation of UCP-2 gene expression in preadipose and adipose cells (mouse), **238**, 606
- Bromobenzene
  - glutathione depletion by, induced thymidylate insufficiency for DNA repair synthesis (hamster), **234**, 470
- 8-Bromo-cyclic GMP
  - inhibition of platelet adhesion to collagen (human), **231**, 412
- Bromodeoxyuridine
  - induced expression of endothelin $_A$  in A375 human melanoma cells, **234**, 526
- $\alpha$ -Bromopalmitate
  - upregulation of UCP-2 gene expression in preadipose and adipose cells (mouse), **238**, 606
- Bronchoalveolar structures
  - formation in embryonic rat lung in primary culture, role of HGF, **241**, 98
- Bronchoconstriction
  - endothelin-1-induced, in perfused lung, effect of phosphodiesterase inhibitors (rat), **231**, 22
- Brown adipose tissue
  - UCP3 expression (human), **235**, 79

- UCP3 regulation in response to cold, thyroid hormone treatment, and high-fat feeding (rat), **240**, 222
- Bruton's tyrosine kinase  
pleckstrin homology domain, inositol polyphosphate and phosphoinositide binding, **236**, 333
- $\kappa$ -Bungarotoxin  
cDNA expression and sequence analysis (snake venom), **230**, 192
- Burkitt's lymphoma  
derived B cells, modulation of macrophage inflammatory protein-1 $\alpha$  and receptor (human), **235**, 576
- Burkitt's lymphoma cells  
apoptosis, replication factor C large subunit cleavage in, mediation by CPP32-like protease, **233**, 343  
Namalwa, sialyl Lewis x and Lewis x epitope synthesis *in vivo*, substrate specificities of human  $\alpha$ -1,3-fucosyltransferases for, **237**, 131
- 2,3-Butanedione monoxime  
inhibition of L-type cardiac Ca<sup>2+</sup> channels, role of PKA-dependent phosphorylation sites (human), **230**, 489
- Butethal  
induced benzophenanthridine alkaloid formation via gene transcript accumulation in California poppy, **241**, 606
- Buthionine sulfoximine  
reversal of heavy metal resistance in multidrug-resistant human KB carcinoma cells, **236**, 586
- N*-*t*-Butyl-*N'*-tetradecyl-3-tetradecylamino-propionamide  
cationic lipid for delivery of plasmid DNA into mammalian cells, **236**, 126
- Butyrate  
stimulation of cyclin D and p21 and inhibition of cyclin-dependent kinase 2 expression in HT-29 colonic epithelial cells, **232**, 169
- Butyrylcholinesterase, *see* Cholinesterase
- b-Zip transcription factor  
association with USF2/FIP (yeast), **231**, 333; *erratum*, **233**, 293
- C**
- C1 inhibitor  
regulation by binding to type IV collagen and heparin (human), **230**, 597
- 3C protease  
hepatitis A virus and poliovirus, susceptibility to degradation by ubiquitin-mediated proteolytic system, **238**, 119
- C5a  
neutrophil responses to, differential effects of MAP kinase inhibitor PD 98059 (human), **232**, 474
- C5a anaphylatoxin receptor  
G-protein coupled receptor homologous to, isolation from mouse and NH15-CA2 cells and expression during bone development (human), **233**, 336
- C109 peptide  
binding to GLUT4-vesicles and inhibition of insulin-induced glucose transport and GLUT4 recruitment in adipocytes (rat), **240**, 409
- CAAT/enhancer binding protein  
binding over TATA box and activation of M promoter of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase (rat), **232**, 247  
direct modulation of transcription from peroxisome proliferator-activated receptor  $\gamma$ 2 promoter, **240**, 99
- Ca<sup>2+</sup>-ATPase  
erythrocyte plasma membrane, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451  
plasma membrane, and calmodulin, protein half-lives in brain(rat), **237**, 163  
plasma membrane and sarcoplasmic reticulum, mRNA levels in aortic smooth muscle cell from spontaneously hypertensive rat, **230**, 344
- Ca<sup>2+</sup>-ATPase inhibitors  
stimulation of osteoclast-like cell formation in cocultures of murine bone marrow cells and calvarial cells, **237**, 111
- Ca<sup>2+</sup>/calmodulin-dependent protein kinase  
CaMKII  
multiple isoforms, expression by human pancreatic islets, **236**, 473  
role in serum factor potentiation of AMPA receptor currents (*Xenopus* oocytes), **238**, 565  
CaMKIV, analysis during T cell development (mouse), **241**, 383  
phosphorylation of cardiac Na<sup>+</sup>-K<sup>+</sup> ATPase (rat), **238**, 544
- Cachexia  
cancer-related, depletion of liver glycogen in, mechanism (mouse), **241**, 49
- Cadherins  
E-cadherin expression, repression of, role of E boxes, **241**, 453  
multiple, expression in fibroblasts (human), **235**, 355
- Cadmium  
*in vitro* effect on metallothionein-I gene promoter, **230**, 159
- Café au lait macules  
in neurofibromatosis type 1, NF1 gene in melanocytes derived from, analysis for loss of heterozygosity, **237**, 138
- Caffeine  
induction of <sup>45</sup>Ca<sup>2+</sup> releases in microsomes of tracheal epithelial cells (pig), **230**, 247  
oxidation to theobromine and theophylline, catalysis by flavin-containing monooxygenase in hepatic microsomes (rat), **235**, 685
- CAG repeats  
genes with, cloning (murine brain), **240**, 239
- Calcereous corpuscles  
associated calcium-binding protein, description (*Echinococcus granulosus*), **237**, 451
- Calcineurin  
cloning, structure, and physiological role, **235**, 271  
drug-dependent inhibition *in vitro*, mediation by FKBP51 (human), **232**, 437
- Calcitriol  
induction of adipose differentiation in OB17 cell line: relationship to adipogenic action of triiodothyronine, **232**, 771
- Calcium  
actin subdomain I gelsolin-binding site sensitive to, localization: implications for severing process (rabbit), **233**, 61  
action potential frequency in pituitary GH<sub>3</sub> cells, effect of Rab3A (rat), **235**, 331  
 $\beta$ -amyloid-induced long-term elevation in astrocytes, prevention by tetrapeptide antagonist (rat), **235**, 479  
basal and inositol 1,4,5-trisphosphate-induced release, effect of cytoplasmic Cl<sup>-</sup> levels in endothelial cells (bovine aorta), **238**, 292  
<sup>45</sup>Ca<sup>2+</sup>, release in microsomes of tracheal epithelial cells, induction by caffeine and inositol 1,4,5-trisphosphate (pig), **230**, 247  
and calcimimetic ( $\pm$ )NPS 568, effects on adrenocorticotrophic hormone release in pituitary tumor cells, **238**, 866  
*c-myc* proto-oncogene expression and Caco-2 cell proliferation dependent on, role for luminal extracellular calcium-sensing receptor, **232**, 80  
cytosolic, concentration ramp, effect on InsP<sub>3</sub>-induced Ca<sup>2+</sup> release in A7r5 smooth muscle cells and tracheal mucosal EBTr cells, **237**, 354  
cytosolic gradients in pancreatic islet cells, stimulation by glucose and carbachol (mouse), **235**, 465  
cytosolic oscillations, and phasic contractions of myometrial smooth muscle, stimulation by (+) *cis*-dioxolane (rat), **231**, 722  
delayed response to glucose in diabetic GK rat, **239**, 129  
depletion, effect on cellular sensitivity to oxidant stress conferred by mtDNA mutations, **239**, 139  
depolarization-induced increase in [Ca<sup>2+</sup>]<sub>i</sub>, inhibition in neuroblastoma×glioma hybrid NG108-15 cells by 2-arachidonoylglycerol, **233**, 207  
depolarization-induced release from skeletal muscle triads, potentiation by cyclic ADP-ribose and inositol 1,4,5-trisphosphate (rabbit), **240**, 772  
1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>-induced entry in skeletal muscle cells, role of Ca<sup>2+</sup> release-activated Ca<sup>2+</sup> channels, **239**, 562

## Subject Index

Calcium (*continued*)

- effect on binding activity of human leukocyte leukotriene B<sub>4</sub> receptor, **236**, 355
- endoplasmic reticulum stores, depletion, protective effects against hypoxia- and mitochondrial inhibitor-induced cellular injury and death (rabbit kidney), **240**, 57
- extracellular, mediation of flickery block of K<sup>+</sup> channel in dispersed parathyroid cells (bovine), **230**, 616
- extracellular and intracellular chelation, opposite effects on Na<sup>+</sup> overload and hepatocyte injury (rat), **232**, 107
- flux in liver, effect of DNA introduction with hand-held gene gun (rat), **234**, 695
- fractional release from endoplasmic reticulum, activation of Ca<sup>2+</sup> entry in rabbit aortic endothelial cells, **241**, 471
- free cytosolic levels
  - effect on intracellular pH in pancreatic acini (rat), **230**, 652
  - LPS-induced increase in HL60 and HUVEC cells, inhibition, role of chondroitin sulfate chains of urinary trypsin inhibitor, **238**, 560
- free levels in cultured dystrophic dermal fibroblasts (human), **230**, 327
- HL-60 cell, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418
- influx
  - in agonist-stimulated endothelial cells, role of myosin light chain kinase and tyrosine kinase inhibitors (pig), **235**, 657
  - in brain VSMC, regulation by voltage-dependent non-selective cation channel sensitive to efonidipine (bovine), **240**, 484
  - voltage-dependent, in human erythrocytes, characterization by fura-2, **236**, 549
- intracellular
  - accumulation, and channel formation, induction by perforin N-terminus peptides (PN71 lymphocytes), **240**, 647
  - mobilization
    - by sphingosine-1-phosphate in U937 cells, role in NF- $\kappa$ B activation, **234**, 121
    - by unsaturated fatty acids independent of IP<sub>3</sub> generation and via insertion at plasma membrane (Ehrlich ascites tumor cells), **241**, 312
  - perturbation, effects on thyroglobulin in FRTL-5 cells: delay of secretion and alteration of glycosylation, **234**, 133
  - regulation by midkine in neutrophils (human), **241**, 756
  - role in angiotensin II-mediated tyrosine phosphorylation and dephosphorylation of PLC- $\gamma$ 1 (rat), **232**, 540
  - in  $\beta$ TC3 cells, effect of syntaxin 1A/HPC-1 (rat), **231**, 89
- intracellular sparks in cardiomyocytes, 2D millisecond analysis by rapid scanning confocal microscopy and effect of isoproterenol (rat), **233**, 413
- in isolated liver nuclei, concentration increase by sphingolipids (rat), **238**, 347
- luminal, in sarcoplasmic reticulum vesicles during Ca<sup>2+</sup> uptake and release, fluorescence probe study (rabbit), **241**, 181
- mitochondrial Ca<sup>2+</sup> transients during contractile cycle in rabbit cardiac myocytes: selective loading of Rhod 2, **236**, 738
- mitochondrial glycerophosphate dehydrogenase domain binding to, gene mutation in diabetic family, **231**, 570
- mobilization in NK cells, stromal-derived factor-1 $\alpha$ -induced, role of heterotrimeric G proteins, **236**, 270; *erratum*, **237**, 759
- Na<sup>+</sup>/Ca<sup>2+</sup> exchange activity in primary cortical neuron culture, inhibition by genistein (rat), **233**, 86
- neuronal NOS inactivation dependent on, analysis: evidence for stabilization/activation factor (rat), **234**, 476
- nuclear and cytoplasmic signals, in gene regulation: breakthroughs and views, **236**, 541
- nuclear and cytosolic signaling induced by extracellular ATP in rat kidney inner medullary collecting duct cells, **234**, 224
- oscillations, effect of cytosolic free Ca<sup>2+</sup> levels (poppy), **234**, 690
- passive permeability of erythrocyte plasma membrane to, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451
- phospholipase C/Ca<sup>2+</sup> pathway, mediation of protein kinase C activation by nociceptin/orphanin FQ (CHO cells), **240**, 304
- protein-tyrosine kinase Syk activation dependent on, stimulation by platelet-activating factor in human B cell line ASK.0, **239**, 23
- pulsatile influx, in neutrophils undergoing CD11b/CD18 integrin engagement (human), **230**, 258
- receptor-mediated entry, effect on PAF primed responses in human neutrophils, **240**, 763
- receptor-specific mobilization responses, role in Fc $\epsilon$ R1 and formyl peptide receptor signaling pathway cooperation in RBL<sup>FPK</sup> cells, **235**, 812
- regulation of thin filament motility, effects of hypertrophic cardiomyopathy mutations Asp175Asn and Glu180Gly in  $\alpha$ -tropomyosin (rabbit), **236**, 760
- release from intracellular stores in permeabilized rat parotid acinar cells, monitoring with Mag-fura-2 and Calcium Green C<sub>18</sub>, **240**, 189
- role in regulation of apoptosis, **239**, 357
- S6-kinase stimulated by, identification in rat liver, **239**, 451
- transport by annexins I, II, V, and VI in large unilamellar vesicles, **237**, 499
- uptake by sarcoplasmic reticulum, measurement: role of phospholamban phosphorylation in hypertrophied myocardium (rat), **239**, 701
- voltage-dependent influx in human erythrocytes, characterization by fura-2, **236**, 549
- Calcium-binding proteins
  - binding by amlexanox and cromolyn in lung extract, comparison (bovine), **240**, 341
  - intracellular, associated with calcareous corpuscles in *Echinococcus granulosus*, **237**, 451
  - photoreceptor-specific, functional characterization and expression (frog), **234**, 173
- Calcium/calmodulin pathway
  - role in electrical stimulation-induced increase in TGF- $\beta$ 1 mRNA levels in murine osteoblastic cells, **237**, 225
- Calcium channel receptor
  - L-type, modulation in aging skeletal muscle in response to insulin-like growth factor-1 receptor (rat), **235**, 784
- Calcium channels
  - $\alpha$ <sub>1</sub>-subunit, neural, cDNA cloning and characterization (squid), **230**, 147
  - antagonist  $\omega$ -conotoxins, circular dichroism spectra, **230**, 133
  - Ca<sup>2+</sup> release-activated, role in 1,25(OH)<sub>2</sub>-vitamin D<sub>3</sub>-induced Ca<sup>2+</sup> entry in skeletal muscle cells, **239**, 562
  - in inner membrane of nuclear envelope (rat), **235**, 236
  - L-type
    - cardiac, inhibition by 2,3-butanedione monoxime, role of PKA-dependent phosphorylation sites (human), **230**, 489
    - functional activity in C1300 neuroblastoma cells, cooperative enhancement by activin A and all-*trans*-retinoic acid, **241**, 363
    - in pancreatic  $\beta$ -cells, coupling to citrulline-argininosuccinate-arginine cycle (rat), **235**, 619
    - voltage-sensitive, in growth plate chondrocytes (chicken), **234**, 432
- Calcium Green C<sub>18</sub>
  - and Mag-fura-2, in monitoring of Ca<sup>2+</sup> release from intracellular stores in permeabilized rat parotid acinar cells, **240**, 189
- Calcium ionophores
  - regulation of protein tyrosine phosphatase receptor gene expression in Jurkat T lymphoma cells, **231**, 77
  - stimulation of osteoclast-like cell formation in cocultures of murine bone marrow cells and calvarial cells, **237**, 111
- Calcium pump, *see* Ca<sup>2+</sup>-ATPase
- Calcium release channels
  - intracellular, functional regulation by arachidonic acid and leukotriene B<sub>4</sub>, **237**, 413
- Calcium-sensing receptor
  - agonists, mediation of flickery block of K<sup>+</sup> channel in dispersed parathyroid cells (bovine), **230**, 616

## Subject Index

- extracellular, expression by human lens epithelial cells, **233**, 801; *erratum*, **237**, 481
- luminal extracellular, role in Caco-2 cells, **232**, 80
- mRNA, upregulation, association with inhibition of PTH secretion by IL-1 $\beta$  in parathyroid glands *in vitro* (bovine), **238**, 880
- Calcium signaling
- cyclosporin A-sensitive, opposite effects on NF- $\kappa$ B activation in human bronchial epithelial and Jurkat T cells, **234**, 424
- Calcium-store-operated channels
- encoding *trpl* homologue *Rtrp3* from rat brain, expression and characterization, **240**, 167
- Calcium waves
- in unstimulated cardiomyocytes isolated from aged spontaneously hypertensive and normotensive rats, **237**, 103
- Calcyphosine
- gene expression, loss in mouse and other rodents, **232**, 407
- Calmitine
- deficiency in skeletal muscle of Duchenne's muscular dystrophy patients and dy/dy dystrophic mice, mitochondrial protease inducing, inhibition by IP96, **232**, 559
- Calmodulin
- calcium/calmodulin pathway, role in electrical stimulation-induced increase in TGF- $\beta$ 1 mRNA levels in murine osteoblastic cells, **237**, 225
  - phosphorylation by myosin light chain kinase, alteration by exchange or duplication of EF-hand pairs, **236**, 702
  - and plasma membrane Ca<sup>2+</sup>-ATPase, protein half-lives in brain (rat), **237**, 163
- Calmodulin-dependent protein kinase, *see* Ca<sup>2+</sup>/calmodulin-dependent protein kinase
- Calnexin
- expression, decrease in human cancer cells grown as colonies compared to monolayer, **238**, 66
- Calpain
- htra-3*, homology with *Caenorhabditis elegans* sex determination gene *tra3* (human), **239**, 845
  - proteolysis of endothelial actin-binding protein 71-kDa domain (human), **232**, 555
  - related cysteine protease, role in cell cycle progression through late G<sub>1</sub> phase (human fibroblasts), **236**, 555
- $\mu$ -Calpain
- active, cytoplasmic processing of profilaggrin (human), **235**, 652
- Calpain inhibitor
- attenuation of TGF- $\beta$ -induced apoptosis in rat hepatocytes, **231**, 457
- Calpromotin
- binding to protein 7.2b of erythrocyte membranes (human), **232**, 294
- Calreticulin
- bidirectional signaling complex with integrin (mouse), **232**, 354
  - secretion, and KDEL receptor expression, in HeLa cells, effect of perturbation of endoplasmic reticulum function, **240**, 36
- Calsequestrin
- oligomeric status in normal and transformed skeletal muscle (dog, rabbit), **240**, 721
- Calspectin
- interaction with synapsin I (bovine), **231**, 852
- Calvariae
- osteoblast-rich populations of cells from, stimulation by angiotensin II (rat), **230**, 176
  - p53 null mouse, derived clonal osteoblastic cell lines, role of bone morphogenetic protein-2 in phenotypic maturation, **231**, 196
- Calvarial cells
- cocultures with bone marrow cells, osteoclast-like cell formation in, stimulation by Ca<sup>2+</sup>-ATPase inhibitors and calcium ionophore (mouse), **237**, 111
- Ca<sup>2+</sup>,Mg<sup>2+</sup>-dependent endonuclease
- antibody to, detection of specific class of chromatin-bound endonuclease, **236**, 423
- cAMP, *see* Cyclic AMP
- cAMP-dependent protein kinase, *see* Protein kinase A
- cAMP response element
- ATF/CRE site, and GC box, in housekeeping Na,K-ATPase  $\alpha$ 1 subunit gene, synergism between, role in constitutive expression, **241**, 169
- cAMP response element binding protein
- phosphorylation at Ser-133 via p44/42 MAP kinase-dependent pathway in PC12 cells, induction by elevated amyloid  $\beta$  protein(1-40) levels, **232**, 637
  - quantification in ventricular nuclear proteins from failing and nonfailing human hearts, **236**, 351
- cAMP response element binding protein-binding protein
- functional association with hepatocyte nuclear factor 4 in *trans*-activation, **241**, 664
  - interaction with peroxisome proliferator-activated receptor  $\gamma$ , stimulation by thiazolidinedione, **240**, 61
- cAMP response element modulator
- cloning, tissue distribution, and isoform identification (dog), **237**, 74
- Camptothecin
- effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- Canalicular multispecific organic anion transporter
- expression in pulmonary, gastric, and colorectal cancer cells (human), **240**, 606
- Cancer
- early diagnosis, role of telomerase activity in endometrium (human), **231**, 610
  - interindividual susceptibility to, associated cytochrome P450 1A1 variants, *in vitro* kinetics (human), **231**, 227
  - vitamin Q<sub>10</sub> blood levels, low, **234**, 296
- Cancer cachexia
- depletion of liver glycogen in, mechanism (mouse), **241**, 49
- Cancer cells
- evolution, role of telomere crisis, **230**, 1
  - tumor hexokinase expression, induction by insulin-like growth factor I, **235**, 389
- Candida albicans*
- hyphal and yeast forms, differential utilization of hemoglobin, **232**, 350
- Cannabinoid receptor
- binding by fatty acid sulfonyl fluorides (rat), **231**, 217
- CAP, *see* Catabolite activator protein
- Capping
- inhibition by NO in HL-60 cells, **232**, 827
  - and polyadenylation, effects on mRNA expression and antisense RNA mediated inhibition of gene expression, **241**, 193
- Carbachol
- stimulation of cytosolic Ca<sup>2+</sup> gradients in pancreatic islet cells (mouse), **235**, 465
- Carbacyclin
- upregulation of UCP-2 gene expression in preadipose and adipose cells (mouse), **238**, 606
- 4 $\alpha$ -Carbinolamine dehydratase
- expression in epidermal keratinocytes (human), **238**, 556
- Carbohydrates
- complex, role in secretion and bFGF binding of rat Golgi sialoglycoprotein MG160 expressed in *Pichia pastoris*, **234**, 68
- Carbon dioxide
- fixation, ribulose-1,5-bisphosphate carboxylase/oxygenase with strong specificity for, detection in thermophilic red algae, **233**, 568

## Subject Index

- Carbon monoxide  
 heme oxygenase-CO pathway, role in keratinocyte proliferation (human), **241**, 215  
 heme oxygenase-CO system, role in genetically hypertensive rats, **241**, 574
- Carbon monoxide sensor  
 heme-based, transcriptional activator CooA containing, signal transduction, **240**, 783
- Carbonyl reductase  
 inducible and noninducible genes, identification in ovary (rat), **230**, 518
- Carboxylesterase  
 differentiation-dependent expression in monocytic cells and transcription factor binding to promoter (human), **230**, 215  
 pulmonary surfactant convertase as family member (mouse), **235**, 180  
 putative, in intestine and liver, molecular cloning and characterization (human), **233**, 117
- 6-Carboxymethyl-5,9-dihydro-9-methyl-2-phenyl-[1,2,4]-triazolo[5,1-a][2,7]naphthyridine  
 induction of apoptosis of HL-60 and U-937 cells, protective effect of adenosine A<sub>1</sub> receptor agonists, **232**, 317
- Carboxymethyllysine  
 immunohistochemical localization in lipofuscin pigments of Alzheimer's disease and aged neurons, **236**, 327
- N-Carboxymethyllysine  
 formation from Amadori product, mediation by hydroxyl radical, **234**, 167  
 levels in streptozocin-diabetic rats and effects of aminoguanidine treatment, **241**, 352
- Carcinogenesis  
 colorectal, association with deregulation of homeobox gene expression (human), **232**, 742  
 hepatic  
 associated overexpression of  $\alpha$ -prothymosin concomitant with c-myc (rat), **232**, 817  
 MAPK phosphatase 1 and 2 gene expression in, analysis (rat), **239**, 746  
 HGF inhibitory effects, characterization in transformed rat liver epithelial cells, **236**, 396
- Carcinogenicity  
 Cr(VI), Cr(IV)-GSH as model compound, **235**, 54  
 7-sulfooxymethyl-12-methylbenz[*a*]anthracene (rat), **231**, 144
- Cardiac cells  
 T<sub>1</sub> effects, AT-1 cardiomyocytes as model for studies of, **237**, 303
- Cardiomyocytes  
 angiotensinogen-deficient mouse, stretch-induced MAP kinase activation, **235**, 36  
 AT-1, as model for studies of T<sub>1</sub> effects on cardiac cells (mouse), **237**, 303  
 cAMP accumulation and atrial natriuretic peptide gene expression, effect of adrenomedullin (rat), **230**, 311  
 expression of basic loop helix/PAS domain transcription factors HIF-1 $\alpha$  and HLF/EPAS involved in adaptive responses to hypoxic stress (rat), **240**, 552  
 fetal,  $\beta$ -myosin heavy chain expression *in vitro*, divergence of expression in adult heart *in vivo* (rat), **230**, 340  
 left ventricular unstimulated, isolated from aged spontaneously hypertensive and normotensive rats, calcium waves in, **237**, 103  
 linoleic acid metabolism *in vitro*, effects of aging (adult rat), **237**, 142  
 p70S6 kinase activation by sodium arsenite, roles for PI 3-kinase and p38 MAP kinase (adult rat), **238**, 207  
 treatment with S-nitroso-D,L-acetylpenicillamine and sodium nitroprusside, effects on guanylyl cyclase responsiveness to NO (rat), **238**, 351
- Cardiomyopathy  
 hypertrophic,  $\alpha$ -tropomyosin mutations Asp175Asn and Glu180Gly causing, effects on Ca<sup>2+</sup> regulation of thin filament motility (rabbit), **236**, 760
- Cardiotoxin II  
 structural role of N-terminal leucine residue (Taiwan cobra), **233**, 713
- Cardiotoxin IV  
 genomic structure (Taiwan cobra), **239**, 756
- Cardiovascular disease  
 platelet-activating factor acetylhydrolase deficiency in, role of Gln<sup>281</sup>→Arg mutation (human), **236**, 772
- CARG box-binding protein  
 CBF-A, homologue in rat liver *qTBP42* telomeric and tetraplex DNA-binding protein, identification (mouse muscle cells), **237**, 617
- Carnitine  
 binding by carnitine acyltransferase, role of serine-threonine-serine motif, site-directed mutagenesis study, **238**, 784; *erratum*, **241**, 803  
 binding to plasma membranes, regulation by ATP-dependent mechanism, **231**, 249  
 cellular uptake and plasma membrane binding in S49 lymphoma cells, stimulation by palmitoyl-CoA, **233**, 752
- L-Carnitine  
 asymmetrical uptake in blood-brain barrier (porcine brain capillary endothelial cells), **241**, 127
- Carnitine acyltransferase  
 serine-threonine-serine motif, role in carnitine binding and transition-state stabilization, site-directed mutagenesis study, **238**, 784; *erratum*, **241**, 803
- Carnitine palmitoyltransferase I  
 direct interaction with Bcl-2 (mouse), **231**, 523  
 heart muscle, highly expressed, reconstitution (human), **239**, 498
- $\beta$ -Carotene  
 and lycopene, effects on cholesterol metabolism in macrophages, **233**, 658
- Carotenoids  
 from Antarctic *Micrococcus roseus*, temperature-dependent biosynthesis, structure, and interaction with synthetic membranes, **239**, 85  
 from *Erwinia herbicola*, RpoS-dependent overexpression in *oxyr*-deficient *Escherichia coli*, **239**, 305
- Cartilage  
 articular  
 degradation, induction by IL-1 $\beta$  by mechanism not mediated by NO (horse), **238**, 81  
 explants, proteoglycan metabolism, effects of continuous cyclic mechanical loading (bovine), **240**, 216  
 differentiation, smoothened cDNA cloning and expression patterns of hedgehog proteins during, analysis (ATDC5 cell), **235**, 142  
 metabolism, effect of boric acid solution (chicken embryo), **234**, 263
- $\beta$ -Casein  
 expression by mammary epithelial cells, role of c-src (mouse), **241**, 710
- Casein kinase  
 Golgi apparatus, phosphorylation of osteopontin by, **240**, 602
- Casein kinase II, *see* Protein kinase CKII
- Caspase  
 reversible inhibition by nitric oxide via S-nitrosylation, **240**, 419
- Caspase-3  
 inhibition by S-nitrosation and oxidation caused by NO (U937 cells), **238**, 387  
 recombinant, expressed in *Pichia pastoris*, comparison to native enzyme, **238**, 920  
 related activity during apoptosis in leukemia U937 cells, effect of geranylgeraniol (human), **234**, 641
- CAT, *see* Chloramphenicol acetyltransferase
- Catabolite activator protein  
 proline-rich region, association with elongation factor 1 $\alpha$  and ribosomal protein L3 (*Saccharomyces cerevisiae*), **232**, 503
- Catalase  
 homodimeric catalase-peroxidase, purification and characterization (*Ana-cystis nidulans*), **235**, 545  
 role in TGF- $\beta$ -modulated effects of PDGF in rat VSMC, **232**, 1

- Catechin polyphenols  
inhibition of peroxynitrite-mediated tyrosine nitration, **232**, 164
- Catecholamine  
vesicles containing, exocytotic mechanism in pheochromocytoma cells, comparison with acetylcholine-containing vesicles (rat), **239**, 57
- Catechol 2,3-dioxygenase  
gene characterization (*Achromobacter xylosoxidans* KF701), **238**, 430  
gene structure in TOM plasmid (*Pseudomonas cepacia* G4), **234**, 578
- $\alpha$ E-Catenin  
alternative cDNA, molecular cloning (human), **237**, 177
- Cathepsin K/OC-2  
gene expression, effect of concanavalin A (rabbit), **234**, 600
- Cathepsin L  
gene encoding, activation in *v-src*-transformed cells, role of Egr family proteins, **238**, 665
- Cathepsin-related enzyme  
platelet lysosomal, effect of lactacystin (human), **234**, 729
- Caveolin  
and MAL proteolipid, detection in distinct lipid microenvironments in internal detergent-insoluble membranes in MDCK cells, **233**, 707
- Caveolin-1  
detergent solubility and association with endothelial NOS, modulation by tyrosine phosphorylation, **236**, 155  
increased expression in heterozygous Niemann-Pick type II human fibroblasts, **236**, 189
- CBF-A  
CARG box-binding protein, homologue in rat liver *qTBP42* telomeric and tetraplex DNA-binding protein, identification (mouse muscle cells), **237**, 617
- Cbl  
CrkL association with, and CrkL tyrosine phosphorylation, induction by erythropoietin and IL-3 in hematopoietic cells, **239**, 412
- CBP, *see* cAMP response element binding protein-binding protein
- CCAAT/enhancer binding protein  $\alpha$   
gene regulation during liver development (rat), **234**, 605
- CCAAT/enhancer binding protein  $\beta$   
gene regulation during liver development (rat), **234**, 605
- CCAAT/enhancer binding protein  $\delta$  promoter  
NF-1A repression domain inhibiting, identification, **238**, 744  
structure and function (rat), **231**, 30
- c-Cbl  
yeast two hybrid screen with, identification of interactions with 14-3-3 isoforms and cytoskeletal components, **240**, 46
- CD4  
fragment containing first two N-terminal domains, expression, purification, and characterization (mouse), **240**, 530  
soluble, binding with principal neutralizing domain of HIV-1 MN gp120, analysis using photoaffinity labeled analogues, **241**, 584
- CD11b  
monocyte chemotactic protein-4-induced upregulation in human eosinophils via pertussis toxin-sensitive G protein, **240**, 32  
PAF-stimulated surface expression in human neutrophils, effect of receptor-mediated calcium entry, **240**, 763
- CD14  
role in induction of NO synthesis in J774 macrophages by lipoteichoic acid from *Staphylococcus aureus*, **233**, 375
- CD24  
as signaling molecule for integrin-mediated cell binding: Src kinase association (mouse), **234**, 330
- CD30  
binding sites of TRAF1, 2, and 3, **233**, 592
- CD36  
formation of covalently associated dimers and multimers in platelets and transfected COS-7 cells, **240**, 812
- CD40  
binding sites of TRAF1, 2, and 3, **233**, 592  
cytoplasmic region, identification of 10-amino-acid segment common to all CD40-mediated cellular responses, **233**, 187
- CD40 ligand  
direct activation of T cells via tyrosine phosphorylation-dependent protein kinase C activation (human), **239**, 11
- CD43  
aberrant expression on colon adenoma and cancer cells, **238**, 612
- CD44  
endothelial, expression, regulation by hepatocyte growth factor/scatter factor (human), **233**, 1
- CD46  
expression, regulation by 3' untranslated region in transgenic mouse, **233**, 829
- Cdc42  
regulation of cell-cell adhesion of MDCK cells, **240**, 430
- CDEP protein  
with ezrin-like and Dbl homology domains, molecular cloning and characterization (human), **241**, 369
- C<sub>2</sub> dihydroceramide  
treated rat, NO production in alveolar macrophages, effect of ceramide, **234**, 738
- cdk2, *see* Cyclin-dependent kinase 2
- CDP-diacylglycerol synthase, *see* Phosphatidate cytidylyltransferase
- CDP-D-glucose 4,6-dehydratase  
*rjbG* gene encoding, identification and mutational analysis (*Acetobacter vinelundii*), **240**, 153
- Cell adhesion  
eosinophils to microvascular endothelial cells, and surface adhesion molecule expression on endothelial cells, effects of eotaxin (human), **241**, 136  
integrin-mediated, mouse CD24 as signaling molecule: association with Src kinases, **234**, 330  
MDCK cells, regulation by Cdc42 and Rac1 small GTPases, **240**, 430  
mesangial cells to extracellular matrix, integrin-mediated, disruption by metal-catalyzed oxidation of ECM proteins (mouse), **233**, 50  
myelomonocytic cells, pertussis toxin-induced, signaling mechanisms: role of tyrosine phosphorylation, **236**, 479  
neutrophils  
to fibrinogen, CD18-mediated, role of phosphatidylinositol 4,5-bisphosphate 3-kinase (human), **232**, 719  
integrin-mediated, regulation by actin polymerization (human), **238**, 910  
platelets to collagen, inhibition by cGMP-elevating agents (human), **231**, 412  
sites in MDCK cells, role of myosin binding subunit of smooth muscle myosin phosphatase, **230**, 552  
to substratum, loss of, upregulation of p21<sup>Cip1/WAF1</sup> expression in BALB/c 3T3 fibroblasts, **238**, 169  
U937 cells, PMA-stimulated, promotion by synthetic peptide FN-C/H-V from C-terminal heparin-binding domain of fibronectin, **239**, 205
- Cell adhesion molecules, *see also specific molecules*  
L1, support of  $\alpha v \beta 3$ -mediated migration of tumor cells and activated T cells (human), **232**, 236
- Cell binding  
by TIMP-2, role of C-terminal domain, **236**, 100
- Cell blotting  
in identification of phagocytic giant cell receptor for *Dictyostelium discoideum*, **230**, 505
- Cell-cell contact  
requirement for induction of Jurkat T cell apoptosis, **238**, 670
- Cell culture  
bone marrow cells, for osteoclast generation and bone resorption, role of M-CSF (pig), **231**, 231

Cell culture (*continued*)

- cancer cells grown as colonies and as monolayer, differential calnexin expression (human), **238**, 66
- epidermal keratinocytes in serum-free medium (human), **236**, 167
- Cell culture density
  - effect on expression of  $\alpha_2$ -macroglobulin receptor/LDL receptor-related protein in breast cancer BT-20 cells, **240**, 122
- Cell cycle
  - BRCA2* expression changes during, in normal breast epithelial cells and MCF-7 tumor cells (human), **234**, 247
  - Cdk inhibitor p27 phosphorylation by cyclin E/Cdk2 dependent on, analysis (human), **240**, 386
  - c-myc* expression during differentiation of mouse mammary epithelial cells: downregulation upon reaching confluence, **239**, 566
  - control with minimal cdk2 participation in fibrosarcoma clone cultured in protein-free medium (mouse), **232**, 622
  - DNA topoisomerase II $\alpha$  gene promoter regulation dependent on, analysis (mouse), **230**, 105
  - effect on telomerase activity in CHO B11 cells, **233**, 717
  - fission yeast, response to nutritional signals, role of nim1 protein kinase, **232**, 204
  - G0-1/S transition, Nim1-like kinase pathway (human fibroblasts), **236**, 130
  - G1 phase
    - arrest, abrogation after DNA damage, association with constitutive overexpression of *Mdm2*, *Cdk4*, and *Irf1* mRNAs in BALB/c 3T3 A31 variant 1-1 clone, **233**, 216
    - gene expression during hematopoietic lineage, **231**, 73
    - growth inhibition of cultured VSMC by adenovirus-mediated gene transfer of C-type natriuretic peptide (rat), **239**, 889
  - G2 phase, fibroblasts, effect of HIV-1 *vpr* gene product preventing cell proliferation (mouse), **232**, 550
  - inhibitor p21<sup>CIP</sup>, phosphorylation by cyclin A-cdk2 complexes, **241**, 434
  - phase
    - correlation with generation of <sup>1</sup>H NMR-detectable mobile lipids in stimulated lymphocytes (mouse), **239**, 868
    - role in radiation-induced micronuclei formation in breast cancer cells, **237**, 678
  - progression
    - and DNA synthesis, in human lymphocytes, regulation by mevalonate metabolite geranylgeranylphosphate, **241**, 376
    - effects of overexpression of polo-like kinase 1 (HeLa cells), **239**, 375
    - through late G<sub>1</sub> phase, role of calpain-like cysteine protease (human fibroblasts), **236**, 555
    - regulated expression of Rap1 in regenerating liver (rat), **230**, 578
    - regulation in HeLa cells, effect of overexpression of cyclin E and cyclin-dependent kinase inhibitor p27<sup>Kip1</sup>, **238**, 534
    - regulation of DNA damage-induced expression of suppressor gene *PML* (HeLa cells), **240**, 640
    - related genes, regulation in hepatocytes by TGF- $\beta$ 1 (rat), **238**, 539
    - staurosporine-induced telophase arrest and apoptosis blocking mitosis exit in human Chang liver cells, **236**, 594
    - telomerase activation dependent on, analysis in naturally synchronized culture of *Physarum polycephalum*, **232**, 492
- Cell cycle arrest
  - associated p21<sup>Cip1/WAF1</sup>, upregulation by loss of cell adhesion to substratum in BALB/c 3T3 fibroblasts, **238**, 169
  - in G1 phase, abrogation after DNA damage, association with constitutive overexpression of *Mdm2*, *Cdk4*, and *Irf1* mRNAs in BALB/c 3T3 A31 variant 1-1 clone, **233**, 216
  - radiation-induced, promotion by GML overexpression, **241**, 481
- Cell-cycle regulators
  - growth of cells with various status of, effects of exogenous p16<sup>INK4a</sup>, **234**, 386
- Cell death, *see also* Apoptosis
  - breakthroughs and views, **236**, 1
  - LPS/IFN- $\gamma$ -induced, in Raw 264.7 macrophages, protective effect of peroxy-nitrite, **241**, 37
- Cell differentiation, *see* Differentiation
- Cell envelope
  - cornified, formation, reduction by tetrameric peptide inhibitors of transglutaminase (human), **233**, 39
- Cell-free system
  - human neutrophil NADPH oxidase activation in, effect of actin, **230**, 206
  - yeast extracts, glucose 6-phosphate metabolism: irreversible metabolic transitions, **234**, 162
- Cell growth
  - anchorage-independent
    - glioblastoma cell line lacking p16<sup>INK4a</sup> protein, effect of p16<sup>INK4a</sup> protein, **231**, 743
    - HeLa cells, correlation with synthesis of glycoprotein hormone  $\alpha$  subunit, **233**, 425
    - ras*-transformed cells, inhibition on PolyHEMA surface by antisense oligodeoxynucleotides against K-*ras* (rat), **231**, 735
  - arrest
    - interleukin-6-induced, association with stat3-dependent transcriptional activation of p19<sup>INK4D</sup> (M1 cells), **238**, 764
    - TNF-mediated, in human endothelial cells, *c-myc* expression and RB phosphorylation during, **236**, 819
  - autocrine regulation in fetal and adult human fibroblasts, **237**, 348
  - bone marrow stromal cells, opposing effects of BMP3 and TGF- $\beta$ 1 (human), **241**, 787
  - breast cancer MCF-7 cells, induced by estrogenic pesticides, synergistic inhibitory effects of curcumin and genistein (human), **233**, 692
  - cells with various status of cell-cycle regulators, effects of exogenous p16<sup>INK4a</sup>, **234**, 386
  - cervical carcinoma cells negative for HPV, inhibition by retinoic acid via induction of insulin-like growth factor binding protein-5 secretion (human), **239**, 706
  - colon carcinoma SW620 cells, inhibition by 12-*O*-tetradecanoylphorbol-13-acetate (human), **232**, 737
  - dtsR* gene-disrupted *Brevibacterium lactofermentum* mutant, fatty acid requirements for, **234**, 157
  - effect on telomerase activity in CHO B11 cells, **233**, 717
  - glioblastoma cells
    - effect of scatter factor-hepatocyte growth factor expression (human), **235**, 743
    - unbounded and anchorage-independent growth in cell line lacking p16<sup>INK4a</sup> protein, effect of p16<sup>INK4a</sup> protein, **231**, 743
  - glioma cells
    - inhibitory effect of interferon- $\beta$  gene expression (rat), **232**, 698
    - in vivo*, suppression by functional expression of human p21<sup>WAF1/CIP1</sup> gene (rat), **233**, 329
  - hepatocytes, early responses in primary culture, tissue-type plasminogen activator and type-1 plasminogen activator inhibitor induction in, analysis (rat), **239**, 123
  - HL-60 cells, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418
  - inhibition by AP-1 gene antisense oligonucleotides in *Tsc2* gene mutant rat model, **241**, 24
  - inhibition by HGF in transformed rat liver epithelial cells, **236**, 396
  - leukemic cells positive for Philadelphia chromosome, effect of Grb2 and Crkl protein inhibition (human), **235**, 383
  - lung squamous carcinoma LK-2 cells, role of *Sonic hedgehog* (human), **238**, 658
  - neuroblastoma SK-N-SH cells, inhibition, induction by upregulation of type II protein kinase A (human), **232**, 469
  - NIH 3T3 fibroblasts, inhibition by *ZPK* gene overexpression (mouse), **231**, 153
  - osteosarcoma Saos-2 cells deficient in p53, suppression by p53, role of p53 oligomerization (human), **232**, 54

- p53-independent inhibition, and apoptosis, 2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone-induced in tumor cells: synergism with genistein, **239**, 467
- prostate cancer cells, stimulation by arachidonic acid, role of 5-lipoxygenase (human), **235**, 418
- and prostatic marker expression, in androgen-sensitive prostate cancer cell line LNCaP, regulation by activin A (human), **234**, 362
- skeletal myoblasts, effects of estrogen, **232**, 373
- solid tumors, suppression by antibody-based therapy targeting tumor vascular endothelial cells (rat), **236**, 493
- vascular smooth muscle cells
- G1 growth inhibition induced by adenovirus-mediated gene transfer of C-type natriuretic peptide *in vitro* (rat), **239**, 889
  - induction by selective activation of proteinase-activated receptor-2 (human), **241**, 762
- Cell lines
- ATDC5, chondrogenesis and cartilage differentiation, hedgehog cDNA cloning and expression (mouse), **235**, 142
  - BA/F3, c-Jun N-terminal kinase activation by granulocyte macrophage-colony stimulating factor (human), **234**, 611
  - cancer and immune cells, IL-13 receptor subunit composition, **238**, 90
  - CEM-SS, HIV-1 infected, redox state of cysteines in HIV-1 Vif, **240**, 257
  - CHSE-214, 90-kDa stress protein induced by fish rhabdovirus infection, characteristics (chinook salmon embryo), **233**, 316
  - FGF-stimulated, direct association of SHP2 with tyrosine-phosphorylated p90, **238**, 261
  - hematopoietic, retroviral-mediated gene transfer, green fluorescent protein variants as markers of, **234**, 371
  - High Five, baculovirus expression system for fungal cellobiohydrolase (*Trichoplysia ni*), **233**, 25
  - human, RBM3 mRNA levels, effect of cold stress: glycine-rich RNA-binding protein, **236**, 804
  - M21, heat-resistant, expressing human HSP70, intracellular distribution of stress glycoproteins, **237**, 382
  - mammalian
    - MAP kinase activation by cyclosporin A, **236**, 599
    - Stat5a activation by IL-6-type cytokines, **236**, 438
  - RBL<sup>PPR</sup>, cooperation of FcεR1 and formyl peptide receptor signaling pathways, **235**, 812
  - RIN m5F, 12-HETE, stimulation of stress-activated c-Jun protein kinase, **230**, 448
  - Sf9, stably transformed, showing improved folding of recombinant membrane protein, generation (*Spodoptera frugiperda*), **238**, 823
  - Sf21 (*Spodoptera frugiperda*), baculovirus expression system functional human decorin production and purification, **232**, 91
  - for fungal cellobiohydrolase, **233**, 25
  - V79, tyrosine metabolite fumarylacetoacetate mutagenicity, enhancement by glutathione depletion (Chinese hamster), **232**, 42
  - with various status of cell-cycle regulators, growth, effects of exogenous p16<sup>INK4a</sup>, **234**, 386
  - WISH, positive-strand RNA virus, induced cytopathic effect, role of IL-8 (human), **235**, 774
- Cell migration
- FBJ-LL, inhibition by ganglioside GD1a expressed in FBJ-S1 cells, **231**, 340
  - tumor cells and activated T cells, αvβ3-mediated, support by L1 adhesion molecule (human), **232**, 236
- Cell morphology
- and tau phosphorylation and cell death, relationship, analysis in NGF-deprived PC12 cells, **240**, 687
- Cell motility
- glioblastoma cells, dynamic characterization (human), **232**, 267
  - HaCaT keratinocytes, enhancement by bradykinin, **237**, 257
- Cellobiohydrolase I
- Trichoderma reesei*, expression in insect cells, **233**, 25
- Cell proliferation
- anterior pituitary cells, stimulation by angiotensin IV *in vitro* (rat), **232**, 292
  - associated regulation of telomerase in endometrium and role in early cancer diagnosis (human), **231**, 610
  - breast epithelial HBL100 cells, inhibition by dextran derivative CDMB7 by interference with FGF2 autocrine loop, **239**, 424; *erratum*, **241**, 804
  - fibroblasts
    - induction by 1,2-dimethylhydrazine auto-oxidation: role of iron and free radicals (mouse), **234**, 44
    - prevention by HIV-1 *vpr* gene product without G<sub>2</sub> arrest of cell cycle (mouse), **232**, 550
    - from small intestinal lamina propria, induction by lipopolysaccharide and role of nitric oxide (human), **240**, 458
  - gastrointestinal epithelial cells, substratum-dependent and region-specific control in serum-free culture (rat), **230**, 537
  - glomerular epithelial cells, role of extracellular matrix (rat), **231**, 160
  - H69 cells, relationship to Ca<sup>2+</sup> signaling pathways (human), **230**, 501
  - inhibition by Krüppel-type zinc finger protein ZBP-89, **237**, 230
  - JEG-3 cells, effect of benzo[a]pyrene and TCDD (human), **231**, 117
  - keratinocytes, role of heme oxygenase-carbon monoxide pathway (human), **241**, 215
  - leptin receptor mediating, functional expression by insulinoma-derived pancreatic β-cells (rat), **238**, 851
  - myoblasts in muscle cultures, effect of ED2+ macrophages (rat), **235**, 754
  - NG108-15 cells, inhibition by expression of POU transcription factor Brn-5, **236**, 693
  - osteoblast-rich populations from calvariae, stimulation by angiotensin II (rat), **230**, 176
  - pancreatic β cell line MIN6, induction by leptin via activation of MAP kinase, **241**, 765
  - peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
  - pulmonary artery smooth muscle cells, heparin inhibition of, effects of molecular weight, protein core, and charge (bovine), **241**, 18
  - Saccharomyces cerevisiae*, role of ALG7 N-glycosylation gene *gl* cyclin, **237**, 562
  - T helper 1 cells, counter-regulation by nitric oxide and interleukin-2 (mouse), **233**, 14
  - thrombin-stimulated, inhibition by ceramide, role of extracellular signal-regulated protein kinase (CCL39 cells), **240**, 405
  - vascular smooth muscle cells
    - stimulation by advanced glycation end products (rabbit), **239**, 111
    - in vitro* and *in vivo*, stimulation by immediate early gene of cytomegalovirus (human), **231**, 447
- Cell shrinkage
- osmotic, inhibition of Fas-induced apoptotic cell death (Jurkat T cells), **236**, 517
- Cell signaling
- ceramide-mediated, role in vasodilation in rat VSMC, **237**, 95
- Cell spreading
- astrogloma cells, mediation by adenosine A<sub>1</sub> receptor (human), **241**, 297
  - effect of HSV-1 glycoprotein (African green monkey kidney cell), **235**, 31
- Cellular recognition sequence
- epimorphin, identification, and role of cell/epimorphin interaction in lung branching morphogenesis, **234**, 522
- Cellulase
- gene cloning and sequencing and characterization of gene products (*Erwinia carotovora* subsp. *carotovora* LY34), **241**, 636
- Central nervous system
- cationic liposome-mediated *in vivo* gene transfer into, efficiency, enhancement by cytoplasmic gene expression system (mouse), **234**, 15
  - desert locust *Schistocerca gregaria*, identification of two peptides, **241**, 530
  - and testis, of transgenic mice, amyloid precursor protein gene promoter constructs preferentially expressed in, **240**, 759

- mRNA translation in *E. coli*, function of  $\epsilon$  sequence of phage T7 as initiator of, **236**, 253
- Chlordane  
and endosulfane and DDT, induced growth of breast cancer MCF-7 cells, synergistic inhibitory effects of curcumin and genistein, **233**, 692
- Chloride  
cytoplasmic levels in endothelial cells, effects on basal and inositol 1,4,5-trisphosphate-induced  $\text{Ca}^{2+}$  release (bovine aorta), **238**, 292  
swelling-activated conductance in *Xenopus* oocytes, relation to functional incorporation of P-glycoprotein into plasma membrane, **237**, 407
- Chloride channels  
CFTR-like, in non-ciliated bronchiolar epithelial cells (rabbit), **230**, 470  
enriched membranes, from epithelium, copurification with nonmuscle myosin IIA (bovine), **231**, 369
- Chloride conductance  
cAMP-dependent, activation by FSH in TM4 Sertoli cells, **233**, 203  
in parotid acinar secretory granules, modulation by GTP-binding protein  $G_s$  (rat), **238**, 638
- Chloride conductance regulatory protein  
swelling-induced,  $\text{pI}_{\text{in}}$ , from ocular ciliary epithelium, cloning and functional expression (rabbit), **239**, 692
- Chloride current  
cardiac CFTR, in ventricular myocytes, effect of genistein (guinea pig), **235**, 74
- 2-Chloroadenosine  
induction of apoptosis of C2C12 myoblastic cells via alteration of actin cytoskeleton, **238**, 361
- 4-Chloroaniline  
DNA ligands to, *in vitro* selection using magnetic microbead-based affinity separation and fluorescence detection, **234**, 117
- Chloroaromatics  
DNA ligands to, *in vitro* selection using magnetic microbead-based affinity separation and fluorescence detection, **234**, 117
- 1-Chloro-2,4-dinitrobenzene  
activity of four allelic forms of glutathione *S*-transferase hGSTP1-1 for, analysis, **238**, 397
- 2-Chloro- $N^6$ -(3-iodobenzyl)adenosine  
adenosine  $A_3$  receptor agonist, effects in human astroglial cells, **241**, 297
- 2-Chloro- $N^6$ -(3-iodobenzyl)adenosine-5'-*N*-methyluronamide  
protective effect against apoptosis of HL-60 and U-937 cells induced by adenosine  $A_3$  receptor antagonists, **232**, 317
- Chlorophyll  
detergent effects on light-harvesting chlorophyll *alb*-protein complex crystallization, fluorescence depolarization study (spinach), **233**, 555
- Chloroplasts  
*Chlamydomonas reinhardtii*, thylakoid membrane vesicles able to integrate and import precursor proteins in *in vitro* system, isolation, **237**, 532  
fructose-1,6-bisphosphatase, cysteine residues involved in reductive amination and structural stability, characterization (rapeseed), **232**, 388  
 $\text{H}^+$ -ATPase, ion-conductive properties after reconstitution into bilayer membrane, effects of ADP, dithiothreitol, and  $\text{Mg}^{2+}$  (spinach), **232**, 461  
threonine tRNA gene, transcription and processing in homologous *in vitro* system (spinach), **233**, 380
- CHO cells  
 $\beta$ 1,6 $N$ -acetylglucosaminyltransferase expression, **237**, 653  
*S*-adenosylhomocysteine hydrolase promoter activity in transfected cells, **240**, 580  
and cells transfected with inducible c-Myc with/without apoptosis inhibitor Bcl-2, activity and expression of tissue transglutaminase, **236**, 280  
CHO B11, telomerase activity as function of cell growth and cell cycle stage, **233**, 717  
CHO-K1, plasmid DNA delivery into, cationic lipid for, **236**, 126  
coupling of rat chimeric  $\text{D}_2/\text{D}_3$  dopamine receptor to adenylyl cyclase, **237**, 394
- expression of murine smooth muscle myosin heavy chains, **232**, 313  
formation of recombinant triple-helical collagen, **231**, 178  
green fluorescent protein long-term stable expression, **236**, 347  
membrane cofactor protein expression, regulation by 3' untranslated region, **233**, 829  
mutant defective in peroxisome targeting signal-1 receptor, isolation, **230**, 402  
neutral cholesterol ester hydrolase activity, suppression by antisense DNA of hormone-sensitive lipase, **233**, 655  
nucleus, p70 S6 kinase, effect on insulin, **234**, 681  
okadaic acid-resistant, unstable expression of multi-drug resistance phenotype, **232**, 398  
overexpressing mutant dynamin, subcellular distribution of GLUT4 in, **241**, 401  
recombinant bovine conglutinin expression and characterization, **238**, 856  
SHPS-1 tyrosine phosphorylation and association with SHP-2, stimulation by EGF, **239**, 483
- Cholecystokinin  
gene expression in pancreas and upper digestive tract, effect of fasting (rat), **231**, 835
- Cholecystokinin 33  
cleavage by recombinant prohormone convertase 2 *in vitro*, **231**, 149
- Cholecystokinin A receptor  
gene encoding, molecular structure (mouse), **236**, 630
- Cholesterol  
dietary, translational regulation of hepatic HMG-CoA reductase (rat), **232**, 278  
metabolism in macrophages, effects of lycopene and  $\beta$ -carotene, **233**, 658
- Cholesterol sulfate  
inhibition of pancreatic trypsin and chymotrypsin, **237**, 262
- Choline acetyltransferase  
stimulation by insulin in embryonic retina, role of jun protein (chicken), **232**, 788
- Cholinephosphotransferase, *see* Diacylglycerol cholinephosphotransferase
- Cholinesterase  
gene, with L3301 mutation, identification as fluoride-resistant gene (human), **240**, 372
- Chondrocytes  
articular  
expression of membrane-linked metalloproteinase family (human), **230**, 335  
mitogen-activated protein kinase, effect of interleukin-1 (rabbit), **230**, 573  
connective tissue growth factor mRNA preferentially expressed in, cloning (human), **234**, 206  
cultured in alginate, collagen synthesis, inhibition by deoxycycline (bovine), **237**, 107  
embryonic, differentiated, basic helix-loop-helix protein DEC1 expressed in, characterization (human), **236**, 294  
growth plate, voltage-sensitive  $\text{Ca}^{2+}$  channels (chicken), **234**, 432  
identification of autocrine colony-stimulating factor chondromodulin-I: stimulation of colony formation of growth plate chondrocytes in agarose culture, **241**, 395
- Chondrogenesis  
smoothened cDNA cloning and expression patterns of hedgehog proteins during, analysis (ATDC5 cell), **235**, 142
- Chondroitin sulfate  
chains in urinary trypsin inhibitor, role in inhibition of LPS-induced increase of cytosolic free  $\text{Ca}^{2+}$  in HL60 and HUVEC cells, **238**, 560
- Chondromodulin-I  
stimulation of colony formation of growth plate chondrocytes in agarose culture, **241**, 395
- Choriocarcinoma cells  
JAR, expression of testis-specific transcripts, **241**, 653  
NJG, soluble D-factor/LIF receptor mRNA detection and production of soluble receptor (human), **232**, 427

## Subject Index

Choriocarcinoma cells (*continued*)

- placental, JEG-3, proliferation and c-myc and growth factor expression, effect of benzo[*a*]pyrene and TCDD (human), **231**, 117

## Choriodecidual cells

- monocyte chemotactic protein-1 synthesis, inhibition by progesterone, **239**, 557

## Chorion

- laid eggs of Medfly *Ceratitis capitata*, detection of antibacterial peptides, **240**, 657
- telomerase activity (human), **241**, 498

## Chromaffin cells

- adrenal medulla, internalization of short-chain isoprenyl diphosphates (bovine), **238**, 7
- inositol phosphate formation induced by ATP, enhancement by neuropeptide Y (bovine), **239**, 287

## Chromate

- lung cancer in workers exposed to, associated p53 gene mutations, **239**, 95

## Chromatin

- binding activity of lamina-associated polypeptide 2, **238**, 240
- endonuclease bound to, specific detection by anti-Ca<sup>2+</sup>, Mg<sup>2+</sup>-dependent endonuclease antibody, **236**, 423
- fiber, folding, role of histones H3-H4 (chicken), **230**, 136
- hepatocyte, neutral sphingomyelinase detection and role in hepatic regeneration (rat), **236**, 29

## Chromodomains

- Pdd1p protein, hydrophobic cluster analysis (*Tetrahymena*), **235**, 103

## Chromosomes

## I

- localization of G protein-coupled receptor gene (human), **230**, 69
- trait loci for blood pressure and related traits (rat), **235**, 343
- ID, mapping of Limk2 gene (mouse), **241**, 243
- Ip36, localization of tumor necrosis factor receptor CD137, **235**, 699
- Iq55,  $\gamma$ -aducan gene mapping and identification of polymorphisms in genetic hypertension (rat), **237**, 685
- 3p21·1-p14·2, peroxisomal branched-chain acyl-CoA oxidase gene assignment (human), **231**, 767
- 3p25, peroxisome proliferator-activated receptor  $\gamma$  gene localization (human), **233**, 756
- 3q27, *dishevelled DVL-3* gene mapping (human), **239**, 510
- 4p16.3, *RGS12* gene mapping (human), **233**, 770
- 7q34-q36, 5-HT<sub>5A</sub> receptor gene on, linkage mapping (human), **233**, 6
- 8q22, p14.5 mapping (human), **241**, 59
- 10, trait loci for blood pressure and related traits (rat), **235**, 343
- 11
- deafness mutation *shaker-2* region, genetic and physical delineation (mouse), **234**, 107
- mapping of olfactory receptor genes expressed in male germ line (human), **237**, 283
- 15q24, galanin-1 receptor gene localization (human), **241**, 558
- 16, *Dyrk* localization (mouse), **231**, 640
- 17, mapping of olfactory receptor genes expressed in male germ line (human), **237**, 283
- 18
- mapping of mouse TCOF1 homologue, **238**, 1
- trait loci for blood pressure and related traits (rat), **235**, 343
- 19, mapping of olfactory receptor genes expressed in male germ line (human), **237**, 283
- 19p13.3, syntenic region on, mapping of human guanidinoacetate methyltransferase to, **238**, 723
- 19q13.1, identification of cluster of four G protein-coupled receptor genes close to CD22 gene (human), **239**, 543
- 20p13 and 2, SHP substrate-1 gene localization (human, mouse), **231**, 61
- 20q11, helix-loop-helix Id1 gene localization (human), **231**, 628

- 21, Down syndrome region, SH3BGR protein in, high-resolution physical map and identification of potential regulatory sequences (human), **241**, 321

## 21q22.3

- nuclear gene within DFN8/10 critical region on, mitochondrially located protein encoded by, immunochemical characterization (human), **238**, 806
- TMEM1 gene, genomic organization and nucleotide sequence (human), **235**, 185

- 22, peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2 mapping (bovine), **239**, 857

- alleles at loci on chromosomes 4 and 13 of spontaneously hypertensive rat, effect on blood pressure, **238**, 586

- arginase II gene localization (human), **233**, 487

- fine mapping of skeletal muscle genes (human), **230**, 347

- INK4a* locus, mutations in squamous cell carcinomas of skin (human), **232**, 38

- major histocompatibility complex class I-related gene cDNA localization in murine genome, **238**, 697

- replication, DnaA protein initiating, conformational transition induced by ATP (*Escherichia coli*), **232**, 130

- transferred, gene expressions in mouse cell lines (human), **230**, 315

## Chronic myelogenous leukemia

- transcriptional activation of human LIM-HOX gene *hLH-2* in, role of *cis*-acting effect of *Bcr-Abl*, **233**, 806; **234**, 742

## Chrysene diol epoxide

- activity of four allelic forms of glutathione *S*-transferase hGSTP1-1 for, analysis, **238**, 397

## Chymotrypsin

- mammalian pancreatic, inhibition by sulfated lipids, **237**, 262

- role of disulfide bond C191-C220, **230**, 592

 $\alpha$ -Chymotrypsin

- inactivator 2,2-dimethyl-3-(*N*-4-cyanobenzoyl)amino-5-phenyl pentanoic anhydride, synthesis, **240**, 850

- lyophilized, imprinting, effect on reactivity of active-site imidazole, **240**, 27

## Cigarette smoke

- extract, inhibition of plasma paraoxonase activity by modification of enzyme's free thiols (human), **236**, 289

- related lung damage, role of CD8<sup>+</sup> Th2 lymphocytes (human), **239**, 146

## Ciliary body

- endogenous ADP-ribosylation of G<sub>in</sub> protein in, stimulation by NO (bovine), **235**, 482

## Cilostazol

- effect on heparin-binding EGF-like growth factor expression in macrophages and VSMC, **238**, 478

## Cinnamon bark

- bacterial endotoxin inhibitor derived from, **234**, 506

## Circular dichroism

- Ca<sup>2+</sup> channel antagonist  $\omega$ -conotoxins, **230**, 133

- Soret, hemoglobin, in analysis of heme-heme excitonic coupling, **235**, 610

## Circulatory system

- fetal, S-nitrosohemoglobin in, role in blood pressure regulation (human), **239**, 875

*cis*-acting effect

- Bcr-Abl*, effect on transcriptional activation of LIM-HOX gene in chronic myelogenous leukemia (human), **233**, 806; **234**, 742

## Cisplatin

- DNA damaged by, effect of mitochondrial endonuclease G (bovine), **235**, 291
- effect in human renal carcinoma cells, synergistic effect of haloenol lactone, **241**, 13

- induced nitric-oxide synthase expression in human neuroblastoma cell line, mediation by TNF- $\alpha$ , **233**, 788

- induced transcriptional upregulation in lung cancer cell line SBC-3, role of proximal 5'-flanking sequence of  $\gamma$ -glutamylcysteine synthetase heavy subunit gene (human), **236**, 616

- resistant L1210 cells, processes, role in cellular response to drug treatments (mouse), **234**, 573
- Citrate synthase/14-nm filament protein  
*Tetrahymena*, bifunctional property after gene expression in *E. coli*, **237**, 205
- Citrulline  
citrulline–argininosuccinate–arginine cycle, coupling to  $\text{Ca}^{2+}$ -signaling in pancreatic  $\beta$ -cells (rat), **235**, 619  
and NO, enzyme producing, detection in kidney (rat), **232**, 672
- c-Jun/AP-1  
mediation of oxidant-initiated apoptosis in glomerular mesangial cells (rat), **240**, 496
- c-Jun N-terminal kinase  
activation  
by GM-CSF in BA/F3 cells, **234**, 611  
by hypoxia and hypoxia/reoxygenation in cultured cardiac myocytes (rat), **239**, 840  
by PDGF, role of phosphatidylinositol-3 kinase (COS-7 cells), **232**, 273  
and extracellular signal-regulated kinases, activities in aorta of hypertensive rats *in vivo*, **236**, 199  
JNK2- $\alpha$ 1, gene expression in developing chick brain, **234**, 489; *erratum*, **236**, 538  
in lymphoblastoid cells, effect of rapamycin (mouse), **230**, 386
- c-Jun protein  
binding to zinc-binding transcription regulatory protein, regulation by zinc ions and protein kinase C phosphorylation (human), **230**, 331
- c-Jun protein kinase  
stress-activated, stimulation by 12-HETE in RIN m5F cells, **230**, 448
- Clonidine  
and amiloride and gabexate mesylate, competitive inhibition of swine kidney copper amine oxidase, **240**, 150
- Cloprostenol  
inhibition of adipose differentiation of primary culture of adipocyte precursors in defined medium (rat), **233**, 200
- Clostridium perfringens*  
effect on formation of azoxymethane-induced aberrant crypt foci in colon (rat), **238**, 753
- Clozapine  
JL 13 sensitivity to oxidative phenomena in comparison with, **238**, 252
- Cluster analysis  
hydrophobic, Pdd1p protein chromodomains (*Tetrahymena*), **235**, 103
- Clusterin  
identification of glycoprotein in colloid of pituitary gland (pig), **234**, 712
- c-met  
expression in HMC-1 mast cell line (human), **239**, 740
- CMKRL1  
chemoattractant receptor, leukotriene  $\text{B}_4$  identification as functional ligand binding to and activating, **240**, 162
- CMKRL3  
chemoattractant-like receptor, cDNA cloning and tissue distribution (rat), **241**, 390
- CMTI-III  
trypsin inhibitory activity, role of distance between basic group of CMTI-III position  $\text{P}_1$  residue side chain and  $\text{Asp}^{189}$  in substrate pocket of trypsin, **240**, 869
- c-Myc  
expression  
by human neutrophils, **233**, 700  
interference during TNF-mediated growth arrest in human endothelial cells, **236**, 819  
in neuroblastoma cells, regulation by 1,25-dihydroxyvitamin  $\text{D}_3$  (mouse), **235**, 15  
gene encoding, transcriptional activation by SV40 large T antigen (human), **235**, 153
- inducible, with/without apoptosis inhibitor Bcl-2, CHO cells stably transfected with, activity and expression of tissue transglutaminase, **236**, 280  
induction in HT29-D4 cells, effect of tubulin agent pretreatment (human), **231**, 751
- mRNA  
antisense pentadecadeoxynucleotides targeted against, inhibition of telomerase in human leukemic cell lines, **241**, 775  
levels in JEG-3 cells, effect of benzo[a]pyrene and TCDD (human), **231**, 117  
overexpression concomitant with  $\alpha$ -prothymosin during hepatic carcinogenesis (rat), **232**, 817
- Coatmer protein  
association with platelet-derived growth factor receptor  $\beta$ , **235**, 455
- Coat protein  
minor 10-kDa, of filamentous phage  $\phi$ Lf, identification of gene VI coding for, **239**, 752
- Cobalt ion  
effect on binding activity of human leukocyte leukotriene  $\text{B}_4$  receptor, **236**, 355
- Cobrotoxin  
genomic structure (Taiwan cobra), **239**, 756
- Cochlea  
alternatively spliced isoforms of  $\text{Na}^+/\text{Ca}^{2+}$  exchanger (guinea pig), **233**, 737
- Coelenterazine analogues  
substrates for *Renilla luciferase*, *Oplophorus luciferase*, and apoaquorin used as reporter proteins, **233**, 349
- Coenzyme A  
effect on luminescent reaction catalyzed by firefly luciferase, **237**, 445
- Coenzyme Q  
increase associated with vitamin A deficiency, effect on respiratory complex I deficiency in cardiac mitochondria (rat), **233**, 451
- Coenzyme  $\text{Q}_{10}$   
activities in animal models and low blood levels in cancer patients, **234**, 296  
increase at plasma membrane, stimulation of ascorbate stabilization in  $\rho^0$ HL-60 cells by, **234**, 79
- Coformycin  
tight-binding interaction with adenosine deaminase, role of N-3 sugar moiety, **236**, 88
- Colchicine  
and analog MTPT, differential effects on assembly-independent GTPase activity of  $\beta$ -tubulin isoforms (bovine brain), **231**, 698
- Cold exposure  
and  $\text{T}_3$  treatment and high-fat feeding, effects on UCP3 regulation in rat skeletal muscle and BAT, **240**, 222
- Cold stress  
and RBM3 mRNA levels in human cell lines: glycine-rich RNA-binding protein, **236**, 804
- Collagen  
binding to platelet  $\alpha 2\beta 1$ , effect on  $\alpha 2\beta 1$  affinity for collagen (human), **232**, 724  
molecular stiffness, determination, **232**, 251  
platelet adhesion to, inhibition by cGMP-elevating agents (human), **231**, 412  
recombinant triple-helical, formation in CHO cells, **231**, 178  
synthesis  
by bovine chondrocytes cultured in alginate, inhibition by deoxycycline, **237**, 107  
by pelvic cartilage, effect of boric acid solution (chicken embryo), **234**, 263  
in small intestinal lamina propria fibroblasts, induction by lipopolysaccharide and role of nitric oxide (human), **240**, 458
- type I  
depolymerization, by recombinant catalytic domain of collagenase-3 (mouse), **230**, 202

## Subject Index

Collagen (*continued*)

mRNA, spatial distribution in *Paracentrotus lividus* eggs and embryos, **238**, 334

## type IV

production by glomerular endothelial cells under normoglycemic conditions, stimulation by glycated albumin (rat), **239**, 91  
regulation of C1 inhibitor function by binding (human), **230**, 597  
tryptophan residues exposed to peroxynitrite, oxidative modification, **234**, 82

## Collagenase-3

recombinant catalytic domain, depolymerization of type I collagen by cleavage of aminotelopeptides (mouse), **230**, 202

## Colloids

pituitary gland, glycoprotein, identification as clusterin an glycosylated albumin fragments (pig), **234**, 712

## Colon

azoxymethane-induced formation of aberrant crypt foci, effect of intestinal bacteria (rat), **238**, 753  
expression of aquaporin with permeability to water and urea (mouse), **240**, 324

## Colon adenocarcinoma

associated cachexia, depletion of liver glycogen in, mechanism (mouse), **241**, 49

## Colon adenocarcinoma cells

aberrant expression of leukocyte-associated sialoglycoprotein CD43, **238**, 612  
Caco-2, calcium-dependent proliferation, role for luminal extracellular calcium-sensing receptor (human), **232**, 80

## HT-29

expression of cyclin D, p21, and cyclin-dependent kinase 2, effects of butyrate, **232**, 169  
protein kinase CKII regulation, effect of sodium butyrate (human), **233**, 673

## Colon adenoma cells

aberrant expression of leukocyte-associated sialoglycoprotein CD43, **238**, 612

## Colon cancer cells

associated epithelial antigen A33, posttranslational modifications (human), **236**, 682  
HT115, interaction with endothelium, regulation by hepatocyte growth factor/scatter factor (human), **233**, 1

## Colon carcinoma

expression of *dishevelled DVL-3* gene (human), **239**, 510

## Colon carcinoma cells

C-26, toxicity of cytokines, role of TNF-mediated apoptosis (mouse), **233**, 270

## HT-29

calnexin expression in cells grown as colonies and as monolayer, **238**, 66  
correlation of enterocytic differentiation with fine structure and sulfation of perlecan, **238**, 874  
differentiation and expression of HNF-4 isoform and HNF-1 $\alpha$ /HNF-1 $\beta$  variant mRNAs (human), **235**, 820  
G $\alpha$  protein, role in macroautophagic sequestration and intracellular trafficking of N-linked glycoproteins (human), **235**, 166

HT29-D4, c-myc induction, effect of pretreatment by tubulin agents (human), **231**, 751

SW620, growth inhibition by 12-*O*-tetradecanoylphorbol-13-acetate (human), **232**, 737

## Colony-stimulating factor

chondrocyte, autocrine, stimulating colony formation of growth plate chondrocytes in agarose culture, identification, **241**, 395

## Colorectal cancer

hereditary nonpolyposis, somatic mutations of *hMSH3* with reference to microsatellite instability (human), **236**, 248  
overexpression of SAP-1 (human), **231**, 705  
role of deregulation of homeobox gene expression (human), **232**, 742

## Colorectal cancer cells

canalicular multispecific organic anion transporter expression (human), **240**, 606

COLO 201, apoptosis induced by 5-fluorouracil/interferon- $\gamma$  combination, mechanisms (human), **240**, 376

## Colorimetric inhibition study

single-stranded DNA decamer sequence interactions with dinitrotoluene, **236**, 344

## Complementarity-determining region

CDR-H3 of mouse monoclonal antibody 13-1 against porphyrin derivative, identification of disulfide bond, **240**, 566

## Complementary DNA

56–58-kDa antigen associated with transplant coronary artery disease, cloning and expression (human), **236**, 716

1-acyl-*sn*-glycerol-3-phosphate acyltransferase, cloning and expression (mouse), **237**, 663

adrenoleukodystrophy-related protein, cloning (human), **239**, 261

aldehyde dehydrogenase constitutively expressed in hepatic cytosol, cloning (rat), **236**, 527

amphiphysin isoform, cloning and tissue-specific expression of multiple splice variants (human), **236**, 178

apoptosis signal-regulating kinase 1, molecular cloning and characterization (mouse), **239**, 905

aquaporin 9, cloning and expression: glycerol permeability (human adipose tissue), **241**, 53

bfp, identification and cloning: RING finger protein (rat brain), **240**, 8

bicistronic transcript encoding dentin-specific proteins, sequence (rat), **231**, 425

BMAL-1 protein, cloning and tissue-specific expression (human), **233**, 258

bone morphogenetic protein type II receptor, cloning (mouse), **235**, 499

$\kappa$ -bungarotoxin, expression and sequence analysis (snake venom), **230**, 192

cAMP response element modulator, cloning, tissue distribution, and isoform identification (dog), **237**, 74

$\alpha$ E-catenin, alternative human form, cloning, **237**, 177

CDEP protein with ezrin-like and Dbl homology domains, cloning and characterization (human), **241**, 369

ceramide galactosyltransferase, cloning, characterization, and expression (human), **232**, 449

chemoattractant-like receptor CMKRL3, cloning and tissue distribution (rat), **241**, 390

cholinephosphotransferase, partial characterization (guinea pig liver), **241**, 504

$\gamma$ S-crystallin, characterization:  $\gamma$ S1 and  $\gamma$ S2 (lip shark), **240**, 51

cytochrome b $_5$  soluble and membrane-bound forms, isolation and characterization (pig), **240**, 80

cytochrome P450 3A30, isolation from marine teleost liver (*Fundulus heteroclitus*), **236**, 306

cytochrome P450 4C8, isolation and identification from termite *Mustotermes darwiniensis*, **241**, 579

*dishevelled DVL-3* gene, cloning, mapping to 3q27, and expression in human breast and colon carcinomas, **239**, 510

DJ-1, transformation of NIH3T3 cells using *ras* (mouse), **231**, 509

DNase, cloning and characterization (human), **231**, 499

E2F-1, cells overexpressing, binding of phosphorylated forms of E2F-1 to retinoblastoma protein in, analysis (mouse), **232**, 336

elongin regulatory subunits, molecular cloning (*Drosophila melanogaster*, *Saccharomyces cerevisiae*), **241**, 334

FKBP51, cloning and sequence (human), **232**, 437

Fringe and C-Fringe 1, identification (chicken), **234**, 754

GP-1, identification (human, mouse), **231**, 360

## G protein-coupled receptor

bovine renal, cloning, **238**, 107

expressed in endothelial cells exposed to fluid shear stress, cloning (human), **240**, 737

GPR41, cloning and expression (rat lung), **234**, 190

- GRB-7, molecular cloning and sequence (human), **232**, 5
- Gu/RNA helicase II-binding protein, isolation and sequencing (human), **234**, 335
- hepatic rhodanese, cloning and expression (human), **231**, 56
- HMG-like protein Pf16, cloning (*Plasmodium falciparum*), **234**, 101
- HSC70 heat shock cognate protein, cloning (*Pleurodeles waltl*), **238**, 159
- human H<sup>+</sup>/peptide cotransporter regulatory factor, cloning and nucleotide sequencing, **237**, 577
- 25-hydroxyvitamin D<sub>3</sub> 1 $\alpha$ -hydroxylase, cloning (human), **239**, 527
- inositol 1,3,4-trisphosphate 5/6 kinase, characterization (*Arabidopsis thaliana*), **232**, 678
- integrin variant  $\beta$ 4E, nucleotide sequence (human), **235**, 826
- iodothyronine deiodinase, chicken type I, cloning and sequence analysis, **241**, 459
- library construction from small amounts of total RNA by suppression PCR effect, **230**, 285
- Limk2 gene, cloning, genomic organization, and chromosomal localization (mouse), **241**, 243
- long-chain acyl-CoA hydrolases from brain and liver cytosol, molecular cloning and expression (rat), **232**, 198
- lysosomal  $\alpha$ -mannosidase, full-length, isolation and nucleotide sequence (human), **200**, 239; *erratum*, **232**, 583
- major histocompatibility complex class I-related human gene, isolation and analysis of murine homolog, **238**, 697
- MAN2B2 encoding mouse homologue of porcine 135-kDa  $\alpha$ -D-mannosidase, cloning: stage-specific expression in spermatogonia, **241**, 439
- mBSSP-3, cloning: murine brain-specific serine protease with Kringle-like domain and scavenger receptor cysteine-rich motifs, **239**, 386
- monocyte chemotactic protein-2, cloning (human), **231**, 726
- MUC3, cloning: novel 59-amino acid tandem repeat region (human), **238**, 143
- multidrug resistance protein homologue *SMRP*, cloning from human cancer cell line, **238**, 790
- myotoxin  $\alpha$ , translated and untranslated regions, nucleotide sequence (rattlesnake), **230**, 607
- neural Ca<sup>2+</sup> channel  $\alpha$ -subunit, cloning and characterization (squid), **230**, 147
- NeuroD* mRNA cloning from retina (human), **233**, 459
- obtusifoliol 14 $\alpha$ -demethylase, cloning and expression in yeast (wheat), **230**, 381
- olfactory receptor genes expressed in male germ line, molecular cloning and chromosomal mapping (human), **237**, 283
- oxygen-regulated protein, ORP150, cloning and expression (human), **230**, 94
- P2Y6, cloning, and pseudogene identification: comparison of P2Y receptor subtype expression in bone and brain tissues (human), **237**, 297; *erratum*, **240**, 507
- p150<sup>Glucl</sup>, sequence (mouse), **231**, 344
- peptidylglycine  $\alpha$ -hydroxylating monooxygenase, cloning (sea anemone), **241**, 509
- phosphoinositide 3-kinase HsC2-PI3K, cloning (human), **233**, 537
- PMP69, sequence: putative peroxisomal ABC-transporter (human), **237**, 152
- presenilin- $\alpha$  and - $\beta$ , cloning and expression in oogenesis and embryogenesis (*Xenopus laevis*), **231**, 392
- proopiomelanocortin, sequence (white sturgeon), **230**, 452
- protein phosphatase 2A B $\beta$ ' subunit, cloning (*Xenopus laevis*), **232**, 218
- putative carboxylesterase in intestine, molecular cloning and characterization (human), **233**, 117
- Qip1, cloning and comparison with Rch1 and hSrp1 in interaction with DNA helicase Q1/RecQ (human), **234**, 48
- RG54*, isolation: mRNA distribution in mouse brain shown by *in situ* hybridization, **241**, 281
- Rgs12* and *Rgs14*, cloning and expression analysis (rat), **233**, 770
- RNB6, highly expressed in neonatal brain, cloning: member of Ena/VASP family (rat), **237**, 307; *erratum*, **241**, 611
- salt-tolerant protein, cloning by functional complementation in yeast (rat), **229**, 134; *erratum*, **240**, 244
- scavenger receptor class B type I, cloning and characterization (rat), **234**, 499
- secretory leukocyte protease inhibitor, cloning and characterization (mouse), **232**, 687
- SHP substrate-1, cloning (human, mouse), **231**, 61
- sigma receptor type I, cloning and structural analysis (mouse), **241**, 535
- smoothened, hedgehog protein, cloning and expression (ATDC5 cell), **235**, 142
- SMT3, identification and characterization (*Caenorhabditis elegans*), **234**, 788
- somatolactin, clone sequence (goldfish), **232**, 282
- spermatogenesis-associated protein RSP29, cloning and characterization (rat), **241**, 714
- SSI-2 and SSI-3, cloning and functional analysis (human), **237**, 79
- steroidogenic acute regulatory protein, nucleotide sequence (rat), **230**, 528
- sugar transporter expressed in neonatal mouse hippocampus, cloning, **238**, 126
- TATA-binding protein, isolation and sequencing: two mRNAs generated by alternative polyadenylation (chicken embryo), **234**, 406
- TBP-binding repressor Dr1, expression and sequence (*Xenopus laevis*), **231**, 561
- TBP-interacting protein -49, nucleotide sequence (rat), **235**, 64
- testis-specific sequences, identification and expression in tumor cells, **241**, 653
- thyrotropin receptor, ovine brain-derived, cloning and expression, **238**, 173
- transcription factor NFATc, molecular cloning and functional characterization (mouse), **240**, 314
- translocation protein 1, human homolog, identification (*Drosophila*), **230**, 100
- tsec-1*, expressed specifically in adult testis, molecular cloning and analysis (mouse), **240**, 261
- from venom glands of *Naja n. atra* and *Bungarus multicinctus*, snoRNAs amplified from, extended sequence complementarity to 5S rRNA, **236**, 782
- vitamin D<sub>3</sub> 25-hydroxylase, cloning, structure, and expression (porcine liver), **241**, 491
- X-linked hypophosphatemia gene, cloning and expression (human), **231**, 635
- zinc finger protein, expressed in cerebellum and hippocampus, cloning (human, mouse), **231**, 481
- Complementation
- analysis of fibroblasts from peroxisomal fatty acid oxidation deficient patient, **235**, 176
- Ca<sup>2+</sup>-activated K<sup>+</sup> channel N- and C-terminal domains, effects of mutations and deletions in S8-S9 interdomain region, **240**, 623
- lep*: leader peptidase I (*Azotobacter vinelandii*), **239**, 393
- membrane transport deficiency in *Saccharomyces cerevisiae* by recombinant ND4 fusion protein, **238**, 811
- metabolic correction of triose phosphate isomerase deficiency *in vitro* (human), **232**, 528
- in yeast, in molecular cloning of rat salt-tolerant protein, **229**, 134; *erratum*, **240**, 244
- Complex I dehydrogenase, *see* NADH dehydrogenase (ubiquinone)
- Concanavalin A
- effect on bone-resorbing activity of osteoclasts and cathepsin K/OC-2 gene expression (rabbit), **234**, 600
- Conductance
- chloride, swelling-activated in *Xenopus* oocytes, relation to functional incorporation of P-glycoprotein into plasma membrane, **237**, 407
- Confluence
- mammary epithelial cells, associated downregulation of *c-myc* expression (mouse), **239**, 566
- Confocal microscopy
- rapid scanning, 2D analysis of intracellular Ca<sup>2+</sup> sparks in cardiomyocytes (rat), **233**, 413

- Conformation, *see also* Molecular structure  
adenylate kinase active sites, flexibility, increase by denaturants, **238**, 382  
annexin V, effect of binding to liposomes, **234**, 111; *erratum*, **237**, 202  
DnaA protein, transition induced by ATP (*Escherichia coli*), **232**, 130  
nociceptin, **233**, 640  
RubisCO, effect of *chbQ* and *chbO* genes downstream from RubisCO genes (*Pseudomonas hydrogothermophila*), **241**, 565  
streptodamine, DNA-induced change (*Streptococcus equisimilis*), **230**, 13
- Conglutinin  
recombinant bovine, expressed in CHO cells, characterization, **238**, 856
- Conjunctiva  
goblet cells, MUC5AC message detection (rat), **236**, 789
- Connectin titin  
N-terminal Z repeat 5, binding to C-terminal region of  $\alpha$ -actinin, **235**, 1
- Connective tissue growth factor  
mRNA expression in TGF- $\beta$ -induced fibrotic tissue (neonatal mouse), **237**, 292; *erratum*, **240**, 507  
mRNA preferentially expressed in chondrocytes, cloning (human), **234**, 206
- $\alpha$ -Conotoxins  
Ca<sup>2+</sup> channel antagonist, circular dichroism spectra, **230**, 133
- Contraction  
cardiac myocytes, mitochondrial Ca<sup>2+</sup> transients during, demonstration after selective loading of Rhod 2 (rabbit), **236**, 738
- CooA  
transcriptional activator containing heme-based CO sensor, signal transduction, **240**, 783
- Copper  
interaction of human angiogenin with, modulation of angiogenin binding to endothelial cells, **236**, 604  
interaction with hydrogen peroxide, **235**, 264
- Copper amine oxidase, *see* Amine oxidase (copper-containing)
- Copper ion  
manner of release in erythrocytes, relationship to stability of mutant SOD-1 associated with FALS, **241**, 251  
mediated oxidative modification of human LDL, protective effect of lipoic acid analogue 1,2-diselenolane-3-pentanoic acid, **240**, 819
- Coproporphyrinogen oxidase  
expression in mouse erythroleukemia cells, regulatory role of transcriptional factor GATA-1, **233**, 729
- Coronary artery disease, *see also* Transplant coronary artery disease  
association with genetic variation in  $\beta_1$ -adrenergic receptor gene among Japanese, **232**, 728
- Corpora allata  
putative hydroxy juvenile hormones synthesized by, identification (locust), **240**, 752
- Corpus cardiacum  
adipokinetic hormone–red pigment-concentrating hormone, distinct sequences (beetle), **230**, 16
- Corpuscles  
calcareous, associated calcium-binding protein, description (*Echinococcus granulosus*), **237**, 451
- Corticobasal degeneration  
and other neurodegenerative diseases with distinct tau-related pathology, cerebrospinal fluid tau levels, **236**, 262
- Corticosteroids  
secretion by adrenal gland, regulation by Substance P, cellular mechanism (newt), **233**, 395
- Corticosterone  
secretion by adrenal gland, regulation by Substance P, cellular mechanism (newt), **233**, 395
- Corticosterone methyloxidase I deficiency  
point mutation in exon 8 of human *CYP11B2* gene encoding steroid 18-hydroxylase (P450<sub>C18</sub>), **234**, 382
- Cortisol, *see* Hydrocortisone
- Cortistatin-like peptide  
identification and characterization (human), **232**, 157
- Cotylenin A  
induction of myeloid leukemia cell differentiation (human, mouse), **238**, 758
- Coxsackievirus B receptor  
putative receptor purification from HeLa cells, **233**, 325
- CP-1  
reduced activity, role in transcriptional downregulation of topoisomerase II $\alpha$  in doxorubicin-resistant variant of human multiple myeloma RPMI 8226, **237**, 217
- C-peptide  
effect on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580
- CpG islands  
methylation, effect on transcription of *p53* tumor suppressor gene promoter (human), **235**, 403
- CPP32  
expression in embryonic sensory neurons and activation in apoptosis (mouse), **231**, 770; *erratum*, **237**, 202  
and interleukin-1 $\beta$ -converting enzyme, role in ultraviolet B-induced apoptosis of SV40-transformed human keratinocytes, **236**, 194
- CPP32-like protease  
activity during retinoic acid-induced neuronal differentiation of P19 cells, enhancement by wortmannin, **232**, 192  
cysteine protease, activation, inhibition by Bcl-2, **233**, 781  
inhibition by nitric oxide under redox regulation, **236**, 365  
mediation of specific cleavage of replication factor C large subunit in apoptosis, **233**, 343
- CPP-binding protein  
80-kDa subunit of NMDA receptor-like complex, and 71-kDa glutamate-binding protein subunit, protein half-lives (rat brain), **241**, 132
- C protein-coupled receptors  
heptahelical, closely related to P2Y<sub>5</sub> receptor, cloning (human), **236**, 106
- CREB, *see* cAMP response element binding protein
- CREM, *see* cAMP response element modulator
- Cre recombinase  
activity in mature oocytes irrespective of *cre* transgene transmission, transgenic mouse line retaining, **237**, 318  
regulation by mutated estrogen receptor ligand-binding domains (mouse), **237**, 752
- Crk-II protein  
enhancement of apoptosis in HEK cells (human), **234**, 616
- CrkL  
inhibitory effect on Philadelphia chromosome-positive leukemic cell growth (human), **235**, 383  
tyrosine phosphorylation and association with Shc, SHP-2, and Cbl in hematopoietic cells, induction by erythropoietin and IL-3, **239**, 412
- Crohn's disease  
T cell receptor V $\beta$  usage, **240**, 545
- Cromolyn  
binding of calcium-binding proteins in lung extract, comparison to amlexanox (bovine), **240**, 341
- Crosslinking studies  
bound ATP, in identification of autotaxin photoaffinity attachment sites, **236**, 449  
radiolabeled large mechanosensitive ion channel of *Escherichia coli*, **232**, 777
- Crotoxin  
reticulocalbin family protein binding, purification and partial amino acid sequence (guinea pig, pig), **239**, 18
- Cryoelectron microscopy  
three-dimensional, reconstruction of 2.25-MDa homomultimeric phosphoenolpyruvate synthase from *Staphylothermus marinus*, **241**, 599
- Cryoprotectants  
prevention of cell lysis and promotion of recovery of respiration and ion transport (rabbit), **234**, 275

## Crypt cells

- colonic, serotonin activation of electrolyte transport via 5-HT<sub>2A</sub> receptor (rat), **230**, 437

## Crypt-like cells

- intestinal, IEC-17, L-glutamate transport by sodium-dependent and -independent mechanisms (rat), **233**, 244

## Cryptorchidism

- unilateral abdominal, effect on glucose transporter expression in abdominal and scrotal testis (rat), **236**, 407

 $\alpha$ -Crystallin $\alpha$ A

- from aged lens, Asp-151 inversion by conformation formed by domain after Ala-155 (human), **239**, 918
- N-terminal region, in crystalline lens, amino acid residue cleavage during aging (human), **231**, 373

 $\alpha$ B

- N-terminal region, in crystalline lens, amino acid residue cleavage during aging (human), **231**, 373
- TATA sequence mutations: lens preference for proximal TATA box and distal TATA-like sequence in transgenic mice, **241**, 407
- transient loss, early cellular response to mechanical stretch (human), **235**, 69
- chaperone activity, effect of heat-induced structural perturbation of secondary and tertiary structures (bovine lens), **237**, 277
- chaperone-like function, affecting factors (bovine), **231**, 270
- functional elements in, analysis: identification of binding sites in  $\alpha$ B-crystallin (bovine), **239**, 217
- intermediate, with maximal chaperone-like activity, detection and characterization (bovine lens), **236**, 370

 $\gamma$ S-Crystallin

- isoforms, characterization from lip shark *Chiloscyllium colax*: evolutionary comparison of  $\gamma$ S and  $\beta/\gamma$  crystallins, **240**, 51

## Crystalline lens

- $\alpha$ A- and  $\alpha$ B-crystallin N-terminal regions, amino acid residue cleavage during aging (human), **231**, 373

## Crystallization

- light-harvesting chlorophyll *a/b*-protein complex, detergent effects, fluorescence depolarization study (spinach), **233**, 555
- oxygenase component of naphthalene dioxygenase in native and selenomethionine-derivatized forms, **241**, 553
- retinoic acid receptor RAR $\gamma$  ligand-binding domain complex with all-*trans* retinoic acid (human), **230**, 293
- thyroid peroxidase from human Graves' thyroid tissue, **234**, 366

## Crystallography

- ATP synthase, analysis of intramolecular rotation, **240**, 247

## c-Src

- activation of STAT1 and STAT3 in PDGF-stimulated NIH3T3 cells, **239**, 493
- phosphatidylinositol 4,5-bisphosphate-dependent phosphorylation of Shc Tyr-239 and Tyr-240, **240**, 399
- and Rho, close association with GM3 in GM3-enriched microdomains at B16 melanoma cell surface, **236**, 218
- role in  $\beta$ -casein expression by mammary epithelial cells (mouse), **241**, 710

## CTP

- effects on denaturation of F-actin, **236**, 798

## C-type natriuretic peptide

- adenovirus-mediated gene transfer into cultured VSMC, induction of G1 growth inhibition (rat), **239**, 889

## Curcumin

- and genistein, synergistic inhibitory effects on growth of breast cancer MCF-7 cells induced by estrogenic pesticides, **233**, 692

CVD, *see* Cardiovascular disease

## Cyanea-RFamides

- isolation from scyphomedusae: novel neuropeptides, **236**, 743

## Cyanovirin-N

- conjugate with *Pseudomonas* exotoxin, construction and toxicity to HIV-infected H9 cells, **239**, 884
- isolation, primary sequence, and disulfide bond structure (*Nostoc ellipsosporum*), **238**, 223
- sequence requirements for anti-HIV biological activity, **238**, 218

## Cyclic ADP-ribose

- and IP<sub>3</sub>, potentiation of depolarization-induced Ca<sup>2+</sup> release from skeletal muscle triads (rabbit), **240**, 772
- measurement in pancreatic islets (rat), **231**, 546

## Cyclic AMP

- accumulation in cardiomyocytes, effect of adrenomedullin (rat), **230**, 311
- chloride conductance dependent on, activation by follicle-stimulating hormone in TM4 Sertoli cells, **233**, 203
- effect on expression of *Escherichia coli* thioredoxin gene, **234**, 564
- Gs-coupled receptor-mediated production in *Xenopus* oocytes expressing rat brain cortex poly (A)<sup>+</sup> RNA, enhancement by baclofen, **241**, 476
- HL-60 cell, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418
- HL-60 cell differentiation dependent on, induction by extracellular ATP, **232**, 626; *erratum*, **236**, 223
- inhibition by cortistatin-like peptide via somatostatin receptors (human), **232**, 157
- inhibition of Fas/Apo-1(CD95)-induced apoptosis of primary hepatocytes (rat), **232**, 20
- regulation of biglycan gene promoter in osteosarcoma cells (human), **235**, 413
- regulation of STAT1 activation in hepatic stellate cells (rat), **233**, 464
- transcriptional activation, impairment by dominant-negative Smad3 protein, **232**, 517
- VIP-stimulated production, role of Asp196 in first extracellular loop of VIP1 receptor (human), **230**, 289

Cyclic AMP-dependent protein kinase, *see* Protein kinase ACyclic AMP phosphodiesterase, *see* Cyclic nucleotide phosphodiesterase, cAMP-specificCyclic AMP response element, *see* cAMP response elementCyclic AMP response element binding protein, *see* cAMP response element binding proteinCyclic AMP-specific phosphodiesterase, *see* 3',5'-Cyclic-nucleotide phosphodiesterase

## Cyclic GMP

- agents elevating, inhibition of platelet adhesion to collagen (human), **231**, 412

## Cyclic nucleotide phosphodiesterase

## cAMP-specific

- PDE4A, zinc-dependent activation, **241**, 175

- PDE III, selective inhibition, modulation of insulin secretion and glycemia (mouse, rat), **236**, 665

## 2',3'-Cyclic-nucleotide 3'-phosphodiesterase

- epitope recognized by monoclonal antibody to, characterization, **237**, 266

## 3',5'-Cyclic-nucleotide phosphodiesterase

- subtypes A, B, C, and D, expression, purification, and characterization (human), **234**, 320

## Cyclic stretch

- upregulation of integrin  $\beta_3$  expression in human umbilical endothelial cells, **239**, 372

## Cyclin A

- in endocytic compartment of hepatic cells, levels during liver regeneration (rat), **230**, 49

## Cyclin A-cdk2 complexes

- phosphorylation of cell cycle inhibitor p21<sup>CIP</sup>, **241**, 434

## Cyclin D

- expression in HT-29 colonic epithelial cells, stimulation by butyrate, **232**, 169

## Cyclin-dependent kinase 2

- activity in cell cycle control in fibrosarcoma clone cultured in protein-free medium (mouse), **232**, 622

Cyclin-dependent kinase 2 (*continued*)

complex with cyclin E, cell cycle-dependent phosphorylation of Cdk inhibitor p27 (human), **240**, 386

cyclin A-cdk2 complexes containing, phosphorylation of cell cycle inhibitor p21<sup>CIP</sup>, **241**, 434

expression in HT-29 colonic epithelial cells, inhibition by butyrate, **232**, 169

## Cyclin-dependent kinase inhibitor

mda-6/WAF1/CIP1 gene encoding, and cyclin-dependent kinases, role in anti-tumor effects of interferons on B16 melanoma cells, **233**, 678

p27, cell cycle-dependent phosphorylation by cyclin E/Cdk2 (human), **240**, 386

p27<sup>KIP1</sup>, overexpression, effect on cell cycle regulation in HeLa cells, **238**, 534

## Cyclin E

complex with cyclin-dependent kinase 2, cell cycle-dependent phosphorylation of Cdk inhibitor p27 (human), **240**, 386

overexpression, effect on cell cycle regulation in HeLa cells, **238**, 534

## Cyclin G1

expression in *Saccharomyces cerevisiae*, role of ALG7 N-glycosylation gene, **237**, 562

## Cycloheximide

induction of IL-6 gene expression and activation of NF- $\kappa$ B (human), **233**, 507

posttranscriptional regulation of *MRP/GS-X* pump and  $\gamma$ -glutamylcysteine synthetase expression in glioma cells (human), **239**, 51

## Cyclooxygenase

and NO, role in isoprostane release by human pulmonary artery in organ culture, **233**, 668

## Cyclooxygenase-2

alternate transcripts, differential regulation: implications for post-transcriptional control, **234**, 85

concordant induction with prostaglandin E<sub>2</sub> synthase, effect on PGE<sub>2</sub> production in peritoneal macrophages (rat), **230**, 110

expression in human mesangial cells, modulation by tetrahydrobiopterin, **241**, 7

gene transcriptional control by IL-1 $\beta$ , role of NF- $\kappa$ B, **237**, 28

## Cyclophilins

induction by hypoxia and heat stress in myogenic cells, **237**, 6

## Cyclopiazonic acid

stimulatory effect on osteoclast-like cell formation in cocultures of mouse bone marrow cells and calvarial cells, **237**, 111

## Cycloprodigiosin hydrochloride

isolation from *Pseudoalteromonas denitrificans* and determination of immunosuppressive activity (mouse), **237**, 543

## Cyclosporin A

activation of MAP kinase, **236**, 599

Ca<sup>2+</sup> signaling sensitive to, opposite effects on NF- $\kappa$ B activation in human bronchial epithelial and Jurkat T cells, **234**, 424

effect on cellular sensitivity to oxidant stress conferred by mtDNA mutations, **239**, 139

Cyclosporine, *see* Cyclosporin A*p*-Cymene methyl hydroxylase

gene sequence and protein structure (*Pseudomonas aureofaciens*), **233**, 502

## Cysteine

modifying reagent benzyl-methanethiosulfonate, restoration of fast inactivation in inactivation-defective human heart sodium channel, **233**, 606

redox state in HIV-1 Vif in infected cells and in virions, **240**, 257

residues in serotonin transporter important for substrate transport (rat), **241**, 68

residues involved in reductive amination and structural stability of chloroplast fructose-1,6-bisphosphatase, characterization (rapeseed), **232**, 388

SH2, in myosin II, mutation effects on actin filament sliding (*Dictyostelium*), **234**, 701

in xylose reductase, sites and significance, deduction from fluorescence studies (*Neurospora crassa*), **239**, 789

## Cysteine proteinase

calpain-like, role in cell cycle progression through late G<sub>1</sub> phase (human fibroblasts), **236**, 555

CPP32 and interleukin-1 $\beta$ -converting enzyme, role in UVB-induced apoptosis of SV40-transformed human keratinocytes, **236**, 194

CPP32-like, activation, inhibition by Bcl-2, **233**, 781

cryptic, from *Trypanosoma cruzi*, detection by preincubation with kininogen at low temperatures, **240**, 540

role in apoptosis, review, **230**, 481

## Cystic fibrosis

Na<sup>+</sup>/K<sup>+</sup> ATPase activity in lower airway epithelium of lung (human), **232**, 464

related alteration of SLP1 protein secretion by human tracheal gland cells, induction by *Pseudomonas aeruginosa* LPS, **241**, 305

## Cystic fibrosis transmembrane regulator

cardiac chloride current, in ventricular myocytes, effect of genistein (guinea pig), **235**, 74

and MDR1b, expression in lung parenchyma, effects of pregnancy (rat), **239**, 606

related chloride channels in non-ciliated bronchiolar epithelial cells (rabbit), **230**, 470

Cytidine-5'-diphosphate-1,2-diacyl-*sn*-glycerol

import through mitochondrial membrane contact sites in permeabilized hepatocytes (rat), **232**, 261

Cytochrome b<sub>5</sub>

identification of two homologous forms in brain (rat), **236**, 641

role in 4 $\alpha$ -methyl-oxidation and C5(6) desaturation of plant sterol precursors, **236**, 434

soluble and membrane-bound forms, cDNAs, isolation and characterization (pig), **240**, 80

Cytochrome b<sub>558</sub>

large subunit hydrophilic regions, derived synthetic peptides, inhibition of superoxide generation in cell-free system from neutrophils, **234**, 531

## Cytochrome c

release from hepatic mitochondria during permeability transition (rat), **232**, 669

rupture of liposomes, role of invariant Arg<sup>91</sup>, **238**, 140

Cytochrome-c<sub>552</sub>

*Thermus thermophilus*, functional and crystallographic studies, **237**, 572

## Cytochrome P450

## 1A1

cancer-associated, *in vitro* kinetics (human), **231**, 227

fusion protein with rat NADPH-P450 oxidoreductase, characterization in *Escherichia coli* (human), **230**, 211

inducible expression in cultured hepatocytes, differential effects of IL-1 $\beta$ , IL-2, and IFN- $\gamma$  (rabbit), **239**, 273

induction by  $\beta$ -naphthoflavone in IEC-18 rat intestinal epithelial cells and potentiation by dibutyl cAMP, **233**, 623

induction by TCDD in endothelial cells in culture, potentiation by glucocorticoids (human, porcine aorta), **232**, 749

mRNA induction by 3-methylcholanthrene, suppression by upstream stimulatory factor 1 in HepG2 cells, **240**, 293

1A1, 1A2, and 1B1, TCDD-induced, differential time-course and dose-response relationships (rat), **233**, 20

1A1 and 1B1, and Ah receptor and other genes, mRNA coregulation by TGF- $\beta$ 1 in human cancer cell lines, **241**, 86

## 1A2

inducible expression in cultured hepatocytes, differential effects of IL-1 $\beta$ , IL-2, and IFN- $\gamma$  (rabbit), **239**, 273

role in hepatic sequestration of dioxin, studies with knockout mice, **236**, 431

- 2D6, expression in human lung, **241**, 79
- 2E1  
cutaneous, tissue-specific induction by dexamethasone (mouse), **235**, 557  
gene expression during embryogenesis and fetogenesis in cephalic tissues, implications for fetal alcohol syndrome (human), **238**, 443  
identification in brain (rat), **231**, 254
- 2F2, mRNA levels, suppression by diethylhexylphthalate (mouse), **239**, 660
- 2J1, similarity to P450ib purified from small intestine (rabbit), **232**, 643
- 3A  
detection in hepatic stellate cells (human), **238**, 420  
posttranscriptional elevation of expression (rat), **231**, 203
- 3A2, glucocorticoid-dependent induction, and low-affinity glucocorticoid binding site activity, effect of vitamin A deficiency (rat liver), **237**, 211
- 3A30, cDNA isolation, and phylogenetic analysis of *CYP3A* genes (*Fundulus heteroclitus*), **236**, 306
- 4A7, identity with P450ia purified from small intestine (rabbit), **232**, 643
- 4C8, isolation and identification in termite *Mastotermes darwiniensis*, **241**, 579
- 4T1, isolation from liver (rainbow trout), **236**, 302
- c17, ligand binding efficiency, protein phosphorylation (rat), **231**, 403
- P450B, insecticide resistance-related, regulation by molting hormone (*Drosophila melanogaster*), **232**, 304
- P450<sub>C18</sub> encoded by *CYP11B2* gene, point mutation in exon 8, as cause of corticosterone methyloxidase I deficiency (human), **234**, 382
- Cytokeratins  
loss of expression, and actin stress fiber formation, in dedifferentiated MDCK-C7 cell lines, **241**, 541
- Cytokine-induced neutrophil chemoattractant-3  
receptor for, identification on neutrophils and characterization (rat), **232**, 562
- Cytokine-inducible SH2 protein  
gene family members CIS2, -3, and -4, cloning and characterization (human), **239**, 439
- Cytokines  
hypothalamic, mRNA, modulation *in vivo* by HIV-1 gp120 (rat), **231**, 514  
IL-6-type, activation of Stat5a in various cell types, **236**, 438  
induced adhesion molecule expression in human endothelial cells, effects of dimethylfumarate, **234**, 19
- LPS/cytokine mixture  
induced cellular injuries in cultured hepatocytes, lack of role of NO (mouse), **240**, 664  
induced NO synthesis in hepatocytes, role of metabolic intermediates (mouse), **236**, 379  
mediated hepatocyte NO synthesis, inhibition by dimethyl sulfoxide (mouse), **239**, 517
- production by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
- pro-inflammatory  
inhibition of ob gene expression in 3T3-L1 adipocytes, **240**, 382  
production associated with interaction of phagocytes and apoptotic cells (mouse), **239**, 799
- Cytolysins  
hemolytic activity, stimulation by 8-anilino-1-naphthalenesulfonate (sea anemone), **232**, 422
- Cytolysis  
perforin, enhancement by low-molecular-weight cytotoxic lymphocyte granule protein: perforin-enhancing protein, **236**, 34  
prevention by cryoprotectants, and promotion of recovery of respiration and ion transport (rabbit), **234**, 275
- Cytomegalovirus  
human, immediate-early gene 2 protein, interaction with heterogeneous ribonucleoprotein A1 in yeast two-hybrid system, **232**, 590  
immediate early gene, stimulation of vascular smooth muscle cell proliferation *in vitro* and *in vivo* (human), **231**, 447
- Cytoplasm  
androgen receptor and prostate-specific antigen nuclear/cytoplasmic distribution in LNCaP cells, role of 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **235**, 539  
Ca<sup>2+</sup> signals, gene regulation by, **236**, 541  
Cl<sup>-</sup> levels in endothelial cells, effects on basal and inositol 1,4,5-trisphosphate-induced Ca<sup>2+</sup> release (bovine aorta), **238**, 292  
differential migration of acylphosphatase isoenzymes to nucleus during apoptosis (K562, Jurkat cells), **231**, 717  
profilaggrin, processing by active  $\mu$ -calpain (human), **235**, 652
- Cytosine-propenal  
formation by hydroxyl radical damage of DNA, **238**, 317
- Cytoskeletal protein  
axonemal and accessory, dephosphorylation, relationship to sperm flagellar motility regulation (chicken), **235**, 108
- Cytoskeleton  
acetyl-CoA carboxylase localization (rat), **233**, 253  
actin, reorganization in human astrogloma cells, mediation by adenosine A<sub>1</sub> receptor, **241**, 297  
actin microfilament derangement by 2-chloroadenosine, role in induction of apoptosis of C2C12 myoblastic cells, **238**, 361  
components, c-Cbl interactions with, identification using yeast two hybrid screen, **240**, 46  
integrin-dependent Tec translocation to, in thrombin-activated platelets, **238**, 247
- Cytosol  
liver, constitutively expressed aldehyde dehydrogenase, cDNA encoding, cloning (rat), **236**, 527  
oocyte, receptor binding of progesterone (frog), **232**, 213  
renal inner medullary collecting duct cells, Ca<sup>2+</sup> signaling induced by extracellular ATP (rat), **234**, 224
- Cytotoxic factors  
release during joint cultivation of human K-562 and mouse L-929 cells, **234**, 655
- Cytotoxicity  
CD4<sup>+</sup> T cells to staphylococcal enterotoxin B-pulsed endothelial cells, regulation by Fas/Fas ligand interaction (human), **239**, 782  
[cyanovirin-N]-[*Pseudomonas* exotoxin] conjugate to HIV-1-infected H9 cells, **239**, 884  
cytokines to colon carcinoma cells, role of TNF-mediated apoptosis (mouse), **233**, 270  
doxorubicin, mechanism in apoptosis and oxidative DNA damage, effect of concentration, **230**, 254  
5-O-( $\beta$ -glucopyranosyl)-2-nitrobenzyl-caged L-leucyl-L-leucine methyl ester (HL-60 cells), **233**, 211  
haloalkene glutathione S-conjugates, effects of stable transfection of LLC-PK1 cells with human microsomal GST gene, **234**, 481  
HIV-1 Nef N-terminal peptides to yeast and bacterial cells, **232**, 707  
H<sub>2</sub>O<sub>2</sub> in hepatocytes, alteration by tumor necrosis factor  $\alpha$  (rat), **230**, 120  
LPS/IFN- $\gamma$ -induced, in Raw 264.7 macrophages, protective effect of peroxy-nitrite, **241**, 37  
lymphokine-activated killer cell-mediated, role of phorbol ester-sensitive protein kinase C isoforms (mouse), **235**, 461  
oxidized LDL-mediated, in endothelial smooth muscle cells, effect of simvastatin (human), **231**, 437  
ricin A chain, A chain proteolysis as requirement for, analysis in Vero cells and murine macrophages, **241**, 617  
tumor necrosis factor  $\alpha$  in NIH-3T3-ras cells, protection by large aggregates of unphosphorylated hsp27 mutants, **241**, 187
- Cytotoxic necrotizing factor I  
hindrance of apoptosis and promotion of phagocytosis in epithelial cells, relationship, **241**, 341

## Cytotoxic T cells

low-molecular-weight granule protein enhancing perforin activity: perforin-enhancing protein, **236**, 34

*Toxoplasma gondii*-infected cell-specific, antigenicity of synthetic *T. gondii* SAG1 peptides for, correlation with peptide binding to HLA-A2 (human), **236**, 257

## D

## DA41

interaction with rat epidermal growth factor-like protein S(1–5), **237**, 245

## Dactinomycin

amplification of site-specific DNA cleavage induced by neocarzinostatin, **239**, 134

effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636

## Daidzein

inhibitory effect on sterol sulfatase from hamster liver, **233**, 579

Daidzein-7,4'-di-*O*-sulfate

inhibitory effect on sterol sulfatase from hamster liver, **233**, 579

Daidzein-4'-*O*-sulfate

inhibitory effect on sterol sulfatase from hamster liver, **233**, 579

## DAN-binding protein

DA41, interaction with rat EGF-like protein S(1–5), **237**, 245

## Daunorubicin

effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636

## Dbl homology domain

and ezrin-like domain, human CDEP protein containing, molecular cloning and characterization, **241**, 369

membrane binding and enzymatic activation, role of neighboring pleckstrin homology domain, **234**, 183

d(CGATCT)<sub>2</sub>

interaction with mutagenic tryptophan pyrrolisate: intercalation model based on NMR experiments, **240**, 803

## DDT

effect on c-erbB2 and c-met growth factor receptor tyrosine kinase and STATS signal transduction in breast epithelial cells, **231**, 17

and endosulfane and chlordane, induced growth of breast cancer MCF-7 cells, synergistic inhibitory effects of curcumin and genistein, **233**, 692

De-*N*-acetylation

sialic acid of sialyl Lewis X sequence, enhancement of L-selectin binding, **240**, 748

## Deafness

associated mutation *shaker-2*, chromosomal region, genetic and physical delineation (mouse), **234**, 107

## DEAH-box proteins

RNA helicase gene encoding member of, cloning and characterization (human), **240**, 335

## DECI

basic helix–loop–helix protein expressed in differentiated human embryo chondrocytes, molecular characterization, **236**, 294

## Decarboxylation

2-hydroxyphytanoyl-CoA, pristanal identification as product: phytanic acid oxidation pathway, **237**, 33

## Decorin

functional, production and purification in baculovirus system (human), **232**, 91

## Dedifferentiation

MDCK-C7 cell lines, associated loss of cytokeratin expression and formation of actin stress fibers, **241**, 541

## Dehydroluciferin

synthesis by firefly luciferase: effect of dehydroluciferin, CoA, and nucleoside triphosphates on luminescent reaction, **237**, 445

## Dementia with Lewy bodies

and other neurodegenerative diseases with distinct tau-related pathology, cerebrospinal fluid tau levels, **236**, 262

## Demethylation

oxidative, at C4, of sterols in maize, role of cytochrome b<sub>5</sub>, **236**, 434

## Denaturation

agents for, effects on saporin, **234**, 129

conditions of, effect on ribozyme-mediated cleavage of TNF- $\alpha$  mRNA *in vivo*, **236**, 205

F-actin, effects of nucleotides, **236**, 798

ubiquitin, structure of pressure-assisted cold denatured state (bovine), **238**, 289

## Denervation

long-term, muscles, effect on dihydropyridine receptor and ryanodine receptor gene expression (rat), **240**, 612

skeletal muscle, associated hexokinase II increase, role of transcriptional regulation (rat), **238**, 53

## Dentin-specific proteins

bicistronic transcript encoding, sequence (rat), **231**, 425

## Denys-Drash syndrome

WT1 mutant proteins in, dominant negative transcriptional activity, role of N-terminal self-association domains, **233**, 723

## 2'-Deoxyadenosine

in combination with 2'-deoxycytosine, induction of differentiation of myeloid leukemia cells (human), **238**, 100

## Deoxyadenosyl radical

S-adenosylmethionine as source of, biotin synthase as member of family of enzymes using, **236**, 402; *erratum*, **240**, 246

2'-Deoxycytosine, *see* Pentostatin

## Deoxycycline

inhibition of collagen synthesis by bovine chondrocytes cultured in alginate, **237**, 107

## 2'-Deoxy-L-cytidine

chiral discrimination by deoxycytidine kinase (mouse), **239**, 329

## Deoxycytidine kinase

chiral discrimination of 2'-deoxy-L-cytidine and L-nucleotides (mouse), **239**, 329

## Deoxyribonuclease

cDNA cloning and characterization (human), **231**, 499

$\gamma$ -like apoptotic endonucleases, in hematopoietic cells (*Xenopus laevis*), **231**, 305

## Deoxyribonuclease I

purification and DNA-induced conformational change (*Streptococcus equisimilis*), **230**, 13

## Deoxyribonucleoside 5'-triphosphates

chiral discrimination by deoxycytidine kinase (mouse), **239**, 329

## Dephosphorylation

axonemal and accessory cytoskeletal proteins, relationship to sperm flagellar motility regulation (chicken), **235**, 108

insulin receptor, role of protein tyrosine phosphatase LAR (rat), **235**, 709

tyrosine in PLC- $\gamma$ 1, angiotensin II-mediated, role of intracellular calcium (rat), **232**, 540

## 3,4-Dephosphatase

effect on neurite formation and MAP kinase activation in growth factor-treated PC12h cells, **238**, 213

## Depolarization

Ca<sup>2+</sup> release from skeletal muscle triads induced by, potentiation by cyclic ADP-ribose and inositol 1,4,5-trisphosphate (rabbit), **240**, 772

intracellular free calcium increase induced by, inhibition in neuroblastoma× glioma hybrid NG108-15 cells by 2-arachidonoylglycerol, **233**, 207

K<sup>+</sup>, effect on secretion of 5-hydroxytryptamine/insulin from pancreatic islets: real time electrochemical detection (mouse), **228**, 100; *erratum*, **231**, 519

## Depolymerization

- type I collagen by recombinant catalytic domain of collagenase-3 (mouse), **230**, 202

## Der p1

- induction of NF- $\kappa$ B activation via interference with I $\kappa$ B $\alpha$  function in asthmatic bronchial epithelial cells (human), **236**, 522

 $\Delta^9$ -Desaturase, *see* Stearoyl-CoA desaturase

## Desaturation

- C5(6), sterols, role of cytochrome b<sub>5</sub> (maize), **236**, 434

## Desulforedoxin

- conversion into rubredoxin center, **231**, 679

*Desulfovibrio desulfuricans* ATCC 27774

- periplasmic nitrate reductase, enzymatic properties and effect of ionic strength, **239**, 816

*Desulfovibrio vulgaris*

- [NiFe] hydrogenase, characterization, **240**, 75

*Desulfurococcus*

- hyperthermophilic V-ATPase, stabilizing residues and functional domains in, **234**, 341

## Detergent-resistant membrane domains

- structure: phase separation and biological membranes, **240**, 1

## Detergents

- cationic, for high-efficiency stable DNA transfection, **231**, 531
- caveolin-1 solubility in, and association with endothelial NOS, modulation by tyrosine phosphorylation, **236**, 155
- effects on crystallization of light-harvesting chlorophyll *alb*-protein complex, fluorescence depolarization study (spinach), **233**, 555
- responses of avian ecto-ATPases from liver and cardiac and smooth muscle, **238**, 728

## Detoxifying enzymes

- phase II, gene induction, mediation by Nrf/small Maf heterodimer through antioxidant response elements, **236**, 313

## Deuterium

- distribution in brain lactate as tracer of metabolic pathways (rat), **237**, 650

## Development

- adrenal gland, D-aspartic acid localization (postnatal rat), **235**, 433
- alveolar structures in whole-organ culture of mammary gland, effect of estrogen (mouse), **232**, 340
- bone, G-protein coupled receptor expressed during, with homology to neuro-peptide and chemoattractant receptors, isolation from mouse and NH15-CA2 cells, **233**, 336
- chicken, differential expression of proteasomal subunit during, **234**, 216
- early
  - murine embryo, expression of proliferation-related Ki-67 mRNA during, **235**, 191
  - in *Xenopus laevis*, biosynthesis of U16 snoRNA during, **241**, 486
- glycogenin expression modulation during, analysis: proteoglycogen biosynthesis (chicken), **240**, 142
- hematopoietic cells, associated expression of GATA-1 transcripts from testis promoter (mouse), **231**, 299
- limb, differential expression of *LH-2A* and *LH-2B* during, analysis (chicken), **238**, 506
- liver, CCAAT/enhancer binding protein  $\alpha$  and  $\beta$  gene regulation (rat), **234**, 605
- male germ cell, associated changes in expression of heat shock protein APG-1 (mouse), **233**, 113
- ob* gene expression and circulating leptin peptide concentrations during (mouse), **238**, 44
- ovary and testis, FGF-8 expression during, analysis (mouse, rat), **232**, 173
- T cells, calmodulin-dependent protein kinase IV during, analysis (mouse), **241**, 383

## Dexamethasone

- binding to murine glucocorticoid receptor, reversible inhibition by zinc, **238**, 86

effects on nitric oxide and tetrahydrobiopterin levels in model of endotoxic shock (mouse), **240**, 298

induced tyrosine aminotransferase gene expression in cultured rat hepatocytes, enhancement by ursodeoxycholic acid, **240**, 732

inducibility of chimeric genes transfected in LATK<sup>-</sup> cells, role of mitochondrial nucleotide sequence similar to hormone response element (rat), **235**, 349

induction of CYP3A2 in liver, and low-affinity glucocorticoid binding site activity, effect of vitamin A deficiency (rat), **237**, 211

and interleukin-1, synergistic stimulation of granulocyte colony-stimulating factor production in differentiated THP-1 cells, **239**, 676

and ionizing radiation, induced apoptosis in murine T cells, mediation by *c-fos* proto-oncogene, **241**, 519

lymphoblastoid cell apoptosis induced by, effect of rapamycin, **230**, 386

potentiation of cytochrome P4501A1 induction by TCDD in endothelial cells in culture (human, porcine aorta), **232**, 749

subacute treatment, effect on ICAM-1 levels on circulating monocytes (rat), **231**, 675

tissue-specific induction of cutaneous cytochrome P4502E1 (mouse), **235**, 557

## Dextran

derivative CMDDB7, inhibition of breast epithelial HBL100 cell proliferation by interference with FGF2 autocrine loop, **239**, 424; *erratum*, **241**, 804

## Dextran sulfate

effect on mammalian lymphocyte, **234**, 783

## Diabetes

affected family, mitochondrial glycerophosphate dehydrogenase, gene mutation in calcium-binding domain, **231**, 570

delayed Ca<sup>2+</sup> response to glucose in diabetic GK rat, **239**, 129

insulin-dependent, associated changes in molecular structure of hair (baboon, human), **233**, 76

kidney genes associated with, isolation using differential display (rat), **232**, 49

renal cortical expression of antioxidant enzyme mRNA (rat), **235**, 598

restoration of lymphopenia in BB/OK rat prone to, phenotypic consequences, **239**, 106

Zucker diabetic fatty rat, pancreatic islets in, uncoupling protein-2 mRNA induction by troglitazone, **237**, 359

## Diabetes mellitus

Caucasians with, molecular scanning of peroxisome proliferator activated receptor  $\gamma$  gene: identification of Pro12Ala PPAR $\gamma$ 2 missense mutation, **241**, 270

complications, role of AGEs: induction of VEGF expression in retinal Müller cells (human), **236**, 712

insulin-dependent, incidence and genetic susceptibility to, role of insulin gene region in Japanese, **233**, 283

non-insulin-dependent, in Otsuka Long-Evans Tokushima fatty rat, genetic analysis, **241**, 200

streptozocin-induced, lens from rats with, increased formation of advanced glycation end products and inhibition by aminoguanidine, **241**, 352

thiazolidinedione compound against, stimulation of interaction between peroxisome proliferator-activated receptor  $\gamma$  and CBP, **240**, 61

## Diabetic nephropathy

mechanism, analysis using mRNA differential display: identification of glucose-regulated genes in human mesangial cells, **238**, 179

## Diacylglycerol cholinephosphotransferase

cDNA, partial characterization (guinea pig), **241**, 504

## Diacylglycerol kinase

stimulation by epidermal growth factor receptor, **232**, 111

## Dialysis

associated amyloidosis, protein constituents, protection from proteinase degradation by  $\alpha_2$ -macroglobulin (human), **231**, 48

*cis*-Diamminedichloroplatinum, *see* Cisplatin

## Dystrophic dysplasia sulfate transporter gene

5'-flanking region cloning and characterization (mouse), **238**, 738

## Subject Index

- 2-Diazo-3,3,3-trifluoropropionyloxy-farnesyl pyrophosphate  
Ras protein incorporating, enzymatic synthesis, **235**, 377
- 2-Diazo-3,3,3-trifluoropropionyloxy-geranyl pyrophosphate  
Ras protein incorporating, enzymatic synthesis, **235**, 377
- Dibenzodiazepines  
retinoid-synergistic, action mechanism, **233**, 121
- 2,5-Di-(*t*-butyl)-1,4-hydroquinone  
stimulatory effect on osteoclast-like cell formation in cocultures of mouse bone marrow cells and calvarial cells, **237**, 111
- Dibutyl cAMP  
modulation of dynactin phosphorylation (Rat2 cells), **232**, 810  
potentiation of CYP1A1 induction by  $\beta$ -naphthoflavone in IEC-18 rat intestinal epithelial cells, **233**, 623
- Dicarboxylate carrier  
role in protonophoric action of long-chain fatty acids in mitochondria (rat liver), **232**, 414
- 2-(2''-Dichloroacetamidobenzyl)-3-(3'-indolyl)-quinoline  
dual inhibition of *Leishmania donovani* DNA topoisomerases, **230**, 171
- 2-(2''-Dichloroacetamido-5''-bromobenzyl)-3'-[3'-(5'-bromoindolyl)]-6-bromoquinoline  
dual inhibition of *Leishmania donovani* DNA topoisomerases, **230**, 171
- Dichloroacetate  
as chloral hydrate metabolite (human), **235**, 695
- Dichloromethane dehalogenase  
affinity for glutathione, determinant of, identification, **238**, 452
- Dictyostelium discoideum*  
endoplasmic reticulum, NADH-dependent disulfide reductase activity, **234**, 313  
slugs, signal transduction, impairment by mitochondrial mutations, **234**, 39
- 2',3'-Dideoxy-3'-thiacytidine  
anti-hepatitis B virus efficacy in HBV transgenic mouse, monitoring by semi-quantitative PCR of serum viral DNA, **241**, 43
- Diet  
deficient in tyrosine and quinine, effect on germfree mouse, **230**, 233  
fasting, effect on gastrin, cholecystokinin, and somatostatin gene expression in pancreas and upper digestive tract (rat), **231**, 835  
fasting/refeeding, effect on translation initiation in skeletal muscle and liver (rat), **240**, 825  
high-fat  
chronic, effect on GLUT4 expression in skeletal muscle and adipose tissue (rat), **235**, 89  
and cold and T<sub>3</sub> treatment, effects on UCP3 regulation in rat skeletal muscle and BAT, **240**, 222  
and exercise training, effects on expression of 5'-deleted GLUT4 minigenes in transgenic mice, **239**, 503
- Diethylhexylphthalate  
suppression of *Cyp2f2* mRNA levels (mouse), **239**, 660
- Differential display  
in cloning of mRNA identical to connective tissue growth factor preferentially expressed in chondrocytes (human), **234**, 206  
in cloning of rat cDNA RNB6 highly expressed in neonatal brain: member of Ena/VASP family, **237**, 307; *erratum*, **241**, 611  
glucose-regulated gene identification in human mesangial cells, **238**, 179  
identification of semaphorin E gene upregulation in rheumatoid synovial cells by, **234**, 153  
isolation of diabetes-associated kidney genes (rat), **232**, 49  
molecular characterization of fetal alcohol syndrome (mouse), **240**, 309
- Differential scanning calorimetry  
effects of nucleotides on F-actin denaturation, **236**, 798
- Differentiation  
acute promyelocytic leukemia NB4 cells, induction by retinoic acid, enhancement by *N*-4-hydroxyphenylretinamide (human), **232**, 432  
adipocytes, binding of conserved region in first intron of insulin receptor gene to nuclear proteins during, **240**, 701  
adipose  
inhibition by prostaglandin F<sub>2 $\alpha$</sub>  receptor agonists in primary culture of adipocyte precursors in defined medium (rat), **233**, 200  
in OB17 cell line, induction by calcitriol: relationship to adipogenic action of triiodothyronine, **232**, 771  
bone marrow stromal cells, opposing effects of BMP3 and TGF- $\beta$ 1 (human), **241**, 787  
cartilage, hedgehog protein, smoothened cDNA cloning and expression (ATDC5 cell), **235**, 142  
characteristics, expression by aortic smooth muscle cell line from p53 knock-out mice, **238**, 154  
dependent expression of human carboxylesterase in monocytic cells (human), **230**, 215  
DMSO-induced, Friend cells, effect on association of phosphatidylinositol-transfer protein with nucleus (mouse), **230**, 302  
enterocytic, correlation with fine structure and sulfation of perlecan in HT29 colon carcinoma cells, **238**, 874  
epidermal keratinocytes in serum-free medium (human), **236**, 167  
hematopoietic cells, associated expression of GATA-1 transcripts from testis promoter (mouse), **231**, 299  
HL 60 cells  
cAMP-dependent, induction by extracellular ATP, **232**, 626; *erratum*, **236**, 223  
into granulocyte or monocyte/macrophage lineage, Syk activity during, **236**, 697  
HT-29 cells (human), **235**, 820  
induction in human hematopoietic, melanoma, and glioma cells in culture, differential inhibition of telomerase activity during, **237**, 438  
mammary epithelial cells, associated *c-myc* expression: downregulation upon reaching confluence (mouse), **239**, 566  
megakaryocytic cells, non-amyloid- $\beta$  component precursor differential regulation (hamster, human), **237**, 611  
monocyte-macrophage, dependent gene, identification and characterization (human), **235**, 4  
muscle cells in hyperglycemic KK mouse, effect of triiodothyronine, **235**, 790  
muscle *in vitro*, late stages, adhalin expression (mouse), **235**, 227  
myeloid, HL-60 cells, phospholipase C  $\beta$ 2 intranuclear translocation (human), **235**, 831  
myeloid leukemia cells  
induction by 2'-deoxycytosine in combination with 2'-deoxyadenosine (human), **238**, 100  
induction by cotylenin A (human, mouse), **238**, 758  
myoblasts  
effect on taurine efflux activated by hypotonicity and thrombin (mouse), **232**, 74  
stimulation by interleukin-15 (C2 cells), **239**, 6  
myogenic, BMP-2 signalings inhibiting, role of Smad1 and Smad5, **238**, 574  
neural, embryonal carcinoma P19 cells, associated enhancement of glycolipid sialyltransferases, **241**, 327  
neuronal  
P19 cells induced by retinoic acid, CPP32-like protease activity during, enhancement by wortmannin, **232**, 192  
PC12 cells, induction by hyperoxia via production of reactive oxygen species, **241**, 347  
osteoblast, in C2C12 myoblasts, BMP-2 signalings inducing, role of Smad1 and Smad5, **238**, 574  
osteogenic, induction by hedgehog proteins, **237**, 465  
pancreatic acinar cell line AR42J, differential expression of Rab3 isoforms during, **236**, 719  
preadipocytes to adipocytes, subsequent *ob* gene expression and leptin secretion (rat), **230**, 360  
retinoic acid-induced, in HL-60 cells, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418

- terminal, keratinocytes in process involving programmed cell death (human), **238**, 886
- Differentiation-inducing factor-1  
*Dictyostelium discoideum*, effects on HL-60 cells, **236**, 418
- Differentiation-stimulating factor/leukemia inhibitory factor receptor  
 mRNA detection in choriocarcinoma cells and production of soluble receptor (human), **232**, 427
- Dihydrofolate reductase  
 domain of DHFR–thymidylate synthase, inhibitor discovery (*Plasmodium falciparum*), **235**, 515
- Dihydrolipoamide succinyltransferase  
 mitochondrial, polypeptide derived from, localization on plasma membrane in skeletal muscle (human, rat), **241**, 151
- 7,8-Dihydroneopterin  
 antioxidant properties, spin trapping study, **234**, 774
- Dihydropyridine  
 binding sites, expression in renal epithelial cells (rabbit), **237**, 41
- Dihydropyridine receptor  
 mRNA expression in fast twitch skeletal muscle, effect of chronic stimulation (rat), **235**, 217  
 and ryanodine receptor, gene expression in long-term denervated muscles (rat), **240**, 612
- Dihydropyrimidinase  
 thermostable, isolation from mesophilic *Bacillus* sp. AR9, **234**, 485; *erratum*, **237**, 759
- 7 $\beta$ ,8 $\alpha$ -Dihydroxy-9 $\alpha$ ,10 $\alpha$ -oxy-7,8,9,10-tetrahydrobenzo[*a*]pyrene  
 glutathione conjugation, role of glutathione S-transferase P1-1 polymorphic form active site architecture (human), **235**, 424
- 1,2-Dihydroxyvitamin D<sub>3</sub>  
 induced activation and nuclear translocation of MAPK in HL-60 cells, up-stream regulation by protein kinase C, **241**, 419  
 regulation of gene expression in neuroblastoma cells (mouse), **235**, 15
- 1 $\alpha$ ,25-Dihydroxyvitamin D<sub>3</sub>  
 Ca<sup>2+</sup> entry in skeletal muscle cells induced by, role of Ca<sup>2+</sup> release-activated Ca<sup>2+</sup> channels, **239**, 562  
 effects on adenylyl cyclase, GTPase, protein kinase A, and phosphorylation of G<sub>i</sub> (chick muscle cells), **234**, 125  
 enhancement of synthesis of transforming growth factor and TGF receptor types I and II in bone cells (human), **239**, 734  
 inducible transcript, in blood monocytes, cloning (human), **235**, 407  
 induction of apoptosis and altered nuclear–cytoplasmic distribution of androgen receptor and prostate-specific antigen in androgen-responsive LNCaP cells (human), **235**, 539  
 response element, identification in *c-fos* promoter (mouse), **230**, 646
- Dimerization  
 CD36 in platelets and transfected COS-7 cells, **240**, 812  
 covalent, effect on structure and function of neuropeptide Y carboxy-terminal fragment, **241**, 737  
 prion protein, species barriers in model for, **232**, 508
- Dimerization domain  
 in *mdr1b* P-glycoprotein, role of cytoplasmic linker region (mouse), **230**, 442
- 2,2-Dimethyl-3-(*N*-4-cyanobenzoyl)amino-5-phenyl pentanoic anhydride  
 potent inactivator of  $\alpha$ -chymotrypsin, synthesis, **240**, 850
- Dimethylfumarate  
 effect on cytokine-induced adhesion molecule expression in human endothelial cells, **234**, 19
- 1,2-Dimethylhydrazine  
 auto-oxidation, induced proliferation of mouse fibroblasts: role of iron and free radicals, **234**, 44
- Dimethylmercury  
 biliary secretion, inhibitory effect of selenium (rat), **239**, 862
- N,N*-Dimethylsphingosine  
 phosphorylation in platelets (human), **231**, 848
- 4,4-Dimethylsterol-4 $\alpha$ -methyl oxidase  
 cytochrome b<sub>5</sub> of maize microsomes as electron carrier for, **236**, 434
- Dimethyl sulfoxide  
 Friend cell differentiation induced by, effect on association of phosphatidylinositol-transfer protein with nucleus (mouse), **230**, 302  
 inhibition of LPS and cytokine mixture-mediated NO synthesis in hepatocytes (mouse), **239**, 517
- Dinitrotoluene  
 interactions of single-stranded DNA decamer sequences with, colorimetric inhibition study, **236**, 344
- Dioxin, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
- ( $\pm$ )*cis*-Dioxolane  
 stimulation of cytosolic Ca<sup>2+</sup> oscillations and phasic contractions of myometrial smooth muscle (rat), **231**, 722
- 5'-Diphosphoadenosine 3'-phosphate  
 as inhibitor of bovine pancreatic ribonuclease A, **231**, 671
- Disagregin  
 interaction with platelet fibrinogen receptor glycoprotein IIb-IIIa (*Ornithodoros moubata*), **241**, 744
- 1,2-Diselenolane-3-pentanoic acid  
 protection of human LDL against copper ion-mediated oxidative modification, **240**, 819
- Disulfide bonds  
 C191–C220, role in trypsin and chymotrypsin, **230**, 592  
 formation by cysteines in HIV-1 Vif in infected cells and in virions, **240**, 257  
 identification in CDR-H3 of mouse monoclonal antibody 13-1 against porphyrin derivative, **240**, 566  
 structural role in synenkephalin, **232**, 800  
 structure in cyanovirin-N isolated from *Nostoc ellipsosporum*, **238**, 223
- Disulfide reductase  
 NADH-dependent, in endoplasmic reticulum of *Dictyostelium discoideum*, **234**, 313
- Ditercalinium  
 in isolation and characterization of mtDNA-less mammalian cell lines (human, mouse), **239**, 257
- Dithiothreitol  
 effect on ion-conductive properties of chloroplast H<sup>+</sup>-ATPase reconstituted into bilayer membrane (spinach), **232**, 461
- Diurnal variations  
 arachidonate 12-lipoxygenase in rat pineal gland, **238**, 229
- Divinyl ether  
 copolymer with maleic anhydride, bioconjugation with human tumor necrosis factor- $\alpha$ , enhancement of TNF- $\alpha$  antitumor potency in mice with solid tumors, **239**, 160
- DJ-1 protein  
 transformation of NIH3T3 cells using *ras* (mouse), **231**, 509
- DLS delivery system  
 enhanced antisense inhibition of HIV-1 via oligonucleotide targeting of *rev* gene, **237**, 566
- DNA  
 alkylation, activity of Hoechst 33258 analogs for, **231**, 94  
 antisense, of hormone-sensitive lipase, suppression of neutral cholesterol ester hydrolase, **233**, 655  
 automated sequencing, and RT-PCR, mutation detection in glycogen storage disease type II by, **241**, 414  
 big carrier complex of aggregate, formation, role of gene transfer mediated by polyarginine, **231**, 421  
 binding  
 DNA minor groove-binding molecules with high sequence selectivities and binding affinities, **240**, 557  
 heat shock factors, effect of quercetin in breast carcinoma cells, **239**, 851  
*hfq* gene product of *Escherichia coli*, **236**, 576  
 NF- $\kappa$ B p50, kinetics, alteration by S-nitrosylation, **238**, 703  
 PPAR $\alpha$ /RXR $\alpha$  heterodimers, requirements, **233**, 91

## DNA (continued)

- spermine-conjugated peptide nucleic acids, **240**, 778
- zinc finger-containing initiation factor eIF-5, zinc dependence (*Zea mays*), **236**, 510
- binding and transcription, regulation by endogenous mutant p53<sup>273His</sup> in MDA-468 breast cancer cells, **232**, 14
- chromosomal
  - adjacent region *gnd* gene encoding 6-phosphogluconate dehydrogenase, sequence (*Actinobacillus actinomycetemcomitans*), **230**, 220
  - Pseudomonas* sp. strain DJ77, localization of 2-hydroxypent-2,4-dienoate hydratase gene *phnH*, **238**, 56
  - cis*-acting elements of  $\gamma$ -glutamylcysteine synthetase heavy subunit gene, identification (human), **232**, 522
- c-Maf transcription factor, role in USF2/FIP association with b-Zip transcription factor (yeast), **231**, 333; *erratum*, **233**, 293
- complementary, *see* Complementary DNA
- damage
  - abrogation of G1 arrest after, association with constitutive overexpression of *Mdm2*, *Cdk4*, and *Irf1* mRNAs, **233**, 216
  - by hydroxyl radicals, associated formation of furfural and base propenals, **238**, 317
  - induced expression of suppressor gene *PML*, cell cycle regulation (HeLa cells), **240**, 640
- damaged
  - binding by hepatitis B virus X-protein, **232**, 255
  - effect of mitochondrial endonuclease G (bovine), **235**, 291
- d(CGATCT)<sub>2</sub>, interaction with mutagenic tryptophan pyrolysate: intercalation model based on NMR experiments, **240**, 803
- DNA-PAPI protein complex, DNA bending, detection by fluorescence resonance energy transfer, **231**, 553
- E boxes, role in repression of E-cadherin expression, **241**, 453
- expressed sequence tags of *Entamoeba histolytica*, analysis, **236**, 611
- hepatitis B virus, in serum, semiquantitative PCR analysis for monitoring of efficacy of anti-HBV drugs in transgenic mouse, **241**, 43
- induced conformational change in streptodornase (*Streptococcus equisimilis*), **230**, 13
- interferon- $\gamma$  activation site (GAS)-like sequence, recognition by STAT4 complex, **233**, 126
- introduction into liver with hand-held gene gun (rat), **234**, 695
- large single duplex, induced by nonionic surfactant, first-order phase transition, **230**, 514
- ligands to chloroaromatics, *in vitro* selection using magnetic microbead-based affinity separation and fluorescence detection, **234**, 117
- methylation-dependent binding, recognition of methylated promoter region of *Xist* gene (mouse), **235**, 730
- minor groove-binding molecules with high sequence selectivities and binding affinities, **240**, 557
- mismatch repair gene *hMSH3*, somatic mutations and microsatellite instability in hereditary nonpolyposis colorectal cancers (human), **236**, 248
- mitochondrial, *see* Mitochondrial DNA
- nucleosome-size fragmentation, Mg<sup>2+</sup>- and Mn<sup>2+</sup>-dependent endonucleases producing, detection in myeloid leukemia cells (human), **233**, 133
- oxidative damage
  - by doxorubicin, cytotoxic mechanism, effect of concentration, **230**, 254
  - protective effects of electrolyzed-reduced water, **234**, 269
- plasmid, *see* Plasmids
- repair
  - defect in Fanconi anemia complementation groups A and D cells, correction (human), **230**, 587
  - mismatch and insertion/deletion, binding properties of *Thermus thermophilus* MutS homologue for, **233**, 834
  - role of (ADP-ribose)<sub>n</sub> catabolism, **236**, 265
  - thymidylate insufficiency for, glutathione depletion-induced (hamster), **234**, 470
  - sequences essential for transcription of phospholipid transfer protein gene in HepG2 cells, **232**, 574
  - single-stranded decamer sequences, interactions with dinitrotoluene, colorimetric inhibition study, **236**, 344
  - site-specific cleavage induced by neocarzinostatin, amplification by actinomycin D, **239**, 134
  - stable, high-efficiency, transfection with cationic detergent and glycerol, **231**, 531
  - STAT3 and NF- $\kappa$ B competitive binding on overlapping binding site, **237**, 90
  - T-cluster, in silencer element of platelet factor 4 gene, binding to alternative form of nucleolysin (human), **235**, 625
  - unwinding by DNA helicase II, inhibition by chemotherapeutic agents (human), **236**, 636
  - Z-DNA, left-handed, comparison of molecular structure determined by X-rays and simulated by molecular dynamics, **236**, 146
- DnaA protein
  - conformational transition induced by ATP (*Escherichia coli*), **232**, 130
- DnaB helicase
  - N-terminal domain, NMR analysis, **231**, 126
- DNA-binding proteins
  - qTBP42*, telomeric and tetraplex, amino acid sequencing and identification as homologue of CBF-A (rat liver), **237**, 617
  - ssDNA, gene 32, binding to phage T4 presynaptic filament, **231**, 600
  - ZBP-89, overexpression in gastric cancer (human), **233**, 154
- DNA-dependent protein kinase
  - downregulation during cellular senescence (WI-38 cells), **238**, 712
  - Ku subunits, hyperthermic lability, role in mechanism for hyperthermic radiosensitization, **234**, 568
- DNA-directed DNA polymerase
  - Epstein-Barr virus, catalysis of strand displacement-associated DNA synthesis, **238**, 33
  - Leishmania donovani*, gene cloning and sequence analysis, **234**, 95
  - nuclear distribution and activity in apoptotic human leukemia cells, **234**, 303
  - pol  $\alpha$ , catalytic subunit purification from tissues at meiotic prometaphase I (*Coprinus cinereus*), **232**, 454
  - pol  $\delta$  class, catalytic subunit interaction with PCNA (*Schizosaccharomyces pombe*), **231**, 321
  - pol  $\epsilon$  class, identification and purification (*Drosophila melanogaster*), **230**, 297
  - Taq, primer/template-independent synthesis of poly d(A-T) by, **238**, 113
- DNA-directed RNA polymerase
  - GCAAG/CTTGC motifs between Spri promoter sequences for, role in neural BCL RNA transcription, mutational analysis, **239**, 407
  - hepatitis C virus, expression, purification, and partial characterization, **232**, 231
  - primary sigma factor, *rpoD* gene encoding, cloning, sequencing, and expression (*Xanthomonas campestris*), **232**, 712
- DNA gyrase, *see* DNA topoisomerase II
- DNA helicase
  - Werner's syndrome gene, defective transcripts, downregulation in cells of patients, **236**, 151
- DNA helicase II
  - DNA unwinding and ATPase activities, inhibition by chemotherapeutic agents (human), **236**, 636
- DNA helicase Q1/RecQL
  - interaction of Qip1, Rch1, and hSrp1 with, comparison (human), **234**, 48
- DnaJ
  - potentiation of interaction between DnaK and  $\alpha$ -helical peptides, **233**, 627
- DnaK
  - and  $\alpha$ -helical peptides, interaction between, potentiation by DnaJ, **233**, 627
- DNA methyltransferase
  - recombinant, baculovirus-expressed, purification and characterization (mouse), **230**, 280

- stalling at single-strand conformers from Huntington's locus (human), **234**, 73
- DNA minor groove-binding molecules  
with high sequence selectivities and binding affinities, **240**, 557
- DNA polymerase, *see* DNA-directed DNA polymerase
- DNA synthesis  
abnormal activity induced by X rays in nevoid basal cell carcinoma syndrome cells (human), **240**, 269  
and cell cycle progression, in human lymphocytes, regulation by mevalonate metabolite geranylgeranylphosphate, **241**, 376  
for DNA repair, glutathione depletion-induced thymidylate insufficiency for, analysis (hamster), **234**, 470  
strand displacement-associated, catalysis by Epstein-Barr virus DNA polymerase, **238**, 33
- DNA topoisomerase I  
and DNA topoisomerase II, dual inhibition by indolyl quinolines (*Leishmania donovani*), **230**, 171
- DNA topoisomerase II  
binding of wild-type p53 by, and overexpression of topoisomerase II in human hepatocellular carcinoma, **234**, 194  
as cellular target of ICRF-193 in egg extract (*Xenopus laevis*), **235**, 571  
cleavable complex with DNA, inhibition by *ortho*-quinone derivative of etoposide, **237**, 24  
complex with DNA, inhibition by *ortho*-quinone derivative of etoposide, **237**, 24  
and DNA topoisomerase I, dual inhibition by indolyl quinolines (*Leishmania donovani*), **230**, 171  
modulation by high pressure (*Escherichia coli*), **239**, 552
- DNA topoisomerase II $\alpha$   
degradation during adenovirus E1A-induced apoptosis, induction of ubiquitin conjugating enzyme for, analysis (MA1 cells), **239**, 823  
phosphorylation by protein kinase CKII, stimulation by CKII  $\beta$  subunit interaction with ribosomal protein L41, **238**, 462
- promoter  
cell cycle-dependent regulation (mouse), **230**, 105  
inverted CCAAT boxes in, potential regulatory role (HL-60 cells), **232**, 608  
transcriptional downregulation in doxorubicin-resistant variant of human multiple myeloma RPMI 8226, role of decreased CP-1 activity, **237**, 217
- DNA virus  
associated with elevated transaminase levels in posttransfusion hepatitis of unknown etiology, isolation: TT virus (human), **241**, 92
- Docosahexaenoic acids  
reduction of prostaglandin-endoperoxide synthase 1 expression in bovine aortic endothelial cells, **241**, 513
- n*-Dodecane  
downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328
- 3(Z)-Dodecendioic acid  
formation by oxidation of fatty acid  $\alpha$ -ketol by bacterial monooxygenase, **232**, 364
- L-Dopa, *see* Levodopa
- Dopamine  
MPTP-induced depletion in murine striatum, prevention by adenovirus-mediated transduction of human glial cell line-derived neurotrophic factor gene, **238**, 569  
upregulation of brain-derived neurotrophic factor and nerve growth factor synthesis by astrocytes in culture (mouse), **238**, 468
- Dopamine D<sub>2</sub> receptor  
and  $\alpha_2$ -adrenoceptor and  $\beta_2$ -adrenoceptor, coexpression in *Xenopus* oocytes for ligand identification, **233**, 853  
Ser<sup>311</sup>→Cys variant, antagonist binding characteristics *in vitro* and *in vivo* (human), **232**, 143
- Dopamine D<sub>2</sub>/D<sub>3</sub> receptor  
chimeric, coupling to adenylyl cyclase (rat), **237**, 394
- Dopamine D<sub>4</sub> receptor  
gene 5'-flanking region, cloning and characterization (human), **235**, 321
- Dopamine transporter  
gene expression, neural targeting of, role of intronic sequences (human), **240**, 807
- Down syndrome  
chromosomal region, SH3BGR protein in, high-resolution physical map and identification of potential regulatory sequences (human), **241**, 321
- Doxorubicin  
cytotoxic mechanism in apoptosis and oxidative DNA damage, effect of concentration, **230**, 254  
resistant variant of human multiple myeloma RPMI 8226, transcriptional downregulation of topoisomerase II $\alpha$  in, role of decreased CP-1 activity, **237**, 217
- dpp pathway  
MAD translocation to nucleus upon stimulation of, analysis (*Drosophila*), **238**, 595
- Drug carriers  
application of bifunctional poly(ethylene glycol) hybrid of fibronectin-related peptides, **241**, 595  
in therapy of macrophage-associated disease, LDLs as, **240**, 112
- Drug screening  
antimycobacterial, application of  $\beta$ -galactosidase reporter system, **235**, 602
- Drug treatment  
response in cisplatin-resistant L1210 cells, role of apoptotic process (mouse), **234**, 573
- DszA protein  
stimulation *in vitro* by flavin reductase (*Rhodococcus erythropolis* IGTS8), **230**, 73
- DszC protein  
stimulation *in vitro* by flavin reductase (*Rhodococcus erythropolis* IGTS8), **230**, 73
- Duchenne/Becker muscular dystrophy  
misdiagnosis, reduction by concomitant use of dystrophin and utrophin/dystrophin-related protein antibodies, **241**, 232
- Duchenne's muscular dystrophy  
associated calmitine deficiency in skeletal muscle of patients and dy/dy mice, mitochondrial protease inducing, inhibition by IP96, **232**, 559  
muscular degeneration resembling, induction by targeted disruption of dystrophin gene exon 52 (mouse), **238**, 492
- Dynactin  
phosphorylation, modulation in response to cellular effectors (Rat2 cells), **232**, 810
- Dynactin 1  
p150<sup>Gluc</sup> component, as candidate for neuromuscular disease mutation *mnd2*, cDNA sequence (mouse), **231**, 344
- Dynactin complex  
50-kDa subunit, detection in nerve growth cone (mouse), **233**, 295
- Dynamin  
mutant, CHO cells overexpressing, subcellular distribution of GLUT4 in, **241**, 401
- Dynamin II  
association with Grb2 SH3 domain in RAS-transformed NIH3T3 cells, **234**, 539
- Dynorphin gene promoter  
effect of upstream regulatory element (rat), **231**, 172
- Dyrk protein  
mapping to chromosome 16, nuclear localization, and multimer formation (mouse), **231**, 640
- Dysplastic nevi  
sporadic form, p16<sup>INK4a</sup> and p53 alterations in affected patients, **237**, 667
- Dystonia  
dopa-responsive, differential splicing of GTP cyclohydrolase I RNA (human), **234**, 316

- Dystrophin  
 gene 5' region, alternative splicing in skeletal muscle: analysis of transcripts (human), **239**, 895  
 gene exon 52, targeted disruption, induction of muscular degeneration resembling Duchenne muscular dystrophy (mouse), **238**, 492  
 and utrophin/dystrophin related protein, antibodies, concomitant use for reduction of misdiagnosis of Duchenne/Becker muscular dystrophy, **241**, 232
- E
- E1AF  
 ets-related, activation of p21<sup>Waf1/Cip1</sup> promoter (human), **236**, 79
- E2F-1  
 phosphorylated forms, binding to retinoblastoma protein in cells overexpressing E2F-1 cDNA (mouse), **232**, 336
- E4BP4 protein  
 inducibility, implications for negative gene regulation by glucocorticoids (ID13 cells), **232**, 403
- E6  
 papillomavirus, mouse homologue of ERC-55 binding protein for specific interaction with vitamin D receptor among nuclear receptors, **233**, 765
- E boxes  
 in mBMP-4 gene 5'-flanking promoter region, involving USF, role in mBMP-4 transcriptional regulation, **240**, 136  
 role in repression of E-cadherin expression, **241**, 453
- Ecdysis-triggering hormone  
 identification (silkworm), **230**, 188
- $\beta$ -Ecdysone  
 regulation of insecticide resistance-related cytochrome P450B (*Drosophila melanogaster*), **232**, 304
- Echinococcus granulosus*  
 intracellular calcium-binding protein associated with calcareous corpuscles, **237**, 451
- Ecto-ATPase  
 avian, from liver and cardiac and smooth muscle, regulatory differences, **238**, 728  
 inhibition in endothelial cells by P<sub>2</sub> purinoceptor agonists ATP $\gamma$ S,  $\alpha,\beta$ -methylene-ATP, and AMP-PNP (bovine pulmonary artery), **233**, 442
- Ecto-5'-nucleotidase  
 activation in preconditioned myocardium, role of protein kinase C- $\alpha$  (dog), **239**, 171
- Edg2 protein  
 cloning and identification as cellular receptor for lysophosphatidic acid (human), **231**, 619
- Efaroxan  
 effect on Arg-induced glucagon secretion from isolated islets (rat), **236**, 162
- EF-hand pairs  
 exchange or duplication, effect on calmodulin phosphorylation by myosin light chain kinase, **236**, 702
- Efonidipine  
 voltage-dependent non-selective cation channel sensitive to, regulation of Ca<sup>2+</sup> influx in brain VSMC (bovine), **240**, 484
- Egg drop syndrome 1976 adenovirus  
 duck, induction of ion channels in model bilayer lipid membranes, **236**, 750
- Eggs  
 activation, erbstatin-sensitive tyrosine kinase functioning in, evidence (ascidian), **238**, 130  
 collagen type I mRNA, spatial distribution (*Paracentrotus lividus*), **238**, 334  
 laid, of Medfly *Ceratitis capitata*, presence of antibacterial peptides on chorion, **240**, 657  
 protein-tyrosine kinase signaling at fertilization, **240**, 519  
 zona pellucida, binding of mouse sperm to  $\beta$ -galactose residues (mouse), **238**, 95
- Egr family proteins  
 role in activation of cathepsin L gene in v-src-transformed cells, **238**, 665
- Ehrlich ascites tumor cells  
 intracellular Ca<sup>2+</sup> mobilization by unsaturated fatty acids independent of IP<sub>3</sub> generation and via insertion at plasma membrane, **241**, 312
- Eicosanoids  
 and arachidonic acid, effects on function of intracellular calcium release channels, **237**, 413
- Eicosapentaenoic acid  
 enhancement of NO production by cultured endothelial cells (human), **232**, 487  
 peroxidation, formation of F<sub>2</sub>-isoprostanes during, **236**, 467  
 reduction of prostaglandin-endoperoxide synthase 1 expression in bovine aortic endothelial cells, **241**, 513
- Electrical charge  
 positive, role in increase of phosphatidylserine synthesis: modulation of serine base exchange enzyme activity by sphingosine and other amphiphilic compounds (rat), **241**, 73
- Electrical potential  
 inhibitory postsynaptic, GABA receptor-mediated, acute effects of 25-hydroxycholesterol (rat brain), **237**, 68  
 membrane, *see* Membrane potential
- Electrical stimulation  
 induction of increased TGF- $\beta$ 1 mRNA levels in murine osteoblastic cells by mechanism involving Ca<sup>2+</sup>/calmodulin pathway, **237**, 225
- Electric organ  
 rapid volume expansion associated with production of postsynaptic potential (*Torpedo californica*), **233**, 305
- Electrochemical detection  
 real-time, 5-hydroxytryptamine/insulin secretion from pancreatic islets, effects of glucose and K<sup>+</sup> depolarization (mouse), **228**, 100; *erratum*, **231**, 519
- Electroencephalogram  
 effect of cortistatin-like peptide hCS-17 (human), **232**, 157
- Electrolyte transport  
 activation by serotonin via 5-HT<sub>2A</sub> receptor in colonic crypt cells (rat), **230**, 437
- Electromyogram  
 effect of cortistatin-like peptide hCS-17 (human), **232**, 157
- Electron spin resonance  
 spin trapping study of antioxidant properties of neopterin and 7,8-dihydro-neopterin, **234**, 774
- Electrophysiology  
 human sweat gland cell line monolayers, responses to oxytocin and ATP, **234**, 30
- Electroporation  
 associated transdermal transport, effect of heparin (human), **234**, 637  
 localized *in vivo*, for foreign gene expression by testis (mouse), **233**, 45
- Electrostimulation  
 chronic low-frequency, skeletal muscle, relationship to oligomeric status of calsequestrin (dog, rabbit), **240**, 721
- Ellipticine  
 effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- Elongation factor 1 $\alpha$   
 association with proline-rich region of adenylyl cyclase-associated protein CAP (*Saccharomyces cerevisiae*), **232**, 503
- Elongation factor Tu1  
 from antibiotic GE2270A producer *Planobispora rosea*, resistance against EF-Tu-targeted antibiotics, **230**, 320
- Elongin  
 regulatory subunit cDNAs, molecular cloning (*Drosophila melanogaster*, *Saccharomyces cerevisiae*), **241**, 334
- ELP  
 and nuclear receptors, role in transcriptional regulation, **230**, 407
- Embryo

- collagen type I mRNA, spatial distribution (sea urchin), **238**, 334
- constitutive HSP75, identification and characterization (sea urchin), **234**, 24
- differential expression of proteasomal subunit during development (chicken), **234**, 216
- early, nonviral transfection methods for foreign gene expression *in ovo* (chicken), **230**, 376
- early development, expression of proliferation-related Ki-67 mRNA (mouse), **235**, 191
- $\alpha^A$ -globin gene expression specific to, analysis (pigeon), **234**, 450
- glycogenin and glycogen synthase activity and glycogen content during development (chicken), **240**, 142
- heat shock transcription factor detection (sea urchin), **240**, 436
- internal organogenesis, role of Met tyrosine kinase activation by HGF (*Xenopus*), **234**, 8
- sensory neurons, CPP32 expression (mouse), **231**, 770; *erratum*, **237**, 202
- Embryo cells
- effect of oncogene transformation on cellular oxygen consumption and glycolysis (rat), **235**, 739
- Embryogenesis
- associated *CYP2E1* expression in cephalic tissues, implications for fetal alcohol syndrome (human), **238**, 443
  - early, in *Xenopus laevis*, biosynthesis of U16 snoRNA during, **241**, 486
  - JNK2- $\alpha$ 1 gene preferential expression in brain (chicken), **234**, 489; *erratum*, **236**, 538
  - presenilin- $\alpha$  and - $\beta$  cDNA expression (*Xenopus laevis*), **231**, 392
  - role of hepatocyte growth factor
    - Met tyrosine kinase activation involvement in organogenesis (*Xenopus laevis*), **234**, 8
    - tissue organizer function, **239**, 639
  - role of transcription factor NFATc (mouse), **240**, 314
  - secondary axis induction by FK 506-binding protein homologue in *Xenopus* embryos and inhibition by coexisting BMP-4 signaling, **239**, 585
- Embryonal carcinoma P19 cells
- CPP32-like protease activity during retinoic acid-induced neuronal differentiation, enhancement by wortmannin (mouse), **232**, 192
  - neural differentiation, associated enhancement of glycolipid sialyltransferases (mouse), **241**, 327
- Embryos
- apoptosis (sea urchin), **240**, 359
  - early, TBP-binding repressor Dr1 expression (*Xenopus laevis*), **231**, 561
  - retinoic acid treatment *in vivo*, post-treatment expression of *goosecoid* gene, role of middle ear bones (mouse), **235**, 748
- Ena/VASP proteins
- family member RNB6 highly expressed in neonatal brain, cDNA cloning (rat), **237**, 307; *erratum*, **241**, 611
- Encapsulation
- flavodoxin in reverse micelles (*Desulfovibrio gigas*), **234**, 651
- Encephalomyopathy
- mitochondrial, tRNA<sup>leu(UUR)</sup> gene mutation associated with, **233**, 637
- Encephalopathies
- transmissible spongiform, strains, potential link with molecular structure, **238**, 185
- Endocytic compartment
- hepatic cells, cyclin A levels during liver regeneration (rat), **230**, 49
- Endocytosis
- GLUT4, evidence for dynamin as regulatory GTPase in, **241**, 401
  - recycling of fluid-phase, bulk-membrane, and receptor-mediated tracers, effects of perturbations (fetal rat fibroblasts), **236**, 661
- Endo-1,4- $\beta$ -glucanase, *see* Cellulase
- Endometrium
- telomerase activity, proliferation-associated regulation and role in early cancer diagnosis (human), **231**, 610
  - uterine, and kidney and ovary, osteogenic protein-1 mRNA expression, effects of pregnancy and estrogen (mouse), **234**, 242
- Endomorphin 1
- hypotensive activity in rabbit, **235**, 567
- Endomorphin 2
- hypotensive activity in rabbit, **235**, 567
- Endonucleases
- apoptotic, DNase  $\gamma$ -like, in hematopoietic cells (*Xenopus laevis*), **231**, 305
  - chromatin-bound, specific detection by anti- $\text{Ca}^{2+}$ . $\text{Mg}^{2+}$ -dependent endonuclease antibody, **236**, 423
  - $\text{Mg}^{2+}$ - and  $\text{Mn}^{2+}$ -dependent, producing nucleosome-size DNA fragmentation, detection in myeloid leukemia cells (human), **233**, 133
  - mitochondrial, action on damaged DNA (bovine), **235**, 291
- Endoplasmic reticulum
- calcium stores, depletion, protective effects against hypoxia- and mitochondrial inhibitor-induced cellular injury and death (rabbit), **240**, 57
  - fractional  $\text{Ca}^{2+}$  release from, activation of  $\text{Ca}^{2+}$  entry in aortic endothelial cells (rabbit), **241**, 471
  - NADH-dependent disulfide reductase activity (*Dictyostelium discoideum*), **234**, 313
  - perturbation of function in HeLa cells, effects on KDEL receptor expression and calreticulin secretion, **240**, 36
- Endosomes
- flow of fluid-phase, bulk-membrane, and receptor-mediated tracers, effects of perturbations (fetal rat fibroblasts), **236**, 661
  - fusion, early, regulation by phospholipase D activity, **236**, 285
- Endosulfan II
- inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- Endosulfane
- and chlordane and DDT, induced growth of breast cancer MCF-7 cells, synergistic inhibitory effects of curcumin and genistein, **233**, 692
- Endosulfan sulfate
- inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- Endothelial cells
- agonist-stimulated, cation influx, role of myosin light chain kinase and tyrosine kinase inhibitors (pig), **235**, 657
- aortic
- apoptosis, inhibition by 17 $\beta$ -estradiol (bovine, human), **237**, 372
  - L-arginine effects (pig), **234**, 35
  - $\text{Ca}^{2+}$  entry, activation by fractional  $\text{Ca}^{2+}$  release from endoplasmic reticulum (rabbit), **241**, 471
  - caveolin-1 detergent solubility and association with endothelial NOS, modulation by tyrosine phosphorylation (bovine), **236**, 155
  - cytochrome P4501A1 induction by TCDD *in vitro*, potentiation by glucocorticoids (human, pig), **232**, 749
  - cytoplasmic  $\text{Cl}^-$  levels, effects on basal and inositol 1,4,5-trisphosphate-induced  $\text{Ca}^{2+}$  release (bovine), **238**, 292
  - expression of mammalian homologues of *trp* gene from *Drosophila* (bovine), **239**, 279
  - prostaglandin-endoperoxide synthase 1 expression, reduction by eicosapentaenoic and docosahexaenoic acids, **241**, 513
  - shear-stressed, elevated prostacyclin release, role of nitric oxide (bovine), **233**, 748
- brain capillary, L-carnitine transport: asymmetrical uptake in blood-brain barrier (pig), **241**, 127
- cerebral
- cytokine-induced nitric-oxide synthase expression, regulation by hairpin oligonucleotide (mouse), **235**, 394
  - permeability, modulation by interleukin-1 (pig), **239**, 804
  - fluid shear stress-subjected, G protein-coupled receptor expressed in, cDNA cloning (human), **240**, 737
  - glomerular, fibronectin and collagen IV production under normoglycemic conditions, stimulation by glycated albumin (rat), **239**, 91
  - high endothelial venules, sulfated sialyl Lewis X on, detection by antibodies (mouse), **230**, 546; *erratum*, **233**, 576

Endothelial cells (*continued*)

- human umbilical vein
  - apamin-sensitive  $\text{Ca}^{2+}$ -dependent  $\text{K}^{+}$  current and hyperpolarization, **236**, 340
  - apoptotic signal transduction in, role of integrin  $\beta 4$ , **233**, 182
  - cytokine-induced adhesion molecule expression, effects of dimethylfumarate, **234**, 19
  - integrin  $\beta_3$  expression, upregulation by cyclic stretch, **239**, 372
  - LPS-induced increase of cytosolic free  $\text{Ca}^{2+}$ , inhibition, role of chondroitin sulfate chains of urinary trypsin inhibitor, **238**, 560
  - NO production *in vitro*, enhancement by eicosapentaenoic acid, **232**, 487
  - TNF-mediated growth arrest, c-myc expression and RB phosphorylation during, **236**, 819
  - VCAM-1 expression, inhibition by reconstituted high-density lipoproteins, **238**, 61
- hypoxic and reperfusion injury, role of ICE-like proteinases, **231**, 844
- immortalized, ECV-304, telomerase activity during p53-mediated apoptosis (human), **241**, 642
- interleukin-8 expression, induction by *Helicobacter pylori*: protein-tyrosine kinase-dependent signal pathway (human), **240**, 561
- microvascular, surface adhesion molecule expression and eosinophil adhesion, effects of eotaxin (human), **241**, 136
- pulmonary artery
  - ecto-ATPase inhibition by  $\text{P}_2$  purinoceptor agonists ATP $\gamma$ S,  $\alpha, \beta$ -methylene-ATP, and AMP-PNP (bovine), **233**, 442
  - human angiogenin binding to, effect of angiogenin interaction with copper (bovine), **236**, 604
- staphylococcal enterotoxin B-pulsed, CD4 $^{+}$  T cell toxicity to, regulation by Fas/Fas ligand interaction (human), **239**, 782
- tumor vascular, antibody-based therapy targeting, suppression of solid tumor growth in rats, **236**, 493
- umbilical artery, nuclear translocation of angiogenin via microtubule- and lysosome-independent mechanisms (human), **238**, 305
- vascular
  - apoptosis, effect of hemodynamic force, **231**, 586
  - endothelin-converting enzyme expression, effect of endothelial growth factor (bovine), **235**, 713
- Endothelial derived vasorelaxation
  - impairment in human apo A-I transgenic rabbits, **241**, 205
- Endothelial growth factor
  - vascular, *see* Vascular endothelial growth factor
- Endothelialization
  - by local delivery of recombinant human vascular endothelial growth factor, effect on in-stent intimal formation (rabbit), **235**, 311
- Endothelin-1
  - induced vasoconstriction, bronchoconstriction, and thromboxane release in perfused lung, effect of phosphodiesterase inhibitors (rat), **231**, 22
  - nuclear signaling induced by, role of Rho GTPase (Rat-2 cells), **232**, 223
  - renal and vascular, expression *in vivo*, increase by angiotensin II (rat), **238**, 861
  - role in osteopontin upregulation in ischemia-induced renal failure in rat, **241**, 212
- Endothelin $_B$ 
  - bromodeoxyuridine-induced expression in A375 human melanoma cells, **234**, 526
- Endothelin-converting enzyme
  - expression in vascular endothelial cells, effect of endothelial growth factor (bovine), **235**, 713
  - functional activity *in vivo*, effects of angiotensin II (rat), **238**, 861
- Endothelin receptor type A
  - role in endothelin regulation (rat), **238**, 861
- Endothelin receptor type B
  - related gene enriched in brain, cloning and characterization (human), **233**, 559
- Endothelium
  - CD44 expression and interactions with tumor cells, regulation by hepatocyte growth factor/scatter factor (human), **233**, 1
  - nitric oxide formation, stimulation by 2-(allylthio)pyrazine, role in protective effect of 2-AP in murine model of endotoxemia, **239**, 310
  - regrowth *in vivo*, effect of ACE inhibition (rabbit), **231**, 577
- Endotoxemia
  - affected heart, NO synthase gene transcription and protein activity (rat), **231**, 211
  - protective effect of 2-(allylthio)pyrazine, role of 2-AP inhibition of iNOS expression and endothelial NO formation in murine model, **239**, 310
- Endotoxic shock
  - murine model, glucocorticoid regulation of nitric oxide and tetrahydrobiopterin in, **240**, 298
- Endotoxin, *see also* Lipopolysaccharide
  - tolerance of ovarian carcinoma cells, role of LPS-inducible I $\kappa$ B kinase (human), **232**, 602
  - treated rat, NO production in alveolar macrophages, effect of ceramide, **234**, 738
- eNOS, *see* Nitric-oxide synthase, endothelial
- Entamoeba histolytica*
  - expressed sequence tags, analysis, **236**, 611
- Enterobacteriaceae*
  - swimming motility, effect of glucose concentration, **231**, 692
- Enterotoxin
  - heat-stable, *see* STa
- Envelope proteins
  - rubella virus, baculoviral display, **238**, 717
- Enzymatic reactions
  - single molecule imaging by objective-type total internal reflection fluorescence microscopy, **235**, 47
- Enzyme-linked immunosorbent assay
  - sandwich technique, angiogenin (bovine), **232**, 323
- Eosinophils
  - adhesion to microvascular endothelial cells, and surface adhesion molecule expression on endothelial cells, effects of eotaxin (human), **241**, 136
  - from asthmatic patients treated with or without prednisolone, PAF-induced chemotaxis, **237**, 146
  - induced inflammation in asthma, correlation with eotaxin expression (human), **236**, 299
  - interleukin-8 release, inhibition by epinastine (human), **230**, 125
  - monocyte chemotactic protein-4-induced oxygen radical production, actin reorganization, and CD11b upregulation via pertussis toxin-sensitive G protein (human), **240**, 32
- Eotaxin
  - effects on surface adhesion molecules of endothelial cells and on eosinophil adhesion to microvascular endothelial cells (human), **241**, 136
  - expression in asthma, and eosinophilic inflammation (human), **236**, 299
  - genomic organization, sequence, and transcriptional regulation (human), **237**, 537
  - as potent chemotaxin for human basophils, **231**, 365
- Eph*-related protein receptor
  - kinase-defective, expression in normal brain (human), **235**, 487
- Epidermal carcinoma cells
  - A431, EGF-induced Stat1 signaling, inhibition by lysophosphatidic acid (human), **240**, 856
- Epidermal growth factor
  - induced Stat1 signaling in human epidermal carcinoma A431 cells, inhibition by lysophosphatidic acid, **240**, 856
  - inhibition of expression of WDNM1 and sulfated glycoprotein-2 genes in mammary epithelial cells, **240**, 104
  - stimulation of 13-hydroxyoctadecadienoic acid formation (human), **231**, 111
  - stimulation of tyrosine phosphorylation of SHPS-1 and association with SHP-2 (CHO cells), **239**, 483

## Subject Index

- treated PC12h cells, neurite formation and MAP kinase activation, effect of protein-tyrosine-phosphatase inhibitor 3,4-dephostatin, **238**, 213
- Epidermal growth factor-like protein**  
S(1-5), interaction with DAN-binding protein DA41 (rat), **237**, 245
- Epidermal growth factor receptor**  
stimulation of diacylglycerol kinase, **232**, 111
- Epidermoid carcinoma cells**  
A431, and Swiss 3T3 cells, activation of ERK 2, JNK, and p38, induction by low extracellular pH, **241**, 236  
HEp-2, cytotoxic necrotizing factor 1-induced apoptosis inhibition and phagocytosis promotion, relationship (human), **241**, 341  
KB, reversal of heavy metal resistance (human), **236**, 586  
multidrug-resistant KB<sub>V200</sub> cell growth, inhibition by MDR1 antisense RNA, **239**, 345
- Epilepsy**  
related mouse jerky gene, human homologue of, cloning, mapping, and tissue distribution, **236**, 389
- Epimorphin**  
cellular recognition sequence identification, and role of cell/epimorphin interaction in lung branching morphogenesis, **234**, 522
- Epinastine**  
inhibition of interleukin-8 release from human eosinophils, **230**, 125
- Epinephrine**  
upregulation of brain-derived neurotrophic factor and nerve growth factor synthesis by astrocytes in culture (mouse), **238**, 468
- Epithelial cells**  
alveolar, type II, expression of receptor for advanced glycation end products gene (rat), **238**, 512  
angiogenin localization (bovine), **232**, 323  
asthmatic bronchial, der p1 induction of NF- $\kappa$ B activation via interference with I $\kappa$ B $\alpha$  function (human), **236**, 522
- breast**  
HBL100, proliferation, inhibition by dextran derivative CMD7 by interference with FGF2 autocrine loop, **239**, 424; *erratum*, **241**, 804  
MCF-10A  
growth factor receptor and STATS signal transduction stimulation by DDT, **231**, 17  
Wnt5a expression, downregulation by extracellular matrix and mutated c-Ha-ras, **239**, 911  
MCF-10AT, receptor tyrosine kinase signal transduction, effects of Fas-signaling, **230**, 89  
bronchial, and Jurkat T cells, NF- $\kappa$ B activation, opposite effects of cyclosporin A-sensitive Ca<sup>2+</sup> signaling (human), **234**, 424  
gastric, apoptosis induction by *Helicobacter pylori* accompanied by increased Bak expression, **239**, 626  
gastrointestinal, substratum-dependent and region-specific control of attachment and proliferation in serum-free culture (rat), **230**, 537  
glomerular, proliferation, role of extracellular matrix (rat), **231**, 160  
HEp-2, cytotoxic necrotizing factor 1-induced apoptosis inhibition and phagocytosis promotion, relationship (human), **241**, 341
- hepatic**  
response to lipid peroxidation products: GST-P induction by 4-hydroxy-2-nonenal (rat), **236**, 505  
transformed, HGF-mediated growth inhibition and apoptosis induction (rat), **236**, 396
- intestinal**  
IEC-6 cells, wound-induced signal transduction, mediation by ERK and p38 MAP kinase pathways (fetal rat), **233**, 389  
IEC-18, CYP1A1 induction by  $\beta$ -naphthoflavone, and potentiation by dibutyl cAMP (rat), **233**, 623
- lens**, expression of extracellular calcium-sensing receptor (human), **233**, 801; *erratum*, **237**, 481
- long-term postconfluent culture**, protein insolubility and late-stage morphogenesis (MDCK cell), **234**, 719
- mammary**  
 $\beta$ -casein expression, role of c-src (mouse), **241**, 710  
confluence, associated downregulation of c-myc expression (mouse), **239**, 566  
HC11, expression of WDNM1 and sulfated glycoprotein-2 genes, inhibition by EGF, **240**, 104  
MDCK, differential localization of G proteins G $\alpha$ o and G $\alpha$ i-1, -2, and -3, **234**, 1  
non-ciliated bronchiolar, CFTR-like chloride channels (rabbit), **230**, 470  
prostate, spermidine-spermine N<sup>1</sup>-acetyltransferase, effect of gossypol (dog), **231**, 383  
pulmonary type II, COX-2 alternate transcripts, identification, cloning, and characterization (human), **234**, 85  
renal, expression of dihydropyridine binding sites, **237**, 41  
tracheal, microsomes, <sup>45</sup>Ca<sup>2+</sup> release, induction by caffeine and inositol 1,4,5-trisphosphate (pig), **230**, 247
- Epithelium**  
chloride channel-enriched membranes, copurification with nonmuscle myosin IIA (bovine), **231**, 369  
gastric, MUC5AC message detection (rat), **236**, 789  
gastrointestinal, A33 antigen, characterization of posttranslational modifications (human), **236**, 682  
lower airway, Na<sup>+</sup>/K<sup>+</sup> ATPase activity in, comparison in cystic fibrosis and non-cystic fibrosis lung (human), **232**, 464  
mammalian digestive tract, pancreatic trypsin and chymotrypsin in, evidence for sulfated lipids as inhibitors of, **237**, 262  
nasal, amiloride-sensitive sodium channels, variation from classical epithelial Na<sup>+</sup> channels (human), **237**, 488  
ocular ciliary, cloning and functional expression of swelling-induced chloride conductance regulatory protein pl<sub>Clm</sub> (rabbit), **239**, 692  
olfactory mucosa, expression of metallothioneins 1 and 2 during regeneration of, analysis (mouse), **232**, 136  
pulmonary, branching morphogenesis, role of cell/epimorphin interaction, **234**, 522  
retinal pigment, identification of monocarboxylate transporter MCT3 (chicken), **234**, 90  
stratified, keratinocyte activation after acute injury, molecular aspects, **236**, 231
- Epitopes**  
antigenic, formation in oxidized LDL, inhibition by NO (human), **232**, 613  
birch pollen Bet v 4 allergen, analysis, **239**, 197  
myelin-associated protein 2',3'-cyclic-nucleotide 3'-phosphodiesterase, recognized by monoclonal antibody, characterization, **237**, 266  
sialyl Lewis x and Lewis x, *in vivo* synthesis, distinct substrate specificities of human  $\alpha$ -1,3-fucosyltransferases for, **237**, 131
- Epoxide hydrolase**  
microsomal, membrane anchor of, membrane topology (human, rabbit, rat), **236**, 754
- Epsilon sequence**  
phage T7, function as initiator of translation of CAT mRNA in *E. coli*, **236**, 253
- Epstein-Barr virus**  
DNA polymerase, catalysis of strand displacement-associated DNA synthesis, **238**, 33
- vectors**  
coupled with cationic or HVJ-liposomes, transduction of genes into human cells, **238**, 795  
coupled with hemagglutinating virus of Japan-liposome system, in targeted gene therapy of EBV-associated neoplasms, **241**, 112
- ErbB4 protein**  
tyrosine phosphorylation, stimulation by aurintricarboxylic acid in neuroblastoma cells (human), **230**, 266

## Subject Index

- Erbstatin  
sensitive tyrosine kinase, functioning in ascidian egg activation, evidence for, **238**, 130
- ERC-55  
mouse homologue VAF1, specific interaction with vitamin D receptor among nuclear receptors, **233**, 765
- ERE, *see* Estrogen responsive element
- Ergothioneine  
as peroxynitrite scavenger, **231**, 389
- ERK, *see* Extracellular signal-regulated kinase
- Ern  
conditional version, creation by fusion to ligand-binding domain of estrogen receptor, **239**, 252
- Erwinia carotovora* subsp. *carotovora* LY34  
endo-1,4- $\beta$ -glucanase genes, cloning, sequencing, and product characterization, **241**, 636
- Erwinia herbicola*  
carotenoids from, RpoS-dependent overexpression in *oxyr*-deficient *Escherichia coli*, **239**, 305
- Erythroblastoid cells  
K562, *see* K562 cells
- Erythrocytes  
copper release and thioredoxin induction, relationship to stability of FALS-associated mutant superoxide dismutase-1, **241**, 251  
membrane protein 7.2b, binding to calpromotin (human), **232**, 294  
plasma membrane,  $\text{Ca}^{2+}$  pump, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451  
voltage-dependent  $\text{Ca}^{2+}$  influx, characterization by fura-2 (human), **236**, 549
- Erythroleukemia cells  
Friend, nucleus, association with phosphatidylinositol-transfer protein, reduction by DMSO-induced differentiation (mouse), **230**, 302  
K562, *see* K562 cells  
MEL, coproporphyrinogen oxidase expression, regulatory role of transcriptional factor GATA-1 (mouse), **233**, 729
- Erythromycin  
complex with iron, superoxide scavenging activity (human), **232**, 183
- Erythropoietin  
induced hemoglobin synthesis in murine hematopoietic cell line, role of Stat5, **234**, 198  
induction of CrkL tyrosine phosphorylation and association with Shc, SHP-2, and Cbl in hematopoietic cells, **239**, 412  
production in hepatocellular carcinoma cells (human), **232**, 702
- ES1  
abundant in retinal photoreceptor cells, gene cloning and expression (zebrafish), **237**, 84
- Escherichia coli*  
aggregated proteins in, limited proteolysis *in vivo*, **237**, 325  
CAT mRNA translation, function of  $\epsilon$  sequence of phage T7 as initiator of, **236**, 253  
chromosome replication, DnaA protein initiating, conformational transition induced by ATP, **232**, 130  
cytotoxicity of HIV-1 Nef N-terminal peptides, **232**, 707  
DNA gyrase activity, modulation by high pressure, **239**, 552  
effect on formation of azoxymethane-induced aberrant crypt foci in colon (rat), **238**, 753  
energy-dependent proteases in, characterization, **241**, 613  
expression studies  
birch pollen Bet v 4 allergen, **239**, 197  
*Brevibacterium flavum* *ftsZ* gene, **236**, 383  
*Cryptosporidium parvum* 15-kDa protein gene, **230**, 164  
divergent plastocyanin expression, **235**, 631  
frog photoreceptor-specific  $\text{Ca}^{2+}$ -binding proteins S-modulin and s26, **234**, 173  
hepatitis C virus RNA polymerase, **232**, 231  
histidine-tagged human vitamin D receptor, for analysis of binding to 65-kDa nuclear protein, **232**, 806  
human cytochrome P450 rat NADPH-cytochrome P450 oxidoreductase, **230**, 211  
human endothelial actin-binding protein 71-kDa domain, **232**, 555  
human hepatitis B virus polymerase: RNase H activity, **233**, 401  
K99 pilus adhesin, in enterotoxigenic organisms, induction by norepinephrine, **232**, 682  
recombinant tobacco acetolactate synthase, **234**, 549  
*Sulfolobus acidocaldarius* Rieske iron-sulfur protein II, with correctly inserted [2Fe-S] cluster, **234**, 283  
*Sulfolobus solfataricus* *trpE* and *trpG* gene, **230**, 306  
synthetic genes specifying periodic polymers modeled on repetitive domain of wheat gliadins, **239**, 240  
*Tetrahymena* 14-nm filament protein/citrate synthase expressed in, bifunctional property, **237**, 205  
glutathione-dependent formaldehyde dehydrogenase induction, **238**, 693  
*hfq* gene product, DNA binding properties, **236**, 576  
histidyl-tRNA synthetase mutants, isolation and analysis, **237**, 192  
HIV-1 protease inhibitor screening with, **233**, 36  
HsIVU protease assembly and proteolytic activity in, role of ATP binding and hydrolysis, **238**, 581  
4-hydroxyphenylacetate catabolic pathway, HpaA protein identification as positive regulator of, **232**, 759  
large mechanosensitive ion channel, radiolabeled, crosslinking studies and localization and assembly in membranes, **232**, 777  
melibiose transporter, inhibition by amiloride, **233**, 147  
*oxyr*-deficient, RpoS-dependent overexpression of carotenoids from *Erwinia herbicola*, **239**, 305  
phagocytosis *in vitro*, and release of lipopolysaccharide, by silkworm adhering hemocytes, **231**, 623  
plasmid replication, instability of regions with expanded CAG repeats during, **240**, 471  
*rnpB* promoter mutants, alteration in stringent response, **230**, 582  
stationary phase-specific mRNA, polyadenylation, **239**, 46
- Esophageal carcinoma cells  
TE10, radiation-induced cell cycle arrest and apoptosis, promotion by GML overexpression (human), **241**, 481
- Estradiol-17 $\beta$ , effects on  
development of alveolar structures in whole-organ culture of mammary gland (mouse), **232**, 340  
protein expression by narrow stromal osteoblasts (mouse), **233**, 30  
skeletal myoblast growth, **232**, 373  
and estrogenic pesticides, induced growth of breast cancer MCF-7 cells, synergistic inhibitory effects of curcumin and genistein, **233**, 692  
inhibition of apoptosis of endothelial cells (bovine, human), **237**, 372  
and pregnancy, effects on osteogenic protein-1 mRNA expression in uterus, kidney, and ovary (mouse), **234**, 242
- Estrogen  
activation of MAP kinase in bone cell line (rat), **235**, 99  
deficiency, associated bone mass loss, analysis in transgenic mouse overexpressing osteoblast stimulating factor-1, **238**, 528  
regulation *in vivo* of progesterone receptor forms A and B expression (chicken), **231**, 573  
steroidal types, synergistic responses *in vivo* and *in vitro* (turtle, yeast), **235**, 336  
stimulation of tamoxifen-induced neuronal cell apoptosis *in vitro*, nongenomic mechanism (GT1-7 cells), **240**, 464
- Estrogen receptor  
112-kDa, expression in cerebral cortex and autoregulation with age (mouse), **231**, 683  
ER $\alpha$  and ER $\beta$ , expression in upper gastrointestinal tract with regulation of trefoil factor family 2 mRNA levels in ovariectomized rat, **240**, 478

- ligand-binding domain, creation of conditional version of transcription factor Erm by fusion to, **239**, 252
- mRNA, assay by quantitative PCR with internal standard fragment (human, rat), **228**, 358; *erratum*, **231**, 520
- from oviduct, identification and characterization (alligator), **232**, 308
- Saccharomyces cerevisiae*-expressed, in study of clinical and environmental anti-estrogens (human), **235**, 669
- signaling pathways, tumor suppressor p53 as negative regulator of, **239**, 617
- subtype, role in agonistic effect of tamoxifen: functional difference between ER $\alpha$  and ER $\beta$  (human), **236**, 140
- Estrogen receptor ligand-binding domains
- mutated, regulation of Cre recombinases (mouse), **237**, 752
- Estrogen responsive element
- promoter context, role in agonistic effect of tamoxifen (human), **236**, 140
- Estrogen-responsive finger protein
- gene cloning, promoter structure, and binding proteins (human), **236**, 765
- Estrone
- effects on skeletal myoblast growth, **232**, 373
- Ethambutol
- inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536
- Ethanol. *see also* Fetal alcohol syndrome
- chronic consumption, effect on oxidative damage to mtDNA (rat), **235**, 286
- effects on Stat3 activation in normal and regenerating liver after short- and long-term exposures (rat), **239**, 666
- treated rat, NO production in alveolar macrophages, effect of ceramide, **234**, 738
- Ethidium bromide
- effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- 7-Ethoxyresorufin-O-deethylase
- and other cell cycle-regulating genes and aryl hydrocarbon receptor gene, mRNA coregulation by TGF- $\beta$ 1 in human cancer cell lines, **241**, 86
- 3-Ethyl 5-benzyl 2-methyl-6-phenyl-4-phenylethynyl-1,4-( $\pm$ )-dihydropyridine-3,5-dicarboxylate
- induction of apoptosis of HL-60 and U-937 cells, protective effect of adenosine A<sub>1</sub> receptor agonists, **232**, 317
- Etoposide
- ortho-quinone derivative, inhibition of cleavable DNA–topoisomerase II complex, **237**, 24
- Euglena gracilis*
- immunodetection of protein related to mammalian arrestin, **233**, 601
- JB70 gene expression, **234**, 544
- Eukaryotic initiation factor 2
- guanine nucleotide exchange on, catalysis by eIF-2B, mechanism, **239**, 223
- Eukaryotic initiation factor 4E
- depletion, suppression of ornithine decarboxylase mRNA translation and polyamine transport in *ras*-transformed CREF cells by, **240**, 15
- Eukaryotic initiation factor 5
- zinc finger-containing, zinc-dependent binding to nucleic acids (*Zea mays*), **236**, 510
- Evolution
- cancer cells, role of telomere crisis, **230**, 1
- $\gamma$ S and  $\beta/\gamma$  crystallins, comparison: characterization of  $\gamma$ S-crystallin isoforms from lip shark *Chiloscyllium colax*, **240**, 51
- Exchange inhibitory peptide
- binding site, localization on cardiac Na–Ca exchanger (bovine), **236**, 113
- Exercise
- endurance training, effect on membrane-associated fatty acid-binding protein in skeletal muscle (human), **231**, 463
- and high-fat diet, effects on expression of 5'-deleted GLUT4 minigenes in transgenic mice, **239**, 503
- treadmill running, augmentation of phosphatidylinositol 3-kinase activity in skeletal muscle (rat), **236**, 647
- Exocytosis
- from acetylcholine- and catecholamine-containing vesicles in pheochromocytoma cells, mechanistic comparison (rat), **239**, 57
- granule, by natural killer cells, role of adenosine (mouse), **231**, 264
- Exodeoxyribonuclease (lambda-induced)
- reversible inhibition by high pressure, **230**, 140
- Exoglycosidases
- incubation of fixed mouse eggs with, effects on sperm binding, **238**, 95
- Exon/intron organization
- lipopolysaccharide binding protein and bactericidal permeability increasing protein genes (human), **236**, 427
- 5' Exoribonuclease
- XRNI and HKEI, effect of RNA structural modifications (*Saccharomyces cerevisiae*), **235**, 799
- Explant culture
- articular cartilage, proteoglycan metabolism in, effects of continuous cyclic mechanical loading (bovine), **240**, 216
- neocortical, neurite outgrowth in, role of amino-terminal region of  $\beta$ -amyloid precursor protein, **236**, 59
- Expressed sequence tags
- Entamoeba histolytica*, analysis, **236**, 611
- Extracellular domain
- P2X<sub>2</sub> receptor, molecular assembly, **240**, 618
- Extracellular fluid
- ATP release from *Saccharomyces cerevisiae* to, role of SacIp, **236**, 50
- Extracellular loop
- VIP1 receptor, Asp196, role for VIP binding and VIP-stimulated cAMP production (human), **230**, 289
- Extracellular matrix
- associated proteins, metal-catalyzed oxidation, effect on integrin-mediated adhesion of mesangial cells (mouse), **233**, 50
- composition, effect on JNK/SAPK and ERK activation by mechanical strain in rat VSMC, **237**, 239
- downregulation of Wnt5a expression in mammary epithelial cell line MCF-10A (human), **239**, 911
- macrophage-secreted, binding by oxidized LDL, **237**, 271
- role in MAP kinase activation and glomerular epithelial cell proliferation (rat), **231**, 160
- Extracellular receptor
- role in adenosine inhibition of granule exocytosis by natural killer cells (mouse), **231**, 264
- Extracellular signal-regulated kinase
- and c-Jun NH<sub>2</sub>-terminal kinases, activities in aorta of hypertensive rats *in vivo*, **236**, 199
- ERK1 and ERK2, activation
- by FGF-2 and PDGF-BB in human osteoblastic and bone marrow cells, and differences in ERK1 mobility and in-gel renaturation in human, mouse, and rat osteoblasts, **238**, 134
- by UVC irradiation, role of protein kinase C (NIH3T3 cells), **240**, 273
- ERK2, activation in A431 and Swiss 3T3 cells, induction by low extracellular pH, **241**, 236
- and JNK/SAPK, activation by mechanical strain in rat VSMC, dependence on extracellular matrix composition, **237**, 239
- related signaling cascade, mediation of intestinal epithelial wound-induced signal transduction (IEC-6 cells), **233**, 389
- role in ceramide inhibition of thrombin-stimulated cell proliferation (CCL39 cells), **240**, 405
- in TNF-stimulated neutrophils (human), **235**, 42
- Eye
- ocular ciliary epithelium, cloning and functional expression of swelling-induced chloride conductance regulatory protein *pl<sub>cm</sub>* (rabbit), **239**, 692
- Pax6* gene alternative splicing and evolutionary conservation of intron sequences (bovine), **240**, 196

## Ezrin-like domain

and Dbl homology domain, human CDEP protein containing, molecular cloning and characterization, **241**, 369

## F

## Familial amyotrophic lateral sclerosis

associated SOD-1 mutants, stability, relationship to copper release and thioredoxin induction in erythrocytes, **241**, 251

## Familial hypertrophic cardiomyopathy

$\alpha$ -tropomyosin mutations Asp175Asn and Glu180Gly causing, effects on  $\text{Ca}^{2+}$  regulation of thin filament motility (rabbit), **236**, 760

## Farnesol

and geranylgeraniol, in salvage pathway for protein isoprenylation, **237**, 483  
phosphorylation by hepatic microsomal and peroxisomal fractions (rat), **230**, 562

## Farnesyl moiety

transfer to Ras p21 (rat), **231**, 789

## Farnesyl-protein transferase

acting on Ras, inhibition by organic acid (human), **232**, 478  
photoaffinity labeling and enzymatic synthesis of Ras protein incorporating photoactive isoprenoid (yeast), **235**, 377

## Farnesylpyrophosphate

internalization by adrenal medulla chromaffin cells (bovine), **238**, 7

## S-Farnesylthiosalicylic acid

induction of inhibition of MAP kinase activation (EJ, Rat-1 cells), **239**, 900

## Fas

apoptosis mediated by, effects on receptor tyrosine kinase signal transduction in breast epithelial cells (human), **230**, 89

cytotoxicity dependent on, and perforin-dependent cytotoxicity, dissociation (mouse), **235**, 461

gene expression by human neutrophils, **233**, 700

induced apoptotic cell death, inhibition by osmotic cell shrinkage (Jurkat T cells), **236**, 517

interaction with Fas ligand, regulatory effect on  $\text{CD4}^+$  T cell toxicity to staphylococcal enterotoxin B-pulsed endothelial cells (human), **239**, 782

primary transcript, alternative splicing generating soluble Fas antagonists, suppression in failing ventricular myocardium (human), **239**, 794

## Fas/Apo-1(CD95)

induction of apoptosis of primary hepatocytes, inhibition by cAMP (rat), **232**, 20

## Fas ligand

gene expression by human neutrophils, **233**, 700

interaction with Fas, regulatory effect on  $\text{CD4}^+$  T cell toxicity to staphylococcal enterotoxin B-pulsed endothelial cells (human), **239**, 782

membrane-anchored, mediation of anti-CD3-induced apoptosis in Jurkat T cells, **238**, 670

## Fasting

effect on gastrin, cholecystokinin, and somatostatin gene expression in pancreas and upper digestive tract (rat), **231**, 835

and hyperglycemia and obesity, genes regulating, in Otsuka Long-Evans Tokushima fatty rat model for obese NIDDM, **241**, 200

## Fasting/refeeding

effect on translation initiation in skeletal muscle and liver (rat), **240**, 825

## Fat body

lebocin 3 and lebocin 4 induction by lipopolysaccharide (*Bombyx mori*), **238**, 769

## Fatty-acid amide hydrolase

recombinant, in reversible anandamide hydrolysis and synthesis (rat), **237**, 512

## Fatty acid-binding protein

membrane-associated, in skeletal muscle, effect of endurance training (human), **231**, 463

## Fatty acids

branched-chain, metabolism in peroxisomes, role of sterol carrier protein X: specific reaction with 3-oxo-pristanoyl-CoA (rat), **236**, 565

long-chain, protonophoric action in mitochondria, role of dicarboxylate carrier (rat liver), **232**, 414

peroxisomal, oxidation, fibroblasts from deficient patient, complementation analysis, **235**, 176

polyunsaturated, linoleic acid conversion to, in adult rat cardiomyocytes, effects of aging, **237**, 142

requirements for growth in *dsrR* gene-disrupted *Brevibacterium lactofermentum* mutant, **234**, 157

sulfonyl fluorides, effect on anandamide metabolism and binding to cannabinoid receptor (rat), **231**, 217

unsaturated, mobilization of intracellular calcium independent of  $\text{IP}_3$  generation and via insertion at plasma membrane (Ehrlich ascites tumor cells), **241**, 312

very-long-chain, abnormal metabolism associated with adrenoleukodystrophy protein deficiency (mouse), **232**, 631

## FccR1

aggregation, induction of tyrosine phosphorylation of 72-kDa protein downstream of Syk (RBL-2H3 cells), **239**, 670

and formyl peptide receptor, cooperation in RBL<sup>FPR</sup> cells, **235**, 812

Fc $\gamma$  receptor

induced MAPK activation in murine macrophages, modulatory effect of IFN- $\gamma$ , TGF- $\beta$ , and platelet-activating factor, **238**, 256

Ferredoxin NADP oxidoreductase, *see* Adrenodoxin reductase

## Ferritin

H chain, transcription in HeLa cells, stimulation by okadaic acid by increased interaction between p300 and transcription factor Bbf, **240**, 179

L chain, mRNA, iron-responsive element, structure and function (human), **235**, 212

## Fertilization

protein-tyrosine kinase signaling at, **240**, 519

## Fertilization channels

in oocytes, gating by NO via nicotinamide nucleotide metabolism (*Ciona intestinalis*), **239**, 723

## Fetal alcohol syndrome

implications of *CYP2E1* expression during embryogenesis and fetogenesis in cephalic tissues (human), **238**, 443

molecular characterization with mRNA differential display (mouse), **240**, 309

## Fetogenesis

associated *CYP2E1* expression in cephalic tissues, implications for fetal alcohol syndrome (human), **238**, 443

F<sub>1</sub>F<sub>0</sub>-ATPase

gene cloning from archaeobacterium *Methanosarcina barkeri*, **241**, 427

FGF-2, *see* Fibroblast growth factor-2

## Fibers

air pollutant, exposure of human and rat alveolar macrophages, differential oxidative response to, **240**, 669

## Fibrils

$\beta$ -helical, from model peptide, **235**, 675

islet amyloid polypeptide, formation *in vitro*, effects of beta cell granule peptides (human), **236**, 580

## Fibrin

glycation, effects on t-plasminogen activator-catalyzed plasminogen activation, **240**, 595

## Fibrinogen

CD18-mediated binding to neutrophils, role of phosphatidylinositol 4,5-bisphosphate 3-kinase (human), **232**, 719

## Fibrinogen receptor

platelet glycoprotein IIb-IIIa, interaction with disagregin (*Ornithodoros moubata*), **241**, 744

## Fibroblast growth factor

basic, *see* Basic fibroblast growth factor

- stimulated cells, tyrosine-phosphorylated p90 in, direct association of SHP2 with, **238**, 261
- Fibroblast growth factor-2  
autocrine loop, interference of dextran derivative CMDB7 with, role in inhibition of breast epithelial HBL100 cell proliferation, **239**, 424; *erratum*, **241**, 804  
mitogenicity, effect of glycosaminoglycans (pig), **235**, 369  
and PDGF-BB, activation of extracellular signal-regulated kinases 1 and 2 in human osteoblastic and bone marrow cells, **238**, 134
- Fibroblast growth factor-8  
expression during oocyte and spermatogonium development (mouse, rat), **232**, 173
- Fibroblastoid cells  
L929, *see* Fibrosarcoma cells, L929
- Fibroblasts  
3T3-L1  
insulin stimulation of GLUT-4 translocation, effect of botulinum E toxin light chain, and toxin light chain inability to cleave SNAP-23, **237**, 388  
subcellular localization of SNAP-23 (mouse), **230**, 64  
B82CAP, mtDNA-less, isolation and characterization using ditercalinium (mouse), **239**, 257  
BALB/c 3T3, loss of cell adhesion to substratum, upregulation of p21<sup>Cip1/WAF1</sup> expression, **238**, 169  
C3H10T1/2, osteogenic differentiation, induction by hedgehog proteins, **237**, 465  
CCL39, thrombin-stimulated cell proliferation, inhibition by ceramide, role of extracellular signal-regulated protein kinase (Chinese hamster), **240**, 405  
cells overexpressing E2F-1 cDNA, binding of phosphorylated forms of E2F-1 to retinoblastoma protein in, analysis (mouse), **232**, 336  
defective transcripts of Werner's syndrome gene, downregulation in WS patients, **236**, 151  
dermal, free Ca<sup>2+</sup> levels and acylphosphatase muscular isoenzyme (human), **230**, 327  
embryonic lung, IMR-90, isolation of cytokine inhibiting osteoclastogenesis (human), **234**, 137  
fetal and adult, autocrine growth regulation (human), **237**, 348  
fluid, bulk-membrane, and receptor endosomal flow, effects of perturbations (fetal rat), **236**, 661  
G1 arrest, abrogation after DNA damage in BALB/c 3T3 A31 variant 1-1 clone, association with constitutive overexpression of *Cdk4*, *Irf1*, and *Mdm2* mRNAs, **233**, 216  
gastric cultured, vascular endothelial growth factor expression (human), **234**, 493  
gene transduction by Epstein-Barr-virus-based vectors coupled with cationic or HVJ-liposomes (human), **238**, 795  
hybrids with HeLa cells, radiation-induced tumorigenesis, associated changes in *N*-glycosylation of glucose transporter-1, **240**, 395  
LATK<sup>-</sup>, chimeric genes transfected in, dexamethasone inducibility, role of mitochondrial nucleotide sequence similar to hormone response element (rat), **235**, 349  
from mitochondrial disease patients, visualization of mitochondria with green fluorescent protein, **239**, 580  
multiple cadherin expression (human), **235**, 355  
Niemann-Pick type II, heterozygous, increased expression of caveolin-1 (human), **236**, 189
- NIH3T3  
atypical, overexpressing protein kinase C  $\zeta$ , phorbol 12-myristate 13-acetate effects, **237**, 336  
fluoroaluminate-induced pertussis toxin-sensitive protein phosphorylation (mouse), **235**, 680  
Fyn activation, effect of PDGF-induced phosphorylation of Tyr28 in Fyn N-terminus, **241**, 355  
growth inhibition by *ZPK* gene overexpression, **231**, 153  
insulin-mediated metabolic and mitotic signaling, negative regulation by low-molecular-weight phosphotyrosine protein phosphatase, **238**, 676  
malignant transformation initiated by constitutive expression of *polo*-like kinase, **234**, 397  
mtDNA-less, isolation and characterization using ditercalinium (mouse), **239**, 257  
PDGF-stimulated, STAT1 and STAT3 activation by c-Src, **239**, 493  
Ras-transformed  
association of dynamin II with Grb2 SH3 domain, **234**, 539  
binding sites for inositol-1,3,4,5-tetrakisphosphate, **239**, 349  
retroviral vector expressing anti-gene RNA in, inhibition of gene expression from human *c-erbB* gene promoter, **240**, 203  
senescence-like state, induction by sodium butyrate, and butyrate enhancement of p21<sup>WAF1/CIP1</sup> promoter activity independently of p53, **237**, 457  
transformation by DJ-1 and *ras* (mouse), **231**, 509  
transformed with activated Ha-*ras*, decreased retinoylation in, **239**, 80  
UVC irradiation, activation of extracellular signal-regulated kinase 1/2 by, role of protein kinase C, **240**, 273  
NIH-3T3-ras, large aggregates of unphosphorylated hsp27 mutants in, control of ROS and glutathione levels and generation of protection against TNF- $\alpha$ , **241**, 187  
Nim1-like kinase pathway acting at G0-1/S transition (human), **236**, 130  
periodontal ligament cells, prion protein mRNA expression, regulation by MRP8 fragment (human), **234**, 59  
from peroxisomal fatty acid oxidation deficient patient, complementation analysis, **235**, 176  
phospholipase C $\beta_1$  expression, control by Lac repressor system: relationship of nuclear PLC $\beta_1$  overexpression and growth factor stimulation, **241**, 122  
pMAM-ras-REF, growth on PolyHEMA, inhibition by antisense oligodeoxynucleotides against K-*ras* (rat), **231**, 735  
proliferation  
induced by 1,2-dimethylhydrazine auto-oxidation: role of iron and free radicals (mouse), **234**, 44  
prevention by HIV-1 *vpr* gene product without G<sub>2</sub> arrest of cell cycle (mouse), **232**, 550  
Rat-1, insulin-stimulated mitogenesis, role of insulin receptor-associated heat shock protein 90, **237**, 345  
Rat-1-derived heat-resistant M21 cells expressing human HSP70, protein glycosylation in, **232**, 26  
rat embryo CREF, *ras*-transformed, translation of ornithine decarboxylase mRNA and polyamine transport, suppression by depletion of eIF-4E, **240**, 15  
senescent, efficient transfer of genes by adenovirus vectors via highly expressed  $\alpha v\beta 5$  integrin, **240**, 88  
SK45, expression of mammalian homologues of *trp* gene from *Drosophila* (human), **239**, 279  
small intestinal lamina propria, proliferation and collagen synthesis, induction by lipopolysaccharide and role of nitric oxide (human), **240**, 458  
Swiss 3T3  
and A431 cells, activation of ERK 2, JNK, and p38, induction by low extracellular pH, **241**, 236  
mitogenesis induction by leukemia inhibitory factor and selective enhancement, **236**, 814  
thrombin-induced stress fiber formation, regulation by 70-kDa S6 kinase (mouse), **233**, 193  
synovial, *see* Synovial cells  
*v-src*-transformed 3Y1 cells, cathepsin L gene activation in, role of Egr family proteins, **238**, 665  
WI-38  
cell cycle progression through late G<sub>1</sub> phase, role of calpain-like cysteine protease (human), **236**, 555  
senescence, associated downregulation of Ku autoantigen, DNA-dependent protein kinase, and poly(ADP-ribose) polymerase (human), **238**, 712

## Subject Index

## Fibronectin

- C-terminal heparin-binding domain, synthetic peptide FN-C' H-V from, promotion of adhesion of PMA-stimulated U937 cells, **239**, 205
- production by glomerular endothelial cells under normoglycemic conditions, stimulation by glycated albumin (rat), **239**, 91
- related peptides, bifunctional poly(ethylene glycol) hybrid of, **241**, 595

## Fibrosarcoma

- KMT-17, solid, growth suppression by antibody-based therapy targeting tumor vascular endothelial cells (rat), **236**, 493

## Fibrosarcoma cells

- Ge-4 clone cultured in protein-free medium, cell cycle control with minimal cdk2 participation (mouse), **232**, 622

## 1 029

- effect on NO and TNF- $\alpha$  production by RAW 264.7 macrophages (mouse), **230**, 636
- expressing yeast  $\Delta^7$ -desaturase gene, increased TNF sensitivity, **241**, 465
- and human K-562 cells, joint cultivation, effect on cytotoxic factor release (mouse), **234**, 655
- lipid unsaturation and membrane fluid state, modulation by stable transformation with yeast  $\Delta^7$ -desaturase gene, **237**, 362
- WFHL, expressing yeast  $\Delta^7$ -desaturase gene, increased TNF sensitivity, **241**, 465

## Fibrosis

- subcutaneous, induction in newborn mice by TGF- $\beta$ , and cooperative effects of other growth factors, **237**, 292; *erratum*, **240**, 507

## Filament-hook-basal body complex

- isolation from *Rhodobacter sphaeroides* W88 and polyhook mutant PG and ultrastructure, **238**, 733

## Fimbrillin polypeptides

- Porphyromonas gingivalis*, secretion by recombinant *Streptococcus gordonii*, **238**, 313

## Finkel-Biskis-Jenkins virus

- FBJ-LL, cell migration, inhibition by ganglioside GD1a expressed in FBJ-S1 cells, **231**, 340

Firefly luciferase, *see* Photinus-luciferin 4-monooxygenase (ATP-hydrolysing)

## FK 506-binding protein

- Xenopus* homologue, induction of secondary axis in embryos and inhibition by coexisting BMP-4 signaling, **239**, 585

## FKBP51 protein

- tissue distribution and abundance and mediation of calcineurin inhibition (human), **232**, 437

## Flagella

- basal body complex, isolation from *Rhodobacter sphaeroides* W88 and polyhook mutant PG and ultrastructure, **238**, 733

## Flavin-containing monooxygenase

- hepatic microsomal, catalysis of caffeine oxidation to theobromine and theophylline (rat), **235**, 685

## Flavin reductase

- stimulation of DsrA and DsrC proteins *in vitro* (*Rhodococcus erythropolis* IGTS8), **230**, 73

## Flavodoxin

- encapsulation in reverse micelles (*Desulfovibrio gigas*), **234**, 651

## Flavone acetic acid

- stimulation of NO and peroxynitrite production in subcutaneous mouse tumor, **235**, 509

## Flavonoids

- peroxynitrite scavenging by, **236**, 591

## Flt-1

- interaction with phospholipase C $\gamma$ : identification of phosphotyrosine binding sites, **240**, 635

## Flt-1 kinase

- phosphorylated 1169-tyrosine-containing region, identification as major binding site for PI C $\gamma$ , **238**, 487

## Fluid shear stress

- endothelial cells exposed to, G protein-coupled receptor expressed in, cDNA cloning (human), **240**, 737

## Fluorescence

- green fluorescent protein at high temperature, mutation enhancing, **232**, 69
- tryptophan, site-directed, in analysis of tear lipocalin solution structure (human), **239**, 191

## Fluorescence depolarization

- analysis of detergent effects on crystallization of light-harvesting chlorophyll *a/b*-protein complex (spinach), **233**, 555

## Fluorescence detection

- and magnetic microbead-based affinity separation, *in vitro* selection of DNA ligands to chloroaromatics using, **234**, 117

## Fluorescence microscopy

- objective-type total internal reflection, in imaging of fluorophores and enzymatic reactions, **235**, 47

## Fluorescence resonance energy transfer

- in detection of DNA bending in DNA-PAP1 protein complex, **231**, 553

## Fluorescence spectroscopy

- study of interaction of HIV-1 Tat(32-72) with target RNA, **241**, 31

## Fluorescence studies

- luminal Ca<sup>2+</sup> of sarcoplasmic reticulum vesicles during Ca<sup>2+</sup> uptake and release (rabbit), **241**, 181
- spPNA-DNA hybrids: spermine-conjugated peptide nucleic acids, **240**, 778
- time-resolved, annexin V conformational changes upon binding to liposomes, **234**, 111; *erratum*, **237**, 202
- xylose reductase cysteine residues (*Neurospora crassa*), **239**, 789

## Fluoride resistance

- encoding by butyrylcholinesterase gene with L3301 mutation (human), **240**, 372

## Fluorine

- effect on large complex formation by p130, **230**, 370

## Fluoroaluminate

- induction of pertussis toxin-sensitive protein phosphorylation, **235**, 680

## Fluorophores

- single molecule imaging by objective-type total internal reflection fluorescence microscopy, **235**, 47

## Fluoroquinolone

- accumulation in outer membrane of *Pseudomonas aeruginosa*, **238**, 457

## 5-Fluorouracil

- and interferon- $\gamma$ , in combination, apoptosis induced by, mechanisms (COLO 201 cells), **240**, 376

## Fluprostenoil

- inhibition of adipose differentiation of primary culture of adipocyte precursors in defined medium (rat), **233**, 200

## Foamy virus

- recombinant, enzymatically active protease, expression and molecular characterization, **237**, 548

## Focal adhesion

- localization of SH3 domain-containing proline-rich protein (mouse), **235**, 794

## Focal adhesion kinase

- p125FAK, tyrosine phosphorylation, suppressive effect on hydrogen peroxide-induced apoptosis of T98G cells, **241**, 769
- PDGF-BB-stimulated phosphorylation in VSMC, inhibition by eNOS gene transfer (guinea pig), **236**, 706

Folding, *see* Protein folding

## Follicle growth

- role of integrin  $\alpha 6$  (mouse), **235**, 524

## Follicle-stimulating hormone

- activation of cAMP-dependent chloride conductance in TM4 Sertoli cells, **233**, 203

## Food intake

- fasting/refeeding, effect on translation initiation in rat skeletal muscle and liver, **240**, 825

- Footprint analysis  
mitochondrial DNA *in organello* (rat), **231**, 856
- Formaldehyde dehydrogenase  
glutathione-dependent, induction in *Escherichia coli* and *Hemophilus influenza*, **238**, 693
- Formate dehydrogenase  
identification as molybdenum-containing protein (*Methylobacterium* sp. RXM), **230**, 30
- N*-Formyl-methionyl-leucyl-phenylalanine  
activation of myeloperoxidase before release from neutrophil granulocytes (human), **232**, 209  
neutrophil responses to, differential effects of MAP kinase inhibitor PD 98059 (human), **232**, 474
- Formyl peptide receptor  
and Fc $\epsilon$ R1 receptor, cooperation in RBL<sup>FPR</sup> cells, **235**, 812
- N*-Formyl peptide receptor  
G-protein coupled receptor homologous to, isolation from mouse and NH15-CA2 cells and expression during bone development (mouse), **233**, 336  
ligand binding domain, identification by gain-of-function approach, **238**, 377
- Forskolin  
modulation of dynactin phosphorylation (Rat2 cells), **232**, 810
- Fourier transform infrared spectroscopy  
alcohol dehydrogenase active center model molecules, **231**, 473  
lipid domains and orthorhombic phases in model stratum corneum, **231**, 797  
nucleotide effects on F-actin denaturation, **236**, 798
- 14-3-3 protein  
isoforms, c-Cbl interactions with, identification using yeast two hybrid screen, **240**, 46  
role in A20 inhibition of NF- $\kappa$ B activation, **238**, 590
- Free radicals  
and iron, role in fibroblast proliferation induced by 1,2-dimethylhydrazine auto-oxidation (mouse), **234**, 44  
mediated effects on skeletal muscle protein in rat treated with Fe-nitritotriacetate, **231**, 37  
photodynamic effects of radicals generated in cell cultures (mouse), **233**, 173  
production, role in hyperoxia-induced neuronal differentiation in PC12 cells, **241**, 347
- Frontotemporal dementia  
and other neurodegenerative diseases with distinct tau-related pathology, cerebrospinal fluid tau levels, **236**, 262
- D-Fructose  
interactions with GLUT5 (human), **238**, 503
- Fructose-1,6-bisphosphatase  
chloroplast, cysteine residues involved in reductive amination and structural stability, characterization (rapeseed), **232**, 388
- Frzb-1  
interactions with Wnts, **236**, 502
- 3-*O*- $\alpha$ -L-Fucopyranosyl-2-acetamido-2-deoxy-D-glucopyranose  
all-*aqueous* regiospecific transglycosylation synthesis, **234**, 358
- $\alpha$ -L-Fucosidase  
nonglycosylated sperm plasma membrane and glycosylated seminal fluid forms in bivalve mollusk, comparison (*Unio elongatulus*), **234**, 54
- Fucosylation  
complex glycosphingolipids by recombinant fucosyltransferase VII, **238**, 165
- $\alpha$ (1,2)Fucosyltransferase  
*FUT1* missense mutation and *FUT2* deletion, role in Indian Bombay phenotype of ABO blood group system, **238**, 21
- $\alpha$ -1,3-Fucosyltransferase  
five enzymes, distinct substrate specificities for *in vivo* synthesis of sialyl Lewis x and Lewis x epitopes (human), **237**, 131
- Fucosyltransferase VII  
recombinant, fucosylation of complex glycosphingolipids by, **238**, 165
- $\alpha$ 1 $\rightarrow$ 3 Fucosyltransferase VII  
transactivation by T-cell leukemia virus-1-encoded Tax protein (human), **231**, 183
- $\alpha$ -L-Fucosyltransferases  
endogenous, detection in COS cells, **237**, 400
- Fumarylacetoacetate  
mutagenicity in V79 cells, enhancement by glutathione depletion, **232**, 42
- Fura-2  
characterization of voltage-dependent Ca<sup>2+</sup> influx in erythrocytes (human), **236**, 549
- Furfural  
formation by hydroxyl radical damage of DNA, **238**, 317
- Fusion  
early, endosomes, regulation by phospholipase D activity, **236**, 285  
synaptic vesicles and synaptic plasma membrane vesicles, role of synaptobrevin (rat brain), **236**, 184
- Fusion proteins  
*Bcr-Abl*, *cis*-acting effect, role in transcriptional activation of human LIM-HOX gene *hLH-2* in chronic myelogenous leukemia, **233**, 806; **234**, 742  
biotin-dependent transcarboxylase-smooth muscle regulatory light chain, replacement in myosin subfragment 1 for binding to glass surface, **230**, 76  
expanded-polyglutamine domain fluorescent fusion proteins, oligomerization in cultured mammalian cells, **238**, 599  
 $\beta$ -galactosidase, aggregated, limited proteolysis *in vivo* (*Escherichia coli*), **237**, 325  
human cytochrome P4501A1-rat NADPH-P450 oxidoreductase, characterization in *Escherichia coli*, **230**, 211  
interleukin-4 receptor  $\alpha$ -chain/Ig $\gamma$ 1, soluble, overexpression, purification, and use for ligand binding studies (human), **239**, 534  
ND4, recombinant, functional complementation of membrane transport deficiency in *Saccharomyces cerevisiae*, **238**, 811  
skeletal muscle-specific, with ZF5 zinc finger domain and VP16 acidic domain, detection by RT-PCR (mouse), **236**, 20  
transcription factor Erm fused to ligand-binding domain of estrogen receptor, **239**, 252  
vesicle membrane, SNAP-23, identification in neutrophils and HL-60 cells (human), **231**, 808
- Fyn  
activation, effect of PDGF-induced phosphorylation of Tyr28 in N-terminus (NIH3T3 cells), **241**, 355
- G
- GABA receptor, *see*  $\gamma$ -Aminobutyric acid receptor
- Gabexate mesylate  
and amiloride and clonidine, competitive inhibition of swine kidney copper amine oxidase, **240**, 150
- 5-S-GAD, *see* *N*- $\beta$ -Alanyl-5-S-glutathionyl-dopa
- Gag proteins  
HIV-1, functional domain mapping, **241**, 317  
*N*-myristoylation blockage, effect on viral infectivity, **237**, 504  
precursor p74, cleavage site, determination with recombinant human foamy virus protease, **237**, 548
- $\beta$ -Galactose residues  
on egg zona pellucida, binding of mouse sperm to, **238**, 95
- $\beta$ -Galactosidase  
*Escherichia coli*  
aggregated fusion protein, limited proteolysis *in vivo*, **237**, 325  
recombinant *Mycobacterium aurum* expressing, in high-throughput screening of antituberculosis drugs, **240**, 536  
reporter system, application in rapid antimycobacterial drug screening (*Mycobacterium smegmatis*), **235**, 602

## Subject Index

## Galactosylation

proteins, UDP-galactose transporter homolog required for, encoding by *gms1*<sup>+</sup> gene (*Schizosaccharomyces pombe*), **232**, 121

$\alpha$ -1,3-Galactosyl *O*-glycosyl glycoprotein  $\rightarrow$  1,6-N-acetylglucosaminyltransferase

recombinant soluble protein A-tagged, expression and purification (CHO cells), **237**, 653

 $\alpha$ -Galactosyl oligosaccharides

polyethylene glycol conjugates, evaluation as inhibitors of hyperacute rejection upon xenotransplantation (human, pig), **232**, 731

 $\alpha$ -1,4-Galactosyltransferase

His-tagged, expression and purification in yeast and COS cells, **240**, 586

## Galanin-1 receptor

gene cloning, chromosomal localization, and transcriptional regulation (human), **241**, 558

pharmacological characterization and tissue distribution (human, rat), **233**, 823

## Gamma irradiation

human cell hybrids, tumorigenesis induced by, associated changes in *N*-glycosylation of glucose transporter-1, **240**, 395

*Saccharomyces cerevisiae* by <sup>192</sup>Ir source simultaneous with NMR spectroscopy, radiobiological probe for, **233**, 238

## Gangliosides

biosynthesis upregulation by synthetic ceramide analog L-PDMP in cortical neurons *in vitro* (rat), **237**, 595

GD1a, expressed in FBJ-S1 cells, inhibition of FBJ-LL cell migration, **231**, 340

GM3, close association with c-Src and Rho in GM3-enriched microdomains at B16 melanoma cell surface membrane, **236**, 218

## Ganglioside sialyltransferases

enhancement during neural differentiation of mouse embryonal carcinoma P19 cells, **241**, 327

GAPDH, *see* Glyceraldehyde-3-phosphate dehydrogenase

## Gastric acid

secretion in pylorus-ligated conscious rat, inhibition by *Helicobacter pylori* LPS, **236**, 532

## Gastric adenocarcinoma cells

AGS, proliferation inhibition by Krüppel-type zinc finger protein ZBP-89 (human), **237**, 230

## Gastric carcinoma

adenovirus-mediated gene therapy with cancer-specific gene expression *in vivo* (human), **231**, 775

associated overexpression of zinc finger DNA-binding protein ZBP-89 (human), **233**, 154

*GRB-7* co-amplification with *CAB1* and *c-ERBB-2* in primary tissues (human), **232**, 5

## Gastric carcinoma cells

canalicular multispecific organic anion transporter expression (human), **240**, 606

*GRB-7* co-amplification with *CAB1* and *c-ERBB-2* (human), **232**, 5

## Gastric epithelial cells

apoptosis in, induction by *Helicobacter pylori* accompanied by increased Bak expression, **239**, 626

## Gastric ulcer

vascular endothelial growth factor expression at ulcer margin (human), **234**, 493

## Gastrin

gene expression in pancreas and upper digestive tract, effect of fasting (rat), **231**, 835

induction of heparin-binding epidermal growth factor-like growth factor and amphiregulin in stomach (rat), **235**, 520

## Gastrin-releasing peptide receptor

mice lacking, generation and characterization, **239**, 28

## Gastrointestinal tract

epithelial antigen A33, characterization of posttranslational modifications (human), **236**, 682

## upper

estrogen receptor  $\alpha$  and  $\beta$  expression with regulation of trefoil factor family 2 mRNA levels in ovariectomized rat, **240**, 478

gastrin, cholecystokinin, and somatostatin gene expression, effect of fasting (rat), **231**, 835

## GATA-1

role in regulation of coproporphyrinogen oxidase expression in mouse erythroleukemia cells, **233**, 729

from testis promoter, expression in hematopoietic cells during development and cell differentiation (mouse), **231**, 299

## GATA-3

regulation of aquaporin-2 gene transcription (rat), **232**, 65

## GB virus-hepatitis G virus

5' noncoding region, sequence characterization, **231**, 606

## GCAAG/CTTGC motifs

between Spri promoter sequences for RNA polymerase III, role in neural BCL RNA transcription, mutational analysis, **239**, 407

## GC box

and ATF/CRE site, in housekeeping Na,K-ATPase  $\alpha$ 1 subunit gene, synergism between, role in constitutive expression, **241**, 169

GDNF, *see* Glial-cell-line-derived neurotrophic factor

## Geldanamycin

Raf-1 destabilization induced by, role of proteasome (NIH3T3 cells), **239**, 655

## Gel electrophoresis

in construction of proteome maps, review, **231**, 1

lipoprotein, in evaluation of coupling efficiency of LDLs for macrophage-specific drug targeting, comparison with other methods, **240**, 112

## Gelsolin

calcium-sensitive actin subdomain I binding site for, localization: implications for severing process (rabbit), **233**, 61

## Gene expression system

cytoplasmic, enhancement of efficiency of cationic liposome-mediated gene transfer into mouse brain *in vivo*, **234**, 15

## Gene gun

hand-held, for introduction of DNA into rat liver, **234**, 695

## Gene II protein

phage I2-2, similar *Xanthomonas campestris* pv. *vesicatoria* Rep protein, plasmid pXV64 encoding, sequence analysis, **231**, 121

## Gene regulation

by nuclear and cytoplasmic calcium signals: breakthroughs and views, **236**, 541

## Genes

ABC transporter family, link of phospholipid transmembrane migration to, evidence from rare inherited disorder of phosphatidylserine externalization, **241**, 548

*N*-acetylglucosaminyltransferase III, transfection, downregulation of swine xenoantigen (pig), **235**, 359; *erratum*, **238**, 686

ACTH receptor, structure and promoter characterization (human), **230**, 7

actin, expression in cells expressing exogenous  $\beta$ -amyloid precursor protein, **231**, 615

actinin  $\beta_C$  and  $\beta_E$ , linkage and liver-specific expression pattern in adult tissues (mouse), **231**, 655

adenosine kinase, cloning and expression (human, rat), **231**, 645

adenovirus-mediated expression via tetracycline-controllable transactivator with nuclear localization signal, **230**, 426

$\beta_2$ -adrenergic receptor, variation, association with coronary heart disease among Japanese, **232**, 728

adrenomedullin receptor homologue of rat gene, highly expressed in heart and immune system, cloning (human), **240**, 183

- $\gamma$ -aducinin, polymorphism in genetic hypertension and mapping to rat chromosome 1q55, **237**, 685
- aldolase A, identification as target for TR2 orphan receptor (human), **235**, 205
- aldolase B, sequence requirement for replication initiation, functional correlation with transcriptional regulation (rat hepatoma cells), **237**, 707
- ALG7, first N-glycosylation, role in G1 cyclin expression and cell proliferation in *Saccharomyces cerevisiae*, **237**, 562
- ALU1-P, encoding protein with aluminum tolerance activity, isolation (*Arthrobacter viscosus*), **239**, 835
- AP-1, mRNA and protein expression during renal carcinogenesis and effects of overexpression of antisense oligonucleotides (Eker rat), **241**, 24
- apoptosis-related, expression by human neutrophils, **233**, 700
- aquaporin-2, transcription, regulation by GATA-3 (rat), **232**, 65
- arginase II, chromosomal localization (human), **233**, 487
- aryl hydrocarbon receptor and cell cycle-regulating genes, mRNA expression, coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
- atrial natriuretic peptide, expression in cardiomyocytes, effect of adrenomedullin (rat), **230**, 311
- bactericidal permeability increasing protein and lipopolysaccharide binding protein, conservation of genomic organization (human), **236**, 427
- bag-1*, anti-apoptotic, upregulation by IFN- $\gamma$  in IL-3-dependent hematopoietic cells, **239**, 401
- bbe1*, berberine bridge enzyme, mRNA accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606
- bcl-2*  
and apoptosis-related genes, expression by human neutrophils, **233**, 700  
blockage of *Fas*-mediated apoptosis in mtDNA-depleted HeLa cells, **237**, 659
- bcl-x<sub>L</sub>*  
anti-apoptotic, upregulation by IFN- $\gamma$  in IL-3-dependent hematopoietic cells, **239**, 401  
overexpression in FL5.12 cells, effects on heat-induced apoptosis and hsp70, *bcl-2*, and Bax protein levels, **241**, 164
- benzophenanthridine alkaloid-biosynthetic, mRNA accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606
- biglycan, promoter, in osteosarcoma cells, regulation by cAMP (human), **235**, 413
- BRCA2*, expression during cell cycle (human), **234**, 247
- Bsg*, mice lacking, sensory and memory function abnormalities, **236**, 733
- butyrylcholinesterase, with L3301 mutation, identification as fluoride-resistant gene (human), **240**, 372
- CAB1*, co-amplification with *GRB-7* and *c-ERBB-2* in primary gastric cancer (human), **232**, 5
- CAG trinucleotide-repeat-containing, cloning in mouse brain, **240**, 239
- calcyphosine, expression, loss in mouse and other rodents, **232**, 407
- calpain *htra-3*, homology with *Caenorhabditis elegans* sex determination gene *tra3*, **239**, 845
- cancer-specific, expression *in vivo*, in adenovirus-mediated gene therapy of gastric carcinoma (human), **231**, 775
- carboxylesterase, promoter binding by transcription factor (human), **230**, 215
- cardiotoxin 4, genomic structure (Taiwan cobra), **239**, 756
- CAT, chloramphenicol acetyltransferase, mRNA expression and antisense RNA mediated inhibition of expression, effects of capping and polyadenylation, **241**, 193
- catechol 2,3-dioxygenase  
characterization (*Achromobacter xylosoxidans* KF701), **238**, 430  
structure in TOM plasmid (*Pseudomonas cepacia* G4), **234**, 578
- cathepsin K/OC-2, effect of concanavalin A (rabbit), **234**, 600
- cathepsin L, activation in *v-src*-transformed cells, role of Egr family proteins, **238**, 665
- cbfQ* and *cbfO*, downstream from RubisCO genes, effects on conformational states and activity of RubisCO (*Pseudomonas hydrognothermophila*), **241**, 565
- CCAAT/enhancer binding protein  $\alpha$  and  $\beta$ , regulation during liver development (rat), **234**, 605
- CCAAT-enhancer binding protein  $\delta$ , promoter, structure and function (rat), **231**, 30
- CCK-A receptor, molecular structure (mouse), **236**, 630
- CCT-1, expression pattern (*Caenorhabditis elegans*), **241**, 687
- cell cycle-regulating and aryl hydrocarbon receptor, mRNA expression, coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
- cell cycle-related, regulation in hepatocytes by TGF- $\beta_1$  (rat), **238**, 539
- c-erbB*, promoter activity, inhibition by retroviral vector expressing anti-gene RNA (human), **240**, 203
- c-ERBB-2*, co-amplification with *CAB1* and *GRB-7* in primary gastric cancer (human), **232**, 5
- c-fos*  
mediation of apoptosis in murine T cells induced by ionizing radiation and dexamethasone, **241**, 519  
promoter, identification of 1 $\alpha$ ,25-dihydroxyvitamin D $_3$  response element (mouse), **230**, 646
- chaperonin, in *Synechocystis* PCC 6803, differential regulation under light-dark transition during heat stress, **239**, 291
- c-Ha-ras<sup>EL</sup>* oncogene, transformed rat adrenocortical cells, transfer of geranylgeranyl and farnesyl moieties to Ras p21 overproduced in, **231**, 789
- c-Ha-ras* oncogene, mutated, downregulation of Wnt5a expression in mammary epithelial cell line MCF-10A (human), **239**, 911
- chemokine receptor-like, molecular cloning and RNA expression (human), **227**, 846; *erratum*, **231**, 519
- chimeric, transfected in LATK $^-$  cells, dexamethasone inducibility, role of mitochondrial nucleotide sequence similar to hormone response element (rat), **235**, 349
- chitin synthase with myosin motor-like domain, isolation (*Aspergillus nidulans*), **236**, 75
- CIS2, -3, and -4, cloning and characterization (human), **239**, 439
- c-myc*  
activation pathway in thrombopoietin signal transduction (human), **231**, 290  
calcium-dependent expression of proto-oncogene: role for luminal extracellular calcium-sensing receptor, **232**, 80  
expression in mammary epithelial cells, downregulation associated with reaching confluence (mouse), **239**, 566  
transcriptional activation by SV40 large T antigen (human), **235**, 153
- cobrotoxin, genomic structure (Taiwan cobra), **239**, 756
- controlled expression with reverse tetracycline-regulated retroviral vector system, **234**, 769
- COX-2, transcriptional control by IL-1 $\beta$ , role of NF- $\kappa$ B, **237**, 28
- cre* transgene, transmission, Cre recombinase activity in mature oocytes irrespective of, transgenic mouse line retaining, **237**, 318
- Crk-II protooncogene, effect on apoptosis in HEK cells (human), **234**, 616
- Cryptosporidium parvum* 15-kDa protein, sequencing, analysis, and expression in *Escherichia coli*, **230**, 164
- C-type natriuretic peptide, adenovirus-mediated transfer into cultured VSMC, induction of G1 growth inhibition (rat), **239**, 889
- p-cymene* methyl hydroxylase, sequence (*Pseudomonas aureofaciens*), **233**, 502
- Cyp1A1*, induction in mouse hepatoma Hepa-1c1c7 cells, effects of myristicin, **233**, 619
- CYP1A1* and *CYP1B1*, and Ah receptor and other genes, mRNA coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
- CYP2E1*, expression during embryogenesis and fetogenesis in cephalic tissues, implications for fetal alcohol syndrome (human), **238**, 443
- CYP3A*, phylogenetic analysis, **236**, 306
- CYP11B2*, steroid 18-hydroxylase (P450 $_{C18}$ ), point mutation in exon 8 as cause of corticosterone methyl oxidase I deficiency (human), **234**, 382
- cyp80b1*, (S)-N-methylcoclaurine 3'-hydroxylase, mRNA accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606

## Subject Index

## Genes (continued)

- cytomegalovirus, immediate early, stimulation of vascular smooth muscle cell proliferation *in vitro* and *in vivo* (human), **231**, 447
- cytosolic phospholipase A2, expression in lipopolysaccharide-stimulated U937 cells and adherent rheumatoid synovial cells, inhibition by interleukin-4 (human), **230**, 40
- $\Delta^9$ -desaturase, *see* Genes, stearoyl-CoA desaturase
- diabetes-associated, in kidney, isolation using differential display (rat), **232**, 49
- diastrophic dysplasia sulfate transporter, 5'-flanking region cloning and characterization (mouse), **238**, 738
- dihydropyridine receptor, expression in long-term denervated muscles (rat), **240**, 612
- dishevelled DVL-3*, cDNA cloning, mapping to 3q27, and expression in human breast and colon carcinomas, **239**, 510
- dnaJ* homologue in *Synechococcus* sp. PCC7942, sequence and analysis, **236**, 461
- DNA polymerase  $\alpha$ , cloning and sequence analysis and comparison with human homologue (*Leishmania donovani*), **234**, 95
- DNA topoisomerase II $\alpha$ , promoter, cell cycle-dependent regulation (mouse), **230**, 105
- dopamine D4 receptor, 5'-flanking region, cloning and characterization (human), **235**, 321
- dopamine transporter, neural targeting of expression, role of intronic sequences (human), **240**, 807
- Dpkn, identification of putative kinase domain with high homology to protein kinase N (*Drosophila melanogaster*), **232**, 126
- dtsR*, disrupted *Brevibacterium lactofermentum* mutant, fatty acid requirements for growth and L-glutamate production in presence of excess biotin, **234**, 157
- dynorphin, promoter, effect of upstream regulatory element (rat), **231**, 172
- dystrophin
- alternative splicing of 5' region in skeletal muscle: analysis of transcripts (human), **239**, 895
  - exon 52, targeted disruption, induction of muscular degeneration resembling Duchenne muscular dystrophy (mouse), **238**, 492
- efp, estrogen-responsive finger protein, 5'-flanking region, multiple regulatory elements and binding proteins (human), **236**, 765
- endo-1,4- $\beta$ -glucanase, from *Erwinia carotovora* subsp. *carotovora* LY34, cloning, sequencing, and product characterization, **241**, 636
- endothelial oxidized LDL receptor, LOX-1, enhanced expression in hypertensive rat, **237**, 496
- endothelin receptor type B-like, enriched in brain, cloning and characterization (human), **233**, 559
- Eotaxin, organization, sequence, and transcriptional regulation (human), **237**, 537
- ES1, abundant in retinal photoreceptor cells, cloning and expression (zebrafish), **237**, 84
- 7-ethoxyresorufin-O-deethylase, and other cell cycle-regulating genes and aryl hydrocarbon receptor gene, mRNA coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
- ets*, related transcription factor E1AF, activation of p21<sup>Waf1/Cip1</sup> promoter (human), **236**, 79
- expression
- activation by non-transforming unmyristylated-SH3-deleted mutant of Src, dependence on Tyr-527, **239**, 681
  - in prostate, regulation by luteinizing hormone (rat), **233**, 108
  - studies of human chromosome 8 from transfer to mouse cell lines, **230**, 315
- Fas*, mediated apoptosis in mtDNA-depleted HeLa cells, blockage by *Bcl-2*, **237**, 659
- F<sub>1</sub>F<sub>0</sub>-ATPase, cloning from archaeobacterium *Methanosarcina barkeri*, **241**, 427
- filamentous phage  $\phi$ Lf gene VI coding for 10-kDa minor coat protein, identification, **239**, 752
- foreign
- expression in testis by localized *in vivo* gene transfer (mouse), **233**, 45
  - nonviral transfection method for expression in early chicken embryos *in ovo*, **230**, 376
- ftsZ*, from coryneform bacteria, cloning, sequencing, and characterization, **236**, 383
- G1-phase cell cycle, expression during hematopoietic lineage, **231**, 73
- GABAA receptor  $\gamma 2$  subunit, alternatively spliced 8-amino-acid exon in, polymorphisms and intron sequences flanking, **238**, 683
- galanin-1 receptor, cloning, chromosomal localization, and transcriptional regulation (human), **241**, 558
- gastrin, cholecystokinin, and somatostatin, expression in pancreas and upper digestive tract, effect of fasting (rat), **231**, 835
- geranylgeranyl transferase  $\alpha$ -subunit and transglutaminase I, functional relationship in terminally differentiating keratinocytes (human), **235**, 10
- $\alpha^A$ -globin and  $\alpha^D$ -globin, isolation and sequencing, and evidence for embryo-specific expression of  $\alpha^D$  (pigeon), **234**, 450
- glucan 1,4- $\alpha$ -glucosidase, mutations leading to glycogen storage disease type II, detection by RT-PCR and automated sequencing, **241**, 414
- glucose-regulated, identification in human mesangial cells by mRNA differential display, **238**, 179
- GLUT4 insulin-responsive glucose transporter, regulatory elements in, **241**, 1
- GLUT4 minigenes, 5'-deleted, regulated expression in transgenic mice: effects of exercise training and high-fat diet, **239**, 503
- glutamic acid decarboxylase, ontogeny of expression in pancreas (mouse), **233**, 227
- $\gamma$ -glutamylcysteine synthetase heavy subunit
- cis*-acting DNA elements of, identification (human), **232**, 522
  - proximal 5'-flanking sequence, role in cisplatin-induced transcriptional upregulation in lung cancer cell line SBC-3 (human), **236**, 616
- glutathione reductase, structure: putative mitochondrial targeting signal (mouse), **237**, 419
- glutathione S-transferase, human microsomal, stable transfection of LLC-PK1 cells with, effects on haloalkene glutathione S-conjugate formation and cytotoxicity, **234**, 481
- glutathione S-transferase P1, expression in breast cancer cells, regulatory role of posttranscriptional processes, **237**, 729
- GML, overexpression, promotion of radiation-induced cell cycle arrest and apoptosis in human tumor cells, **241**, 481
- gmsI*<sup>+</sup>, encoding of UDP-galactose transporter homolog required for protein galactosylation (*Schizosaccharomyces pombe*), **232**, 121
- goosecoid*
- expression in branchial region after retinoic acid treatment of embryo *in vivo*, role of middle ear bones (mouse), **235**, 748
  - mutation, related nasal and pharyngeal abnormalities (mouse), **233**, 161
- G protein-coupled receptor
- family related to peptide receptors, cloning (human), **231**, 651
  - GPR40-GPR43 cluster, identification close to CD22 gene on chromosome 19q13.1 (human), **239**, 543
  - isolation from *Saccharomyces cerevisiae*, **240**, 287
  - localization on chromosome 1 (human), **230**, 69
- GRB-7*, molecular cloning and co-amplification with *CAB1* and *c-ERBB-2* in primary gastric cancer (human), **232**, 5
- green fluorescent protein, transfer and expression in human prostate cancer cell lines LnCap and PC-3, effects of selective clinical ultrasound signals, **234**, 64
- guanidinoacetate methyltransferase, mapping to syntenic region on 19p13.3 (human), **238**, 723
- gumD*, role in normal pigmentation and virulence in causing black rot (*Xanthomonas campestris*), **233**, 265

- Ha-ras oncogene, activated, NIH 3T3 cells transformed with, decreased retinoylation in, **239**, 80
- HDGF family, with significant N-terminal homology, characterization of HDGF and HRP-1 and -2 (mouse), **238**, 26
- helix-loop-helix Id1, organization, sequence, and chromosomal localization (human), **231**, 628
- heme-binding protein 23, regulation by metalloporphyrins and protoporphyrin IX in liver and hepatocyte cultures (rat), **231**, 667
- hepatic nuclear factor-1 $\alpha$ , extrahepatic expression in *chlch* and *I4CoS/I4CoS* mice, **233**, 631
- hepatitis B virus X gene, deletion mutants in human hepatocellular carcinoma, **241**, 726
- hereditary hemochromatosis, human candidate, mouse homolog for, identification, **230**, 35
- hfq*, encoded HF-I, DNA binding properties (*Escherichia coli*), **236**, 576
- HHMJG*, human homologue of mouse jerky gene, cloning, mapping, and tissue distribution of product, **236**, 389
- hMSH3*, somatic mutations with reference to microsatellite instability in hereditary nonpolyposis colorectal cancers (human), **236**, 248
- homeobox
- deregulation, association with colorectal carcinogenesis (human), **232**, 742
  - expression during 3T3-L1 adipogenesis, **237**, 470
  - expression in osteosarcoma and neuroblastoma cell lines, cell-type-specific modulation by TGF- $\beta$  superfamily (human), **233**, 365
  - LH-2A* and *LH-2B*, differential expression during limb development (chicken), **238**, 506
- HSP70-1, selective expression in adrenal cortex of thermally stressed rat, **233**, 550
- 5-HT<sub>5A</sub> receptor, sequence variation and linkage mapping on chromosome 7q34-q36 (human), **233**, 6
- human glial cell line-derived neurotrophic factor, adenovirus-mediated transduction, prevention of MPTP-induced dopamine depletion in murine striatum, **238**, 569
- Huntington's locus, single-strand conformers from, stalling of human DNA methyltransferase at, **234**, 73
- 20 $\alpha$ -hydroxysteroid dehydrogenase, prolactin-mediated inhibition (rat), **235**, 587
- 25-hydroxyvitamin D<sub>3</sub> 1 $\alpha$ -hydroxylase, cloning (human), **239**, 527
- IL-4 receptor, common polymorphisms (human), **231**, 696
- inducible nitric-oxide synthase
- expression, role of promoter and 3' region (human), **233**, 523
  - transcriptional activation by LPS plus IFN- $\gamma$  in RAW 264.7 macrophages, role of upstream NF- $\kappa$ B site, **236**, 655
  - transcription and promoter activity in hepatocytes, effect of oxidative stress (rat), **234**, 289
- inducible and noninducible carbonyl reductase, identification in ovary (rat), **230**, 518
- influenza virus RNA polymerase and nucleoproteins, inhibition by liposomally endocapsulated antisense phosphorothioate oligonucleotides in clone 76 cells, **232**, 545
- insulin, hepatic cells transduced with, release of immunoreactive insulin by, effect of ambient glucose levels (mouse), **233**, 470
- insulin gene region, role in incidence of and genetic susceptibility to insulin-dependent diabetes mellitus in Japanese, **233**, 283
- insulin-like growth factor II
- imprinting in acute myeloid leukemia (human), **231**, 466
  - imprinting relaxation in sporadic breast carcinoma (human), **235**, 123
  - promoter-dependent tissue-specific expression (human), **233**, 221
  - splicing of polymorphic region in adrenocortical carcinoma (human), **239**, 878
- insulin receptor
- conserved region in first intron, binding of nuclear proteins during adipocyte differentiation, **240**, 701
  - mutant alleles, association with genetic syndromes of extreme insulin resistance, **237**, 516
- integrin  $\alpha$ 6 subunit, regulatory elements, identification (human), **241**, 258
- interferon- $\beta$ , isolation, expression, and growth-inhibitory effect of expression on glioma cells (rat), **232**, 698
- interleukin-6, induction by cycloheximide and anisomycin (human), **233**, 507
- interleukin-8, lipopolysaccharide-induced expression mediated by NF- $\kappa$ B and AP-1 in astrocytoma U373 cells, redox regulation (human), **232**, 568
- intracapsular injection, subsequent expression and localization of human kallistatin in rat submandibular gland, **231**, 494
- JB70 protein, related to rat  $\alpha$ <sub>1</sub>-acid glycoprotein, expression in *Euglena gracilis*, **234**, 544
- JNK2- $\alpha$ 1, expression in developing chick brain, **234**, 489; *erratum*, **236**, 538
- LDL-PLA<sub>2</sub>, systematic screening for polymorphic variants and case-control analysis in schizophrenia (human), **241**, 630
- lep*, leader peptidase I, nucleotide sequence and genetic complementation (*Azotobacter vinelandii*), **239**, 393
- leptin
- 5' flanking sequences involved in trophoblast-specific transcription, identification (human), **241**, 658
  - expression, and hormone release, effect of enteral vs. parenteral nutrition (rat), **237**, 98
  - expression in adipose tissue, leptin receptor-mediated autocrine regulation (rat), **240**, 492
- LIM-HOX, *hLH-2*, transcriptional activation in chronic myelogenous leukemia, role of *cis*-acting effect of *Bcr-Abl* (human), **233**, 806; **234**, 742
- Limk2, cDNA cloning, genomic organization, and chromosomal localization (mouse), **241**, 243
- lipopolysaccharide binding protein and bactericidal permeability increasing protein, conservation of genomic organization (human), **236**, 427
- luxZ*, enhancing bioluminescence of *lux* operon from *Photobacterium leiognathi*, linkage to *pkI* gene encoding pyruvate kinase I, **239**, 228
- Machado-Joseph disease, product identification in lymphocytes and brain (human), **233**, 476
- maleate *cis-trans* isomerase, cloning and characterization (*Alcaligenes faecalis*), **239**, 74
- MAPK phosphatases 1 and 2, expression in hepatocarcinogenesis, ascites hepatoma cells, and regenerating liver (rat), **239**, 746
- mBMP-4, transcriptional regulation, role of E-box in 5'-flanking promoter region involving USF (mouse), **240**, 136
- mda-6/WAF1/CIP1, and cyclin-dependent kinases, role in antitumor effects of interferons on B16 melanoma cells, **233**, 678
- MDR*, lack of expression in Scott syndrome lymphoblasts: link between phospholipid transmembrane migration and ABC transporter gene family, **241**, 548
- MDR1*
- antisense RNA of, inhibition of growth of multidrug-resistant KB<sub>V200</sub> cells, **239**, 345
  - promoter, transactivation by Tax protein of human T-lymphotropic virus type I, **238**, 482
- metallothionein-I, promoter, activation in response to Cd and upstream stimulatory factor *in vitro*, **230**, 159
- metronidazole resistance locus in *Helicobacter pylori*, isolation, **236**, 785
- mex* operon, products, role in antibiotic extrusion in *Pseudomonas aeruginosa*, **233**, 611
- microsomal aldehyde dehydrogenase, *Ahd3*, extrahepatic expression in *chlch* and *I4CoS/I4CoS* mice, **233**, 631
- mitochondrial glycerophosphate dehydrogenase, mutation in calcium-binding domain in diabetic family, **231**, 570
- mitochondrial ND1, T3308C mutation, association with bilateral striatal necrosis and MELAS syndrome (human), **238**, 323
- mitochondrial ND5, G13513A mutation associated with MELAS syndrome (human), **238**, 326

Genes (*continued*)

- mitochondrial tRNA<sup>Leu(LUR)</sup>, mutation associated with mitochondrial encephalomyopathy (human), **233**, 637
- mitochondrial tRNA<sup>Phe</sup>, evolution: import of cytosolic tRNA<sup>Phe</sup> into mitochondria (*Arabidopsis thaliana*), **237**, 432
- monocyte-macrophage-dependent, identification and characterization (human), **235**, 4
- mouse Müllerian-inhibiting substance type II receptor, sequence, genomic organization and chromosomal location, **237**, 741
- MPD2, overexpression, suppression of lethality of protein disulfide isomerase depletion in CXXC sequence-dependent manner (*Saccharomyces cerevisiae*), **239**, 710
- MR1, murine homolog of human gene, cDNA isolation and analysis, **238**, 697
- MRF4, distal regulatory regions (rat), **237**, 170
- mRNA capping enzyme  $\beta$  subunit, encoding RNA 5'-triphosphatase, isolation and characterization (*Saccharomyces cerevisiae*), **239**, 116
- MUC5AC, cloning from rat and comparison with human and mouse homologues, **236**, 789
- NAD<sup>+</sup>-dependent 15-hydroxyprostaglandin dehydrogenase, genomic structure and promoter characterization (mouse), **235**, 582
- NADH-cytochrome b<sub>5</sub> reductase, first exon identification (human), **235**, 779
- NAD(P)H:menadiene oxidoreductase, *Nmo1*, extrahepatic expression in *chl/ch* and *14CoS/14CoS* mice, **233**, 631
- NADPH:quinone oxidoreductase, and other cell cycle-regulating genes and aryl hydrocarbon receptor gene, mRNA coregulation by TGF- $\beta$ , in human cancer cell lines, **241**, 86
- Na<sup>+</sup>-glucose cotransporter, nutrient regulation of expression (lamb), **230**, 624
- Na<sup>+</sup>/I<sup>-</sup> symporter  
homozygous mutation causing iodide trapping defect leading to hypothyroidism in Brazilian kindred, **240**, 488  
promoter characterization (rat), **239**, 34
- Na,K-ATPase  $\alpha$ 1 subunit, synergism between ATF/CRE site and GC box in, role in constitutive expression, **241**, 169
- NAT1 locus, N-acetyltransferase, identification of allele NAT1\*17 (human), **233**, 584
- ND6, NADH:ubiquinone oxidoreductase, mutational analysis in patients with Lebers hereditary optic neuropathy, **234**, 511
- negative regulation by glucocorticoids, implications of E4BP4 inducibility (ID13 cells), **232**, 403
- NF1, in melanocytes derived from café au lait macules of neurofibromatosis type 1 patients, analysis for loss of heterozygosity, **237**, 138
- NF1 locus, loss of heterozygosity, analysis in plexiform and dermal neurofibromas in NF1 patients, **234**, 346
- ninaA, Sf9 cells transformed with, improved folding of recombinant membrane protein in, analysis (*Drosophila melanogaster*), **238**, 823
- nonperoxisomal expression in mouse, peroxisome proliferator-induced transcriptional repression, mediation by PP-activated receptor  $\alpha$ , **230**, 155
- norbin, induced by tetraethylammonium treatment in rat hippocampal slices, induction of neurite outgrowth in Neuro 2a cells, **240**, 766
- normal and variant plasminogen, induction by interleukin-6 (human), **230**, 129
- NO synthase  
effect of heat shock response on expression, **231**, 257  
transcription in heart during endotoxemia (rat), **231**, 211
- nuclear, within DFNB8/10 critical region on 21q22.3, mitochondrially located protein encoded by, immunochemical characterization (human), **238**, 806
- O alleles at blood group ABO locus, molecular analysis in populations of different ethnic origin, **234**, 779
- ob, expression  
in 3T3-L1 adipocytes, enhancement by TGF- $\beta$  and inhibition by pro-inflammatory cytokines, **240**, 382  
and circulating leptin peptide concentrations, developmental changes (mouse), **238**, 44
- after differentiation of preadipocytes to adipocytes (rat), **230**, 360
- in obese spontaneously hypertensive rat, **231**, 582
- olfactory receptor, expressed in male germ line, molecular cloning and chromosomal mapping (human), **237**, 283
- oncogenic, effect of transformation of embryo cells on cellular oxygen consumption and glycolysis (rat), **235**, 739
- $\mu$ -opioid receptor, expression under control of dual promoters (mouse), **234**, 351
- osmoresponsive, multiple, transient expression in salinity-stressed seedlings of rice cv. Bura Rata, **233**, 663
- osteocalcin, expression by marrow stromal adipocytes (mouse), **231**, 442
- osteopontin, expression in cultured mesangial cells (rat), **233**, 81
- oxyr, *Escherichia coli* deficient in, RpoS-dependent overexpression of carotenoids from *Erwinia herbicola*, **239**, 305
- p14.4, promoter isolation and characterization: p14.5-hPOP1 region bidirectional promoter function (human), **241**, 59
- p16, expression loss in malignant skin tumors (human), **230**, 85
- p16<sup>INK4a</sup>, alterations in sporadic dysplastic nevi (human), **237**, 667
- p21<sup>WAF1/CIP1</sup>, functional expression in rat glioma cells, effect on growth *in vitro* and induction of radiosensitivity (human), **233**, 329
- p53  
alterations in sporadic dysplastic nevi (human), **237**, 667  
intracavitary liposome-mediated transfer into glioblastoma expressing wtp53 *in vivo*, tumor-suppressing effect and effect on survival (mouse), **233**, 359  
mutations in lung cancer from chromate-exposed workers, **239**, 95  
tumor suppressor gene, promoter, transcription, effect of CpG methylation (human), **235**, 403
- p67phox, mutation in chronic granulomatous disease, identification (human), **231**, 861
- pancreatic GAPDH, expression during ontogeny and cerulein-induced acute pancreatitis (rat), **235**, 636
- parathyroid hormone-related peptide, expression in osteoblasts, upregulation with kinetics of immediate early gene by parathyroid hormone (human), **239**, 155
- Pax6, alternative splicing in bovine eye and evolutionary conservation of intron sequences, **240**, 196
- PDGF A-chain, transcription regulation by first intron elements (human), **230**, 569
- pepsinogen C, product, possible role as growth factor during gastric mucosal healing (rat), **238**, 17
- peripherin/RDS, coding region, in retinitis punctata albescens, identification of polymorphic missense and silent mutations (human), **231**, 103
- peroxisomal branched-chain acyl-CoA oxidase, assignment to chromosome 3p21.1-p14.2 (human), **231**, 767
- peroxisome proliferator-activated receptor  $\gamma$   
chromosomal localization and partial genomic structure (human), **233**, 756  
mapping of  $\gamma$ 1 and  $\gamma$ 2 to chromosome 22 (bovine), **239**, 857  
molecular scanning in diabetic Caucasians: identification of Pro12Ala PPAR $\gamma$ 2 missense mutation, **241**, 270
- phase II detoxifying enzymes, induction, mediation by Nrf/small Maf heterodimer through antioxidant response elements, **236**, 313
- phnD, encoding 2-hydroxymuconic semialdehyde hydrolase, sequence analysis (*Pseudomonas* sp. DJ77), **232**, 288
- phnG, encoding 2-hydroxymuconic semialdehyde dehydrogenase, nucleotide sequence (*Pseudomonas* sp. DJ77), **240**, 41
- phnH, encoding 2-hydroxypent-2,4-dienoate hydratase, localization and sequence analysis (*Pseudomonas* sp. strain DJ77), **238**, 56
- phosphoenolpyruvate carboxykinase, expression in kidney, effect of maternal dietary glucose (newborn rat), **231**, 187
- 6-phosphogluconate dehydrogenase, *gnd*, sequence (*Actinobacillus actinomycetemcomitans*), **230**, 220
- phospholipid transfer protein, transcription in HepG2 cells, DNA sequences essential for, **232**, 574

## Subject Index

- phosphorylase kinase liver  $\gamma$  subunit, splice-site mutation, role in autosomal recessive liver PhK deficiency (human), **236**, 544
- pkI*, linkage to *luxZ* gene enhancing bioluminescence of *lux* operon from *Photobacterium leiognathi*, **239**, 228
- platelet factor 4, silencer element, T-cluster DNA, binding to alternative form of nucleolysin (human), **235**, 625
- PML* suppressor gene, DNA damage-induced expression, cell cycle regulation (HeLa cells), **240**, 640
- potassium channel Kv1.5, expression in left ventricle, effects of thyroid and glucocorticoid hormones (rat), **237**, 521
- presenilin 1*, molecular cloning, sequencing, and expression in brain (*Microcebus murinus*), **228**, 430; *erratum*, **231**, 520
- prostaglandin E<sub>2</sub> and F<sub>2 $\alpha$</sub>  receptors, expression in myometrium and downregulation during pregnancy (human), **238**, 838
- prostate-specific antigen, 5' far upstream flanking region, androgen responsive element (human), **231**, 784
- protein tyrosine phosphatase receptor, *hPTP-J*, cloning and characterization (human), **231**, 77
- qTBP42*, telomeric and tetraplex DNA-binding protein-encoding, identification as homologue of CBF-A mouse muscle cell CArG box-binding protein (rat liver), **237**, 617
- rus*
- and DJ-1, in transformation of NIH3T3 cells (mouse), **231**, 509
  - NIH3T3 fibroblasts transformed by, binding sites for inositol-1,3,4,5-tetrakisphosphate, **239**, 349
  - transformed CREF cells, translation of ornithine decarboxylase mRNA and polyamine transport, suppression by depletion of eIF-4E, **240**, 15
- receptor for advanced glycation end products, expression in type II alveolar epithelial cells (rat), **238**, 512
- regulation by thyroid hormone nuclear receptors in hepatocellular carcinoma cells, modulation by cell-type specific factors (human), **238**, 280
- retinal degeneration B*, *Drosophila*, molecular cloning and characterization of mammalian homologues, **236**, 559
- rev*, HIV-1 antisense targeting, enhancement by DLS delivery system, **237**, 566
- rfbG*, CDP-D-glucose 4,6-dehydratase, identification and mutational analysis (*Acetobacter vinelandii*), **240**, 153
- ribosomal RNA 16S, sequence and copy number (*Xanthomonas campestris*), **235**, 276
- ribosomal RNA large subunit, mutations, impairment of signal transduction in *Dictyostelium discoideum* slugs, **234**, 39
- RNA helicase, encoding DEAH-box protein family member, cloning and characterization (human), **240**, 335
- RNase H1, cloning and characterization (*Drosophila melanogaster*), **240**, 844
- rnpB*, promoter mutants, alteration in stringent response (*Escherichia coli*), **230**, 582
- ROMK, mutations, in antenatal Bartter syndrome, association with impaired K<sup>+</sup> channel function (human), **230**, 641
- rpoD* gene encoding primary sigma factor of *Xanthomonas campestris*, cloning, sequencing, and expression, **232**, 712
- Rtrp3*, expression and characterization: *trpl* homologue from rat, **240**, 167
- ryanodine receptor, expression in long-term denervated muscles (rat), **240**, 612
- scavengase p20, isolation: relationship to peroxiredoxins (*Escherichia coli*), **233**, 848
- semaphorin E, upregulation in rheumatoid synovial cells, **234**, 153
- seminal vesicle autoantigen, structure (mouse), **231**, 106
- sex determination, *tra-3* from *Caenorhabditis elegans*, homology with human calpain *htra3*, **239**, 845
- SGP-2, sulfated glycoprotein-2, expression in mammary epithelial cells, inhibition by EGF, **240**, 104
- SH3BGR, promoter sequencing and identification of potential regulatory elements (human), **241**, 321
- SHP substrate-1, chromosomal localization (human, mouse), **231**, 61
- sigma receptor type 1, cloning and structural analysis (mouse), **241**, 535
- single-stranded DNA-binding protein gene 32, binding to phage T4 presynaptic filament, **231**, 600
- skeletal muscle, fine mapping (human), **230**, 347
- SMemb/NMHC-B, smooth muscle myosin heavy chain embryonic form, isolation, and characterization of 5'-flanking region (rabbit), **239**, 598
- SMT3, identification and characterization (*Caenorhabditis elegans*), **234**, 788
- Sonic hedgehog*, role in growth of human lung squamous carcinoma LK-2 cells, **238**, 658
- spleen cell-expressed, mediating acquired testosterone-resistant immunity to *Plasmodium chabaudi* malaria, identification (mouse), **230**, 167
- stearoyl-CoA desaturase
- stable transformation of mammalian cells with, modulation of lipid unsaturation and membrane fluid state, **237**, 362
  - transcriptional regulation, role of API element (*Histoplasma capsulatum*), **230**, 457
  - yeast, increased TNF sensitivity of tumor cells expressing, **241**, 465
- stearoyl-CoA desaturase, SCD1
- localization of negative thyroid hormone-response region (murine liver), **233**, 838
  - regulation by vitamin A (mouse liver), **231**, 206
- SULT1A1, common alleles, association with thermal stable phenol sulfotransferase phenotype (human), **239**, 298
- synthetic, specifying periodic polymers modeled on repetitive domain of wheat gliadins, conception and expression, **239**, 240
- TAFII<sub>31</sub>, apoptosis-induced expression in differentiated PC12 cells deprived of NGF, **234**, 230
- tdh*, threonine dehydrogenase, transcriptional analysis (*Xanthomonas campestris*), **240**, 523
- tec*, promoter activity of, Sp1 and PU.1 as essential transcription factors (mouse), **234**, 376
- thioredoxin, expression, effect of cyclic AMP (*Escherichia coli*), **234**, 564
- threonine dehydrogenase, characterization (*Xanthomonas campestris*), **235**, 300
- threonine tRNA, from spinach chloroplast, transcription and processing in homologous *in vitro* system, **233**, 380
- thyroid transcription factor-1, transcription from start site nt-1902 and positive regulation by TTF-1 in thyroid (rat), **238**, 748
- tissue-type plasminogen activator and type-1 plasminogen activator inhibitor, induction in early growth responses of hepatocytes in primary culture (rat), **239**, 123
- TMEM1, on chromosome 21q22.3, genomic organization and nucleotide sequence (human), **235**, 185
- TN gene knockout mouse, dopaminergic neurons, tyrosine hydroxylase mRNA level, **231**, 356
- transcription factor AP-1-enhanced expression, dependence on orientation of AP-1 element (LLC-PK1 cells), **238**, 285
- transforming growth factor  $\alpha$ , mouse, integration of HTLV-1 provirus into, **233**, 792
- trp*, from *Drosophila*, mammalian homologues, differential expression across tissues and cell lines, **239**, 279
- trpE* and *trpG*, expression in *Escherichia coli* (*Sulfolobus solfataricus*), **230**, 306
- trpl* homologue *Rtrp3* from rat brain, expression and characterization, **240**, 167
- truncation, enhancement of L-aspartase activity (*Escherichia coli*), **238**, 411
- Tsc2*, mutant rat model of renal carcinoma, AP-1 mRNA and protein expression during development of, and effects of overexpression of antisense oligonucleotides, **241**, 24
- tumor necrosis factor- $\beta$ , Nco I polymorphism, relation to hypertriglyceridemia and insulin resistance in lean and obese subjects, **236**, 829; *erratum*, **240**, 507
- tumor necrosis factor receptor CD137, localization on chromosome 1p36, **235**, 699

Genes (*continued*)

- tyrosine aminotransferase, glucocorticoid-induced expression in cultured rat hepatocytes, enhancement by ursodeoxycholic acid, **240**, 732
- UCP-2, expression in preadipose and adipose cells, upregulation by PPAR agonists (mouse), **238**, 606
- UDP glucuronosyltransferase-1A6, *Ugt1a6*, extrahepatic expression in *chlch* and *14CoS/14CoS* mice, **233**, 631
- V $\beta$ , usage in T cell receptor in Crohn's disease, **240**, 545
- vascular endothelial growth factor, promoter region, analysis (human), **230**, 413
- V-ATPase of *Desulfurococcus*, structure, **234**, 341
- vesicular stomatitis virus G protein, adenovirus-mediated inducible expression, in VSV-G pseudotyped retroviral packaging, **232**, 379
- vitamin D receptor, alleles *a*, *b*, and *T*, as risk factors for hyperparathyroidism (human), **231**, 329
- WAF1/Cip1 protein, promoter, activation by histone deacetylase via Sp1 sites in MG63 osteosarcoma cells, **241**, 142
- WDM1, expression in mammary epithelial cells, inhibition by EGF, **240**, 104
- Werner's syndrome, defective transcripts, downregulation in cells of patients, **236**, 151
- Wnt5a, expression in mammary epithelial cell line MCF-10A, downregulation by extracellular matrix and mutated c-Ha-ras (human), **239**, 911
- Xen1*, encoding putative evolutionarily conserved membrane protein, isolation and expression (*Xenopus laevis*), **238**, 899
- Xist*, methylated promoter region, recognition by methylation-dependent DNA-binding (mouse), **235**, 730
- X-linked hypophosphatemia, cDNA expression and cloning (human), **231**, 635
- ZPK*, overexpression, effect on cell growth (mouse), **231**, 153
- Gene therapy  
targeted, of EBV-associated neoplasms, use of Epstein-Barr virus-based vector/HVJ-liposome complex vector for, **241**, 112
- Genetic analysis  
non-insulin-dependent diabetes mellitus in Otsuka Long-Evans Tokushima fatty rat, **241**, 200
- Genetic complementation, *see* Complementation
- Gene transfer  
cationic liposome-mediated, into mouse brain *in vivo*, efficiency enhancement by cytoplasmic gene expression system, **234**, 15
- endothelial NOS gene, inhibition of PDGF-BB-stimulated focal adhesion kinase and paxillin phosphorylation in VSMC (guinea pig), **236**, 706
- and expression, in human prostate cancer cell lines LnCap and PC-3, effects of selective clinical ultrasound signals, **234**, 64
- $\beta$ -galactosyltransferase into senescent cells: efficient transfer by adenovirus vectors via highly expressed  $\alpha\beta 5$  integrin, **240**, 88
- to human cells by Epstein-Barr-virus-based vectors coupled with cationic or HVJ-liposomes, **238**, 795
- polyarginine-mediated, role of formation of big carrier complex of DNA aggregate, **231**, 421
- retroviral-mediated, in primary hematopoietic cells and cell lines, green fluorescent protein variants as markers of, **234**, 371
- Genistein  
and curcumin, synergistic inhibitory effects on growth of breast cancer MCF-7 cells induced by estrogenic pesticides, **233**, 692
- effect on cardiac CFTR chloride current in ventricular myocytes (guinea pig), **235**, 74
- effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- inhibition of Na<sup>+</sup>/Ca<sup>2+</sup> exchange activity in primary cortical neuron culture (rat), **233**, 86
- synergistic effects in 2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone-induced apoptosis and p53-independent growth inhibition in tumor cells, **239**, 467
- Genome sequence analysis  
with 2D gel electrophoresis, review, **231**, 1
- Genomic organization  
bone morphogenetic protein type II receptor (mouse), **235**, 499
- helix-loop-helix Id1 gene (human), **231**, 628
- Limk2 gene (mouse), **241**, 243
- TMEM1 gene on chromosome 21q22.3 (human), **235**, 185
- Genomic structure  
ACTH receptor gene (human), **230**, 7
- NAD<sup>+</sup>-dependent 15-hydroxyprostaglandin dehydrogenase gene (mouse), **235**, 582
- Geranylgeraniol  
effect on caspase-3-like activity during human leukemia U937 cell apoptosis, **234**, 641
- and farnesol, in salvage pathway for protein isoprenylation and, **237**, 483
- Geranylgeranoic acid  
apoptosis induced by, mitochondrial membrane potential loss (human), **230**, 58
- Geranylgeranyl moiety  
transfer to Ras p21 (rat), **231**, 789
- Geranylgeranylphosphate  
mevalonate metabolite, regulation of cell cycle progression and DNA synthesis in human lymphocytes, **241**, 376
- Geranylgeranylpyrophosphate  
internalization by adrenal medulla chromaffin cells (bovine), **238**, 7
- Geranylgeranyl transferase  
 $\alpha$ -subunit, gene encoding, functional relationship in terminally differentiating keratinocytes (human), **235**, 10
- Germ cells  
interactions with Sertoli cells, role in TGF- $\beta$ 1 expression and secretion *in vitro* (rat), **238**, 905
- male, developmentally regulated expression of heat shock protein APG-1 (mouse), **233**, 113
- Germ line  
male, olfactory receptor genes expressed in, molecular cloning and chromosomal mapping (human), **237**, 283
- Gestation  
leptin profile in plasma, adipose tissue, and placenta (rat), **240**, 798
- serum leptin profile: increase after midpregnancy (mouse), **240**, 213
- Giant cell receptor  
phagocytic, identification by cell blotting (*Dictyostelium discoideum*), **230**, 505
- Gibberellin-binding protein  
partial purification from *Azukia angularis* seedlings and characterization, **241**, 782
- Glass beads  
myosin-coated, suspended from actin paracrystals, accelerative sliding, **237**, 427
- Glass surfaces  
myosin subfragment 1 bound to, effect on sliding velocity of actin filament (chicken), **230**, 76
- GlcNAc-transferase  
detection and characterization (*Oryzias latipes*), **230**, 533
- Gladians  
periodic polymers modeled on repetitive domain of, synthetic genes specifying, conception and expression (wheat), **239**, 240
- Glial-cell-line-derived neurotrophic factor  
human gene, adenovirus-mediated transduction, prevention of MPTP-induced dopamine depletion in murine striatum, **238**, 569
- and MEN 2A and 2B, mutations, Ret-Shc-GRB2 complex induced by, characterization, **237**, 747
- Glial cells  
apoptosis in brains of Alzheimer's disease patients, role of p53, **232**, 418
- C6, inducible NOS expression, inhibition by benzoquinones, **239**, 367

## Subject Index

- cerebellar, MAP kinase activity  
 activation by HIV-1 Tat protein (rat), **238**, 800  
 downregulation signaled by HIV-1 gp120 (rat), **240**, 683  
 retinal pigmented epithelial and Müller glial cells, NO production in, control by endogenous TNF- $\alpha$  (mouse), **240**, 132
- Glial fibrillary acidic protein  
 domain-specific phosphorylation by vimentin (human), **234**, 621
- Glioblastoma cells, *see also* Astrocytoma cells  
 lacking p16<sup>INK4a</sup>, unbounded and anchorage-independent growth, effect of p16<sup>INK4a</sup> protein, **231**, 743
- RT-2  
 functional expression of human p21<sup>WAF1/CIP1</sup> gene, effect on growth *in vivo* and induction of radiosensitivity (rat), **233**, 329  
 wild-type p53-expressing, *in vivo* intracavitary liposome-mediated p53 gene transfer into, tumor-suppressing effect and effect on survival (mouse), **233**, 359
- T98G, hydrogen peroxide-induced apoptosis, suppressive role of p125FAK protein-tyrosine kinase (human), **241**, 769
- tumorigenicity and growth, effect of scatter factor–hepatocyte growth factor expression (human), **235**, 743
- U87 and U373 cells, motility, dynamic characterization (human), **232**, 267
- Glioma  
 telomere length in, relationship to telomerase RNA expression and telomerase activity in gliomas (human), **239**, 830
- Glioma cells  
 A172,  $\gamma$ -glutamylcysteine synthetase and *MRP/GS-X* pump expression, post-transcriptional regulation by ACNU and cycloheximide (human), **239**, 51  
 Ast812, and hematopoietic and melanoma cells, differentiation *in vitro*, differential inhibition of telomerase activity during, **237**, 438  
 T9, growth inhibitory effect of interferon- $\beta$  gene expression (rat), **232**, 698
- $\alpha$ -Globin  
 $\alpha^A$  and  $\alpha^D$  genes in pigeon, isolation and sequencing and evidence for embryo-specific expression of  $\alpha^D$ -globin gene, **234**, 450
- Glucagon  
 arginine-induced secretion from isolated rat islets, effects of insulin secretagogues with imidazoline structure, **236**, 162
- Glucagon-like peptide-1  
 and glucose, phosphorylation of SNAP-25 in RIN 1046-38 cells, **238**, 297
- Glucan 1,4- $\alpha$ -glucosidase  
 gene mutations in glycogen storage disease type II, detection by RT-PCR and automated sequencing, **241**, 414
- Glucocorticoid hormone  
 and thyroid hormone, effect on Kv1.5 potassium channel gene expression in left ventricle (rat), **237**, 521
- Glucocorticoid receptor  
 steroid binding to, reversible inhibition by zinc (mouse), **238**, 86  
 trans-repressive function, alleviation by Bcl-2, **233**, 781
- Glucocorticoids  
 CYP3A2 induction dependent on, and low-affinity glucocorticoid binding site activity, effect of vitamin A deficiency (rat liver), **237**, 211  
 induced tyrosine aminotransferase gene expression in cultured rat hepatocytes, enhancement by ursodeoxycholic acid, **240**, 732  
 inhibition of adrenocorticotropin secretion, mechanism (rat), **235**, 295  
 mitochondria as primary site of action (LTK<sup>-</sup> cells), **235**, 349  
 negative gene regulation by, implications of E4BP4 inducibility (ID13 cells), **232**, 403  
 potentiation of cytochrome P4501A1 induction by TCDD in endothelial cells in culture (human, porcine aorta), **232**, 749  
 regulation of nitric oxide and tetrahydrobiopterin in model of endotoxic shock (mouse), **240**, 298
- Gluconeogenesis  
 in *Manduca sexta*, absence of short-term regulation, **237**, 702
- Glucose  
 blood level in hyperglycemic KK mouse, effect of triiodothyronine, **235**, 790  
 concentration, effects on  
 immunoreactive insulin release from insulin gene-transduced hepatic cells (mouse), **233**, 470  
 swimming motility in enterobacteria, **231**, 692  
 effect on secretion of 5-hydroxytryptamine/insulin from pancreatic islets: real time electrochemical detection (mouse), **228**, 100; *erratum*, **231**, 519  
 and GLP-1, phosphorylation of SNAP-25 in RIN 1046-38 cells, **238**, 297  
 induction of delayed Ca<sup>2+</sup> response in diabetic GK rat, **239**, 129  
 insulin-induced transport, inhibition by myosin-derived peptide C109 in adipocytes (rat), **240**, 409  
 insulin secretion induced by, role of cAMP-dependent protein kinase in intact pancreatic islets (rat), **232**, 648  
 levels in obese diabetic and normal mice, effects of brain-derived neurotrophic factor, **238**, 633  
 Maillard reaction with lysine or proteins, formation of vesperlysines A, B, and C as crosslinked products, **232**, 227  
 maternal dietary, effect on phosphoenolpyruvate carboxykinase gene expression in kidney (newborn rat), **231**, 187  
 metabolism  
 effect of syntaxin 1A/HPC-1 (rat), **231**, 89  
 in *Libinia emarginata*, neurohormone regulating, identification, **237**, 694  
 regulated genes, identification in human mesangial cells by mRNA differential display, **238**, 179  
 regulation of osteoclastic bone resorption (chicken), **235**, 646  
 release from isolated hepatocytes, effect of selective inhibition of cyclic AMP phosphodiesterase III (rat), **236**, 665  
 stimulated insulin secretion, from rat islets, role of MAP kinase activation, **239**, 447  
 stimulation of cytosolic Ca<sup>2+</sup> gradients in pancreatic islet cells (mouse), **235**, 465  
 transit into liver microsomes, role in glucose-6-phosphatase function (rat), **236**, 808
- Glucose-6-phosphatase  
 function, role of glucose transit into liver microsomes (rat), **236**, 808
- Glucose 6-phosphate  
 metabolism in yeast cell-free extracts: irreversible metabolic transitions, **234**, 162
- Glucose-dependent insulinotropic peptide receptor  
 point mutation conferring constitutive activity, **232**, 96
- $\alpha$ -D-Glucose pentaacetate  
 stimulation of insulin release (rat), **231**, 435
- Glucose transporters, *see also* GLUT1; GLUT4  
 expression in abdominal and scrotal testis: effect of unilateral abdominal cryptorchidism (rat), **236**, 407
- Glucuronidation  
 mycophenolic acid by human UDP glucuronosyltransferase UGT1A10, **238**, 775
- GLUT1  
*N*-glycosylation, changes associated with radiation-induced tumorigenesis of human cell hybrids, **240**, 395
- GLUT4  
 5'-deleted minigenes, regulated expression in transgenic mice: effects of exercise training and high-fat diet, **239**, 503  
 expression in skeletal muscle and adipose tissue, effect of diet and age (rat), **235**, 89  
 insulin-induced recruitment in adipocytes, inhibition by myosin-derived peptide C109 in adipocytes (rat), **240**, 409  
 insulin-stimulated translocation in 3T3-L1 cells, effect of botulinum E toxin light chain, and toxin light chain inability to cleave SNAP-23, **237**, 388  
 regulatory elements in, **241**, 1  
 subcellular distribution in CHO cells overexpressing mutant dynamin, **241**, 401

- GLUT 5  
functional studies: pH effect on substrate selection and analysis of substrate interactions (human), **238**, 503
- L-Glutamate  
efficient production in presence of excess biotin by *ptsR* gene-disrupted *Brevibacterium lactofermentum* mutant, **234**, 157  
sodium-dependent and -independent transport in intestinal crypt-like IEC-17 cells (rat), **233**, 244
- Glutamate-binding protein  
71-kDa subunit of NMDA receptor-like complex, and 80-kDa CPP-binding protein subunit, protein half-lives (rat brain), **241**, 132
- Glutamate-cysteine ligase  
expression in glioma cells, posttranscriptional regulation by ACNU and cycloheximide (human), **239**, 51  
heavy subunit gene  
cis-acting DNA elements of, identification (human), **232**, 522  
proximal 5'-flanking sequence, role in cisplatin-induced transcriptional upregulation in lung cancer cell line SBC-3 (human), **236**, 616  
mRNA expression, Jun-dependence (human), **234**, 588
- Glutamate dehydrogenase  
thermostable, oligomeric structure formation, effect of heat treatment (*Pyrococcus* sp. KOD1), **241**, 646
- Glutamate receptor  
NMDA R1, identification in ink gland (*Sepia officinalis*), **235**, 429
- Glutamic acid decarboxylase  
gene expression in pancreas, ontogeny (mouse), **233**, 227
- Glutamine  
Glu-235 in human melanocortin 5 receptor, role in low affinity for  $\alpha$ -MSH, **236**, 489
- Glutamyl aminopeptidase  
plasma, reduction in sporadic Alzheimer's disease, **231**, 526
- $\gamma$ -Glutamylcysteine synthetase, *see* Glutamate-cysteine ligase
- Glutathione  
capped ZnS nanocrystallites, characteristics, **237**, 16  
conjugation of  $7\beta,8\alpha$ -dihydroxy-9 $\alpha,10\alpha$ -oxy-7,8,9,10-tetrahydrobenzo[*a*]pyrene, role of GSTP1-1 polymorphic form active site architecture (human), **235**, 424  
Cr(IV)-GSH, synthesis, identification, and free hydroxyl radical generation, as model compound of Cr(VI) carcinogenicity, **235**, 54  
dependent and independent microsomal prostaglandin E synthase, tissue distribution (rat), **235**, 148  
depletion  
induced thymidylate insufficiency for DNA repair synthesis (hamster), **234**, 470  
in V79 cells, effect on mutagenicity of tyrosine metabolite fumarylacetoacetate, **232**, 42  
dichloromethane dehalogenase/glutathione S-transferase affinity for, determinant of, identification, **238**, 452  
efflux before hypoxia-induced hepatocyte injury (rat), **238**, 320  
levels in NIH-3T3-ras cells, control by large aggregates of unphosphorylated hsp27 mutants, **241**, 187  
mRNA expression, Jun-dependence (human), **234**, 588  
regulation of TNF $\alpha$ -induced NF- $\kappa$ B, activation in L6 myoblasts, **237**, 645
- Glutathione S-conjugates  
haloalkene-derived, formation and cytotoxicity, effects of stable transfection of LLC-PK1 cells with human microsomal GST gene, **234**, 481
- Glutathione-dependent formaldehyde dehydrogenase  
induction in *Escherichia coli* and *Hemophilus influenza*, **238**, 693
- Glutathione peroxidase  
RNA, and Mn superoxide dismutase RNA, evidence for binding to same protein (rat), **222**, 590; *erratum*, **238**, 686  
role in TGF- $\beta$ -modulated effects of PDGF in rat VSMC, **232**, 1
- Glutathione reductase (NADPH)  
gene structure: putative mitochondrial targeting signal (mouse), **237**, 419
- Glutathione transferase  
class  $\mu$ , subunit, preferential overexpression in mouse liver by myristicin, **236**, 825  
gene induction, mediation by Nrf/small Maf heterodimer through antioxidant response elements, **236**, 313
- GST-P  
expression in rat liver epithelial cells, effects of lipid peroxidation products, **236**, 505  
promoter, NF-1A repression domain inhibiting, identification, **238**, 744
- hGSTP1-1  
four allelic forms, activities for diol epoxides of polycyclic aromatic hydrocarbons, **238**, 397  
polymorphic forms, active site architecture, role in glutathione conjugation of  $7\beta,8\alpha$ -dihydroxy-9 $\alpha,10\alpha$ -oxy-7,8,9,10-tetrahydrobenzo[*a*]pyrene, **235**, 424  
human microsomal, stable transfection of LLC-PK1 cells with gene for, effects on haloalkene glutathione S-conjugate formation and cytotoxicity, **234**, 481  
inactivation by haloenol lactone in human renal carcinoma cells: *in vitro* chemotherapy synergist, **241**, 13  
P1, gene expression in breast cancer cells, regulatory role of posttranscriptional processes, **237**, 729  
superfamily member dichloromethane dehalogenase, affinity for glutathione, determinant of, identification, **238**, 452
- Glycans  
incompletely glycosylated N-linked, chitobiose core, binding of activating receptor of rat NK cells NKR-P1A, **238**, 149
- Glycation  
proteins, effect on t-plasminogen activator-catalyzed plasminogen activation, **240**, 595
- Glycemia  
and insulin secretion, modulation by selective inhibition of cyclic AMP phosphodiesterase III (mouse, rat), **236**, 665
- Glyceraldehyde-3-phosphate dehydrogenase  
pancreatic, gene expression during ontogeny and cerulein-induced acute pancreatitis (rat), **235**, 636
- Glycerol  
for high-efficiency stable DNA transfection, **231**, 531  
permeability, aquaporin with, molecular cloning and expression from adipose tissue (human), **241**, 53  
release from isolated adipocytes, effect of selective inhibition of cyclic AMP phosphodiesterase III (rat), **236**, 665
- Glycerol-3-phosphate dehydrogenase  
mitochondrial, ascorbic acid as stimulatory cofactor (guinea pig, rat), **239**, 457
- Glycerol-1,2,3-trimethylsuccinate  
metabolism in rat pancreatic islets, **236**, 26
- Glycerophosphate dehydrogenase  
mitochondrial, gene mutation in calcium-binding domain in diabetic family, **231**, 570
- Glycine  
cleavage system, role in control of endogenous D-serine (human), **231**, 793  
conserved residues 229 and 234 in aldehyde dehydrogenase, role in activity and nucleotide binding (*Vibrio harveyi*), **238**, 448  
effect on prevention of cell lysis and recovery of respiration and ion transport after anoxia/reoxygenation (rabbit), **234**, 275
- Glycine-extended gastrin precursors  
activation of PI-3-kinase pathway, and tyrosine phosphorylation of insulin receptor substrate-1 (AR4-2J cells), **236**, 687
- Glycine N-methyltransferase  
comparison with 4S-benzo[*a*]pyrene-binding protein (rat liver), **233**, 300; letter to editor, **237**, 758

## Glycine-rich RNA-binding proteins

family member RBM3, increased mRNA levels in human cells in response to cold stress, **236**, 804

## Glycogen

content in isolated hepatocytes, effect of selective inhibition of cyclic AMP phosphodiesterase III (rat), **236**, 665

content in muscle, liver, and brain in developing chicken, **240**, 142

hepatic, mechanism of depletion in cancer cachexia (mouse), **241**, 49

## Glycogenin

expression in muscle, liver, and brain in developing chicken, **240**, 142

## Glycogen storage disease type II

mutation detection by RT-PCR and automated sequencing, **241**, 414

small deletion in French patient, identification, **235**, 138

## Glycogen synthase

activity in muscle, liver, and brain in developing chicken, **240**, 142

Glycogen synthase kinase 3 $\alpha$ 

–protein kinase F<sub>A</sub>, selective interaction with membrane phospholipids, **237**, 331

## Glycoglycerolipids

phosphocholine-containing, GGPI-I and GGPI-II, identification as species-specific major immunodeterminants of *Mycoplasma fermentans*, **233**, 644

## Glycoinositolphospholipid

covalent binding to hemoglobin: post-translational modification of Hb in hyperinsulinism with hypoglycemia, **239**, 435

## Glycolipid sialyltransferases

enhancement during neural differentiation of mouse embryonal carcinoma P19 cells, **241**, 327

## Glycolysis

effect of oncogene transformation of embryo cells (rat), **235**, 739

irreversible metabolic transitions: glucose 6-phosphate metabolism in yeast cell-free extracts, **234**, 162

## Glycoprotein hormones

$\alpha$  subunit, synthesis in HeLa cells, correlation with anchorage-independent growth, **233**, 425

## Glycoprotein Ib/IX

blocking of von Willebrand factor binding to, high shear stress with, attenuation of agonist-induced GPIIb/IIIa-mediated platelet aggregation, **233**, 796

## Glycoprotein IIb/IIIa

mediated platelet aggregation, agonist-induced, attenuation by high shear stress combined with blocking of von Willebrand factor binding to GPIb/IX, **233**, 796

platelet, interaction with disagregin (*Ornithodoros moubata*), **241**, 744

## Glycoproteins

alterations in retinal microvascular cells, effect of advanced glycation end products (bovine), **235**, 281

in colloids of pituitary gland, identification as clusterin and glycosylated albumin fragments (pig), **234**, 712

coupled to agarose beads, mouse sperm binding to, **238**, 95

gp120, HIV, binding activity of recombinant mutant cyanovirin-N forms, **238**, 218

gp120, HIV-1

effect on hypothalamic cytokine mRNA *in vivo* (rat), **231**, 514

MN, principal neutralizing domain, binding with sCD4, analysis using photoaffinity labeled analogues, **241**, 584

signaling of MAP kinase activity downregulation in granular neurons and glial cells from rat cerebellum, **240**, 683

gpE, HSV-1, effect on IgG binding and cell-to-cell spread (African green monkey kidney cell), **235**, 31

N-linked, macroautophagic sequestration and intracellular trafficking, by G<sub>i3</sub> protein in HT-29 cells (human), **235**, 166

N-linked oligosaccharides of, elements involved in reactivity of rat NKR-PIA with, **238**, 149

stress-related, intracellular distribution in heat-resistant cell model expressing human HSP70, **237**, 382

and sugars, binding of glycosylation-inhibiting factor subunit (bovine, pig), **237**, 46

## Glycosaminoglycans

effect on fibroblast growth factor-2 mitogenicity (pig), **235**, 369

## Glycosidases

retaining, classification of human lysosomal and jack bean  $\alpha$ -mannosidases as, **238**, 896

treatment of mouse eggs with, effects on sperm binding, **238**, 95

## Glycosphingolipids

complex, fucosylation by recombinant fucosyltransferase VII, **238**, 165

synthesis in melanoma B16 cells, priming by glycosylation of lactosylceramide analogs (mouse), **241**, 698

## Glycosylation

human chorionic gonadotropin  $\alpha$  subunit beyond Asn78-linked GlcNAc residue, effect on stability, **232**, 117

lactosylceramide analogs in melanoma B16 cells: priming of glycosphingolipid synthesis (mouse), **241**, 698

## N-linked

deregulation of associated ALG7 gene and role in cell proliferation in *Saccharomyces cerevisiae*, **237**, 562

glucose transporter-1, changes associated with radiation-induced tumorigenesis of human cell hybrids, **240**, 395

O-linked, nuclear and cytoplasmic proteins, regulation, **231**, 237

## proteins

in Golgi apparatus, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682

in heat-resistant rat fibroblast model expressing human HSP70, **232**, 26

thyroglobulin in FRTL-5 cells, alteration by perturbation of cellular Ca<sup>2+</sup>, **234**, 133

variable domain, in monoclonal antibody to gonadotropin-releasing hormone, modulation of antigen binding, **234**, 465

## Glycosylation-inhibiting factor

12-kDa subunit, binding to glycoproteins and sugars (bovine, pig), **237**, 46

## Glycosylceramides

6-sulfated sialyl Lewis X series, L-selectin binding studies: binding enhancement due to de-N-acetylation of sialic acid, **240**, 748

## Glycosyl-phosphatidylinositol-phospholipase type D

role in generation of second messengers (human), **233**, 432

## Glycyrrhizin

identification as thrombin inhibitor (*Glycyrrhiza glabra*), **235**, 259; *erratum*, **237**, 203

## GM3 ganglioside

close association with c-Src and Rho in GM3-enriched microdomains at B16 melanoma cell surface membrane, **236**, 218

GM-CSF, *see* Granulocyte–macrophage colony-stimulating factor

## GML

overexpression, promotion of radiation-induced cell cycle arrest and apoptosis in human tumor cells, **241**, 481

## Goblet cells

conjunctival, MUC5AC message detection (rat), **236**, 789

## Golgi apparatus

casein kinase, phosphorylation of osteopontin by, **240**, 602

protein glycosylation, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682

sialoglycoprotein MG160, expressed in *Pichia pastoris*, secretion and bFGF binding: role of complex carbohydrates and sialic acid (rat), **234**, 68

## Gonadotropin-releasing hormone

monoclonal antibody to, variable domain glycosylation, modulation of antigen binding, **234**, 465

## Gonadotropin-releasing hormone receptors

mammalian and nonmammalian, structure–function relations, **238**, 517

- Gossypol  
effect on spermidine/spermine *N*<sup>1</sup>-acetyltransferase in prostate epithelial cells (dog), **231**, 383
- GPR1  
G-protein coupled receptor homologous to, isolation from mouse and NH15-CA2 cells and expression during bone development (rat), **233**, 336
- G protein-coupled receptors  
6H1, orphan receptor proposed to be p2y5 receptor, lack of mediation of nucleotide-promoted second messenger responses, **236**, 455  
bovine renal, molecular cloning: regulation of mRNA levels by amino acid availability, **238**, 107  
cluster of four genes, identification close to CD22 gene on chromosome 19q13.1 (human), **239**, 543  
excitatory or inhibitory, coexpression in *Xenopus* oocytes for ligand identification, **233**, 853  
expressed in endothelial cells exposed to fluid shear stress, cloning (human), **240**, 737  
family related to peptide receptors, cloning (human), **231**, 651  
G/CCK<sub>B</sub>, wortmannin-sensitive activation of p70S6 kinase and MAP kinase by, **238**, 202  
gene isolation from *Saccharomyces cerevisiae*, **240**, 287  
gene localization on chromosome 1 (human), **230**, 69  
GPR41, molecular cloning and tissue expression (rat lung), **234**, 190  
Gs-coupled, mediated cAMP production in *Xenopus* oocytes expressing rat brain cortex poly (A)<sup>+</sup> RNA, enhancement by baclofen, **241**, 476  
with homology to neuropeptide and chemoattractant receptors and expressed during bone development, isolation from mouse and NH15-CA2 cells, **233**, 336
- G proteins  
 $\beta$  subunit amino terminus, interaction with  $\beta$ -adrenergic receptor kinase, **240**, 425  
 $\beta\gamma$  subunits, role in baclofen enhancement of Gs-coupled receptor-mediated cAMP production in *Xenopus* oocytes expressing rat brain cortex poly (A)<sup>+</sup> RNA, **241**, 476  
Gi, phosphorylation in chick muscle cells, and adenylyl cyclase, GTPase, protein kinase A activities, effects of 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>, **234**, 125  
G $\alpha$ , ADP-ribosylation in ciliary body, stimulation by NO (bovine), **235**, 482  
Gi3, in HT-29 cells, role in macroautophagic sequestration and intracellular trafficking of N-linked glycoproteins (human), **235**, 166  
Go $\alpha$  and G $\alpha$ -1, -2, and -3, differential localization in polarized epithelial MDCK cells, **234**, 1  
Go $\alpha$ , Gq $\alpha$ , and Gs $\alpha$ , immunoreactivity associated with rat pancreatic zymogen granule membrane, **237**, 235  
GP-1, cDNA identification (human, mouse), **231**, 360  
Gs, modulation of Cl<sup>-</sup> conductance of parotid acinar secretory granules (rat), **238**, 638  
pertussis toxin-sensitive, role in monocyte chemotactic protein-4 effects on oxygen radical production, actin, and CD11b expression in human eosinophils, **240**, 32  
role in stromal-derived factor-1 $\alpha$ -induced NK cell chemotaxis and Ca<sup>2+</sup> mobilization, **236**, 270; *erratum*, **237**, 759  
trimeric,  $\alpha$ -subunits, subcellular localization in human platelets, **234**, 439  
vesicular stomatitis virus, pseudotyped retroviral packaging through adenovirus-mediated inducible gene expression, **232**, 379
- Granules  
beta cell, peptides in, effects on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580  
cytotoxic lymphocyte, low-molecular-weight protein enhancing perforin activity: perforin-enhancing protein, **236**, 34  
exocytosis by natural killer cells, role of adenosine (mouse), **231**, 264  
lytic, channel formation and [Ca<sup>2+</sup>], accumulation induction, comparison with perforin N-terminus peptides and purified perforin (PN71 lymphocytes), **240**, 647  
parotid acinar secretory, Cl<sup>-</sup> conductance in, modulation by GTP-binding protein G<sub>s</sub> (rat), **238**, 638
- Granulocyte colony-stimulating factor  
production in differentiated THP-1 cells, synergistic stimulation by dexamethasone and interleukin-1, **239**, 676
- Granulocyte-macrophage colony-stimulating factor  
activation of c-Jun N-terminal kinase in BA/F3 cells (human), **234**, 611  
and M-CSF, production by human thyrocytes in culture, **238**, 191  
and TNF signaling pathways, comparison (human), **235**, 42
- Granulocytes  
basophilic, expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279  
HL-60 cell differentiation into, Syk activity during, **236**, 697  
movement, dual action of cAMP-dependent protein kinase (HL-60 cell), **235**, 445  
neutrophil, myeloperoxidase release after activation by f-Meth-Leu-Phe (human), **232**, 209
- Granulomatous disease  
chronic, p67phox gene mutation, identification (human), **231**, 861
- Granzyme B  
role in apoptosis, review, **230**, 481
- Graves' disease  
thyroid tissue, thyroid peroxidase purification and crystallization from, **234**, 366
- Graves' ophthalmopathy  
pathogenesis, link to full length and splice variant thyrotropin receptor expression in skeletal muscle of extraocular origin (human), **230**, 493
- Grb2 protein  
inhibition effect on Philadelphia chromosome positive leukemic cell growth (human), **235**, 383
- Grb3-3  
adenosine deaminase as binding protein, identification, **237**, 735
- Green fluorescent protein  
baculoviral display, **238**, 717  
fluorescence at high temperature, mutation enhancing, **232**, 69  
fusion protein with polyglutamine domain, oligomerization in cultured mammalian cells, **238**, 599  
gene, transfer and expression in human prostate cancer cell lines LnCap and PC-3, effects of selective clinical ultrasound signals, **234**, 64  
jellyfish, replication-competent HIV-1 expressing, generation, **233**, 288  
long-term stable expression in mammalian cells, **236**, 347  
variants, as markers of retroviral-mediated gene transfer in primary hematopoietic cells and cell lines, **234**, 371  
in visualization of mitochondria in cultured fibroblasts from patients with mitochondrial diseases, **239**, 580
- GroEL-like protein  
overexpression in symbiotic interactions of weevil *Sitophilus oryzae* and its endosymbiotic bacteria, **239**, 769
- Growth  
cellular, *see* Cell growth  
Djungarian hamster, retardation by weak magnetic fields, **234**, 707  
endothelial regrowth *in vivo*, effect of ACE inhibition (rabbit), **231**, 577  
follicular, role of integrin  $\alpha$ 6 (mouse), **235**, 524
- Growth cone  
detection of dynactin complex 50-kDa subunit (mouse), **233**, 295
- Growth factor  
pepsinogen C gene product possible role as, during gastric mucosal healing (rat), **238**, 17
- Growth factor receptor  
c-erbB2 and c-met, stimulation in breast epithelial cells (human), **231**, 17
- Growth factor receptor binding factor  
-Sos association, stimulation by DDT in breast epithelial cells (human), **231**, 17

## Growth factor receptor-bound protein 2

SH3 domain, association with dynamin II in Ras-transformed NIH3T3 cells, **234**, 539

Growth hormone, *see* Somatotropin

## Growth plate

chondrocytes, voltage-sensitive  $\text{Ca}^{2+}$  channels (chicken), **234**, 432

## Growth-related protein

GRO $\alpha$ , interleukin-8 type B receptor extracellular region binding to, mapping (human), **232**, 663

GSH, *see* Glutathione

## GTP

dependent mechanism involving  $\text{G}_{\alpha_i}$  phosphorylation, role in  $1\alpha,25$ -dihydroxyvitamin  $\text{D}_3$  stimulation of adenylyl cyclase pathway in muscle cells (chicken), **234**, 125

effects on denaturation of F-actin, **236**, 798

loading of farnesylated p21Ras by insulin at plasma membrane (3T3-L1 cells), **239**, 42

## GTPase

and adenylyl cyclase and protein kinase A and phosphorylation of  $\text{G}_i$ , in chick muscle cells, effects of  $1\alpha,25$ -dihydroxyvitamin  $\text{D}_3$ , **234**, 125

assembly-independent activity of  $\beta$ -tubulin isoforms, differential effects of colchicine and analog MTPT (bovine brain), **231**, 698

GTPase-ATPase, identification of nucleolar phosphoprotein p130 as, **230**, 370

RaIA, interaction with Arf-responsive  $\text{PIP}_2$ -dependent phospholipase D1 (mouse), **235**, 854

regulatory, in GLUT4 endocytosis, evidence for dynamin as, **241**, 401

## GTP-binding protein

role in mechanism of glucocorticoid inhibition of adrenocorticotropin secretion (rat), **235**, 295

## GTP cyclohydrolase I

RNA, differential splicing in dopa-responsive dystonia (human), **234**, 316

## Guanidine hydrochloride

activation of adenylate kinase by increasing conformational flexibility of active sites, **238**, 382

saporin resistance to, **234**, 129

## Guanidinoacetate methyltransferase gene

mapping to syntenic region on 19p13.3 (human), **238**, 723

## Guanine nucleotide exchange factors

Rho, Dbl homology domain, and ezrin-like domain of band 4.1 superfamily, molecular cloning and characterization of human CDEP protein containing, **241**, 369

## Guanine nucleotides

exchange on eIF-2, catalysis by eIF-2B, mechanism, **239**, 223

## Guanine-propenal

formation by hydroxyl radical damage of DNA, **238**, 317

## Guanylate cyclase

responsiveness to NO, effects of cardiomyocyte treatment with *S*-nitroso-D,L-acetylpenicillamine and sodium nitroprusside (rat), **238**, 351

rod outer segment membrane, calcium-modulated, characterization (bovine), **234**, 666

soluble, NO dissociation from, analysis (bovine lung), **239**, 284

## Guanylate cyclase C receptor

mice lacking, resistance to STa-induced intestinal secretion, **239**, 463

Guanylyl cyclase, *see* Guanylate cyclase

## Gu/RNA helicase II-binding protein

cloning and characterization (human), **234**, 335

## H

## H-7

inhibition of telomerase in nasopharyngeal cancer cells in culture (human), **241**, 730

## Hair

molecular structure, changes in insulin-dependent diabetes (baboon, human), **233**, 76

## Hairpin ribozyme

fourteen-nucleotide fragment, secondary structure, **232**, 444

## Half-life

71-kDa glutamate-binding and 80-kDa CPP-binding protein subunits of NMDA receptor-like complex (rat brain), **241**, 132

calmodulin and plasma membrane  $\text{Ca}^{2+}$ -ATPase in brain (rat), **237**, 163

## Haloalkenes

derived glutathione *S*-conjugates, formation and cytotoxicity, effects of stable transfection of LLC-PK1 cells with human microsomal GST gene, **234**, 481

## Haloenol lactone

synergistic effect on chemotherapy *in vitro*, **241**, 13

*Haloferax volcanii*

RNA splicing ligase activity, **237**, 588

## Halotolerance

rice cultivar Bura Rata with, salinity-stressed seedlings, transient expression of multiple genes, **233**, 663

 $\text{H}^+$ -ATPase

chloroplast, ion conductivity after reconstitution into bilayer membrane, effects of ADP, dithiothreitol, and  $\text{Mg}^{2+}$  (spinach), **232**, 461

role in  $\text{pH}_i$  regulation in osteoclasts (rat), **235**, 838

## Head and neck carcinoma

expression of testis-specific transcripts, **241**, 653

## Healing

gastric mucosal, pepsinogen C gene product as possible growth factor during (rat), **238**, 17

Heart, *see also* Myocardium

adrenoleukodystrophy-related protein mRNA expression (human), **239**, 261

annexin V localization in adult and neonate (pig, rat), **238**, 622

basic helix-loop-helix/PAS protein BMAL-1 expression (human), **233**, 258

coronary artery disease, association with genetic variation in  $\beta_1$ -adrenergic receptor gene among Japanese, **232**, 728

expression of aquaporin with permeability to water and urea (mouse), **240**, 324

expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279

failure, effect on cAMP-response element binding protein expression (human), **236**, 351

HIF-1 $\alpha$  and HLF/EPAS expression: basic loop helix/PAS domain transcription factors involved in adaptive responses to hypoxic stresses (rat), **240**, 552

and immune system, human homologue of rat adrenomedullin receptor with high expression in, molecular cloning, **240**, 183

leptin receptor splice variants Ob-Ra, b, and e, detection and quantitation (mouse), **238**, 648; *erratum*, **241**, 803

myofibrils, expression of myosin-binding phosphatase (bovine), **236**, 570

$\beta$ -myosin heavy chain expression in adult rat *in vivo*, divergence of expression in fetal rat cardiomyocytes *in vitro*, **230**, 340

NO synthase gene transcription and protein activity during endotoxemia (rat), **231**, 211

peroxisome proliferator-activated receptors  $\gamma 1$  and  $\gamma 2$ , differential expression (bovine), **239**, 857

transcription factor NFATc expression (mouse), **240**, 314

wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102

## Heart cells

$\text{T}_1$  effects, AT-1 cardiomyocytes as model for studies of, **237**, 303

## Subject Index

Heat, *see also* Thermal stability

- effect on oligomeric structure formation of thermostable glutamate dehydrogenase (*Pyrococcus* sp. KOD1), **241**, 646
- induced apoptosis and hsp70, bcl-2, and Bax protein levels in FL5.12 cells, effects of *Bcl-x<sub>L</sub>* overexpression, **241**, 164
- induced structural perturbation of  $\alpha$ -crystallin secondary and tertiary structure, effect on chaperone activity (bovine lens), **237**, 277
- Heat resistance
  - cell model M21 with, expressing human HSP70, intracellular distribution of stress glycoproteins, **237**, 382
- Heat shock
  - effect on NO synthase gene expression, **231**, 257
- Heat shock cognate proteins
  - HSC70, cDNA cloning (*Pleurodeles waltl*), **238**, 159
- Heat shock factor 2
  - trimerization domain, interaction with nucleoporin p62 (human), **240**, 228
- Heat shock proteins
  - hsp27, large aggregates of unphosphorylated mutants, control of intracellular ROS and glutathione levels and generation of protection against TNF- $\alpha$  in NIH-3T3-ras cells, **241**, 187
  - hsp70
    - heat-induced expression in FL5.12 cells, and apoptosis induction, effects of *Bcl-x<sub>L</sub>* overexpression, **241**, 164
    - heat-resistant rat fibroblast model expressing, protein glycosylation in, analysis (human), **232**, 26
    - human, heat-resistant cell model expressing, intracellular distribution of stress glycoproteins, **237**, 382
  - hsp70-1 gene, selective expression in adrenal cortex of thermally stressed rat, **233**, 550
  - hsp75, constitutive, identification and characterization (sea urchin embryo), **234**, 24
  - hsp90, insulin receptor-associated, role in insulin-stimulated mitogenesis (Rat-1 fibroblasts), **237**, 345
  - hsp108, binding specificity (chicken), **240**, 673
  - hsp110, APG-1, developmentally regulated expression in male germ cells (mouse), **233**, 113
  - induction in breast carcinoma cells, inhibition by quercetin, **239**, 851
- Heat shock response
  - in endothelial smooth muscle cells, effect of simvastatin (human), **231**, 437
- Heat shock transcription factors
  - activity *in vitro* and in transgenic embryos (sea urchin), **240**, 436
  - binding of DNA, effect of quercetin in breast carcinoma cells, **239**, 851
- Heat-stable enterotoxin, *see* STa
- Heat stress
  - associated selective expression of HSP70-1 gene in adrenal cortex (rat), **233**, 550
  - and hypoxia, induction of cyclophilins in myogenic cells by, **237**, 6
  - light-dark transition during, differential regulation of chaperonin genes of *Synechocystis* PCC 6803 under, **239**, 291
- Heat treatment
  - mild, nonenzymatic lactosylation of  $\beta$ -lactoglobulin under, associated structural heterogeneity of glycoforms (bovine), **236**, 413
- Heavy meromyosin
  - single molecule, and actin, scanning force microscopic study of interaction events between, **234**, 178
- Heavy metals
  - resistance, reversal in multidrug-resistant human KB carcinoma cells, **236**, 586
- Hedgehog protein
  - induction of osteogenic differentiation, **237**, 465
  - smoothed cDNA cloning and expression patterns during chondrogenesis and cartilage differentiation (mouse), **235**, 142

## HeLa cells

- anchorage-independent growth, correlation with synthesis of glycoprotein hormone  $\alpha$  subunit, **233**, 425
- cell cycle progression, effects of overexpression of polo-like kinase 1, **239**, 375
- cell cycle regulation, effect of overexpression of cyclin E and cyclin-dependent kinase inhibitor p27<sup>Kip1</sup>, **238**, 534
- DNA damage-induced expression of suppressor gene *PML*, cell cycle regulation, **240**, 640
- ferritin H chain transcription, stimulation by okadaic acid by increased interaction between p300 and transcription factor Bbf, **240**, 179
- gene transduction by Epstein-Barr-virus-based vectors coupled with cationic or HVJ-liposomes, **238**, 795
- hyaluronidase produced by, differences with enzyme in serum, detection by zymography (human), **241**, 446
- hybrids with normal fibroblasts, radiation-induced tumorigenesis, associated changes in *N*-glycosylation of glucose transporter-1, **240**, 395
- interleukin-6 gene expression induction and NF- $\kappa$ B activation by cycloheximide and anisomycin, **233**, 507
- KDEL receptor expression and calreticulin secretion, effect of perturbation of endoplasmic reticulum function, **240**, 36
- lack of infectivity of HIV-1 with integrase zinc finger-like domain mutant and morphologically normal maturation, **239**, 715
- mitotic, association of protein phosphatase-1 $\delta$  with retinoblastoma protein and reversible phosphatase activation (human), **235**, 704
- mtDNA-depleted, blockage of *Fas*-mediated apoptosis by *Bcl-2*, **237**, 659
- Na,K-ATPase isoform response to insulin:  $\alpha$ 2L11R.N122D and  $\alpha$ 1 isoforms (human), **236**, 444
- nuclear extracts, splicing efficiency of HIV-1 splice site pairs D1-A2 and D2-A2, **237**, 182
- putative coxsackievirus B receptor purification (human), **233**, 325
- sialyl Lewis x and Lewis x epitope synthesis *in vivo*, substrate specificities of human  $\alpha$ -1,3-fucosyltransferases for, **237**, 131
- Helicobacter pylori*
  - induction of apoptosis in gastric epithelial cells accompanied by increased Bak expression, **239**, 626
  - induction of IL-8 expression in endothelial cells via protein-tyrosine kinase-dependent signaling pathway, **240**, 561
  - lipopolysaccharide, inhibition of acid secretion in pylorus-ligated conscious rat, **236**, 532
  - metronidazole resistance, isolation of associated genetic locus, **236**, 785
  - vacuolating cytotoxin, binding to 140-kDa protein in human gastric cell lines AZ-521 and AGS, **238**, 629
- Helix-loop-helix protein
  - basic, DEC1, expressed in differentiated human embryo chondrocytes, molecular characterization, **236**, 294
  - Id1, genomic organization, sequence, and chromosomal localization (human), **231**, 628
- Helix-turn-helix motif
  - 13-kDa protein, encoding by bacterial operons related to SRP pathway, **231**, 839
- Helper T cells, *see* T helper cells
- Hemagglutinating virus of Japan
  - liposome system, EBV-based vectors coupled with, in targeted gene therapy of EBV-associated neoplasms, **241**, 112
  - liposome system, in *in vivo* transfer efficiency of antisense oligonucleotides into myocardium, **231**, 540
- Hematopoietic cells
  - CrkL tyrosine phosphorylation and association with Shc, SHP-2, and Cbl, induction by erythropoietin and IL-3, **239**, 412
  - D2, and melanoma and glioma cells, differentiation *in vitro*, differential inhibition of telomerase activity during, **237**, 438
  - DNase  $\gamma$ -like apoptotic endonuclease (*Xenopus laevis*), **231**, 305

## Subject Index

- expression of GATA-1 transcripts from testis promoter during development and cell differentiation (mouse), **231**, 299
- IL-3-dependent, IFN- $\gamma$  upregulation of anti-apoptotic gene expression and inhibition of apoptosis, **239**, 401
- IL-13 receptor subunit composition, **238**, 90
- primary cells and cell lines, retroviral-mediated gene transfer, green fluorescent protein variants as markers of, **234**, 371
- SKT6, erythropoietin-induced hemoglobin synthesis, role of Stat5 (mouse), **234**, 198
- transduction with retroviral vectors based on Gibbon ape leukemia virus (human), **231**, 477
- Heme-binding protein 23**
- gene regulation by metalloporphyrin and protoporphyrin IX in liver and hepatocyte cultures (rat), **231**, 667
- Heme-heme excitonic coupling**
- analysis by Soret circular dichroism of hemoglobin (human), **235**, 610
- Heme oxygenase-1**
- regulation and immunohistochemical analysis in rat kidney with myoglobinuric acute renal failure, **240**, 93
- Heme oxygenase-carbon monoxide pathway**
- role in genetically hypertensive rats, **241**, 574
- role in keratinocyte proliferation (human), **241**, 215
- Hemochromatosis**
- hereditary, candidate gene, mouse homolog, identification (human), **230**, 35
- Hemocyanin**
- dioxygen-binding functional unit, complete amino acid sequence (*Rapana thomasiana*), **238**, 403
- Hemocytes**
- adhering, release of lipopolysaccharide, in *in vitro* phagocytosis of *Escherichia coli* (silkworm), **231**, 623
- lebocin 3 and lebocin 4 induction by lipopolysaccharide (*Bombyx mori*), **238**, 769
- Sarcophaga peregrina*, pupa-specific surface antigens, monoclonal antibodies against, **236**, 497
- Hemodialysis-associated amyloidosis**
- stromelysin-mediated pathology in, role of  $\beta_2$ -microglobulin:  $\beta_2$ -m induction of stromelysin production in synovial fibroblasts, **239**, 621
- Hemodynamic stress**
- role in apoptosis of vascular endothelial cells, **231**, 586
- Hemoglobin**
- covalent binding of glycoinositolphospholipid: post-translational modification of Hb in hyperinsulinism with hypoglycemia, **239**, 435
- differential utilization by hyphal and yeast forms of *Candida albicans*, **232**, 350
- effects of organotin compounds (trout), **238**, 301
- erythropoietin-induced synthesis in murine hematopoietic cell line, role of Stat5, **234**, 198
- nitric oxide transport in fetal circulation, role in blood pressure regulation (human), **239**, 875
- Soret circular dichroism, in analysis of heme-heme excitonic coupling (human), **235**, 610
- Hemolysis**
- by cytolytins, stimulation by 8-anilino-1-naphthalenesulfonate (sea anemone), **232**, 422
- Hemopexin**
- related repeats, in human vitronectin, recognition by *Streptococcus pyogenes*, **234**, 445
- Hemophilus influenza**
- glutathione-dependent formaldehyde dehydrogenase induction, **238**, 693
- Heparin**
- antiproliferative effect on bovine pulmonary artery SMCs, effects of molecular weight, protein core, and charge, **241**, 18
- binding sites, in midkine, identification and role in neurite promotion (rat), **236**, 66
- effect on mammalian lymphocyte, **234**, 783
- effect on transdermal transport associated with electroporation (human), **234**, 637
- fibronectin C-terminal domain binding, synthetic peptide FN-C/H-V from, promotion of adhesion of PMA-stimulated U937 cells, **239**, 205
- regulation of C1 inhibitor function by binding (human), **230**, 597
- Heparin-binding EGF-like growth factor**
- expression in macrophages and VSMC, effect of cilostazol, **238**, 478
- Heparin-binding growth factor-related growth factor**
- mRNA induction by gastrin in stomach (rat), **235**, 520
- Hepatectomy**
- partial, subsequent liver regeneration, effect of TNF- $\alpha$  production inhibition (rat), **231**, 557
- partial, subsequent transient downregulation of inhibin- $\beta$ C expression (mouse), **235**, 553
- Hepatitis**
- posttransfusion, of unknown etiology, isolation of DNA virus associated with elevated transaminase levels in, **241**, 92
- Hepatitis A virus**
- and poliovirus, proteinase 3C, susceptibility to degradation by ubiquitin-mediated proteolytic system, **238**, 119
- Hepatitis B virus**
- antiviral drugs against, efficacy in HBV transgenic mouse, monitoring by semiquantitative PCR of serum viral DNA, **241**, 43
- human, RNase H activity of polymerase expressed in *Escherichia coli*, **233**, 401
- posttranscriptional regulatory element, RNA secondary structure, **231**, 864
- X gene, deletion mutants in human hepatocellular carcinoma, **241**, 726
- X protein, binding of damaged DNA and sensitization of liver cells to UV irradiation, **232**, 255
- Hepatitis C virus**
- genotype 5a, complete coding sequence, **236**, 44
- genotype 6a, complete coding sequence, **234**, 393
- immune complexed and non-immune complexed particles, differences in hypervariable region 1 quasispecies, **240**, 677
- infection, susceptible human cells, hepatitis G virus replication, **235**, 505
- nonstructural protein NS5A, amino terminal deletion mutants, function as transcriptional activators in yeast, **236**, 360
- NS3 protein, nuclear accumulation, effect of wild-type and mutant p53, **230**, 431
- NS3 serine proteinase, N-terminal region, role in enzymatic integrity, **231**, 738
- protease, inhibitory effects of thiazolidine derivatives, **238**, 643
- RNA polymerase, expression, purification, and partial characterization, **232**, 231
- Hepatitis G virus**
- GB virus, 5' noncoding region, sequence characterization, **231**, 606
- plus- and minus-stranded RNA, distribution in serum, liver tissue, and peripheral blood mononuclear cells (human), **237**, 288
- replication in human cells with susceptibility to hepatitis C virus infection, **235**, 505
- Hepatocellular carcinoma cells**
- gene regulating activity of thyroid hormone nuclear receptors, modulation by cell-type specific factors (human), **238**, 280
- Hep3B**
- inducible nitric-oxide synthase expression and erythropoietin production (human), **232**, 702
- insulin signaling pathway, role of Stat1 $\alpha$  (human), **235**, 317
- increased MAPK expression and activity (human), **236**, 54
- overexpression of topoisomerase II, and implications of topoisomerase II binding of wild-type p53 (human), **234**, 194
- Hepatocellular carcinoma tissue**
- detection of deletion mutants of hepatitis B virus X gene (human), **241**, 726

## Subject Index

- Hepatocyte growth factor  
activation of Met tyrosine kinase, role in internal organogenesis in *Xenopus* embryo, **234**, 8  
inhibition of growth and induction of apoptosis in transformed rat liver epithelial cells, **236**, 396  
regulation of endothelial CD44 expression and endothelium–tumor cell interactions (human), **233**, 1  
role as tissue organizer for organogenesis and regeneration, **239**, 639  
role in formation of bronchoalveolar structures in embryonic rat lung in primary culture, **241**, 98
- Hepatocyte growth factor receptor  
c-met, expression in HMC-1 mast cell line (human), **239**, 740  
Met/HGF family, expression in bone morphogenetic protein-4-like pattern in gastrulae ectoderm (*Xenopus*), **231**, 191
- Hepatocyte growth factor/scatter factor  
expression effect on glioblastoma tumorigenicity and growth (human), **235**, 743
- Hepatocyte nuclear factor-1 $\alpha$   
mRNA, extrahepatic expression in *chlch* and *14CoS/14CoS* mice, **233**, 631
- Hepatocyte nuclear factor-4  
functional association with CREB-binding protein in *trans*-activation, **241**, 664  
isoforms and HNF-1 $\alpha$ /HNF-1 $\beta$  variants, mRNA expression in HT-29 cells (human), **235**, 820
- Hepatocytes  
acetyl-CoA carboxylase intracellular localization (rat), **233**, 253  
apoptosis in absence of poly(ADP-ribose) polymerase (mouse), **233**, 518  
cell cycle-related genes, regulation by TGF- $\beta$ 1 (rat), **238**, 539  
chromatin, neutral sphingomyelinase detection and role in hepatic regeneration (rat), **236**, 29  
CYP1A1 and CYP1A2, inducible expression *in vitro*, differential effects of IL-1 $\beta$ , IL-2, and IFN- $\gamma$  (rabbit), **239**, 273  
cytotoxic effect of H<sub>2</sub>O<sub>2</sub>, alteration by tumor necrosis factor  $\alpha$  (rat), **230**, 120  
early growth responses, tissue-type plasminogen activator and type-I plasminogen activator inhibitor induction in, analysis in primary culture (rat), **239**, 123  
Fas/Apo-1(CD95)-induced apoptosis in primary culture, inhibition by cAMP (rat), **232**, 20  
glucocorticoid-induced tyrosine aminotransferase gene expression *in vitro*, enhancement by ursodeoxycholic acid (rat), **240**, 732  
glucose release and glycogen stores, effect of selective inhibition of cyclic AMP phosphodiesterase III (rat), **236**, 665  
heme-binding protein 23 gene regulation by metalloporphyrins and protoporphyrin IX (rat), **231**, 667  
hypoxia-induced injury, glutathione efflux before, analysis (rat), **238**, 320  
iNOS gene transcription and promoter activity, effect of oxidative stress (rat), **234**, 289  
lipopolysaccharide and cytokine mixture-induced cellular injuries *in vitro*, lack of role of NO (mouse), **240**, 664  
lipopolysaccharide/cytokine-induced NO synthesis, role of metabolic intermediates (mouse), **236**, 379  
lipoprotein(a) levels, inhibition by retinoids (macaque), **238**, 48  
Na<sup>+</sup> overload and injury, prevention, role of Na<sup>+</sup>/Ca<sup>2+</sup> exchanger (rat), **232**, 107  
neutrophil chemotactic protein LECT2 expression, immunochemical analysis using antibodies to recombinant protein, **237**, 116  
nitric oxide synthesis, LPS and cytokine mixture-mediated, inhibition by dimethyl sulfoxide (mouse), **239**, 517  
nuclear accumulation of G-actin in isolated cells, induction by adenine nucleotides (rat), **240**, 697  
permeabilized, cytidine-5'-diphosphate-1,2-diacyl-*sn*-glycerol import through mitochondrial membrane contact sites (rat), **232**, 261  
phosphatidate phosphohydrolase-1 activity, effect of transforming growth factor  $\beta$  (rat), **230**, 365  
sensitivity to reactive nitrogen intermediates *in vitro* (human), **233**, 545  
TGF- $\beta$ -induced apoptosis, attenuation by calpain inhibitors (rat), **231**, 457
- Hepatoma cells  
H4, antisense inhibition of angiotensinogen, enhancement by cationic liposome delivery, **232**, 794  
Hepa-1c1c7, *Cyp1a-1* induction, effects of myristicin (mouse), **233**, 619  
HepG2  
CYP1A1 mRNA induction by 3-methylcholanthrene, suppression by upstream stimulatory factor 1, **240**, 293  
DNA sequences essential for transcription of phospholipid transfer protein gene (human), **232**, 574  
NFY transcription factor binding of regulatory element AIC and transactivation of apolipoprotein A-I promoter (human), **231**, 140  
proteasome inhibition by insulin (human), **234**, 671  
HTC, apoptosis, replication factor C large subunit cleavage in, mediation by CPP32-like protease (rat), **233**, 343  
HuH-7, geranylgeranoic acid-induced apoptosis, mitochondrial membrane potential loss (human), **230**, 58  
MAPK phosphatase 1 and 2 genes, characteristic expression (rat), **239**, 746  
McA-RH7777, apolipoprotein B secretion, effect of suppression of protein-tyrosine-phosphatase LAR (rat), **237**, 367
- Hepatoma-derived growth factor  
mouse homologue, as member of gene family with significant homology in amino terminus, **238**, 26
- Hepatoma-derived growth factor-related proteins  
HRP-1 and HRP-2, and HDGF, as members of gene family in mice with significant homology in amino terminus, **238**, 26
- Hereditary nonpolyposis colorectal cancer  
somatic mutations of *hMSH3* with reference to microsatellite instability (human), **236**, 248
- Herpes simplex virus type 1  
effect of laminin on cell to cell spread in human keratinocytes, **230**, 466  
glycoprotein E, effect on IgG binding and cell-to-cell spread (African green monkey kidney cell), **235**, 31
- 12-HETE, *see* 12-Hydroxyeicosatetraenoic acid
- Heterozygosity  
loss of, *see* Loss of heterozygosity
- Hexafluoroisopropanol  
aqueous, formation of molten globule-like state of myoglobin in, **233**, 687
- Hexaglycosylceramides  
6-sulfated sialyl Lewis X series, L-selectin binding studies: binding enhancement due to de-*N*-acetylation of sialic acid, **240**, 748
- N*-Hexanoylsphingosine  
treated rat, NO production in alveolar macrophages, effect of ceramide, **234**, 738
- Hexokinase  
tumor, RNA expression in cancer cells, induction by insulin-like growth factor I, **235**, 389
- Hexokinase II  
transcriptional regulation in denervated skeletal muscle (rat), **238**, 53
- HF-I  
*hfq* gene-encoded, DNA binding properties (*Escherichia coli*), **236**, 576
- HGF, *see* Hepatocyte growth factor
- HHMJG  
human homologue of mouse JERKY gene product, cloning, mapping, and tissue distribution, **236**, 389
- HIF-1 $\alpha$   
and HLF/EPAS, cardiac expression; basic loop helix/PAS domain transcription factors involved in adaptive responses to hypoxic stresses (rat), **240**, 552
- High-density lipoprotein  
oxidative status in hypercholesterolemic chicken: lipid peroxide content, apo A-I oligomerization, and *in vitro* oxidation, **239**, 570

- reconstituted, inhibition of VCAM-1 expression in endothelial cells (human), **238**, 61
- Hippocampus
- electroencephalogram, effect of cortistatin-like peptide hCS-17 (human), **232**, 157
  - slices, brain gene norbin induced by tetraethylammonium in, induction of neurite outgrowth in Neuro 2a cells, **240**, 766
  - sugar transporter expressed in, cDNA cloning (neonatal mouse), **238**, 126
  - zinc finger protein cDNA expression (human, mouse), **231**, 481
- Hippocampus abundant gene transcript 1
- cDNA cloning (neonatal mouse), **238**, 126
- His<sub>6</sub>-tag
- $\beta$ -1,4-galactosyltransferase with, expression and purification in yeast and COS cells, **240**, 586
- Histidine
- His61 of Cu,Zn-superoxide dismutase, imidazolate bridge rupture in reduced crystalline enzyme, **241**, 119
  - His211 and Val 208 role in ligand binding and receptor function of ovine Mel<sub>1a $\beta$</sub>  melatonin receptor, **239**, 418
  - residue essential for hyaluronate lyase activity, identification (group B *Streptococcus*), **231**, 379
- L-Histidine decarboxylase
- mRNA, expression, suppression by methyleugenol (rat), **232**, 188
- Histidine-tRNA ligase
- mutated, from *Escherichia coli*, isolation and analysis, **237**, 192
- Histidyl-tRNA synthetase, *see* Histidine-tRNA ligase
- Histone deacetylase
- inhibitor, activation of WAF1/Cip1 gene promoter via Sp1 sites in MG63 osteosarcoma cells, **241**, 142
- Histones
- H3-H4, role in folding of chromatin fiber (chicken), **230**, 136
- HIV, Human immunodeficiency virus
- HL-60 cells
- apoptosis
    - induced by adenosine A<sub>3</sub> receptor antagonists, protective effect of A<sub>3</sub> agonists, **232**, 317
    - peroxynitrite-induced, role of reactive oxygen species (human), **230**, 115
  - apoptotic, shifts in DNA polymerase  $\alpha$  nuclear distribution and activity, **234**, 303
  - capping in, inhibition by NO, **232**, 827
  - cytosolic free Ca<sup>2+</sup>, LPS-induced increase, inhibition, role of chondroitin sulfate chains of urinary trypsin inhibitor, **238**, 560
  - differentiation
    - cAMP-dependent, induction by extracellular ATP, **232**, 626; *erratum*, **236**, 223
    - into granulocyte or monocyte/macrophage lineage, Syk activity during, **236**, 697
  - 1,25-dihydroxyvitamin D<sub>3</sub>-induced activation and nuclear translocation of MAPK, upstream regulation by protein kinase C, **241**, 419
  - expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437
  - 5-O-( $\beta$ -glucopyranosyl)-2-nitrobenzyl-caged L-leucyl-L-leucine methyl ester cytotoxicity, **233**, 211
  - growth and differentiation, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418
  - infection with agent of human granulocytic ehrlichiosis, associated cellular changes and induction of apoptosis, **232**, 298
  - lymphotoxin beta isoforms expressed in, identification, **238**, 273
  - matrix metalloproteinase-9 production and activation, **238**, 842
  - myeloid differentiation, phospholipase C  $\beta$ 2 intranuclear translocation (human), **235**, 831
  - NADH-cytochrome b<sub>5</sub> reductase gene, first exon identification (human), **235**, 779
  - retinoid X receptor  $\alpha$ -induced apoptosis, role of Bcl-2 pathway (human), **230**, 251
  - $\rho^c$ HL-60, ascorbate stabilization, stimulation by CoQ<sub>10</sub> increase at plasma membrane, **234**, 79
  - SNAP-23 identification (human), **231**, 808
  - telomerase inhibition by antisense pentadecadeoxynucleotides targeted against c-myc mRNA, **241**, 775
  - topoisomerase II $\alpha$  promoter, inverted CCAAT boxes in, potential regulatory role, **232**, 608
- HLF/EPAS
- and HIF-1 $\alpha$ , cardiac expression: basic loop helix/PAS domain transcription factors involved in adaptive responses to hypoxic stresses (rat), **240**, 552
- HMG-CoA reductase
- hepatic, translational regulation by dietary cholesterol (rat), **232**, 278
- HMG-like protein
- Pf16, cDNA cloning (*Plasmodium falciparum*), **234**, 101
- Hoechst 33258
- DNA alkylation activity, **231**, 94
- Homeobox, *see* Genes, homeobox
- Homodimers
- CD36, formation in platelets and transfected COS-7 cells, **240**, 812
- Hormone responsive elements
- mechanism independent of, in SMRT inhibition of interstitial collagenase transcription (rabbit synovial fibroblasts), **237**, 52
  - similar mitochondrial nucleotide sequence, role in dexamethasone inducibility of chimeric genes transfected in LATK cells (rat), **235**, 349
- Hormone-sensitive lipase, *see* Triacylglycerol lipase
- Horseradish peroxidase
- fluid-phase endocytosis, effects of perturbations, comparison with bulk-membrane and receptor-mediated tracers (fetal rat fibroblasts), **236**, 661
- HpaA protein
- identification as positive regulator of 4-hydroxyphenylacetate catabolic pathway of *Escherichia coli*, **232**, 759
- HPC-1 protein-syntaxin 1A
- interaction with tubulin (rat), **231**, 352
- H<sup>+</sup>/peptide cotransporter
- PEPT1, human, pH-sensing regulatory factor modulating transport activity of, cloning and characterization, **237**, 577
- 5-HPETE, *see* Arachidonic acid hydroperoxide
- hPOPI
- connection to p14.4 gene by bidirectional promoter, **241**, 59
- HRP, *see* Hepatoma-derived growth factor-related proteins
- HsIVU protease
- assembly and proteolytic activity in *Escherichia coli*, role of ATP binding and hydrolysis, **238**, 581
  - characteristics, **241**, 613
- hSrp1
- and Rch1 and cloned human importin- $\alpha$  homologue Qip1, interaction with DNA helicase Q1/RecQ, **234**, 48
- HSV-1, *see* Herpes simplex virus type 1
- Human chorionic gonadotropin
- $\alpha$  subunit, glycosylation beyond Asn78-linked GlcNAc residue, effect on stability, **232**, 117
- Human foamy virus protease
- recombinant, enzymatically active, expression and molecular characterization, **237**, 548
- Human granulocytic ehrlichiosis
- agent causing, infection of HL-60 cells, associated cellular changes and induction of apoptosis, **232**, 298
- Human immunodeficiency virus
- cyanovirin-N with activity against
    - isolation, primary sequence, and disulfide bond structure (*Nostoc ellipsosporum*), **238**, 223
    - sequence requirements for biological activity, **238**, 218

## Subject Index

Human immunodeficiency virus (*continued*)

- Gag protein, *N*-myristoylation blockage, effect on viral ineffectivity, **237**, 504
- Nef protein
- activation of V $\beta$ , detection by simple amplification, **230**, 509
  - acyl-CoA thioesterase hACTE-III binding, activity enhancement by direct binding with Nef, **238**, 234
- Human immunodeficiency virus type 1
- enhanced antisense inhibition by DLS delivery system, **237**, 566
  - Gag proteins, functional domain mapping, **241**, 317
  - gp120
    - effect on hypothalamic cytokine mRNA *in vivo*, **231**, 514
    - principal neutralizing domain of MN strain, binding with sCD4, analysis using photoaffinity labeled analogues, **241**, 584
    - signaling of MAP kinase activity downregulation in granular neurons and glial cells from rat cerebellum, **240**, 683
  - H9 cells infected with, toxic effects of [cyanovirin-N]-[*Pseudomonas* exotoxin] conjugate, **239**, 884
  - with integrase zinc finger-like domain mutant and morphologically normal maturation, lack of infectivity, **239**, 715
  - Nef N-terminal peptides, cytotoxicity to yeast and bacterial cells, **232**, 707
  - p2<sup>gag</sup> peptide AEAMSQVTNTATIM processed from viral Pr55<sup>gag</sup>, identification as suicide inhibitor of HIV-1 protease, **241**, 275
  - p17 protein, antibodies against, cross-reaction with human superoxide dismutase-2, **230**, 184
  - protease
    - identification of p2<sup>gag</sup> peptide AEAMSQVTNTATIM processed from HIV-1 Pr55<sup>gag</sup> as suicide inhibitor of, **241**, 275
    - inhibition by oxim derivatives, **230**, 557
    - inhibitors, screening with *Escherichia coli* cell assay, **233**, 36
    - replication, inhibition by triple-helix-forming phosphorothioate oligonucleotides targeted to polypurine tract, **233**, 742
    - replication-competent, expressing jellyfish green fluorescent protein, generation, **233**, 288
    - reverse transcriptase, inhibition by (thio)carboxanilide derivatives, models, **234**, 458
    - splice site pairs D1-A2 and D2-A2, *in vitro* splicing efficiency, **237**, 182
    - Tat(32–72), interaction with target RNA, fluorescence and NMR study, **241**, 31
  - Tat protein
    - activation of B lymphocytes, **237**, 461
    - activation of MAP kinase in granular neurons and glial cells from rat cerebellum, **238**, 800
    - display in filamentous bacteriophage M13, **235**, 806
    - effects of Tat-binding protein-1, enhancement by TBP-1 interacting protein, **239**, 176
  - Vif protein, redox state of cysteines in, analysis in infected cells and in virions, **240**, 257
  - vpr* gene product, prevention of murine fibroblast proliferation without G<sub>2</sub> arrest of cell cycle, **232**, 550
- Human papilloma virus
- cervical carcinoma cells negative for, growth, inhibition by retinoic acid via induction of insulin-like growth factor binding protein-5 secretion (human), **239**, 706
- Human T-cell lymphotropic virus type 1
- provirus, integration into mouse transforming growth factor  $\alpha$  gene, **233**, 792
  - Tax protein, transactivation of *MDR-1* gene promoter, **238**, 482
- Huntington's disease
- gene locus, single-strand conformers from, stalling of human DNA methyltransferase at, **234**, 73
- Hyaluronate lyase
- histidine residue identification (group B *Streptococcus*), **231**, 379
- Hyaluronidase
- plasma, purification, cloning, and expression (human), **236**, 10
  - produced by human tumor cell lines, differences with enzyme in serum, detection by zymography, **241**, 446
- Hybridization, *see also In situ* hybridization
- somatic rodent/human cell, in gene assignment of peroxisomal branched-chain acyl-CoA oxidase to chromosome 3p21·1-p14·2 (human), **231**, 767
- Hybridoma cells
- NG108-15, amyloid  $\beta$  protein generation, suppression by prolyl endopeptidase inhibitor, **235**, 641
  - SK2, microencapsulated with alginate-poly(L)lysine-alginate membrane, immunological studies (rabbit), **230**, 524
- Hybrids
- poly(ethylene glycol)-fibronectin-related peptides, bifunctional, **241**, 595
  - spPNA-DNA, with improved stability, UV and fluorescence studies, **240**, 778
- Hybrid screen
- c-Cbl yeast two hybrid screen, in identification of interactions with 14-3-3 isoforms and cytoskeletal components, **240**, 46
- D-Hydantoinase, *see* Dihydropyrimidinase
- Hydration
- state of cell, regulation of mammary protein synthesis (rat), **230**, 351
- Hydrocortisone
- inhibitory action on lysophospholipid:acyl-CoA acyltransferase expression in human T cells, **237**, 632
  - potentiation of cytochrome P4501A1 induction by TCDD in endothelial cells in culture (human, porcine aorta), **232**, 749
- Hydrogenase
- membrane-bound, from *Hydrogenovibrio marinus*, characterization as extremely thermophilic and oxygen-tolerant, **232**, 766
- Hydrogenovibrio marinus*
- membrane-bound hydrogenase, characterization as extremely thermophilic and oxygen-tolerant, **232**, 766
- Hydrogen peroxide
- cytotoxic effect in hepatocytes, alteration by tumor necrosis factor  $\alpha$  (rat), **230**, 120
  - glomerular mesangial cell apoptosis initiated by, role of c-Jun/AP-1 and NF- $\kappa$ B (rat), **240**, 496
  - induction of 60-kDa A170 stress protein in peritoneal macrophages (mouse), **232**, 33
  - interaction with copper, **235**, 264
  - neuronal cell apoptosis induced by, processing of Alzheimer's amyloid precursor protein (human), **235**, 845
  - nonenzymatic generation of nitric oxide by reaction with D- or L-arginine, **233**, 150
  - role in N<sup>ε</sup>-(carboxymethyl)lysine formation from Amadori product, **234**, 167
  - T98G cell apoptosis induced by, suppressive role of p125FAK protein-tyrosine kinase, **241**, 769
- Hydrogen sulfide
- and nitric oxide, role in smooth muscle relaxation (guinea pig, rat), **237**, 527
- Hydrogen transfer
- to NAD(P)<sup>+</sup>, catalyzed by lactol dehydrogenases, stereospecificity, **233**, 681
- Hydrolysis
- enzymatic, Russian-VX by organophosphorus hydrolase, **241**, 294
  - phosphoinositides, mediation of insulin-stimulated sodium transport (*Xenopus laevis*), **231**, 156
- Hydrostatic pressure
- high, induction of stable partly denatured state of trypsin (bovine), **239**, 150
- 1-Hydroxy-3-carboxy-pyrrolidine
- spin trapping of superoxide radicals, **231**, 701
- 25-Hydroxycholesterol
- acute effects on GABA receptor-mediated inhibitory postsynaptic potentials (rat brain), **237**, 68
  - toxicity, establishment of morphologically distinct PC12 cell lines resistant to, **239**, 429

- 6-Hydroxychrysene  
inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- N*-[4-[1-Hydroxy-2-(dibutylamino)ethyl] quinolin-8-yl]-4-azidosalicylamide  
interactions with multidrug resistance protein, **241**, 104
- 4-Hydroxy-3,5-dimethylbenzoate  
biosynthesis of cyclic tautomer of (3-methylmaleyl)acetone from, by *Pseudomonas* sp. HH35 but not *Rhodococcus rhodochrous* N75, **238**, 197
- 20-Hydroxyecdysone, *see*  $\beta$ -Ecdysone
- 12-Hydroxyeicosatetraenoic acid  
in RIN m5F cells, stimulation of stress-activated c-Jun protein kinase, **230**, 448
- Hydroxyl radical  
Cr(IV)-GSH generating, as model compound of Cr(VI) carcinogenicity, **235**, 54  
DNA damage by, associated formation of furfural and base propenals, **238**, 317  
mediation of *N*-(carboxymethyl)lysine formation from Amadori product, **234**, 167  
metal-induced, generation by Cu<sup>+</sup>-metallothioneins from LEC rat liver, **231**, 549
- 7-Hydroxymethylbenz[a]anthracene  
7-sulfooxymethylbenz[a]anthracene as electrophilic and carcinogenic form, **231**, 712
- 6-Hydroxymethylbenzo[a]pyrene  
6-sulfooxymethylbenzo[a]pyrene as electrophilic and carcinogenic form, **234**, 554
- 2-Hydroxy-muconic semialdehyde dehydrogenase  
*phnG* gene encoding, nucleotide sequence (*Pseudomonas* sp. DJ77), **240**, 41
- 2-Hydroxy-muconic semialdehyde hydrolase  
*phnD* gene encoding, sequence analysis (*Pseudomonas* sp. DJ77), **232**, 288
- 4-Hydroxynonenal  
interaction with rhodopsin, **230**, 275
- 4-Hydroxy-2-nonenal  
induction of GST-P in rat liver epithelial cells, **236**, 505
- 4-Hydroxy-2,3-*trans*-nonenal  
effect on erythrocyte plasma membrane Ca<sup>2+</sup> pump and passive Ca<sup>2+</sup> permeability (human), **235**, 451
- 13-Hydroxyoctadecadienoic acid  
formation, stimulation by TGF $\alpha$ /EGF (human), **231**, 111  
production by prostate tumors and cell lines (human), **239**, 775
- 13-Hydroxy-12-oxo-9(Z)-octadecenoic acid  
oxidation to 3(Z)-dodecendioic acid by bacterial monooxygenase, **232**, 364
- 2-Hydroxypent-2,4-dienoate hydratase  
*phnH* gene encoding, localization and sequence analysis (*Pseudomonas* sp. strain DJ77), **238**, 56
- 4-Hydroxyphenylacetate  
catabolism in *Escherichia coli*, HpaA protein identification as positive regulator of, **232**, 759
- N*-4-Hydroxyphenylretinamide  
enhancement of retinoic acid-induced differentiation and retinoylation of proteins in NB4 acute promyelocytic leukemia cells (human), **232**, 432
- 2-Hydroxyphytanoyl-CoA  
decarboxylation, pristanal identification as product: phytanic acid oxidation pathway, **237**, 33
- 1-Hydroxypyrene  
inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- 20 $\alpha$ -Hydroxysteroid dehydrogenase  
prolactin-mediated inhibition of gene expression (rat), **235**, 587
- 4-Hydroxy-2',3',4',5'-tetrachloro biphenyl  
inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- 1-Hydroxy-2,2,6,6-tetramethyl-4-oxo-piperidine  
in quantification of peroxynitrite, superoxide, and peroxyl radicals, **230**, 54  
spin trapping of peroxynitrite, **231**, 701
- 4-Hydroxy-2',4',6'-trichloro biphenyl  
inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- 25-Hydroxyvitamin D<sub>3</sub> 1 $\alpha$ -hydroxylase  
cDNA and genomic DNA cloning (human), **239**, 527
- Hypercholesterolemia  
effect on HDL oxidative status: lipid peroxide content, apo A-I oligomerization, and *in vitro* oxidation (chicken), **239**, 570
- Hyperglycemia  
affected KK mouse, muscle cell differentiation and blood glucose level, effect of triiodothyronine, **235**, 790  
and fasting and obesity, genes regulating, in Otsuka Long-Evans Tokushima fatty rat model for obese NIDDM, **241**, 200  
non-ketotic, cerebral D-serine depletion (human), **231**, 793
- Hyperinsulinemia  
with hypoglycemia, post-translational covalent glycoinositolphospholipid binding of hemoglobin in, **239**, 435  
independent of body mass index, relationship to serum leptin levels (human), **239**, 340  
induction in transgenic mouse homozygous for tyrosine kinase-deficient human insulin receptor, **240**, 446
- Hyperoxia  
induction of neuronal differentiation in PC12 cells via production of reactive oxygen species, **241**, 347
- Hyperparathyroidism  
sporadic primary, and uremia and multiple endocrine neoplasia, vitamin D receptor alleles as risk factors (human), **231**, 329
- Hyperpolarization  
by receptor stimulation of apamin-sensitive Ca<sup>2+</sup>-dependent K<sup>+</sup> current (human), **236**, 340
- Hypertension, *see also* Blood pressure  
affected rat, enhanced endothelial oxidized LDL receptor expression, **237**, 496  
aorta of rats with, extracellular signal-regulated kinase and c-Jun NH<sub>2</sub>-terminal kinase activities *in vivo*, **236**, 199  
genetically hypertensive rats, role of heme oxygenase/carbon monoxide system, **241**, 574  
Ren-2 transgenic rat model, vascular smooth muscle cell hypertrophy in culture from, mediation by angiotensin II, mechanism, **240**, 367  
SHR rats, and normotensive rats, unstimulated cardiomyocytes isolated from, calcium waves in, **237**, 103
- Hyperthermic lability  
Ku subunits in DNA-dependent protein kinase, role in mechanism of hyperthermic radiosensitization, **234**, 568
- Hypertriglyceridemia  
and insulin resistance, relation to TNF- $\beta$  gene Nco I polymorphism in lean and obese subjects, **236**, 829; *erratum*, **240**, 507
- Hypervariable region 1  
quasispecies, differences in immune complexed and non-immune complexed hepatitis C virus particles, **240**, 677
- Hypocholesterolemic agents  
lycopene and  $\beta$ -carotene as, in murine macrophages, **233**, 658
- Hypoglycemia  
hyperinsulinism with, post-translational covalent glycoinositolphospholipid binding of hemoglobin in, **239**, 435
- Hypophosphatemia  
X-linked gene, cDNA expression and cloning (human), **231**, 635
- Hypophysectomy  
effect on phosphate regulation of renal vitamin D-24-hydroxylase (rat), **233**, 813
- Hypotension  
activity of endomorphin 1 and 2 (rabbit), **235**, 567

## Hypothalamus

- leptin receptor splice variants Ob-Ra, b, and e, detection and quantitation (mouse), **238**, 648; *erratum*, **241**, 803
- paraventricular nucleus, parvocellular activation by arachidonyl ethanolamide, **237**, 724

## Hypothyroidism

- induction by iodide trapping defect caused by homozygous mutation in Na<sup>+</sup>/I<sup>-</sup> symporter gene in Brazilian kindred, **240**, 488

## Hypotonicity

- and thrombin, activation of taurine efflux in myoblasts (mouse), **232**, 74

## Hypoxia

- and heat stress, induction of cyclophilins in myogenic cells by, **237**, 6
- hepatocyte injury induced by, glutathione efflux before, analysis (rat), **238**, 320
- and hypoxia/reoxygenation, activation of p65<sup>PAK</sup>, p38 MAP kinase, and stress-activated protein kinase in cultured cardiac myocytes (rat), **239**, 840
- induced endothelial cell injury, role of ICE-like proteinases, **231**, 844
- induction of NO and prostaglandin-E<sub>2</sub> release by astroglial cells, modulation by interleukin-1 $\beta$  (human), **238**, 916
- and mitochondrial inhibitor, induced cellular injury and death, protective effects of depletion of ER calcium stores (rabbit renal proximal tubules), **240**, 57

## Hypoxic stress

- basic loop helix/PAS domain transcription factors involved in adaptive responses to, cardiac expression: HIF-1 $\alpha$  and HLF/EPAS (rat), **240**, 552

## I

## IA-1

- neuroendocrine tumor marker, promoter region, molecular characterization (human), **236**, 776

I $\kappa$ -B

- and NF- $\kappa$ B, role in heat shock response effect on NO synthase gene expression, **231**, 257

I $\kappa$ B $\alpha$ 

- function in asthmatic bronchial epithelial cells, interference by Der p1 allergen, role in Der p1 induction of NF- $\kappa$ B activation, **236**, 522

I $\kappa$ B kinase

- lipopolysaccharide-inducible, role in endotoxin tolerance of ovarian carcinoma cells (human), **232**, 602

ICE, *see* Interleukin-1 $\beta$  converting enzyme

## ICE-like protease

- role in endothelial cell hypoxic and reperfusion injury, **231**, 844

## ICRF-193

- DNA topoisomerase II as cellular target in egg extract (*Xenopus laevis*), **235**, 571

## Idazoxan

- effect on Arg-induced glucagon secretion from isolated islets (rat), **236**, 162

## IFM-ICM cluster

- mutation: restoration of fast inactivation in inactivation-defective human heart sodium channel by benzyl-methanethiosulfonate, **233**, 606

IGF-I, *see* Insulin-like growth factor I

## Imidazolate ring

- bridging, of His61 of Cu,Zn-superoxide dismutase, rupture in reduced crystalline enzyme, **241**, 119

## Imidazole

- active-site, reactivity, effect of imprinting of lyophilized  $\alpha$ -chymotrypsin, **240**, 27

## Imidazoline compounds

- inhibition of Arg-induced glucagon secretion from isolated islets (rat), **236**, 162

## Imipenem

- diffusion in outer membrane of *Pseudomonas aeruginosa*, **238**, 457
- Pseudomonas aeruginosa* isogenic strains susceptible and resistant to, ATR-FTIR spectroscopic study, **232**, 240

## Immediate-early gene 2 protein

- human cytomegalovirus, interaction with heterogeneous ribonucleoprotein A1 in yeast two-hybrid system, **232**, 590

## Immobilization stress

- effect on hepatic IL-6 expression (mouse), **238**, 707

## Immune complexes

- hepatitis C virus particles forming, and non-complexed particles, differences in hypervariable region 1 quasispecies, **240**, 677

## Immune responses

- to soluble proteins, immunoadjuvancy of liposomes in induction of, relationship to surface charge, **240**, 793

## Immune system

- and heart, human homologue of rat adrenomedullin receptor with high expression in, molecular cloning, **240**, 183

## Immunity

- acquired testosterone-resistant, to *Plasmodium chabaudi* malaria, spleen cell-expressed gene mediating, identification (mouse), **230**, 167

## Immunoadjuvancy

- liposomes, in induction of immune responses to soluble proteins, relationship to surface charge, **240**, 793

## Immunoaffinity purification

- natriuretic peptide (ivy), **235**, 722

## Immunodeterminants

- species-specific, of *Mycoplasma fermentans*, identification of glycolipid-phospholipids GGPI-I and GGPI-II as, **233**, 644

## Immunoglobulin

- IgG, effect of HSV-1 glycoprotein E on binding (African green monkey kidney), **235**, 31

Immunoglobulin E receptor Fc $\epsilon$ R1

- aggregation, induction of tyrosine phosphorylation of 72-kDa protein downstream of Syk (RBL-2H3 cells), **239**, 670

- and formyl peptide receptor, cooperation in RBL<sup>FPR</sup> cells, **235**, 812

## Immunoglobulin receptor

- Ig $\alpha$  subunit, interaction of B cell Src kinases with, regulation by Src kinase palmylation, **234**, 325

## Immunohistochemistry

- angiogenin localization (bovine), **232**, 323

## Immunotoxins

- saporin as candidate for synthesis of, unusual stability, **234**, 129

## Imprinting

- lyophilized  $\alpha$ -chymotrypsin, effect on reactivity of active-site imidazole, **240**, 27

## Incidental Lewy body disease

- and Parkinson's disease, Bcl-2 levels: upregulation as early event in neurodegeneration, **240**, 84

## Indole

- imprinting of lyophilized  $\alpha$ -chymotrypsin with, effect on reactivity of active-site imidazole, **240**, 27

## Indolyl quinolines

- dual inhibition of *Leishmania donovani* DNA topoisomerases, **230**, 171

## Infection

- hepatitis C virus-susceptible cells, hepatitis G virus replication (human), **235**, 505

## Infectious hematopoietic necrosis virus

- infection of fish cells, 90-kDa stress protein induced by, characteristics, **233**, 316

## Inflammation

- eosinophilic, in asthma, correlation with eotaxin expression (human), **236**, 299

## Influenza virus

- RNA polymerase and nucleoprotein genes, inhibition by liposomally endocapsulated antisense phosphorothioate oligonucleotides in clone 76 cells, **232**, 545

## Subject Index

## Infrared spectroscopy

ATR-FTIR, imipenem-susceptible and -resistant *Pseudomonas aeruginosa* isogenic strains, **232**, 240

Inhibin- $\beta$ C

transient downregulation of expression after partial hepatectomy (mouse), **235**, 553

## Inhibitory postsynaptic potentials

GABA receptor-mediated, acute effects of 25-hydroxycholesterol (rat brain), **237**, 68

## Initiation complexes

protein synthesis, mammalian, binding constants of formation and role of mRNA, **230**, 27

## Initiation factor 4A1

cloned gene promoter, characterization (human), **233**, 844

## Injury

acute, to stratified epithelium, molecular aspects of keratinocyte activation following, **236**, 231

arterial, effect of ACE inhibitors (rabbit), **231**, 577

hypoxic and reperfusion, endothelial cells, role of ICE-like proteinases, **231**, 844

## Inner medullary collecting duct cells

nuclear and cytosolic  $\text{Ca}^{2+}$  signaling induced by extracellular ATP (rat kidney), **234**, 224

iNOS, *see* Nitric-oxide synthase, inducible

## Inositol high polyphosphates

regulation of AP-2-synaptotagmin interaction, **240**, 128

## Inositol 1,2,3,5,6-pentakisphosphate 5-phosphatase

activity from fetal calf thymus, role of vicinal thiols, **240**, 146

## Inositol phosphates

ATP-induced formation in chromaffin cells, enhancement by neuropeptide Y (bovine), **239**, 287

## Inositol phosphoglycans

generation, role of glycosyl-phosphatidylinositol-phospholipase type D (human), **233**, 432

## Inositol polyphosphates

binding by pleckstrin homology domain of Btk, **236**, 333

## Inositol-1,3,4,5-tetrakisphosphate

binding sites in control and *ras*-transformed NIH/3T3 fibroblasts, **239**, 349

## Inositol trisphosphate

induced  $\text{Ca}^{2+}$  release in A7r5 smooth muscle cells and tracheal mucosal EBTr cells, effect of cytosolic  $\text{Ca}^{2+}$  concentration ramp, **237**, 354

intracellular  $\text{Ca}^{2+}$  mobilization by unsaturated fatty acids in Ehrlich ascites tumor cells independent of, **241**, 312

## Inositol 1,4,5-trisphosphate

$\text{Ca}^{2+}$  release induced by, effect of cytoplasmic  $\text{Cl}^{-}$  levels in endothelial cells (bovine aorta), **238**, 292

and cyclic ADP-ribose, potentiation of depolarization-induced  $\text{Ca}^{2+}$  release from skeletal muscle triads (rabbit), **240**, 772

induction of  $^{45}\text{Ca}^{2+}$  releases in microsomes of tracheal epithelial cells (pig), **230**, 247

## Inositol 1,4,5-trisphosphate-gated channel

intracellular  $\text{Ca}^{2+}$  release channel, effects of arachidonic acid and eicosanoids, **237**, 413

## Inositol 1,3,4-trisphosphate 5/6 kinase

cDNA, characterization (*Arabidopsis thaliana*), **232**, 678

## Insect neuropeptide-binding proteins

soluble, identification in *Helicoverpa zea*, **238**, 925

*In situ* hybridization

analysis of *RGS4* mRNA distribution in mouse brain, **241**, 281

localization of leptin receptor mRNA splice variants in peripheral tissues (mouse), **232**, 383

## Insulin

action defects at receptor and post-receptor level in type A insulin resistance syndrome (human), **234**, 626

activation of phosphatidylinositol 3'-kinase, inhibition by phenylarsine oxide (3T3-L1 cells), **239**, 316

cAMP- and glucose-dependent secretion, effects of pseudosubstrate inhibition of cAMP-dependent protein kinase in pancreatic islets (rat), **232**, 648

effect on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580

effect on p70 S6 kinase in CHO nucleus, **234**, 681

energy-dependent release from pancreatic islets, role of ascorbic acid (guinea pig), **231**, 820

extreme resistance, genetic syndromes associated with, identification of insulin receptor mutant alleles in affected patients, **237**, 516

gene region, role in incidence of and genetic susceptibility to insulin-dependent diabetes mellitus in Japanese, **233**, 283

glucose-stimulated secretion from rat islets, role of MAP kinase activation, **239**, 447

GTP loading of farnesylated p21Ras at plasma membrane by, analysis (3T3-L1 cells), **239**, 42

and 5-hydroxytryptamine, secretion from pancreatic islets, real time electrochemical detection, effects of glucose and  $\text{K}^{+}$  depolarization (mouse), **228**, 100; *erratum*, **231**, 519

immunoreactive, release from insulin gene-transduced hepatic cells, effect of ambient glucose levels (mouse), **233**, 470

induced activation of phosphatidylinositol 3-kinase in skeletal muscle, augmentation by treadmill running (rat), **236**, 647

inhibition of proteasome activity in HepG2 cells (human), **234**, 671

metabolic and mitotic signaling mediated by, negative regulation by low-molecular-weight phosphotyrosine protein phosphatase (NIH-3T3 cells), **238**, 676

modulation of ATP-sensitive  $\text{K}^{+}$  channels in skeletal muscle fibers (rat), **232**, 536

Na,K-ATPase isoform response comparison in HeLa cells:  $\alpha 2\text{L111R.N122D}$  and  $\alpha 1$  isoforms, **236**, 444

relationship to *rac1* protein expression in crypt-villus axis of small intestine (rat), **233**, 455

release stimulation by  $\alpha$ -D-glucose pentaacetate (rat), **231**, 435

## secretion

and glycemia, modulation by selective inhibition of cyclic AMP phosphodiesterase III (mouse, rat), **236**, 665

inhibition by syntaxin 1A/HPC-1 (rat), **231**, 89

and mRNA levels, in isolated rat pancreatic islets, effects of leptin, **238**, 267

NO-dependent inhibition in INS-1 pancreatic  $\beta$ -cells, temporal relationship to tetrahydrobiopterin synthesis (rat), **233**, 66

signaling, effect of insulin degrading enzyme (rat), **231**, 167

signaling defects in skeletal muscle from Wistar fatty rat, effect of pioglitazone, **223**, 439; *erratum*, **236**, 833

signaling pathway in Hep3B cells, role of Stat1 $\alpha$ , **235**, 317

stimulated mitogenesis, role of insulin receptor-associated heat shock protein 90 (Rat-1 fibroblasts), **237**, 345

stimulated sodium transport, mediation by phosphoinositide hydrolysis (*Xenopus laevis*), **231**, 156

## stimulation of

choline acetyltransferase in embryonic retina, role of jun protein (chicken), **232**, 788

glucose transport, inhibition by myosin-derived peptide C109 in adipocytes (rat), **240**, 409

GLUT4 translocation in 3T3-L1 cells, effect of botulinum E toxin light chain, and toxin light chain inability to cleave SNAP-23, **237**, 388

## Insulin degrading enzyme

cellular localization and effects on insulin signaling (rat), **231**, 167

## Insulin-like growth factor I

action defects at receptor and post-receptor level in type A insulin resistance syndrome (human), **234**, 626

## Subject Index

Insulin-like growth factor I (*continued*)

- induction of tumor hexokinase RNA expression in cancer cells, **235**, 389
- role in phosphate regulation of renal vitamin D-24-hydroxylase (rat), **233**, 813
- stimulation of Swiss 3T3 cells, and nuclear PLC $\beta_1$  overexpression, relationship, **241**, 122

## Insulin-like growth factor II

- promoter-dependent tissue-specific expression of *IGF2* gene (human), **233**, 221
- relaxation of imprinting of *IGF2* gene in sporadic breast carcinoma (human), **235**, 123

## Insulin-like growth factor binding protein-3

- formation of SDS-stable multimers (human), **240**, 707
- induction of apoptosis in breast cancer cells, **237**, 690; *erratum*, **240**, 246

## Insulin-like growth factor binding protein-5

- formation of SDS-stable multimers (human), **240**, 707
- secretion, induction by retinoic acid: inhibition of HPV-negative cervical carcinoma cell growth (human), **239**, 706

## Insulin-like growth factor I receptor

- response modulation of skeletal muscle L-type Ca $^{2+}$  channel receptor (rat), **235**, 784
- tyrosine residue 1250, role in ligand-mediated internalization by R- cells (murine embryo), **239**, 182

## Insulinoma

- pancreatic  $\beta$ -cells derived from, expression of functional leptin receptor mediating proliferative response (rat), **238**, 851

## Insulinoma cells

- RIN 1046-38, SNAP-25 phosphorylation by glucose and GLP-1, **238**, 297
- $\beta$ TC3, intracellular calcium, effect of syntaxin 1A/HPC-1 (rat), **231**, 89

## Insulin receptor

- associated heat shock protein 90, role in insulin-stimulated mitogenesis (Rat-1 fibroblasts), **237**, 345
- dephosphorylation, role of protein tyrosine phosphatase LAR (rat), **235**, 709
- gene, conserved region in first intron, binding of nuclear proteins during adipocyte differentiation, **240**, 701
- human, tyrosine-kinase-deficient, hyperinsulinemia in transgenic mouse homozygous for, **240**, 446
- insulin and IGF-I action, defects in type A syndrome of insulin resistance (human), **234**, 626
- mutant alleles associated with genetic syndromes of extreme insulin resistance, identification, **237**, 516
- mutations
  - Asp59Gly and Leu62Pro, identification in type A syndrome of extreme insulin resistance (human), **234**, 764
  - at serine residues, effect on receptor tyrosine kinase activity (human), **239**, 235

## Insulin receptor substrate-1

- tyrosine phosphorylation, and activation of PI-3-kinase pathway by glycine-extended gastrin precursors (AR4-2J cells), **236**, 687

## Insulin-regulated membrane aminopeptidase

- trafficking kinetics in 3T3-L1 adipocytes, **239**, 247

## Insulin-related growth factor II

- gene imprinting in acute myeloid leukemia (human), **231**, 466

## Insulin resistance

- extreme, type A syndrome, identification of insulin receptor mutations (human), **234**, 764
- and hypertriglyceridemia, relationship to TNF- $\beta$  gene Nco I polymorphism in lean and obese subjects, **236**, 829; *erratum*, **240**, 507
- type A syndrome, affected patient, defects of insulin and IGF-I action at receptor and postreceptor level, **234**, 626

## Insulin secretagogues

- with imidazoline structure, inhibition of Arg-induced glucagon secretion from isolated islets (rat), **236**, 162

## Integrase

- zinc finger-like domain mutant, HIV-1 with, lack of infectivity and morphologically normal maturation, **239**, 715

## Integrins

- $\alpha_2\beta_1$ , platelet-associated, affinity modulation after ligand binding (human), **232**, 724
- $\alpha_{11b}\beta_3$  and  $\alpha_v\beta_3$ , von Willebrand factor interaction with, effects of anti-vWf monoclonal antibody GUR76-23, **234**, 147
- $\alpha_4\beta_7$ , TK1 lymphoma cell stimulation via, and associated activation of src-tyrosine- and MAP-kinases, **239**, 68
- $\alpha_6$ ,
  - gene regulatory elements, identification (human), **241**, 258
  - role in follicular growth (mouse), **235**, 524
- $\alpha_6\beta_1$ , bidirectional signaling complex with calreticulin (mouse), **232**, 354
- $\alpha_M\beta_2$ , extracellular nucleotide-induced surface expression on peripheral blood leukocytes (human), **233**, 71
- $\alpha_v\beta_3$ , migration of tumor cells and activated T cells mediated by, support by L1 adhesion molecule (human), **232**, 236
- $\alpha_v\beta_5$ , highly expressed, efficient transfer of genes into senescent cells by adenovirus vectors via, **240**, 88
- $\beta_1$ , expression, upregulation by cyclic stretch in human umbilical endothelial cells, **239**, 372
- $\beta_4$ , role in apoptotic signal transduction in endothelial cells (human umbilical vein), **233**, 182
- $\beta_{4E}$  variant, cytoplasmic domain, production by partial retention of intronic sequences (human), **235**, 826
- CD11b/CD18, neutrophils undergoing engagement, pulsatile Ca $^{2+}$  influx (human), **230**, 258
- CD18, mediation of neutrophil adhesion to fibrinogen, role of phosphatidylinositol 4,5-bisphosphate 3-kinase (human), **232**, 719
- dependent tyrosine phosphorylation and cytoskeletal translocation of Tec in thrombin-activated platelets, **238**, 247
- mediated cell binding, mouse CD24 as signaling molecule: association with Src kinases, **234**, 330
- mesangial cell adhesion to ECM mediated by, disruption by metal-catalyzed oxidation of ECM proteins (mouse), **233**, 50
- neutrophil adhesion mediated by, regulation by actin polymerization (human), **238**, 910

## Intercalation

- interaction of mutagenic tryptophan pyrolysate with d(CGATCT) $_n$ , **240**, 803

## Intercellular adhesion molecule-1

- cytokine-induced expression in human endothelial cells, effects of dimethylfumarate, **234**, 19
- expression on nasal microvascular endothelial cells, effect of eotaxin (human), **241**, 136
- levels on circulating monocytes, effect of subacute treatment with dexamethasone (rat), **231**, 675

## Interferon

- activated Jak kinases, interaction with p59 $^{lck}$  (human), **235**, 83
- upregulation of Spi-1/PU.1 in human leukemia K562 cells, **240**, 862

Interferon- $\alpha$ 

- and IFN- $\gamma$ , antitumor effects on B16 melanoma cells, role of mda-6/WAF1/CIP1 and related cyclin-dependent kinases, **233**, 678

Interferon- $\gamma$ 

- gene encoding, isolation, expression, and growth-inhibitory effect of expression on glioma cells (rat), **232**, 698

Interferon- $\gamma$ 

- activation site (GAS)-like sequence on DNA, recognition by STAT4 complex, **233**, 126
- and 5-fluorouracil, in combination, apoptosis induced by, mechanisms (COLO 201 cells), **240**, 376
- and IFN- $\alpha$ , antitumor effects on B16 melanoma cells, role of mda-6/WAF1/CIP1 and related cyclin-dependent kinases, **233**, 678

- and IL-1 $\beta$  and IL-2, differential effects on inducible expression of CYP1A1 and CYP1A2 in cultured hepatocytes (rabbit), **239**, 273
- induction of human iNOS expression, regulation by promoter and 3' regions, **233**, 523
- and LPS
- induced cell death in Raw 264.7 macrophages, protective effect of peroxynitrite, **241**, 37
  - transcriptional activation of iNOS gene in macrophages by, role of upstream NF- $\kappa$ B site, **236**, 655
- LPS-TNF- $\alpha$  combination
- induced cellular injuries in cultured hepatocytes, lack of role of NO (mouse), **240**, 664
  - mediated hepatocyte NO synthesis, inhibition by dimethyl sulfoxide (mouse), **239**, 517
- modulatory effect on Fc $\gamma$  receptor-induced MAPK activation in murine macrophages, **238**, 256
- nitric oxide production in alveolar macrophages from rat treated with, effect of ceramide, **234**, 738
- production by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
- and TNF- $\alpha$ , cytotoxicity to colon carcinoma cells, role of TNF-mediated apoptosis (mouse), **233**, 270
- upregulation of anti-apoptotic gene expression and inhibition of apoptosis in IL-3-dependent hematopoietic cells, **239**, 401
- Interferon- $\gamma$ 1
- interleukin-4 receptor  $\alpha$ -chain soluble fusion protein, overexpression, purification, and use for ligand binding studies (human), **239**, 534
- Interleukin-1
- and dexamethasone, synergistic stimulation of granulocyte colony-stimulating factor production in differentiated THP-1 cells, **239**, 676
  - effect on MAP kinases in articular chondrocytes (rabbit), **230**, 573
  - induced IL-6 production, inhibition by synthetic retinoids (mouse), **231**, 243
  - modulation of protein tyrosine phosphatase activity and permeability of brain endothelial cells (pig), **239**, 804
- Interleukin-1 $\alpha$
- induction of iNOS in uterine smooth muscle (human, rat), **238**, 12
- Interleukin-1 $\beta$
- and IL-2 and IFN- $\gamma$ , differential effects on inducible expression of CYP1A1 and CYP1A2 in cultured hepatocytes (rabbit), **239**, 273
  - induction of degradation of equine articular cartilage by mechanism not mediated by NO, **238**, 81
  - induction of human iNOS expression, regulation by promoter and 3' regions, **233**, 523
  - inhibition of ob gene expression in 3T3-L1 adipocytes, **240**, 382
  - inhibition of PTH secretion in parathyroid glands *in vitro*, association with upregulation of calcium-sensing receptor mRNA (bovine), **238**, 880
  - modulation of spontaneous induction of NO and prostaglandin E<sub>2</sub> release by hypoxic astroglial cells (human), **238**, 916
  - mRNA levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338
  - production by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
  - transcriptional control of COX-2 gene expression, role of NF- $\kappa$ B, **237**, 28
- Interleukin-2
- analgesic domain (human), **230**, 542
  - hammerhead ribozyme against, in human cells, **231**, 397
  - and IL-1 $\beta$  and IFN- $\gamma$ , differential effects on inducible expression of CYP1A1 and CYP1A2 in cultured hepatocytes (rabbit), **239**, 273
  - and nitric oxide, counter-regulation of T helper 1 cell proliferation (mouse), **233**, 14
- production
- by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
  - in T cells, Ras/MAP kinase-driven, inhibition by perillid acid (human), **241**, 720
  - structural modifications at positions 47 and 65, **233**, 309
- Interleukin-3
- dependent hematopoietic cells, IFN- $\gamma$  upregulation of anti-apoptotic gene expression and inhibition of apoptosis, **239**, 401
  - induction of CrkL tyrosine phosphorylation and association with Shc, SHP-2, and Cbl in hematopoietic cells, **239**, 412
- Interleukin-4
- binding studies, use of soluble human IL-4 receptor  $\alpha$ -chain/Ig $\gamma$ 1 fusion protein, **239**, 534
  - inhibition of cytosolic phospholipase A2 gene expression and biosynthesis in LPS-stimulated U937 cells and adherent rheumatoid synovial cells (human), **230**, 40
  - signal transduction, facilitation by 70-kDa protein in absence of common gamma receptor chain (human), **233**, 279
- Interleukin-5
- long-term systemic delivery by intramuscular injection of expression plasmid (mouse), **233**, 527
- Interleukin-6
- expression in liver, effect of immobilization stress (mouse), **238**, 707
  - gene expression, induction by cycloheximide and anisomycin (human), **233**, 507
  - growth arrest induced by, association with stat3-dependent transcriptional activation of p19<sup>INK4D</sup> (M1 cells), **238**, 764
  - IL-1-induced production, inhibition by synthetic retinoids (mouse), **231**, 243
  - induction of normal and variant plasminogen gene expression (human), **230**, 129
  - inhibition of ob gene expression in 3T3-L1 adipocytes, **240**, 382
  - production by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
  - and related cytokines, activation of Stat5a in various cell types, **236**, 438
  - release from cortical type I astrocytes, effect of somatostatin (rat), **235**, 242
- Interleukin-8
- binding by IL-8 type B receptor extracellular region, mapping (human), **232**, 663
  - expression in endothelial cells, induction by *Helicobacter pylori*: protein-tyrosine kinase-dependent signal pathway, **240**, 561
  - gene encoding, LPS-induced expression mediated by NF- $\kappa$ B and AP-1 in astrocytoma U373 cells, redox regulation (human), **232**, 568
  - neutrophil responses to, differential effects of MAP kinase inhibitor PD 98059 (human), **232**, 474
  - release from eosinophils, inhibition by epinastine (human), **230**, 125
  - role in cytopathic effect induced by positive-strand RNA viruses in WISH cell line (human), **235**, 774
- Interleukin-11
- induction of rapid protein kinase C activation and cytosolic to particulate translocation of  $\alpha$  and  $\beta$  PKC isoforms in K562 cells, **232**, 61
  - inhibition of ob gene expression in 3T3-L1 adipocytes, **240**, 382
- Interleukin-12
- production by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359
- Interleukin-13
- recombinant, expression and generation of neutralizing IL-13 antiserum (rat), **235**, 529
- Interleukin-15
- promotion of angiogenesis *in vivo* (mouse), **233**, 231
  - signal transduction mechanism, role of LCK and MAP kinase (human), **232**, 754
  - stimulation of C2 skeletal myoblast differentiation, **239**, 6
- Interleukin-18
- activation of NF- $\kappa$ B in murine T helper type 1 cells, **234**, 454
  - induced activation and association of p56lck and MAPK in murine Th1 clone, **237**, 126

## Subject Index

- Interleukin-1 $\beta$ -converting enzyme  
and CPP32, role in ultraviolet B-induced apoptosis of SV40-transformed human keratinocytes, **236**, 194  
related proteinase, role in endothelial cell hypoxic and reperfusion injury, **231**, 844
- Interleukin-1 receptor  
ST2 homolog, expression, induction by proinflammatory stimulus, **235**, 474
- Interleukin-4 receptor  
gene encoding, common polymorphisms (human), **231**, 696  
and IL-7 receptor, with common  $\gamma$  chain, expression on trophoblasts (human), **231**, 429  
third receptor component facilitating IL-4 signal transduction, detection (human), **233**, 279
- Interleukin-4 receptor  $\alpha$   
-Ig $\gamma$ 1 soluble fusion protein, overexpression, purification, and use for ligand binding studies (human), **239**, 534
- Interleukin-7 receptor  
and IL-4 receptor, with common  $\gamma$  chain, expression on trophoblasts (human), **231**, 429
- Interleukin-8 receptor  
type B, extracellular binding regions, mapping (human), **232**, 663
- Interleukin-13 receptor  
subunit composition in cancer and immune cells (human), **238**, 90
- Interleukin-1 receptor antagonist  
endogenous, neuroprotective effects (rat), **234**, 211
- Intermolecular force microscopy  
subpiconewton, sensitivity, **231**, 566
- Internalization  
short-chain isoprenyl diphosphates by adrenal medulla chromaffin cells (bovine), **238**, 7
- Interstitial collagenase  
transcription, inhibition by SMRT through HRE-independent mechanism (rabbit synovial fibroblasts), **237**, 52
- Intestinal trefoil factor  
putative receptor, identification by *in situ* binding and ligand blotting (rat), **237**, 673
- Intestine  
arginase II mRNA expression (human), **233**, 487  
cytochromes P450 belonging to CYP2J and CYP4A subfamilies, purification and characterization (rabbit), **232**, 643  
epithelial wound-induced signal transduction, mediation by ERK and p38 MAP kinase pathways, studies in IEC-6 cells, **233**, 389  
natriuretic peptide synthesis (eel), **238**, 817  
peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857  
putative carboxylesterase, molecular cloning and characterization (human), **233**, 117  
rac1 protein expression in crypt-villus axis, relationship to insulin (rat), **233**, 455  
STa-induced secretion, resistance in mice lacking guanylyl cyclase C receptor, **239**, 463  
villi tip and crypt regions, isolation of intraepithelial lymphocytes by alkaline phosphatase-based method (mouse), **241**, 797  
wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102
- Intrinsic factor  
receptor binding site, location near amino acids 25–44 (rat), **231**, 348
- Introns  
dopamine transporter gene, sequences in, role in neural targeting (human), **240**, 807  
first, of insulin receptor gene, conserved region in, binding of nuclear proteins during adipocyte differentiation, **240**, 701  
first element, transcription regulation of PDGF A-chain gene (human), **230**, 569  
integrin variant  $\beta$ 4E cytoplasmic domain, sequence retention (human), **235**, 826  
*Pax6* gene, evolutionary conservation of sequences, and alternative splicing of *Pax6* in bovine eye, **240**, 196  
sequences flanking alternatively spliced 8-amino-acid exon of  $\gamma$ 2 subunit gene for GABAA receptor, **238**, 683
- Iodide ion  
and ClO $_3^-$  and SCN $^-$ , differential electrophysiological character in transport by Na $^+$ /I $^-$  symporter, **231**, 731
- Iodide trapping defect  
caused by homozygous mutation in Na $^+$ /I $^-$  symporter gene, induction of hypothyroidism in Brazilian kindred, **240**, 488
- Iodothyronine deiodinase  
type I, chicken, molecular cloning and sequence analysis, **241**, 459
- Ion channels  
induction by avian adenovirus in model bilayer lipid membranes, **236**, 750  
large mechanosensitive, radiolabeled, crosslinking studies and localization and assembly in membranes (*Escherichia coli*), **232**, 777  
transmembrane, formation, and [Ca $^{2+}$ ] $_i$  accumulation, induction by perforin N-terminus peptides (PN71 lymphocytes), **240**, 647  
voltage-dependent non-selective cation channel sensitive to efonidipine, regulation of Ca $^{2+}$  influx in brain VSMC (bovine), **240**, 484
- Ionic charge  
heparin, effect on pulmonary artery smooth muscle cell antiproliferative activity, **241**, 18
- Ionic conductivity  
chloroplast H $^+$ -ATPase reconstituted into bilayer membrane, effects of ADP, dithiothreitol, and Mg $^{2+}$  (spinach), **232**, 461
- Ionic strength  
effect on periplasmic nitrate reductase (*Desulfovibrio desulfuricans* ATCC 27774), **239**, 816
- Ion transport  
and respiration, recovery after anoxia/reoxygenation in proximal tubule cells, promotion by cryoprotectants (rabbit), **234**, 275
- IP96  
inhibition of mitochondrial protease inducing calmitine deficiency in skeletal muscle of Duchenne's muscular dystrophy patients and dy/dy dystrophic mice, **232**, 559
- Iron  
complex with erythromycin, superoxide scavenging activity (human), **232**, 183  
and free radicals, role in fibroblast proliferation induced by 1,2-dimethylhydrazine auto-oxidation (mouse), **234**, 44
- Iron-nitriloacetate  
treated rat, skeletal muscle protein, free radical-mediated effects, **231**, 37
- Iron-responsive element  
ferritin light chain mRNA, structure and function (human), **235**, 212
- Iron-sulfur protein II  
Rieske-type, of *Sulfolobus acidocaldarius*, expression with correctly inserted [2Fe-S] cluster in *E. coli*, **234**, 283
- Ischemia  
induced renal failure in rat, osteopontin upregulation in, and role of ET-1, **241**, 212
- Islet amyloid polypeptide  
fibril formation *in vitro*, effects of beta cell granule peptides (human), **236**, 580  
renal elimination (human), **239**, 265
- Islets of Langerhans, *see* Pancreatic islets
- Isoflavones  
dietary, putative preventive role in breast cancer: daidzein sulfoconjugates as potent inhibitors of sterol sulfatase from hamster liver, **233**, 579
- I $^{35}$ SO $_4$ , GalCer  
inhibition of pancreatic trypsin and chymotrypsin, **237**, 262

- Isoleucine  
role in active site of rubisco at position 164 (*Rhodospirillum rubrum*), **232**, 482
- Isomerization  
aspartic acid-151 in  $\alpha$ A-crystallin from aged lens, inversion induced by conformation formed by domain after alanine-155 (human), **239**, 918  
myotoxin *a* from *Crotalus viridis viridis*, role of Pro20: folding and structural characterization of synthetic myotoxin *a* and Pro20Gly homologue, **241**, 525
- Isoniazid  
inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536
- Isoprenylation  
protein, salvage pathway with farnesol and geranylgeraniol, **237**, 483
- Isoprenyl diphosphates  
short-chain, internalization by adrenal medulla chromaffin cells (bovine), **238**, 7
- 8-Iso-prostaglandin  $F_{2\alpha}$   
release by human pulmonary artery in organ culture, role of cyclooxygenase and NO, **233**, 668
- Isoprostanes  
release by human pulmonary artery in organ culture, role of cyclooxygenase and NO, **233**, 668
- $F_2$ -Isoprostanes  
formation during peroxidation of eicosapentaenoic acid, **236**, 467
- Isoproterenol  
effect on intracellular  $Ca^{2+}$  sparks in cardiomyocytes, 2D millisecond analysis by rapid scanning confocal microscopy (rat), **233**, 413
- Isoxazolylnaphthoquinoneimine  
postulated antibacterial mechanism in *Staphylococcus aureus*, simulation in membranes with *in vitro* system, **239**, 186
- J**
- Jak kinase  
interferon-activated, interaction with p59<sup>l<sup>n</sup></sup> (human), **235**, 83
- JB70 protein  
gene expression in *Euglena gracilis*, **234**, 544
- JL 13  
oxidability compared to clozapine and loxapine, **238**, 252
- Jun  
dependence of glutamine and  $\gamma$ -glutamylcysteine synthetase mRNA expression (human), **234**, 588  
role in stimulation of choline acetyltransferase by insulin in embryonic retina (chicken), **232**, 788
- Jun N-terminal kinase  
activation by Dbl homology domain, role of neighboring pleckstrin homology domain, **234**, 183  
activation in A431 and Swiss 3T3 cells, induction by low extracellular pH, **241**, 236
- Jun N-terminal kinase/SAPK  
and ERK, activation by mechanical strain in rat VSMC, dependence on extracellular matrix composition, **237**, 239
- Juvenile hormone III  
hydroxylated forms biosynthesized by locust corpora allata, identification, **240**, 752
- K**
- K99 pilus adhesin  
expression by enterotoxigenic *Escherichia coli*, induction by norepinephrine, **232**, 682
- K562 cells  
expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437
- expression of testis-specific transcripts, **241**, 653  
and mouse L-929 cells, joint cultivation, effect on cytotoxic factor release (human), **234**, 655
- Rab transcripts synthesized by, PCR analysis: Rab11 association with transferrin-containing recycling compartments, **239**, 612  
rapid protein kinase C activation and cytosolic to particulate translocation of  $\alpha$  and  $\beta$  PKC isoforms, induction by interleukin-11 (human), **232**, 61
- Spi-1/PU.1 upregulation by interferon, **240**, 862  
telomerase inhibition by antisense pentadecadeoxynucleotides targeted against c-myc mRNA, **241**, 775
- Kallikrein 2  
glandular, activation of zymogen form of prostate-specific antigen (human), **238**, 549
- Kallistatin  
expression and localization in rat submandibular gland after intracapsular gene injection (human), **231**, 494
- Kaposi's sarcoma cells  
AIDS-associated, secretion of neurotrophic growth factors (human), **233**, 408
- KDEL receptor  
expression, and calreticulin secretion, in HeLa cells, effect of perturbation of endoplasmic reticulum function, **240**, 36
- KDR  
interaction with phospholipase C $\gamma$ : identification of phosphotyrosine binding sites, **240**, 635
- Kearns-Sayre syndrome  
cultured fibroblasts from patients with, visualization of mitochondria with green fluorescent protein, **239**, 580
- $\alpha$ -Keratin  
molecular structure in hair, changes in insulin-dependent diabetes (baboon, human), **233**, 76
- Keratinocytes  
activation after acute injury to stratified epithelia, molecular aspects: breakthroughs and views, **236**, 231  
cell to cell spread of HSV-1, effect of laminin (human), **230**, 466  
cornified cell envelope formation, reduction by tetrameric peptide inhibitors of transglutaminase (human), **233**, 39
- epidermal  
4 $\alpha$ -carbinolamine dehydratase expression (human), **238**, 556  
cultivation, serial transfer, and differentiation in serum-free medium (human), **236**, 167
- HaCaT, bradykinin-induced actin reorganization and enhancement of cell motility (human), **237**, 257
- proliferation, role of heme oxygenase-carbon monoxide pathway (human), **241**, 215
- SV40-transformed, ultraviolet B-induced apoptosis, role of CPP32 and interleukin-1 $\beta$ -converting enzyme (human), **236**, 194
- SVK14, melanin-concentrating hormone binding sites, **241**, 622
- terminal differentiation  
functional relationship of geranylgeranyl transferase  $\alpha$ -subunit and transglutaminase 1 genes in, **235**, 10  
involving programmed cell death (human), **238**, 886
- Keratoconus  
expression of transcription factors (human), **235**, 253
- $\alpha$ -Ketoisocaproate  
transport in neuroblastoma NB-2a cells, **237**, 63
- Ki-67 protein  
proliferation-related, mRNA expression in early development embryo (mouse), **235**, 191
- Kidney  
arginase II mRNA expression (human), **233**, 487  
citrulline- and NO-producing enzyme, detection (rat), **232**, 672  
cortex, antioxidant enzyme mRNA expression in normal and diabetic rat, **235**, 598

Kidney (*continued*)

- diabetes-associated genes, isolation using differential display (rat), **232**, 49
- diabetic nephropathy mechanism, analysis using mRNA differential display: identification of glucose-regulated genes in human mesangial cells, **238**, 179
- expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279
- ischemia-induced failure in rat, associated osteopontin upregulation and role of ET-1, **241**, 212
- islet amyloid polypeptide elimination (human), **239**, 265
- leptin receptor mRNA splice variants, localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383
- with myoglobinuric acute renal failure, regulation and immunohistochemical analysis of stress protein heme oxygenase-1 (rat), **240**, 93
- peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857
- thioredoxin reductase activity, effect of selenium deficiency (rat), **234**, 293
- and uterus and ovary, osteogenic protein-1 mRNA, effects of pregnancy and estrogen (mouse), **234**, 242
- very-long-chain fatty acid accumulation in adrenoleukodystrophy protein-deficient mouse, **232**, 631
- vitamin D-24-hydroxylase regulation by phosphate: effects of hypophysectomy, growth hormone, and insulin-like growth factor I (rat), **233**, 813
- wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102
- Kidney cells**
- BHK, soluble human IL-4 receptor  $\alpha$ -chain/Ig $\gamma$ 1 fusion protein overexpressed in, purification and use in ligand binding studies, **239**, 534
- COS**
- detection of different endogenous  $\alpha$ -L-fucosyltransferases, **237**, 400
- $\beta$ -1,4-galactosyltransferase expression and purification using His<sub>6</sub>-tag technology, **240**, 586
- COS-1**, expressing exogenous  $\beta$ -amyloid precursor protein, actin gene expression (African green monkey), **231**, 615
- COS-7**
- mRNA expression and antisense RNA mediated inhibition of gene expression, effects of capping and polyadenylation, **241**, 193
- oligomerization of expanded polyglutamine domain fluorescent fusion proteins, **238**, 599
- transfected, CD36 formation of covalently associated dimers and multimers in, **240**, 812
- epithelial, expression of dihydropyridine binding sites, **237**, 41
- fetal, expression of butyrylcholinesterase gene with L3301 mutation, induction of fluoride-resistant phenotype (human), **240**, 372
- glomerular mesangial, from adult kidney, apoptosis, role of RGD-containing peptides (human), **234**, 594
- HEK 293**
- apoptosis, effect of protooncogene Crk-II (human), **234**, 616
- expression of mammalian homologues of *trp* gene from *Drosophila* (human), **239**, 279
- plasmid DNA delivery into, cationic lipid for, **236**, 126
- inner medullary collecting duct, nuclear and cytosolic Ca<sup>2+</sup> signaling induced by extracellular ATP (rat), **234**, 224
- LLC-PK1**, stable transfection with human microsomal GST gene, effects on haloalkene glutathione S-conjugate formation and cytotoxicity (pig), **234**, 481
- MDCK**
- cell-cell adhesion, regulation by Cdc42 and Rac1 small GTPases, **240**, 430
- cell-cell adhesion sites, role of myosin binding subunit of smooth muscle myosin phosphatase, **230**, 552
- differential localization of G proteins G $\alpha$ o and G $\alpha$ i-1, -2, and -3, **234**, 1
- internal detergent-insoluble membranes, detection of caveolin and MAL proteolipid in distinct lipid microenvironments, **233**, 707
- long-term postconfluent culture, protein insolubility and late-stage morphogenesis (canine), **234**, 719
- MDCK-C7**, dedifferentiated, loss of cytokeratin expression and formation of actin stress fibers, **241**, 541
- Vero**, ricin A chain cytotoxicity, role of A chain proteolysis, **241**, 617
- Kininogen**
- preincubation at low temperatures with, in detection of cryptic protease activity from *Trypanosoma cruzi*, **240**, 540
- K-ras**
- antisense nucleotides against, inhibition of anchorage-independent growth of *ras*-transformed cells on PolyHEMA surface (rat), **231**, 735
- Kringle-like domain**
- and three scavenger receptor cysteine-rich motifs, molecular cloning of murine brain-specific serine protease with, **239**, 386
- Kupffer cells**
- as dominant site of uncoupling protein 2 expression (rat liver), **235**, 760
- L**
- Laccase**
- and tyrosinase, pluripotent polyphenol oxidase with activities of, characterization from melanogenic marine *Alteromonas* sp., **240**, 787
- Lac repressor system**
- control of phospholipase C $\beta$ <sub>1</sub> expression: relationship between nuclear PLC $\beta$ <sub>1</sub> overexpression and growth factor stimulation, **241**, 122
- Lacrimal glands**
- immunolocalization of aquaporin homologs (mouse), **238**, 891
- Lactacystin**
- effect on human platelet lysosomal cathepsin A-like enzyme, **234**, 729
- Lactate**
- brain, deuterium distribution as tracer of metabolic pathways (rat), **237**, 650
- Lactobacillus acidophilus*
- effect on formation of azoxymethane-induced aberrant crypt foci in colon (rat), **238**, 753
- Lactoferricin**
- induced apoptosis in leukemic cells, role of reactive O<sub>2</sub> species (human), **237**, 624
- $\beta$ -Lactoglobulin
- nonenzymatic lactosylation under mild heat treatment, associated structural heterogeneity of glycoforms (bovine), **236**, 413
- Lactol dehydrogenases**
- hydrogen transfer to NAD(P)<sup>+</sup> catalyzed by, stereospecificity, **233**, 681
- Lactosylation**
- nonenzymatic, bovine  $\beta$ -lactoglobulin under mild heat treatment, associated structural heterogeneity of glycoforms, **236**, 413
- Lactosylceramide**
- analogs, glycosylation in melanoma B16 cells: priming of glycosphingolipid synthesis (mouse), **241**, 698
- Lambda exonuclease**, *see* Exodeoxyribonuclease (lambda-induced)
- Lamin**
- proteolysis during apoptosis, two proteases involved in, characteristics and localization, **233**, 96
- Lamina-associated polypeptide 2**
- chromatin-binding activity, **238**, 240
- Laminin**
- effect on HSV-1 spread from cell to cell in human keratinocytes, **230**, 466
- or pronectin, JNK/SAPK and ERK activation by mechanical strain in rat VSMC cultured on, **237**, 239
- Large mechanosensitive ion channel**
- radiolabeled, crosslinking studies and localization and assembly in membranes (*Escherichia coli*), **232**, 777
- LCK protein**
- role in signal transduction mechanism of interleukin-15 (human), **232**, 754

## Leader peptidase I

*lep* gene encoding, nucleotide sequence and genetic complementation (*Azotobacter vinelandii*), **239**, 393

## Learning

and memory, analysis in mice lacking *Bsg* gene, **236**, 733

## Lebers hereditary optic neuropathy

mutational analysis of ND6 gene in patients with, **234**, 511

## Lebocin 4

detection in *Bombyx mori* and characterization, **238**, 769

Lecithin-cholesterol acyltransferase, *see* Phosphatidylcholine-sterol *O*-acyltransferase

## LECT2

expression in human hepatocytes, immunochemical analysis using antibodies to recombinant protein, **237**, 116

## Lectins

sensitivity of avian ecto-ATPases from liver and cardiac and smooth muscle, **238**, 728

## Leiomyoma cells

mitogen-activated protein kinase stimulation by prolactin (human), **238**, 473

*Leishmania donovani*

DNA polymerase  $\alpha$  gene, cloning and sequence analysis and comparison with human homologue, **234**, 95

## Lens

aged,  $\alpha$ A-crystallin from, aspartic acid-151 inversion by conformation formed by domain after alanine-155 (human), **239**, 918

$\alpha$ B-crystallin, effect of TATA sequence mutations: lens preference for proximal TATA box and distal TATA-like sequence in transgenic mice, **241**, 407

diabetic, increased formation of AGEs and inhibition by aminoguanidine (rat), **241**, 352

epithelial cells, expression of extracellular calcium-sensing receptor (human), **233**, 801; *erratum*, **237**, 481

## Leprechaunism

insulin receptor mutant alleles associated with, identification, **237**, 516

## Leptin

detection in human milk and relationship to maternal plasma leptin concentration and adiposity, **240**, 742

effect on insulin secretion and mRNA levels in isolated rat pancreatic islets, **238**, 267

effect on lipolysis in mouse adipocytes *in vitro*: possible autocrine/paracrine action, **240**, 590

## gene expression

in adipose tissue, leptin receptor-mediated autocrine regulation (rat), **240**, 492

and circulating peptide concentrations, developmental changes (mouse), **238**, 44

and hormone release, effect of enteral vs. parenteral nutrition (rat), **237**, 98

gestational profile in plasma, adipose tissue, and placenta (rat), **240**, 798

identification of 5' flanking sequences involved in trophoblast-specific transcription (human), **241**, 658

increased production by adipose tissue after midpregnancy (mouse), **240**, 213

induction of proliferation of pancreatic  $\beta$  cell line MIN6 via activation of MAP kinase, **241**, 765

mRNA expression and secretion in 3T3-L1 adipocytes, regulation by thyroid hormone, **232**, 822

## secretion

after differentiation of preadipocytes to adipocytes (rat), **230**, 360

in obese spontaneously hypertensive rat, **231**, 582

serum levels

during pregnancy, and leptin receptor mRNA levels in uterus and other organs (rat), **237**, 476

relationship to hyperinsulinemia independent of body mass index and visceral obesity (human), **239**, 340

## Leptin binding factor

demonstration in human serum, **233**, 818

## Leptin receptor

amino acid variants, lack of association with juvenile onset obesity (human), **233**, 248

functional, mediating proliferative response, expression by insulinoma-derived pancreatic  $\beta$ -cells (rat), **238**, 851

mediation of apparent autocrine regulation of leptin gene expression (rat), **240**, 492

short form, role in signal transduction (rat), **231**, 26

## splice variants

localization in peripheral tissues by RT-PCR and *in situ* hybridization (mouse), **232**, 383

Ob-Ra, b, and e, detection and quantitation in murine tissues, **238**, 648; *erratum*, **241**, 803

uterine mRNA, and serum leptin, increase during pregnancy (rat), **237**, 476

## Leucine

N-terminal residue in snake venom cardiotoxin II, role (*Naja naja atra*), **233**, 713

## L-Leucyl-L-leucine methyl ester

5-O-( $\beta$ -glucopyranosyl)-2-nitrobenzyl-caged, synthesis, cytotoxicity, and solubility in PBS with 1% DMSO (HL-60 cells), **233**, 211

## Leu-enkephalin-encoding sequence DNA-binding factor

identification as transcription factor YY1 (rat), **231**, 135

## Leukemia cells

FLG 29.1, raloxifene binding and bioeffects (human), **240**, 573

HL-60, *see* HL-60 cells

## Jurkat

expression of mammalian homologues of *trp* gene from *Drosophila* (human), **239**, 279

expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437

and P39 cells, detection of  $Mg^{2+}$ - and  $Mn^{2+}$ -dependent endonucleases producing nucleosome-size DNA fragmentation (human), **233**, 133

## L1210

cisplatin-resistant, processes, role in cellular response to drug treatments (mouse), **234**, 573

effect on NO and TNF- $\alpha$  production by RAW 264.7 macrophages (mouse), **230**, 636

stimulated to growth, ornithine decarboxylase induction, role of phosphatidylinositol 3-kinase, **239**, 729

Philadelphia chromosome positive, effect of Grb2 and Crkl protein inhibition on growth (human), **235**, 383

U937, *see* U937 leukemia cells

## Leukemia inhibitory factor

and IL-6, activation of Stat5a in various cell types, **236**, 438

induction of mitogenesis in Swiss 3T3 cells, and selective enhancement, **236**, 814

## Leukemia inhibitory factor receptor

mRNA detection in choriocarcinoma cells and production of soluble receptor (human), **232**, 427

## Leukemia virus

retroviral vectors based on, transduction of human hematopoietic progenitor cells (Gibbon ape), **231**, 477

## Leukocytes

depletion, prevention of stress-induced decrease in gastric prostaglandin  $I_2$  (rat), **231**, 52

leukotriene  $B_1$  receptor binding activity, effects of metal ions (human), **236**, 355

peripheral blood, extracellular nucleotide-induced Mac-1 surface expression (human), **233**, 71

## Leukosialin

aberrant expression on colon adenoma and cancer cells, **238**, 612

- Leukotriene B<sub>4</sub>  
 and arachidonic acid, regulation of intracellular calcium release channel function, **237**, 413  
 binding to receptor on leukocytes, effects of metal ions (human), **236**, 355  
 identification as functional ligand binding to and activating cloned chemotactant receptor CMKRL1, **240**, 162  
 neutrophil responses to, differential effects of MAP kinase inhibitor PD 98059 (human), **232**, 474
- Leukotriene B<sub>4</sub> receptor  
 leukocyte, binding activity, effects of metal ions (human), **236**, 355
- Levodopa  
 dystonia responsive to, GTP cyclohydrolase I in, differential RNA splicing (human), **234**, 316
- Lewis lung carcinoma  
 growth, suppression by recombinant murine angiostatin, **236**, 651
- LEX032  
 recombinant, inhibition of human leukocyte proteinase 3, **233**, 697
- LIF, *see* Leukemia inhibitory factor
- Ligand-mediated internalization  
 role of IGF-1 receptor residue 1250 (R- cells), **239**, 182
- Limb development  
 differential expression of *LH-2A* and *LH-2B* during, analysis (chicken), **238**, 506
- Limk2  
 gene cDNA cloning, genomic organization, and chromosomal localization (mouse), **241**, 243
- LIM motif  
 containing kinase gene Limk2, cDNA cloning, genomic organization, and chromosomal localization (mouse), **241**, 243
- Lindane  
 inhibition of progesterone receptor-mediated transactivation in yeast, **233**, 139
- Linoleate  
 peroxisomal  $\beta$ -oxidation, metabolites produced during, movement to microsomes for conversion into linoleate (rat), **233**, 438
- Linoleic acid  
 metabolism, in cultured adult cardiomyocytes, effects of aging (rat), **237**, 142  
 monochlorohydrins, effect on cardiac papillary muscles (guinea pig), **231**, 295
- $\gamma$ -Linolenic acid  
 regulation of maspin expression and cancer cell mobility (human), **237**, 639
- Lipase, *see* Triacylglycerol lipase
- Lipid mediators  
 responses of avian ecto-ATPases from liver and cardiac and smooth muscle, **238**, 728
- Lipid mobilizing factor  
 role in liver glycogen depletion in cancer cachexia (mouse), **241**, 49
- Lipid peroxidation  
 inhibition by *N*-acetylserotonin, and role in retinal physiology, **233**, 778  
 low-density lipoprotein, and atherosclerosis, in apolipoprotein E-deficient mice, inhibition by losartan, **236**, 622  
 membrane, effects of amyloid  $\beta$  peptide fragment 25–35, **233**, 760  
 products, cellular response: GST-P induction by 4-hydroxy-2-nonenal (rat), **236**, 505
- Lipid peroxides  
 content in HDL from hypercholesterolemic chickens and role in atherogenesis, **239**, 570
- Lipids  
 bilayer membranes, ion channel induction by avian adenovirus, **236**, 750  
 cationic, for delivery of plasmid DNA into mammalian cells, **236**, 126  
 distinct microenvironments in internal detergent-insoluble membranes in MDCK cells, detection of caveolin and MAL proteolipid in, **233**, 707  
 domains in model stratum corneum (bovine), **231**, 797  
 mobile, <sup>1</sup>H NMR-detectable, generation in stimulated lymphocytes, relationship to cellular activation, cell cycle, and phosphatidylcholine-specific phospholipase C (mouse), **239**, 868  
 plasma levels, in mice lacking APOBEC-1, effects of apo E deficiency, **236**, 375  
 sulfated, inhibition of pancreatic trypsin and chymotrypsin, **237**, 262  
 unsaturation, and membrane fluid state, modulation in mammalian cells by stable transformation with yeast  $\Delta^9$ -desaturase gene, **237**, 362
- Lipocalin  
 tear, solution structure, analysis by site-directed tryptophan fluorescence (human), **239**, 191
- Lipofuscins  
 Alzheimer's disease and aged neurons, immunohistochemical localization of AGEs pentosidine and carboxymethyllysine in, **236**, 327
- Lipoic acid analogue  
 1,2-diselenolane-3-pentanoic acid, protection of human LDL against copper ion-mediated oxidative modification, **240**, 819
- Lipolysis  
 in mouse adipocytes *in vitro*, effect of leptin: possible autocrine/paracrine action, **240**, 590
- Lipopolysaccharide  
 effect on monocyte-macrophage differentiation-dependent gene (human), **235**, 4  
*Helicobacter pylori*, inhibition of acid secretion in pylorus-ligated conscious rat, **236**, 532  
 and IFN- $\gamma$   
 induced cell death in Raw 264.7 macrophages, protective effect of peroxynitrite, **241**, 37  
 transcriptional activation of iNOS gene in macrophages by, role of upstream NF- $\kappa$ B site, **236**, 655  
 I $\kappa$ B kinase induced by, role in endotoxin tolerance of ovarian carcinoma cells (human), **232**, 602  
 induced cytosolic free Ca<sup>2+</sup> increase in HL60 and HUVEC cells, inhibition, role of chondroitin sulfate chains of urinary trypsin inhibitor, **238**, 560  
 induced interleukin-8 gene expression mediated by NF- $\kappa$ B and AP-1 in astrocytoma U373 cells, redox regulation (human), **232**, 568  
 induction of  
 actin phosphorylation in monocytes (human), **241**, 670  
 cell proliferation and collagen synthesis in small intestinal lamina propria fibroblasts, role of nitric oxide (human), **240**, 458  
 early and late activation of protein kinase C in inflammatory macrophages by selective activation of PKC- $\epsilon$ , **240**, 629  
 leucocins 3 and 4 (*Bombyx mori*), **238**, 769  
 inhibitor derived from cinnamon bark, **234**, 506  
*Pseudomonas aeruginosa*, induction of cystic fibrosis-like alteration of SLP1 protein secretion by human tracheal gland cells, **241**, 305  
 release by adhering hemocytes, in *in vitro* phagocytosis of *Escherichia coli* (silkworm), **231**, 623  
 stimulated macrophages, tyrosine phosphorylation of 41-kDa protein in, inhibition by negatively charged liposomes (mouse), **231**, 827  
 stimulated nitric oxide production from macrophages, regulation by scavenger receptors (mouse), **237**, 601  
 stimulated peritoneal macrophages, prostaglandin D<sub>2</sub> production, effect of concordant induction of PGE<sub>2</sub> synthase with cyclooxygenase-2 (rat), **230**, 110  
 stimulated U937 cells, cytosolic phospholipase A2 gene expression and biosynthesis, inhibition by interleukin-4 (human), **230**, 40
- Lipopolysaccharide binding protein  
 and bactericidal permeability increasing protein, conservation of genomic organization of genes encoding (human), **236**, 427
- Lipopolysaccharide-cytokine mixture  
 induced cellular injuries in cultured hepatocytes, role of NO (mouse), **240**, 664  
 mediated NO synthesis in hepatocytes  
 inhibition by dimethyl sulfoxide (mouse), **239**, 517  
 role of metabolic intermediates (mouse), **236**, 379

## Subject Index

- Lipoprotein, *see also* High-density lipoprotein; Low-density lipoprotein  
 $\beta$ -very-low-density, nitrotyrosine bound to apoprotein, evaluation as bio-marker of peroxynitrite formation in experimental atherosclerosis (rabbit), **232**, 332
- Lipoprotein(a)  
 hepatocyte levels, inhibition by retinoids (macaque), **238**, 48
- Lipoprotein gel electrophoresis  
 in evaluation of coupling efficiency of LDLs for macrophage-specific drug targeting, comparison with other methods, **240**, 112
- Liposomes  
 annexin V binding, associated conformational changes, **234**, 111; *erratum*, **237**, 202  
 antisense phosphorothioate oligonucleotides endocapsulated by, inhibition of influenza virus RNA polymerase and nucleoprotein genes in clone 76 cells, **232**, 545  
 cationic  
 conjugation to antisense oligonucleotides, enhancement of antisense inhibition of angiotensinogen in hepatoma cell culture, **232**, 794  
 or HVJ-liposome, Epstein-Barr-virus-based vectors coupled with, transduction of genes into human cells, **238**, 795  
 mediated *in vivo* gene transfer into mouse brain, efficiency, enhancement by cytoplasmic gene expression system, **234**, 15  
 -HVJ method  
 or cationic liposome, Epstein-Barr-virus-based vectors coupled with, transduction of genes into human cells, **238**, 795  
 EBV-based vectors coupled with, in targeted gene therapy of EBV-associated neoplasms, **241**, 112  
*in vivo* transfer efficiency of antisense oligonucleotides into myocardium with, **231**, 540  
 induction of NO synthase expression in VSMC (bovine), **231**, 780  
 mediation of intracavitary p53 gene transfer into glioblastoma expressing wtp53 *in vivo*, tumor-suppressing effect and effect on survival (mouse), **233**, 359  
 negatively charged, inhibition of tyrosine phosphorylation of 41-kDa protein in LPS-stimulated macrophages (mouse), **231**, 827  
 rupture by cytochrome C, role of invariant Arg<sup>91</sup> (bovine brain), **238**, 140  
 surface charge, relationship to immunoadjuvancy in induction of immune responses to soluble proteins, **240**, 793
- Lipoteichoic acid  
 from *Staphylococcus aureus*, induction of nitric oxide synthesis in J774 cells, role of CD14-dependent pathway, **233**, 375
- Lipovitellin-2  
 active nuclear transport (chicken), **234**, 760
- Lipoxygenase  
 pathway product 12-HETE in RIN m5F cells, stimulation of stress-activated c-Jun protein kinase, **230**, 448
- 5-Lipoxygenase  
 role in arachidonic acid stimulation of prostate cancer cell growth (human), **235**, 418
- 15-Lipoxygenase  
 in breast carcinoma BT-20 cells, characterization (human), **231**, 111
- Liver  
 angiotensinogen promoter activation, role of ATF-like element (human), **237**, 158  
 arginase II mRNA expression (human), **233**, 487  
 Ca<sup>2+</sup>-stimulated S6-kinase identification (rat), **239**, 451  
 carcinogenesis, associated overexpression of  $\alpha$ -prothymosin concomitant with c-myc (rat), **232**, 817  
 CCAAT/enhancer binding protein  $\alpha$  and  $\beta$  gene regulation during development (rat), **234**, 605
- Chang cells  
 sensitization to UV irradiation by hepatitis B virus X-protein, **232**, 255  
 staurosporine-induced telophase arrest and apoptosis blocking mitosis exit (human), **236**, 594
- Cyp2f2 mRNA levels, reduction by diethylhexylphthalate (mouse), **239**, 660  
 cytochrome P450 3A30 isolation (*Fundulus heteroclitus*), **236**, 306  
 cytochrome P450 4T1 isolation (rainbow trout), **236**, 302  
 cytosol, constitutively expressed aldehyde dehydrogenase, cDNA cloning (rat), **236**, 527  
 cytosolic long-chain acyl-CoA hydrolase cDNA, molecular cloning and expression (rat), **232**, 198  
 dioxin sequestration, role of CYP1A2, knockout mouse studies, **236**, 431  
 distribution of plus- and minus-stranded hepatitis G virus RNA (human), **237**, 288  
 ecto-ATPase, comparison to ecto-ATPases from and cardiac and smooth muscle (chicken), **238**, 728  
 expression of aquaporin with permeability to water and urea (mouse), **240**, 324  
 expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279  
 and extrahepatic tissues, *14CoS/14CoS* mutant and wild-type *chlch* mice, expression of *Nmo1*, *Ugt1a6*, *Ahd3*, and *Hnfl*  $\alpha$  genes, **233**, 631  
 glycogen, mechanism of depletion in cancer cachexia (mouse), **241**, 49  
 glycogenin and glycogen synthase activity and glycogen content during development (chicken), **240**, 142  
 heme-binding protein 23 gene regulation by metalloporphyrins and protoporphyrin IX (rat), **231**, 667  
 insulin gene-transduced cells, release of immunoreactive insulin, effect of ambient glucose levels (mouse), **233**, 470  
 interleukin-6 expression, effect of immobilization stress (mouse), **238**, 707  
 LEC, Cu<sup>+</sup>-metallothioneins, metal-induced hydroxyl radical generation (rat), **231**, 549  
 leptin receptor mRNA splice variants, localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383  
 low-affinity glucocorticoid binding site activity and glucocorticoid-dependent induction of CYP3A2, effect of vitamin A deficiency (rat), **237**, 211  
 nuclei, calcium concentration, increase by sphingolipids (rat), **238**, 347  
 nucleoside transport activity, correlation with expression of sodium-dependent purine nucleoside carrier mRNA (rat), **233**, 572  
 peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857  
 phosphorylase kinase deficiency, autosomal recessive, caused by splice-site mutation in liver  $\gamma$  subunit gene (human), **236**, 544  
 preferential overexpression of class  $\mu$  GST subunit by myristicin (mouse), **236**, 825  
 putative carboxylesterase, molecular cloning and characterization (human), **233**, 117  
 regenerating  
 cell cycle-regulated expression of Rap1 (rat), **230**, 578  
 MAPK phosphatase 1 and 2 genes, characteristic expression (rat), **239**, 746  
 Stat3 activation in, ethanol effects after short- and long-term exposures (rat), **239**, 666  
 regeneration  
 cyclin A levels in endocytic compartment in hepatic cells (rat), **230**, 49  
 after partial hepatectomy, effect of TNF- $\alpha$  production inhibition (rat), **231**, 557  
 role of chromatin neutral sphingomyelinase (rat), **236**, 29  
 stellate cells  
 detection of cytochrome P4503A (human), **238**, 420  
 STAT1 activation in, regulation by cAMP (rat), **233**, 464  
 thioredoxin reductase activity, effect of selenium deficiency (rat), **234**, 293  
 wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102
- Loading  
 cyclic mechanical, continuously applied, effects on proteoglycan metabolism of mature bovine articular cartilage explants, **240**, 216  
 selective, Rhod 2 into mitochondria: mitochondrial Ca<sup>2+</sup> transients during contractile cycle in rabbit cardiac myocytes, **236**, 738

Long-chain acyl-CoA hydrolase, *see* Palmitoyl-CoA hydrolase

# Losartan

inhibition of LDL lipid peroxidation and atherosclerosis in apolipoprotein E-deficient mice, **236**, 622

# Loss of heterozygosity

NF1 locus in neurofibromatosis type 1 patients  
melanocytes derived from café au lait macules, **237**, 138  
plexiform and dermal neurofibromas, **234**, 346

# Lovastatin

effect on surface LDL receptor expression, **235**, 117

# Low-affinity glucocorticoid binding site

activity, and glucocorticoid-dependent induction of CYP3A2, effect of vitamin A deficiency (rat liver), **237**, 211

# Low-density lipoprotein

copper ion-mediated oxidative modification, protective effect of lipoic acid analogue 1,2-diselenolane-3-pentanoic acid (human), **240**, 819  
as drug carriers in therapy of macrophage-associated disease, **240**, 112  
lipid peroxidation, and atherosclerosis, in apolipoprotein E-deficient mice, inhibition by losartan, **236**, 622

# oxidized

antigenic epitope formation in, inhibition by NO (human), **232**, 613  
binding to macrophage-secreted extracellular matrix, **237**, 271  
cytotoxicity mediated by, in endothelial smooth muscle cells, effect of simvastatin (human), **231**, 437  
impairment of peripheral blood mononuclear cell proliferation and cytokine production (human), **232**, 359  
uptake by macrophages via proteoglycan-mediated pathway, effect of angiotensin II injection (mouse), **239**, 63  
surface, behavior of phosphatidylcholine and sphingomyelin (human), **234**, 733

# Low-density lipoprotein receptor

activity in macrophages, augmentation by lycopene and  $\beta$ -carotene, **233**, 658  
endothelial oxidized, LOX-1, enhanced expression in hypertensive rat, **237**, 496  
surface, effect of lovastatin on expression, **235**, 117

# Loxapine

oxidability of JL 13 in comparison with, **238**, 252

# LPS, *see* Lipopolysaccharide

# Luciferase

as bioluminescent reporter protein using coelenterazine analogues as substrate (*Oplophorus*, *Renilla*), **233**, 349  
firefly, *see* *Photinus*-luciferin 4-monooxygenase (ATP-hydrolysing)

# Luminescence

reaction catalyzed by firefly luciferase, effect of dehydroluciferin, CoA, and nucleoside triphosphates, **237**, 445

# Lung

arginase II mRNA expression (human), **233**, 487  
branching morphogenesis, role of cell/epimorphin interaction, **234**, 522  
cystic fibrosis and non-cystic fibrosis, Na<sup>+</sup>/K<sup>+</sup> ATPase in lower airway epithelium (human), **232**, 464  
cytochrome P450 2D6 expression (human), **241**, 79  
embryonic, bronchoalveolar structure formation *in vitro*, role of HGF (rat), **241**, 98  
expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279  
extract, calcium-binding protein binding by amlexanox and cromolyn in, comparison (bovine), **240**, 341  
G protein-coupled receptor GPR41, molecular cloning and tissue expression (rat), **234**, 190  
and heart and cardiomyocytes, expression of basic loop helix/PAS domain transcription factors HIF-1 $\alpha$  and HLF/EPAS involved in adaptive responses to hypoxic stress (rat), **240**, 552  
leptin receptor splice variants  
localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383

Ob-Ra, b, and e, detection and quantitation (mouse), **238**, 648; *erratum*, **241**, 803

parenchyma, multidrug resistance mRNA polymorphic expression, pregnancy effects; comparison with CFTR mRNA expression (rat), **239**, 606

peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857

smoking-related damage, role of CD8<sup>+</sup> Th2 lymphocytes (human), **239**, 146

transcription factor NFATc expression (mouse), **240**, 314

very-long-chain fatty acid accumulation in adrenoleukodystrophy protein-deficient mouse, **232**, 631

wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102

# Lung adenocarcinoma cells

A5DC7 subline, bidirectional regulation of telomerase activity (human), **237**, 313

A549, transcriptional control of COX-2 gene expression by IL-1 $\beta$ , role of NF- $\kappa$ B (human), **237**, 28

# Lung cancer cells

PC-14/CDDP, cDNA cloning of multidrug resistance protein homologue *SMRP* (human), **238**, 790

SBC-3, cisplatin-induced transcriptional upregulation of  $\gamma$ -glutamylcysteine synthetase heavy subunit gene, role of proximal 5'-flanking sequence (human), **236**, 616

# Lung cancer tissue

p53 gene mutations in chromate-exposed workers, **239**, 95

# Lung carcinoma cells

canalicular multispecific organic anion transporter expression (human), **240**, 606

hyaluronidase produced by, differences with enzyme in serum, detection by zymography (human), **241**, 446

# Lung squamous carcinoma cells

LK-2, growth, role of *Sonic hedgehog* (human), **238**, 658

# Luteinizing hormone

increase of transcript abundance in prostate independently of androgens (rat), **233**, 108

# Lycopene

and  $\beta$ -carotene, effects on cholesterol metabolism in macrophages, **233**, 658

# Lymph nodes

leptin receptor splice variants Ob-Ra, b, and e, detection and quantitation (mouse), **238**, 648; *erratum*, **241**, 803

# Lymphoblastoid cells

S49, dexamethasone-induced apoptosis and c-Jun amino terminal kinase activity, effect of rapamycin (mouse), **230**, 386

# Lymphoblasts

derived from Scott syndrome B cells, lack of expression of *MDR* genes: link between phospholipid transmembrane migration and ABC transporter gene family, **241**, 548

# Lymphocytes

cell cycle progression and DNA synthesis, regulation by mevalonate metabolite geranylgeranylphosphate (human), **241**, 376

intraepithelial, isolation from small intestine villi tip and crypt regions by alkaline phosphatase-based method (mouse), **241**, 797

Machado-Joseph disease gene product identification (human), **233**, 476

mammalian, effect of heparin, dextran sulfate, and polyanions, **234**, 783

from old mice, mitochondrial dysfunction: enhanced activation of permeability transition, **240**, 68

PN71, channel formation and [Ca<sup>2+</sup>]<sub>i</sub> accumulation induced by perforin N-terminus peptides, perforin, and whole lytic granules, comparison, **240**, 647

proliferating, internalization rate, role in lovastatin effect on surface LDL receptor expression, **235**, 117

salivary gland, anti-SS-A/Ro 60-kDa peptide Fab fragment from infiltrating cells of Sjögren's syndrome patient, molecular cloning, **232**, 101

- stimulated, generation of  $^1\text{H}$  NMR-detectable mobile lipids in, relationship to cellular activation, cell cycle, and phosphatidylcholine-specific phospholipase C (mouse), **239**, 868
- and tumor cells, heterozygous for Taq I restriction enzyme polymorphism, mRNA stability of vitamin D receptor big T and small t alleles (human), **238**, 77
- Lymphokine-activated killer cells
- mediated cytotoxicity, role of phorbol ester-sensitive protein kinase C isoforms (mouse), **235**, 461
- Lymphoma cells
- Cupillo, expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437
  - J-77 and RL, lymphotoxin beta isoforms expressed in, identification (human), **238**, 273
  - non-Hodgkin's, lymphotoxin beta isoforms expressed in, identification (human), **238**, 273
  - S49, cellular uptake and plasma membrane binding of carnitine, stimulation by palmitoyl-CoA (mouse), **233**, 752
  - TK1, stimulation via  $\alpha_4\beta_7$  integrin and associated activation of src-tyrosine- and MAP-kinases, **239**, 68
  - U937, *see* U937 lymphoma cells
- Lymphopenia
- restoration in diabetes-prone BB/OK rat, phenotypic consequences, **239**, 106
- Lymphotoxin beta
- identification of two isoforms expressed in lymphoid cell lines and non-Hodgkin's lymphomas (human), **238**, 273
- Lyophilization
- $\alpha$ -chymotrypsin in presence or absence of imprinting ligands, effect on reactivity of active-site imidazole, **240**, 27
- Lysine
- Maillard reaction with glucose, formation of vesperlysines A, B, and C as crosslinked products, **232**, 227
- Lysophosphatidic acid
- identification of Edg2 protein as cellular receptor (human), **231**, 619
  - inhibition of EGF-induced Stat1 signaling in human epidermal carcinoma A431 cells, **240**, 856
- Lysophosphatidylcholine
- effect on monocyte-macrophage differentiation-dependent gene (human), **235**, 4
- Lysophospholipid:acyl-CoA acyltransferase
- expression in human T cells, inhibitory action of hydrocortisone, **237**, 632
- Lysosomal  $\alpha$ -glucosidase, *see* Glucan 1,4- $\alpha$ -glucosidase
- Lysosomes
- $\alpha$ -mannosidase from, full-length cDNA isolation and nucleotide sequence (human), **200**, 239; *erratum*, **232**, 583
  - role in apoptosis, review, **230**, 481
- M
- Mac-1
- extracellular nucleotide-induced surface expression on peripheral blood leukocytes (human), **233**, 71
- Machado-Joseph disease
- gene product, identification in lymphocytes and brain (human), **233**, 476
- $\alpha_2$ -Macroglobulin
- protection of protein constituents of dialysis-associated amyloidosis from protease degradation (human), **231**, 48
- $\alpha_2$ -Macroglobulin receptor/LDL receptor-related protein
- cell culture density-dependent expression in breast cancer BT-20 cells, **240**, 122
- Macromolecular activators of phagocytosis
- from platelets and precursors, transferrin as constituent (human), **230**, 270
- Macrophage colony-stimulating factor
- and GM-CSF, production by human thyrocytes in culture, **238**, 191
  - proteoglycan, identification of basic fibroblast growth factor binding domains (human), **230**, 392
  - role in osteoclast generation and bone resorption in marrow cells (pig), **231**, 231
- Macrophage colony-stimulating factor receptor
- c-fms*, RNA, expression in tissue macrophages, induction by TNF- $\alpha$  (mouse), **240**, 442
- Macrophage inflammatory protein-1 $\alpha$
- modulation in B cells from AIDS and Burkitt's lymphoma patients, **235**, 576
- Macrophage inflammatory protein-2
- production associated with interaction of phagocytes and apoptotic cells (mouse), **239**, 799
- Macrophage inflammatory protein-1 $\alpha$  receptor
- modulation in B cells from AIDS and Burkitt's lymphoma patients, **235**, 576
- Macrophage migration inhibitory factor
- identification in adipose tissue and induction by tumor necrosis factor- $\alpha$  (rat), **235**, 94
  - role as essential immunoregulatory cytokine in atopic dermatitis (human), **240**, 173
- Macrophages
- A170 stress protein phosphorylation by casein kinase II-related activity (mouse), **241**, 157
  - activated, Fc $\gamma$  receptor-induced MAP kinase activation, modulatory effect of IFN- $\gamma$ , TGF- $\beta$ , and platelet-activating factor (mouse), **238**, 256
  - alveolar
    - endotoxin and ethanol-treated rat, NO production, effect of ceramide, **234**, 738
    - human and rat, differential oxidative response to exposure to particulate air pollutants, **240**, 669
    - signal-induced NF- $\kappa$ B activation in, effect of tetrandrine (rat), **231**, 99
  - associated diseases, LDLs as drug carriers in therapy of, **240**, 112
  - c-fms* RNA expression, induction by TNF- $\alpha$  (mouse), **240**, 442
  - chemiluminescence, zymosan-stimulated and luminol-dependent, effect of excited Photofrin II molecules (mouse), **233**, 173
  - cholesterol metabolism, effects of lycopene and  $\beta$ -carotene, **233**, 658
  - ED2+, effect on myoblast proliferation in muscle culture (rat), **235**, 754
  - extracellular matrix secreted by, binding by oxidized LDL (mouse), **237**, 271
  - HL-60 cell differentiation into, Syk activity during, **236**, 697
  - inflammatory, early and late activation of protein kinase C in, induction by LPS by selective activation of PKC- $\epsilon$ , **240**, 629
  - LPS-stimulated, tyrosine phosphorylation of 41-kDa protein in, inhibition by negatively charged liposomes (mouse), **231**, 827
  - monocyte differentiation-dependent gene, identification and characterization (human), **235**, 4
  - nitric oxide production
    - in J774 cells, induction by lipoteichoic acid from *Staphylococcus aureus*, role of CD14-dependent pathway, **233**, 375
    - LPS-stimulated, regulation by scavenger receptors (mouse), **237**, 601
    - modulation by apolipoprotein-E and amyloid-beta peptide (human), **240**, 391
  - oxidized LDL uptake via proteoglycan-mediated pathway, effect of angiotensin II injection (mouse), **239**, 63
  - peritoneal
    - 60-kDa A170 stress protein, induction by low micromolar levels of  $\text{H}_2\text{O}_2$  and proteasome inhibitors (mouse), **232**, 33
    - LPS-induced NO production and TNF- $\alpha$  secretion, effect of phosphatidylinositol-3-kinase inhibitor wortmannin (mouse), **240**, 692
    - LPS-stimulated, prostaglandin  $\text{D}_2$  production, effect of concordant induction of  $\text{PGE}_2$  synthase with cyclooxygenase-2 (rat), **230**, 110
  - RAW 264.7
    - iNOS gene transcriptional activation by LPS plus IFN- $\gamma$ , role of upstream NF- $\kappa$ B site (mouse), **236**, 655
    - LPS/IFN- $\gamma$ -induced cell death, protective effect of peroxynitrite, **241**, 37

## Subject Index

Macrophages (*continued*)

- NO and TNF- $\alpha$  production, effect of L929 and L1210 cell lines (mouse), **230**, 636
- ricin A chain cytotoxicity, role of A chain proteolysis (mouse), **241**, 617
- U937, *see* U937 macrophages
- Macules
- café au lait, in neurofibromatosis type 1, NF1 gene in melanocytes derived from, analysis for loss of heterozygosity, **237**, 138
- MAD
- nuclear translocation upon stimulation of *dpp* pathway (*Drosophila*), **238**, 595
- Mag-fura-2
- and Calcium Green C<sub>18</sub>, in monitoring of Ca<sup>2+</sup> release from intracellular stores in permeabilized rat parotid acinar cells, **240**, 189
- Magnesium ion effects
- binding activity of human leukocyte leukotriene B<sub>4</sub> receptor, **236**, 355
- ion-conductive properties of chloroplast H<sup>+</sup>-ATPase reconstituted into bilayer membrane (spinach), **232**, 461
- large complex formation by p130, **230**, 370
- Magnetic fields
- weak, 50 Hz, effect on growth, testicle, and melatonin synthesis (Djungarian hamster), **234**, 707
- Magnetic microbeads
- based affinity separation, and fluorescence detection, *in vitro* selection of DNA ligands to chloroaromatics using, **234**, 117
- Maillard reaction
- lysine or proteins with glucose, formation of vesperlysines A, B, and C as crosslinked products, **232**, 227
- Major histocompatibility complex
- class I, related gene
- as haemochromatosis candidate, mouse homolog, identification (human), **230**, 35
- murine homolog of human gene, cDNA isolation and analysis, **238**, 697
- class II, superantigen binding domain, solution structure (mouse), **234**, 660
- Malaria
- acquired testosterone-resistant immunity to, spleen cell-expressed gene mediating, identification (*Plasmodium chabaudi*), **230**, 167
- Maleate *cis-trans* isomerase
- gene cloning and characterization (*Alcaligenes faecalis*), **239**, 74
- Maleic anhydride
- copolymer with divinyl ether, bioconjugation with human tumor necrosis factor- $\alpha$ , enhancement of TNF- $\alpha$  antitumor potency in mice with solid tumors, **239**, 160
- MAL proteolipid
- and caveolin, detection in distinct lipid microenvironments in internal detergent-insoluble membranes in MDCK cells, **233**, 707
- MAL proteolipid-related proteins
- identification, **232**, 618
- Mammary epithelial cells
- $\beta$ -casein expression, role of c-src (mouse), **241**, 710
- confluence, associated downregulation of c-myc expression (mouse), **239**, 566
- HC11, expression of WDNM1 and sulfated glycoprotein-2 genes, inhibition by EGF, **240**, 104
- Mammary gland
- alveolar structures, development in whole-organ culture, effect of estrogen (mouse), **232**, 340
- peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857
- proteins, synthesis, regulation by cellular hydration state (rat), **230**, 351
- Mammary serine protease inhibitor, *see* Maspin
- Mandibular organ inhibiting hormones
- regulating methyl farnesoate synthesis and glucose metabolism in *Libinia emarginata*, identification, **237**, 694
- Manganese ion
- effect on binding activity of human leukocyte leukotriene B<sub>4</sub> receptor, **236**, 355
- effect on manganese peroxidase activity (*Phanerochaete chrysosporium*), **239**, 645
- influx in agonist-stimulated endothelial cells, role of myosin light chain kinase and tyrosine kinase inhibitors (pig), **235**, 657
- Manganese peroxidase
- catalytic activity, effects of Mn<sup>2+</sup> and oxalate (*Phanerochaete chrysosporium*), **239**, 645
- $\alpha$ -Mannosidase
- human lysosomal and jack bean, characterization as retaining glycosidases, **238**, 896
- lysosomal, full-length cDNA, isolation and nucleotide sequence (human), **200**, 239; *erratum*, **232**, 583
- 1,2- $\alpha$ -Mannosidase
- crucial carboxyl residues, identification by site-directed mutagenesis (*Aspergillus phoenicis*), **238**, 779
- $\alpha$ -D-Mannosidase
- porcine 135-kDa, stage-specific expression of mouse homologue in type A spermatogonia, **241**, 439
- MAP kinase, *see also specific MAP kinases*
- activation
- by cyclosporin A, **236**, 599
- by estrogen in bone cell line (rat), **235**, 99
- Fc $\gamma$  receptor-induced, in murine macrophages, modulatory effect of IFN- $\gamma$ , TGF- $\beta$ , and platelet-activating factor, **238**, 256
- by gastric inhibitory polypeptide via wortmannin-sensitive and -insensitive pathways (CHO cell), **235**, 171
- in granular neurons and glial cells from cerebellum by HIV-1 Tat protein (rat), **238**, 800
- in growth factor-treated PC12h cells, effect of protein-tyrosine-phosphatase inhibitor 3,4-dephosphatin, **238**, 213
- inhibition induced by Ras antagonist S-farnesylthiosalicylic acid (EJ, Rat-1 cells), **239**, 900
- in leptin induction of proliferation of pancreatic  $\beta$  cell line MIN6, **241**, 765
- role in glucose-stimulated insulin secretion from rat islets, **239**, 447
- role of extracellular matrix (rat), **231**, 160
- on stimulation of TK1 lymphoma cells via  $\alpha_4\beta_7$  integrin, **239**, 68
- stretch-induced, in cardiomyocytes of angiotensinogen-deficient mouse, **235**, 36
- wortmannin-sensitive, by G protein-coupled receptor G/CCK<sub>B</sub>, **238**, 202
- activation loop, synthetic peptide corresponding to, phosphorylation-sensitive secondary structure in, **236**, 243
- in articular chondrocytes, effect of interleukin-1 (rabbit), **230**, 573
- CD40-mediated responses, role of different kinases, **233**, 187
- 1,25-dihydroxyvitamin D<sub>3</sub>-induced activation and nuclear translocation in HL-60 cells, upstream regulation by protein kinase C, **241**, 419
- in granular neurons and glial cells from rat cerebellum, HIV-1 gp120-signalled downregulation, **240**, 683
- increased expression and activity in human hepatocellular carcinoma, **236**, 54
- inhibitor PD 98059, differential effects on neutrophil responses to chemotactic factors (human), **232**, 474
- and p34<sup>cdc2</sup> kinase substrate peptides, effects on motility and phosphorylation status of demembranated fowl spermatozoa, **240**, 116
- and p56lck, activation and association in murine Th1 clone, induction by IL-18, **237**, 126
- phosphorylation in breast epithelial cells, stimulation by DDT (human), **231**, 17
- and Ras, IL-2 production in T cells driven by, inhibition by perillic acid (human), **241**, 720
- role in hypertensive vascular disease: aortic ERK and JNK activities *in vivo* (rat), **236**, 199

- role in signal transduction mechanism of interleukin-15 (human), **232**, 754  
stimulation by AGEs in rabbit VSMC, **239**, 111  
stimulation by prolactin in leiomyoma cells (human), **238**, 473
- MAP kinase phosphatases  
MKP-1 and MKP-2, expression in hepatocarcinogenesis, ascites hepatoma cells, and regenerating liver (rat), **239**, 746
- MARCKS proteins  
identification and characterization (*Xenopus laevis*), **234**, 143
- Markov model  
in analysis of motifs in steroid dehydrogenases and homologs, **231**, 760
- Maspin  
expression in human cancer cells, regulation by gamma linolenic acid, **237**, 639
- Mast cells  
L-histidine decarboxylase mRNA expression, suppression by methyleugenol (rat), **232**, 188  
HMC-1, expression of hepatocyte growth factor receptor c-met (human), **239**, 740
- Matrix metalloproteinase  
inhibitory action of TIMP-2, role of C-terminal domain, **236**, 100  
membrane-linked family, ADAM, expression in hematological malignancy-derived cells (human), **235**, 437
- Matrix metalloproteinase 1, *see* Interstitial collagenase
- Matrix metalloproteinase-9  
production and activation by HL-60 cells, **238**, 842
- Maturation  
oocytes, pre-maturation-promoting factor activation during, mediation by proteasome (starfish), **236**, 40
- MCM/P1 proteins  
expression, nuclear localization, and interactions (human), **236**, 118
- M-CSF, *see* Macrophage colony-stimulating factor
- MDR1b  
mRNA, polymorphic expression in lung parenchyma of nonpregnant and pregnant rats: comparison with CFTR mRNA expression, **239**, 606
- Mechanical loading  
cyclic, continuously applied, effects on proteoglycan metabolism of mature bovine articular cartilage explants, **240**, 216
- Mechanical properties  
collagen molecule stiffness, determination, **232**, 251
- Mechanical strain  
JNK/SAPK and ERK activation in rat VSMC by, dependence on extracellular matrix composition, **237**, 239
- Mechanical stretch  
associated stress, early cellular response, transient loss of  $\alpha$ B-crystallin (human), **235**, 69  
uni-axial cyclic, upregulation of integrin  $\beta_3$  expression in human umbilical endothelial cells, **239**, 372
- Mechanochemical properties  
defective, of cleaved actins, restoration by native tropomyosin, **237**, 121
- Medium  
serum-free, cultivation, serial transfer, and differentiation of human epidermal keratinocytes in, **236**, 167
- Medusae  
scyphozoan, isolation of Cyanea-RFamide neuropeptides, **236**, 743
- Megakaryocytic cells  
differentiation, non-amyloid- $\beta$  component precursor differential regulation (hamster, human), **237**, 611  
hematopoietic prostaglandin-D synthase induction by phorbol ester (human), **241**, 288
- Meiosis  
oocyte maturation, pre-maturation-promoting factor activation during, mediation by proteasome (starfish), **236**, 40  
prometaphase I, tissues at, purification of DNA polymerase  $\alpha$  catalytic subunit (*Coprinus cinereus*), **232**, 454
- Melanin-concentrating hormone  
binding sites in SVK14 keratinocytes, **241**, 622
- Melanocortin receptor  
MC-3 and -4, human, Agouti-related protein identified as antagonist of, **237**, 629  
MC-5, low additivity for  $\alpha$ -MSH, role of Glu-235 and Arg-272 (human), **236**, 489
- Melanocytes  
derived from café au lait macules of neurofibromatosis type 1 patients, NF1 gene in, analysis for loss of heterozygosity, **237**, 138  
murine skin, tyrosinase alternative transcripts, qualitative and quantitative catalog as basis for detection of melanoma-specific changes, **236**, 173
- Melanogenesis  
role of nitric oxide (*Sepia officinalis*), **235**, 429
- Melanoma  
skin melanocyte changes due to, qualitative and quantitative catalog of tyrosinase alternative transcripts as basis for detection (mouse), **236**, 173
- Melanoma cells  
A9 and B16F10, transferred human chromosome 8, gene expressions (mouse), **230**, 315  
A375, bromodeoxyuridine-induced expression of endothelin<sub>A</sub> (human), **234**, 526  
B16  
antitumor effects of interferons, role of mda-6/WAF1/CIP1 and related cyclin-dependent kinases, **233**, 678  
glycosphingolipid synthesis, priming by glycosylation of lactosylceramide analogs (mouse), **241**, 698  
GM3-enriched microdomains, close association of GM3 with c-Src and Rho, **236**, 218  
CM73-36, and hematopoietic and glioma cells, differentiation *in vitro*, differential inhibition of telomerase activity during, **237**, 438  
expression of retinoic acid receptor cofactors SMRT and Trip-1 (human), **234**, 278  
expression of testis-specific transcripts, **241**, 653  
tissue-type plasminogen activator bound at surface of, spatial orientation (human), **239**, 322
- $\alpha$ -Melanotropin  
low affinity of human melanocortin 5 receptor for, role of Glu-235 and Arg-272, **236**, 489
- $\gamma$ -Melanotropin  
as remnant in proopiomelanocortin cDNA (white sturgeon), **230**, 452
- MELAS syndrome  
associated G13513 mutation in mitochondrial ND5 gene, identification (human), **238**, 326  
and bilateral striatal necrosis, associated T3308C mutation in mitochondrial ND1 gene (human), **238**, 323
- Melatonin  
binding by ovine Mel<sub>1a/6</sub> receptor, role of Val 208 and His 211, **239**, 418  
synthesis in Djungarian hamster, retardation by weak magnetic fields, **234**, 707
- Melatonin receptor  
Mel<sub>1a/6</sub>, ovine, ligand binding and receptor function, role of Val 208 and His 211, **239**, 418
- Melibiose transporter  
inhibition by amiloride in *Escherichia coli*, **233**, 147
- Melittin  
binding to secretory phospholipase A<sub>2</sub> and inhibition of enzymatic activity, **238**, 436
- Membrane anchor  
microsomal epoxide hydrolase, membrane topology (human, rabbit, rat), **236**, 754
- Membrane cofactor protein  
expression, regulation by 3' untranslated region in transgenic mouse, **233**, 829

## Subject Index

## Membrane domains

detergent-resistant, structure: phase separation and biological membranes, **240**, 1

## Membrane potential

## mitochondrial

loss during geranylgeranoic acid-induced apoptosis (human), **230**, 58

in lymphocytes, effects of aging (mouse), **240**, 68

postsynaptic, production in electric organ, associated rapid volume expansion of organ (*Torpedo californica*), **233**, 305

## Membrane proteins

complexes, role in protein glycosylation in Golgi apparatus (*Saccharomyces cerevisiae*), **241**, 682

fatty acid-binding, in skeletal muscle, effect of endurance training (human), **231**, 463

putative evolutionarily conserved, encoded by maternally expressed *Xenl* gene, isolation and expression (*Xenopus laevis*), **238**, 899

recombinant, folding, stably transformed Sf9 cell line showing improvement in, generation, **238**, 823

## Membranes

alginate-poly(L)lysine-alginate, SK2 hybridoma cells microencapsulated with, immunological studies after allogeneic transplantation (rabbit), **230**, 524

associated thioredoxin, detection on cell lines (human), **230**, 602

binding, and enzymatic activation, of Dbl homology domain, role of neighboring pleckstrin homology domain, **234**, 183

detergent-insoluble microdomains, detection of MAL proteolipid-related family of proteins, **232**, 618

epithelial, chloride channel-enriched, copurification with nonmuscle myosin IIA (bovine), **231**, 369

erythrocyte  
associated protein 7.2b, binding to calpromotin (human), **232**, 294  
Ca<sup>2+</sup> pump, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451  
fetal, expression of nitric-oxide synthase mRNA: role in parturition (human), **233**, 276

fluid state, and lipid unsaturation, modulation in mammalian cells by stable transformation with yeast  $\Delta^9$ -desaturase gene, **237**, 362

hepatic, binding specificity of avian heat shock protein 108 (chicken), **240**, 673

inner, nuclear envelope, zinc and calcium channels (rat), **235**, 236

internal detergent-insoluble, in MDCK cells, detection of caveolin and MAL

proteolipid in distinct lipid microenvironments, **233**, 707

*in vitro* system, simulation of postulated isoxazolylnaphthoquinoneimine anti-bacterial mechanism in *Staphylococcus aureus* with, **239**, 186

large mechanosensitive ion channel, radiolabeled, localization and assembly in *Escherichia coli*, **232**, 777

lipid bilayer  
chloroplast H<sup>+</sup>-ATPase reconstituted into, ion-conductive properties, effects of ADP, dithiothreitol, and Mg<sup>2+</sup> (spinach), **232**, 461

ion channel induction by avian adenovirus, **236**, 750

lipid peroxidation, effects of amyloid  $\beta$  peptide fragment 25–35, **233**, 760

localization of mammalian target of rapamycin to, in insulin-responsive 3T3-L1 cells, **241**, 704

mediated endosomal flow, and fluid-phase and receptor-mediated flow, effects of perturbations (fetal rat fibroblasts), **236**, 661

mitochondrial, contact sites, import of cytidine-5'-diphosphate-1,2-diacyl-sn-glycerol through, analysis in permeabilized hepatocytes (rat), **232**, 261

outer, *Pseudomonas aeruginosa*, antibiotic diffusion pathways in, **238**, 457

pancreatic zymogen granule, Goa, Gqa, and Gsa immunoreactivity associated with (rat), **237**, 235

phospholipid, Ca<sup>2+</sup> transport activity of annexins I, II, V, and VI, **237**, 499

phospholipids in, selective interaction of protein kinase F/glycogen synthase kinase 3 $\alpha$  with, **237**, 331

plasma membrane, *see* Plasma membrane

sarcoplasmic reticulum, *see* Sarcoplasmic reticulum

synaptosomal, NMDA receptor-like complex isolated from, protein half-lives of 71-kDa glutamate-binding and 80-kDa CPP-binding protein subunits (rat brain), **241**, 132

synthetic, interaction with carotenoid pigments of Antarctic bacterium *Micrococcus roseus*, **239**, 85

thymidine transport deficiency in *Saccharomyces cerevisiae*, functional complementation by recombinant ND4 fusion protein, **238**, 811

## Membrane transport protein

phosphatidylcholine, non-MDR2-coded, expression in oocyte (*Xenopus laevis*), **231**, 277

## Memory

and learning, analysis in mice lacking *Byg* gene, **236**, 733

retention upregulation by synthetic ceramide analog 1-PDMP in cortical neurons *in vitro* (rat), **237**, 595

MEN, *see* Multiple endocrine neoplasia

## Mercuric chloride

immune dysregulation induced by, implications of thiol levels in CD134-defined subsets of T cells (rat), **240**, 452

## Mercury

-Se, equimolar complex, binding to selenoprotein P (rat), **231**, 7

## Meromysin

heavy, *see* Heavy meromysin

## Mesangial cells

cyclooxygenase-2 expression, modulation by tetrahydrobiopterin (human), **241**, 7

## glomerular

adult kidney, apoptosis, role of RGD-containing peptides (human), **234**, 594

oxidant-initiated apoptosis, role of c-Jun AP-1 and NF- $\kappa$ B (rat), **240**, 496

glucose-regulated genes, identification by mRNA differential display (human), **238**, 179

integrin-mediated adhesion to extracellular matrix, disruption by metal-catalyzed oxidation of ECM proteins (mouse), **233**, 50

osteopontin gene expression and protein synthesis in culture (rat), **233**, 81

## Mesenchymal cells

C3H10T1/2, osteogenic differentiation, induction by hedgehog proteins, **237**, 465

monocyte chemotactic protein-2 mRNA expression (human), **231**, 726

## Mesoderm

induction by BMP-4 BMP-7 heterodimers (*Xenopus laevis*), **232**, 53

## Messenger RNA

adrenoleukodystrophy-related protein, expression (human), **239**, 261

amphiphysin II multiple splice variants, tissue-specific expression (human), **236**, 178

angiotensin receptor type 2, upregulation by angiotensin II in rat cortical cells, **239**, 633

antioxidant enzymes, renal cortical expression in normal and diabetic rat, **235**, 598

AP-1, expression during renal carcinogenesis (Eker rat), **241**, 24

arginase II, tissue distribution (human), **233**, 487

arginine vasopressin, identification in aortic smooth muscle cells (rat), **231**, 831

aryl hydrocarbon receptor and cell cycle-regulating genes, coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86

benzophenanthridine alkaloid-biosynthetic genes, accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606

calcium pump, plasma membrane and sarcoplasmic reticulum, levels in aortic smooth muscle cell from spontaneously hypertensive rat, **230**, 344

calcium-sensing receptor, upregulation, association with inhibition of PTH secretion by IL-1 $\beta$  in parathyroid glands *in vitro* (bovine), **238**, 880

caveolin-1, expression in heterozygous Niemann-Pick type II fibroblasts, **236**, 189

- Cdk4*, *Irf1*, and *Mdm2*, constitutive overexpression, association with abrogation of G1 arrest after DNA damage in BALB/c 3T3 A31 variant 1-1 clone, **233**, 216
- cell cycle-regulating genes and aryl hydrocarbon receptor gene, coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86
- chloramphenicol acetyltransferase expression, and antisense RNA mediated inhibition of gene expression, effects of capping and polyadenylation, **241**, 193
- translation in *E. coli*, function of  $\epsilon$  sequence of phage T7 as initiator of, **236**, 253
- c-myc  
 antisense pentadecadeoxynucleotides targeted against, inhibition of telomerase in human leukemic cell lines, **241**, 775  
 levels in JEG-3 cells, effect of benzo[a]pyrene and 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (human), **231**, 117
- collagen type I, spatial distribution in *Paracentrotus lividus* eggs and embryos, **238**, 334
- connective tissue growth factor, preferentially expressed in chondrocytes, cloning (human), **234**, 206
- cortistatin-like peptide, tissue distribution (human), **232**, 157
- cyclooxygenase-2, differential regulation of alternate transcripts, **234**, 85
- CYP1A1, induction by 3-methylcholanthrene, suppression by upstream stimulatory factor 1 in HepG2 cells, **240**, 293
- Cyp2f2*, hepatic levels, reduction by diethylhexylphthalate (mouse), **239**, 660
- differential display, *see* Differential display
- dihydropyridine receptor isoforms, expression in fast twitch skeletal muscle, effect of chronic stimulation (rat), **235**, 217
- estrogen receptor, assay by quantitative PCR with internal standard fragment (human, rat), **228**, 358; *erratum*, **231**, 520
- ferritin light chain, iron-responsive element, structure and function (human), **235**, 212
- $\gamma$ -glutamylcysteine, Jun-dependence of expression (human), **234**, 588
- glutathione, Jun-dependence of expression (human), **234**, 588
- G protein-coupled receptor, bovine renal, regulation by amino acid availability, **238**, 107
- heparin-binding epidermal growth factor-like growth factor and amphiregulin, induction by gastrin in stomach (rat), **235**, 520
- L-histidine decarboxylase, expression, suppression by methyleugenol (rat), **232**, 188
- HIV-1, *in vitro* production, splicing efficiency of viral splice site pairs D1-A2 and D2-A2, **237**, 182
- HNF-4 isoforms and HNF-1 $\alpha$ /HNF-1 $\beta$  variants, expression in HT-29 cells (human), **235**, 820
- hypothalamic cytokine, modulation by HIV-1 gp120 *in vivo* (rat), **231**, 514
- insulin, in isolated rat pancreatic islets, effects of leptin, **238**, 267
- interleukin-1 $\beta$ , levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338
- Ki-67, proliferation-related, expression in early development embryo (mouse), **235**, 191
- leptin, expression in 3T3-L1 adipocytes, regulation by thyroid hormone, **232**, 822
- leptin receptor  
 splice variants, localization in peripheral tissues by RT-PCR and *in situ* hybridization (mouse), **232**, 383  
 uterine, increase during pregnancy (rat), **237**, 476
- MDR1b, multidrug resistance, polymorphic expression in lung parenchyma of nonpregnant and pregnant rats: comparison with CFTR mRNA expression, **239**, 606
- monocyte chemotactic protein-2, expression in mesenchymal cells (human), **231**, 726
- nested competitive RT-PCR, **231**, 813
- NeuroD*, cDNA cloning and expression analysis in retina (human), **233**, 459
- nitric-oxide synthase, expression in fetal membranes: role in parturition (human), **233**, 276
- ornithine decarboxylase, translation, and polyamine transport, suppression in *ras*-transformed CREF cells by depletion of eIF-4E, **240**, 15
- osteoblast-specific factor-1, expression, regulation by dual promoters (mouse), **238**, 831
- osteogenic protein-1, expression in kidney, ovary, and uterus, effects of pregnancy and estrogen (mouse), **234**, 242
- p56<sup>lck</sup>, turnover upon T cell activation, regulation, role of 3' untranslated region (human), **233**, 419
- Pax6*, alternative splicing in bovine eye and evolutionary conservation of intron sequences, **240**, 196
- prion protein  
 alternative usage of exon 1 (bovine), **233**, 650  
 expression in human fibroblasts, regulation by MRP8 fragment, **234**, 59
- prostate transcript abundance, increase by luteinizing hormone independently of androgens (rat), **233**, 108
- RBM3, increased levels in human cells in response to cold stress: glycine-rich RNA-binding protein, **236**, 804
- Ref-1, thyrotropin-induced increase in rat thyroid FRTL-5 cells, **236**, 71
- RGS4*, distribution in mouse brain, *in situ* hybridization analysis, **241**, 281
- rho A and rho kinase, upregulation in myometrium during pregnancy (rat), **230**, 356
- role in formation of mammalian protein synthesis initiation complexes, **230**, 27
- sodium-dependent purine nucleoside carrier, expression, correlation with nucleoside transport activity in liver (rat), **233**, 572
- sodium/iodide symporter, levels in human thyroid cancer cell lines and non-transformed FRTL-5 rat thyroid cells, differential effects of retinoic acid, **240**, 832
- soluble D-factor/LIF receptor, detection in choriocarcinoma cells (human), **232**, 427
- Src-like adapter protein, expression, induction by all-*trans*-retinoic acid, **230**, 81
- stationary phase-specific, polyadenylation in *Escherichia coli*, **239**, 46
- TATA-binding protein, two forms generated by alternative polyadenylation (chicken embryo), **234**, 406
- transforming growth factor  $\beta$ 1  
 expression and regulation in rat fetal testis *in vitro*, **236**, 135  
 increased levels in murine osteoblastic cells, induction by electrical stimulation by mechanism involving Ca<sup>2+</sup>/calmodulin pathway, **237**, 225
- translation initiation in skeletal muscle and liver, effect of food intake (rat), **240**, 825
- trefoil factor family 2, regulation in ovariectomized rat, role of estrogen receptor  $\alpha$  and  $\beta$  expression in upper gastrointestinal tract, **240**, 478
- tumor necrosis factor  $\alpha$   
 expression in skin, inhibition by silymarin (mouse), **239**, 334  
 levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338
- ribosome-mediated cleavage *in vivo*, factors affecting, **236**, 205
- tyrosinase, alternative transcripts, qualitative and quantitative catalog in normal murine skin melanocytes, **236**, 173
- tyrosine hydroxylase, level in dopaminergic neurons of tenascin gene knockout mouse, **231**, 356
- uncoupling protein-2, induction by troglitazone in pancreatic islets of Zucker diabetic fatty rats, **237**, 359
- urokinase plasminogen activator, levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338
- vitamin D receptor big T and small t alleles, stability in cells heterozygous for Taq I restriction enzyme polymorphism (human), **238**, 77
- Werner's syndrome gene, defective transcripts, downregulation in cells of patients, **236**, 151
- Metabolites  
 intermediary, role in LPS/cytokine-induced NO synthesis in hepatocytes (mouse), **236**, 379

## Subject Index

- Metal ions  
 dependency of cAMP-specific phosphodiesterase activation and inhibition on, **241**, 175  
 effects on angiogenin binding to calf pulmonary artery endothelial cells, **236**, 604  
 effects on binding activity of human leukocyte leukotriene B<sub>4</sub> receptor, **236**, 355
- Metalloporphyrins  
 gene regulation of heme-binding protein 23 in liver and hepatocyte cultures (rat), **231**, 66
- Metalloproteinase  
 inhibitory action of TIMP-2, role of C-terminal domain, **236**, 100  
 membrane-linked family, expression in articular chondrocytes (human), **230**, 335
- Metallothionein  
 Cu<sup>+</sup>-MT, from I EC rat liver, metal-induced hydroxyl radical generation, **231**, 549
- Metallothionein I  
 expression in untreated olfactory mucosa and during epithelial regeneration (mouse), **232**, 136  
 gene promoter, activation in response to Cd and upstream stimulatory factor *in vitro*, **230**, 159
- Metallothionein II  
 expression in untreated olfactory mucosa and during epithelial regeneration (mouse), **232**, 136
- Metallothionein IIA  
 promoter, NF-1A repression domain inhibiting, identification, **238**, 744
- Metals  
 extracellular matrix protein oxidation catalyzed by, effect on integrin-mediated adhesion of mesangial cells (mouse), **233**, 50  
 induced hydroxyl radical generation by Cu<sup>+</sup>-metallothioneins from LEC rat liver, **231**, 549
- Metamorphosis  
 role of DNase  $\gamma$ -like apoptotic endonuclease in hematopoietic cells (*Xenopus laevis*), **231**, 305
- Methanethiosulfonate  
 derivatives, effects on fast inactivation in inactivation-defective human heart sodium channel: analysis of IFM-ICM mutation, **233**, 606
- M. moscarema barkeri*  
 F<sub>1</sub>F<sub>1</sub>-ATPase gene cloning, **241**, 427
- Methionine depletion  
 thymidylate insufficiency due to, as result of GSH depletion (hamster), **234**, 470
- 5-Methoxyindole-3-acetic acid  
 retinal, diurnal rhythms and interspecies differences (quail, rat), **239**, 353
- 5-Methoxytryptamine  
 retinal, diurnal rhythms and interspecies differences (quail, rat), **239**, 353
- N-Methyl-D-aspartate receptor  
 related complex, protein half-lives of 71-kDa glutamate-binding and 80-kDa CPP-binding protein subunits (rat brain), **241**, 132
- Methylation  
 CpG islands, effect on transcription of *p53* tumor suppressor gene promoter (human), **235**, 403  
 LIM-HOX gene *h1H-2* in bone marrow cells in chronic myelogenous leukemia, in analysis of transcriptional activation mechanism, **233**, 806; **234**, 742
- 3-Methylcholanthrene  
 induction of CYP1A1 mRNA, suppression by upstream stimulatory factor 1 in HepG2 cells, **240**, 293
- (S)-N-Methylcloaurine 3'-hydroxylase  
*cyp80b1* gene encoding, mRNA accumulation in barbiturate-induced cell cultures of California poppy, **241**, 606
- 6-Methylcoumarin  
 illuminated solutions, photochemical formation of singlet molecular oxygen, **235**, 615
- $\alpha,\beta$ -Methylene-ATP  
 inhibition of ecto-ATPase in endothelial cells (bovine pulmonary artery), **233**, 442
- Methyleugenol  
 suppression of L-histidine decarboxylase mRNA expression (rat), **232**, 188
- Methyl farnesoate  
 synthesis in *Libinia emarginata*, neurohormone regulating, identification, **237**, 694
- (3-Methylmaleyl)acetone  
 cyclic tautomer, biosynthesis from 4-hydroxy-3,5-dimethylbenzoate by *Pseudomonas* sp. HH35 but not *Rhodococcus rhodochrous* N75, **238**, 197
- Methyl mercury, *see* Dimethylmercury
- 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine  
 induced dopamine depletion in murine striatum, prevention by Ad-mediated transduction of human glial-derived neurotrophic factor gene, **238**, 569
- 4 $\alpha$ -Methylsterol-4 $\alpha$ -methyl oxidase  
 cytochrome b<sub>5</sub> of maize microsomes as electron carrier for, **236**, 434
- 1-Methyl-1,2,3,4-tetrahydroisoquinoline-synthesizing enzyme  
 isolation from rat brain: implications in Parkinson's disease, **236**, 676
- Metronidazole  
 resistance, in *Helicobacter pylori*, isolation of associated genetic locus, **236**, 785
- Met tyrosine kinase  
 activation by HGF, role in internal organogenesis in *Xenopus* embryo, **234**, 8
- Mevalonate  
 metabolite geranylgeranylphosphate, regulation of cell cycle progression and DNA synthesis in human lymphocytes, **241**, 376
- MexA  
 role in antibiotic extrusion in *Pseudomonas aeruginosa*, **233**, 611
- MexB  
 role in antibiotic extrusion in *Pseudomonas aeruginosa*, **233**, 611
- Mezerein  
 downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328
- MG160  
 rat Golgi sialoglycoprotein, expressed in *Pichia pastoris*, secretion and bFGF binding: role of complex carbohydrates and sialic acid, **234**, 68
- Micelles  
 reverse, encapsulation of flavodoxin, **234**, 651
- Microcitoma cells  
 H69, cholinergic stimulation (human), **230**, 501
- Micrococcus roseus*  
 carotenoid pigments, temperature-dependent biosynthesis, structure, and interaction with synthetic membranes, **239**, 85
- $\gamma$ -Microglobulin  
 induction of stromelysin production by human synovial fibroblasts, **239**, 621
- Micronuclei  
 radiation-induced formation in breast cancer cells, role of serum concentration and cell cycle distribution, **237**, 678
- Microparticle bombardment  
 localized *in vivo*, for foreign gene expression by testis (mouse), **233**, 45
- Microsatellite instability  
 in hereditary nonpolyposis colorectal cancers, and somatic mutations of *hMSH3* (human), **236**, 248
- Microsomes  
 cerebellar, intracellular Ca<sup>2+</sup> release channel, effects of arachidonic acid and eicosanoids (dog), **237**, 413  
 hepatic  
 conversion into linoleate of metabolites produced during peroxisomal  $\beta$ -oxidation of linoleate and arachidonate (rat), **233**, 438  
 flavin-containing monooxygenase, catalysis of caffeine oxidation to theobromine and theophylline (rat), **235**, 685

- fractions, phosphorylation of farnesol (rat), **230**, 562  
 glucose transit into, role in glucose-6-phosphatase function (rat), **236**, 808  
 tracheal epithelial cell,  $^{45}\text{Ca}^{2+}$  release, induction by caffeine and inositol 1,4,5-trisphosphate (pig), **230**, 247
- Microvessels  
 retinal, glycoprotein alterations in, effect of AGEs (bovine), **235**, 281
- Midkine  
 heparin-binding sites in, identification and role in neurite promotion (rat), **236**, 66  
 regulation of intracellular calcium in neutrophils (human), **241**, 756
- Migration inhibitory factor  
 macrophage, identification in adipose tissue and induction by tumor necrosis factor- $\alpha$  (rat), **235**, 94
- Migration inhibitory factor-related protein  
 MRP8, fragment, regulation of PrP mRNA expression in human fibroblasts, **234**, 59
- Milk  
 human, leptin detection and relationship to maternal plasma leptin concentration and adiposity, **240**, 742
- Milrinone  
 selective inhibition of cyclic AMP phosphodiesterase III, modulation of insulin secretion and glycemia (mouse, rat), **236**, 665
- Minor groove-binding molecules  
 with high sequence selectivities and binding affinities, **240**, 557
- MIP-3 $\alpha$   
 human, STRL22 identification as receptor for, **236**, 212
- Mismatches  
 and insertion/deletion mutations, binding properties of *Thermus thermophilus* MutS homologue for, **233**, 834
- Mismatch repair gene  
*hMSH3*, somatic mutations and microsatellite instability in hereditary non-polyposis colorectal cancers (human), **236**, 248
- Mitochondria  
 associated components, role in apoptosis, review, **230**, 481  
 cardiac, deficiency in respiratory complex I from vitamin A-deficient rat, effect of increased coenzyme Q, **233**, 451  
 cytochrome c release during permeability transition (rat liver), **232**, 669  
 deficient  $\rho^0$ HL-60 cells, ascorbate stabilization, stimulation by  $\text{CoQ}_{10}$  increase at plasma membrane, **234**, 79  
 dihydrolipoamide succinyltransferase, derived polypeptide, localization on plasma membrane of skeletal muscle (human, rat), **241**, 151  
 dysfunction in lymphocytes from old mice: enhanced activation of permeability transition, **240**, 68  
 glycerol-3-phosphate dehydrogenase, ascorbic acid as stimulatory cofactor (guinea pig, rat), **239**, 457  
 inhibitor antimycin A, and hypoxia, induced cellular injury and death, protective effects of depletion of ER calcium stores (rabbit renal proximal tubules), **240**, 57  
 membrane contact sites, import of cytidine-5'-diphosphate-1,2-diacyl-*sn*-glycerol through, analysis in permeabilized hepatocytes (rat), **232**, 261  
 membrane potential, loss during geranylgeranoic acid-induced apoptosis (human), **230**, 58  
 mutations, impairment of signal transduction in *Dictyostelium discoideum* slugs, **234**, 39  
 ND1 gene, T3308C mutation, association with bilateral striatal necrosis and MELAS syndrome (human), **238**, 323  
 ND5 gene, G13513A mutation associated with MELAS syndrome, identification (human), **238**, 326  
 potassium channel subunit Kir6.1 localization (rat), **241**, 693  
 as primary site of action of glucocorticoids (LATK $^-$  cells), **235**, 349  
 protease inducing calmitine deficiency in skeletal muscle of Duchenne's muscular dystrophy patients and dy/dy dystrophic mice, inhibition by IP96, **232**, 559  
 protein located in, encoded by nuclear gene within DFNB8/10 critical region on 21q22.3, immunochemical characterization (human), **238**, 806  
 protonophoric action of long-chain fatty acids in, role of dicarboxylate carrier (rat liver), **232**, 414  
 selective loading of Rhod 2: mitochondrial  $\text{Ca}^{2+}$  transients during contractile cycle in rabbit cardiac myocytes, **236**, 738  
 substrate competitive oxidation, effects of mild respiratory chain deficiency (human), **236**, 643  
 tRNA<sup>Leu(UUR)</sup> gene, mutation associated with mitochondrial encephalopathy (human), **233**, 637  
 tRNA<sup>Phe</sup> gene, evolution: import of cytosolic tRNA<sup>Phe</sup> into mitochondria (*Arabidopsis thaliana*), **237**, 432  
 visualization with green fluorescent protein in cultured fibroblasts from patients with mitochondrial diseases, **239**, 580
- Mitochondrial diseases  
 cultured fibroblasts from patients with, visualization of mitochondria with green fluorescent protein, **239**, 580
- Mitochondrial DNA  
 age-related fragmentation into minicircles (human heart), **226**, 369; *erratum*, **232**, 832  
 deletions  
 comparison in different species and tissues (human, rat), **230**, 630  
 gross mosaic pattern in skeletal muscle tissue of adult (human), **233**, 56  
 from deltoid muscle, extensive rearrangement in old age (human), **232**, 147  
 mammalian cell lines lacking, isolation and characterization using ditercalinium (human, mouse), **239**, 257  
 mutations  
 in Alzheimer's disease, **241**, 221  
 induction of cellular sensitivity to oxidant stress, partial rescue by calcium depletion and cyclosporin A, **239**, 139  
 oxidative damage after chronic ethanol consumption (rat), **235**, 286  
 -protein interaction, footprint analysis in *organello* (rat), **231**, 856  
 role in apoptotic neuronal cell death in Parkinson's disease, **235**, 158  
 wild-type, and 4.8-kb deletion, quantification in organs (rat), **233**, 102
- Mitochondrial matrix  
 localization of 56-kDa chaperonin-like protein (sea urchin), **234**, 646
- Mitogen-activated protein kinase, *see* MAP kinase
- Mitogenesis  
 induction by fibroblast growth factor-2, effect of glycosaminoglycans (pig), **235**, 369  
 induction by leukemia inhibitory factor in Swiss 3T3 cells, and selective enhancement, **236**, 814  
 insulin-stimulated, role of insulin receptor-associated heat shock protein 90 (Rat-1 fibroblasts), **237**, 345  
 vascular smooth muscle cells, role of NF- $\kappa$ B activation (bovine), **235**, 365
- Mitosis  
 exit, in Chang liver cells, staurosporine-induced telophase arrest and apoptosis blocking, **236**, 594  
 insulin-mediated signaling, negative regulation by low-molecular-weight phosphotyrosine protein phosphatase (NIH-3T3 cells), **238**, 676  
 released cells, association of protein phosphatase-1 $\delta$  with retinoblastoma protein and reversible phosphatase activation (human), **235**, 704
- Mnn9 protein  
 glycosylation in Golgi apparatus, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682
- Mobility  
 ERK1, in human, mouse, and rat osteoblasts, **238**, 134
- Mole  
 and placenta, P-glycoprotein expressed in, function (human), **235**, 849
- Molecular dynamics  
 simulated left-handed Z-DNA molecular structure, comparison with structure determined by X-rays, **236**, 146

Molecular structure, *see also* Conformation

- CCK-A receptor gene (mouse), **236**, 630
- $\alpha$ -crystallin, secondary and tertiary, heat-induced structural perturbation, effect on chaperone activity (bovine lens), **237**, 277
- $\alpha$ -keratin of hair, changes in insulin-dependent diabetes (baboon, human), **233**, 76
- left-handed Z-DNA, determined by X-rays and simulated by molecular dynamics, comparison, **236**, 146
- myoglobin, effects of aqueous hexafluoroisopropanol media: formation of molten globule-like state, **233**, 687
- neuropeptide Y carboxy-terminal fragment, effect of covalent dimerization, **241**, 737
- oligomeric, formation in thermostable glutamate dehydrogenase, effect of heat treatment (*Pyrococcus* sp. KOD1), **241**, 646
- phospholamban, **239**, 1
- pressure-assisted cold denatured state of ubiquitin, **238**, 289
- prion protein, and TSE strains, **238**, 185
- secondary
- hairpin ribozyme fourteen-nucleotide fragment, **232**, 444
  - phosphorylation-sensitive, in synthetic peptide corresponding to MAP kinase activation loop, **236**, 243
  - stability, chloroplast fructose-1,6-bisphosphatase, cysteine residues involved in, characterization (rapeseed), **232**, 388
  - three-dimensional, 2.25-MDa homomultimeric phosphoenolpyruvate synthase from *Staphylothermus marinus*, cryoelectron microscopic reconstruction, **241**, 599

## Molecular weight

- heparin, effect on pulmonary artery smooth muscle cell antiproliferative activity, **241**, 18

Molting hormone, *see*  $\beta$ -Ecdysone

## Molybdenum

- protein containing, identity of formate dehydrogenase (*Methylobacterium* sp. RXM), **230**, 30

## Molybdenum-containing proteins

- identity of formate dehydrogenase (*Methylobacterium* sp. RXM), **230**, 30

## Monensin

- and other perturbations, effects on fluid, bulk-membrane, and receptor endosomal flow in fetal rat fibroblasts, **236**, 661

## Monoblastic leukemia cells

- derived FLG 29.1 cell line, raloxifene binding and bioeffects (human), **240**, 573

## Monocarboxylate transporter

- MCT3, identification in retinal pigment epithelium (chicken), **234**, 90

## Monochlorohydrins

- linoleic acid-derived, effect on cardiac papillary muscles (guinea pig), **231**, 295

## Monoclonal antibodies

- 13-1, to porphyrin derivative, structural characterization: disulfide bond in CDR-H3 (mouse), **240**, 566
- acetylcholinesterase, inhibition of amyloid fibril formation induced by acetylcholinesterase, **232**, 652
- $\alpha_2$ C2 adrenergic receptor third intracellular loop, subtype-specific recognition with, analysis (human), **233**, 166
- anti-90 K, preparation and characterization, **232**, 367
- based therapy targeting tumor vascular endothelial cells, suppression of solid tumor growth in rats, **236**, 493
- C219, against P-glycoprotein, modulation of ATPase of P-gp, **230**, 398
- 2',3'-cyclic-nucleotide 3'-phosphodiesterase, epitope recognized by, characterization, **237**, 266
- gonadotropin-releasing hormone, variable domain glycosylation, modulation of antigen binding, **234**, 465
- L3 and SP2, tumor antigen 90K domains recognized by, identification, **232**, 367
- pupa-specific surface antigens of *Sarcophaga peregrina* hemocytes, **236**, 497

- von Willebrand factor, GUR76-23, effects on vWf interaction with integrins  $\alpha_{IIb}\beta_3$  and  $\alpha_v\beta_3$  (mouse), **234**, 147

## Monocyte chemotactic protein-1

- synthesis, inhibition by progesterone in choriodecidual and breast cancer cell line, **239**, 557

## Monocyte chemotactic protein-2

- cDNA cloning and mRNA expression in mesenchymal cells (human), **231**, 726

## Monocyte chemotactic protein-4

- elicited signal pathways and cell effector functions in human eosinophils, **240**, 32

## Monocyte/macrophage lineage

- HL-60 cell differentiation into, Syk activity during, **236**, 697

## Monocytes

- circulating, ICAM-1 levels, effect of subacute treatment with dexamethasone (rat), **231**, 675
- LPS-induced phosphorylation of actin (human), **241**, 670
- macrophage differentiation-dependent gene, identification and characterization (human), **235**, 4

## Monocytic cells

- blood, 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>-inducible transcript, cloning (human), **235**, 407

- differentiation-dependent expression of carboxylesterase (human), **230**, 215

## Monocytic leukemia THP-1 cells

- differentiated, granulocyte colony-stimulating factor production by, stimulation by dexamethasone and interleukin-1 (human), **239**, 676
- lactoferricin-induced apoptosis, role of reactive O<sub>2</sub> species (human), **237**, 624

## Mononuclear cells

- peripheral blood, *see* Peripheral blood mononuclear cells

## Monooxygenase

- bacterial, oxidation of fatty acid  $\alpha$ -ketol to 3(Z)-dodecendioic acid, **232**, 364

## Morphogenesis

- branching, in lung, role of cell/epimorphin interaction, **234**, 522
- embryonic lung in primary culture, bronchoalveolar structure formation in, role of HGF (rat), **241**, 98
- late-stage, in long-term postconfluent MDCK epithelial cell culture (canine), **234**, 719

## 3-Morpholinodisynonimine

- effects on hepatocytes in culture (human), **233**, 545

## Morphology

- and tau phosphorylation and cell death, analysis in NGF-deprived PC12 cells, **240**, 687

## Motility

- and phosphorylation status, demembranated fowl spermatozoa, effects of MAP kinase and p34<sup>cdc2</sup> kinase substrate peptides, **240**, 116
- sea urchin sperm, reactivation to normal after preparation and storage, **237**, 59
- swimming, enterobacteria, effect of glucose concentration, **231**, 692
- thin filament, Ca<sup>2+</sup> regulation of, effects of hypertrophic cardiomyopathy mutations Asp175Asn and Glu180Gly in  $\alpha$ -tropomyosin (rabbit), **236**, 760

## Mpd2p

- overproduction, suppression of lethality of protein disulfide isomerase depletion in CXXC sequence-dependent manner (*Saccharomyces cerevisiae*), **239**, 710

MPTP, *see* 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine

## MRF4

- gene distal regulatory regions (rat), **237**, 170

 $\alpha_2$ MR/LRP, *see*  $\alpha_2$ -Macroglobulin receptor/LDL receptor-related proteinmRNA, *see* Messenger RNA

## mRNA capping enzyme

- $\beta$  subunit gene encoding RNA 5'-triphosphatase, isolation and characterization (*Saccharomyces cerevisiae*), **239**, 116

mRNA differential display, *see* Differential display

## mRNA fingerprinting

- amplified RFLP-based, using single restriction enzyme recognizing 4-bp sequence, **234**, 516
- MRP8, *see* Migration inhibitory factor-related protein
- MRP/GS-X pump  
expression in glioma cells, posttranscriptional regulation by ACNU and cycloheximide (human), **239**, 51
- $\alpha$ -MSH, *see*  $\alpha$ -Melanotropin
- MSH-1 protein  
minimal domain sufficient for binding mismatched oligonucleotides, mapping (human), **232**, 10
- MTPT  
and colchicine, differential effects on assembly-independent GTPase activity of  $\beta$ -tubulin isoforms (bovine brain), **231**, 698
- Mucins  
carrying sialylLewis A antigens, effect on E-selectin (human), **234**, 559  
MUC3, cDNA cloning: novel 59-amino acid tandem repeat region (human), **238**, 143  
MUC5AC, gene cloning from rat and comparison with human and mouse homologues, **236**, 789
- Mucosa  
gastric  
development of stress-induced lesions, role of gastric mucosal constitutive and inducible NOS (rat), **236**, 275  
healing, pepsinogen C gene product as possible growth factor during (rat), **238**, 17  
palatal, isolated myofibroblastic cells, apoptosis induction by basic fibroblast growth factor (rat), **240**, 21  
tracheal, EBTr cells from, InsP<sub>3</sub>-induced Ca<sup>2+</sup> release, effect of cytosolic Ca<sup>2+</sup> concentration ramp (bovine), **237**, 354
- Müller cells  
and retinal pigmented epithelial cells, NO production in, control by endogenous TNF- $\alpha$  (mouse), **240**, 132  
VEGF expression, induction by AGEs (human), **236**, 712
- Müllerian-inhibiting substance type II receptor  
sequence, genomic organization and chromosomal location (mouse), **237**, 741
- Multidrug resistance  
-ATP-binding cassette protein, effect on ATP efflux of *Saccharomyces cerevisiae*, **230**, 22  
KB carcinoma cells with  
growth, inhibition by MDR1 antisense RNA, **239**, 345  
reversal of heavy metal resistance (human), **236**, 586  
phenotype, unstable expression in CHO cells resistant to okadaic acid, **232**, 398  
tumor cells with, overexpression of 40-kDa protein (human), **236**, 483
- Multidrug resistance protein  
homologue *SMRP*, cDNA cloning from human cancer cell line, **238**, 790  
interactions with *N*-{4-[1-hydroxy-2-(dibutylamino)ethyl] quinolin-8-yl}-4-azidosalicylamide, **241**, 104  
MDR1b, mRNA, polymorphic expression in lung parenchyma of nonpregnant and pregnant rats: comparison with CFTR mRNA expression, **239**, 606
- Multidrug transport  
relationship to apoptosis and procoagulant lipid exposure: *MDR* gene expression in Scott cells, **241**, 548
- Multidrug transporter  
Bmr, broad ligand specificity of transcriptional regulator for, analysis (*Bacillus subtilis*), **239**, 269
- Multimerization  
CD36 in platelets and transfected COS-7 cells: covalently associated dimers and multimers, **240**, 812  
insulin-like growth factor binding protein-3: SDS-stable multimers (human), **240**, 707
- Multiple endocrine neoplasia  
hyperparathyroidism, vitamin D receptor alleles as risk factors (human), **231**, 329
- MEN 2A and 2B genes, and GDNF, mutations, characterization of Ret-She-GRB2 complex induced by, **237**, 747
- Multiple myeloma cells  
RPMI 8226, doxorubicin-resistant variant Dox IV, transcriptional downregulation of topoisomerase II $\alpha$  in, role of decreased CP-1 activity (human), **237**, 217
- Multispecific organic anion transporter  
human canalicular, expression in lung, gastric, and colorectal cancer cells, **240**, 606
- Munc18c  
inhibition of SNAP-23 binding to syntaxin 4 (mouse adipocytes), **234**, 257
- Muscle  
cardiac, two distinct ADP-ribosyl cyclase types: PKC regulation of sarcoplasmic reticulum form (dog, rat), **234**, 252  
cardiac and skeletal, Na<sup>+</sup> isoforms, discrimination by antisense oligonucleotides (human), **234**, 235  
cardiac and smooth, ecto-ATPases from, comparison to ecto-ATPase from liver (chicken), **238**, 728  
cell differentiation in hyperglycemic KK mouse, effect of triiodothyronine, **235**, 790  
differentiation *in vitro*, late stages, adhalin expression (mouse), **235**, 227  
expression of gene encoding CCT-1 chaperonin containing TCP-1 (*Caenorhabditis elegans*), **241**, 687  
glycogenin and glycogen synthase activity and glycogen content during development (chicken), **240**, 142  
injection of expression plasmid for long-term systemic delivery of interleukin-5 (mouse), **233**, 527  
papillary, cardiac, effect of monochlorohydrins of linoleic acid (guinea pig), **231**, 295  
peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857  
skeletal, *see* Skeletal muscle  
smooth, *see* Smooth muscle: Vascular smooth muscle cells  
striated, thin filament motility regulation by Ca<sup>2+</sup>, effects of hypertrophic cardiomyopathy mutations Asp175Asn and Glu180Gly in  $\alpha$ -tropomyosin (rabbit), **236**, 760
- Muscle pouch  
rat, ectopic osteoinduction by recombinant human BMP-2 and recombinant *Xenopus* BMP-4/7 heterodimer *in vivo*, comparison, **239**, 575
- Muscular dystrophy  
Duchenne/Becker, misdiagnosis, reduction by concomitant use of dystrophin and utrophin/dystrophin related protein antibodies, **241**, 232  
Duchenne's  
associated calmitine deficiency in skeletal muscle of patients and dy/dy mice, mitochondrial protease inducing, inhibition by IP96, **232**, 559  
muscular degeneration resembling, induction by targeted disruption of dystrophin gene exon 52 (mouse), **238**, 492
- Mutagenesis  
site-directed, *see* Site-directed mutagenesis  
7-sulfooxymethyl-12-methylbenz[a]anthracene-induced (rat), **231**, 144  
tyrosine metabolite fumarylacetoacetate-induced, enhancement by glutathione depletion in V79 cells, **232**, 42
- Mutants  
14CoS/14CoS mouse, and wild-type *chlch* mouse, extrahepatic expression of *Nno1*, *Ugt1a6*, *Ahd3*, and *Hnfl*  $\alpha$  genes, **233**, 631  
amino terminal deletion, hepatitis C virus nonstructural protein NS5A, function as transcriptional activators in yeast, **236**, 360  
CHO cell, defective in peroxisome targeting signal-1 receptor, isolation, **230**, 402  
cyanovirin-N, anti-HIV and gp120 binding activity, **238**, 218  
dominant positive, CoxA, isolation: transcriptional activator function in absence of CO, **240**, 783

## Mutants (continued)

- dhxR* gene-disrupted, *Brevibacterium lactofermentum*, fatty acid requirements for growth and L-glutamate production in presence of excess biotin, **234**, 157
- histidyl-tRNA synthetases, from *Escherichia coli*, isolation and analysis, **237**, 192
- hsp27, large aggregates of, control of intracellular ROS and glutathione levels and generation of protection against TNF- $\alpha$  in NIH-3T3-ras cells, **241**, 187
- superoxide dismutase-1, FALS-associated, stability, relationship to copper release and thioredoxin induction in erythrocytes, **241**, 251
- thyroid hormone receptor  $\beta$ 1, identified in patient with resistance to thyroid hormone, inhibition of wild-type TRs and other nuclear receptors, **238**, 39; *erratum*, **240**, 507
- Tsc2* gene, rat model with, AP-1 mRNA and protein expression during development of renal carcinoma and effects of overexpression of antisense oligonucleotides, **241**, 24
- WT1 Denys-Drash, dominant negative transcriptional activity, role of N-terminal self-association domains, **233**, 723
- Mutational analysis**
- ND6 gene in patients with Lebers hereditary optic neuropathy, **234**, 511
- rfbG* gene encoding CDP-D-glucose 4,6-dehydratase (*Azotobacter vinelandii*), **240**, 153
- role of GCAAG/CTTGC motifs between Sprit promoter sequences for RNA polymerase III in neural BC1 RNA transcription, **239**, 407
- Mutations**
- butyrylcholinesterase gene with isoleucine replacement of leucine at codon 330, identification as fluoride-resistant gene (human), **240**, 372
- calcium-binding domain of mitochondrial glycerophosphate dehydrogenase gene in diabetic family, **231**, 570
- calmodulin, by EF-hand pair alteration by exchange or duplication, effect on phosphorylation by myosin light chain kinase, **236**, 702
- $\alpha$ B-crystallin TATA sequence: lens preference for proximal TATA box and distal TATA-like sequence in transgenic mice, **241**, 407
- cytochrome C Arg<sup>91</sup> substitution by norleucine, effect on liposome rupture, **238**, 140
- deafness, *shaker-2*, chromosomal region, genetic and physical delineation (mouse), **234**, 107
- deletion
- age-associated, in mtDNA, in different species and tissues, comparison (human, rat), **230**, 630
- hepatitis B virus X gene in human hepatocellular carcinoma, **241**, 726
- S8-S9 interdomain region of Ca<sup>2+</sup>-activated K<sup>+</sup> channels, effects on complementation of N- and C-terminal domains, **240**, 623
- small, identification in French glycogen-storage disease type II patient, **235**, 138
- estrogen receptor ligand-binding domains, regulation of Cre recombinases (mouse), **237**, 752
- FUT1* missense mutation and *FUT2* deletion, role in Indian Bombay phenotype of ABO blood group system, **238**, 21
- glucose-dependent insulinotropic peptide receptor: point mutation conferring constitutive activity, **232**, 96
- Gooseoid* gene, related nasal and pharyngeal abnormalities (mouse), **233**, 161
- green fluorescent protein, enhancement of fluorescence at high temperature, **232**, 69
- guanidinoacetate methyltransferase gene, analysis in jittery mice, **238**, 723
- hscp* voltage-gated sodium channel, Val421 to Met in IS6, association with pyretoid resistance in *Heliothis virescens* F., **239**, 688
- hypertrophic cardiomyopathy, in  $\alpha$ -tropomyosin, Asp175Asn and Glu180Gly, effects on Ca<sup>2+</sup> regulation of thin filament motility (rabbit), **236**, 760
- IFM-ICM cluster: restoration of fast inactivation in inactivation-defective human heart sodium channel by benzyl-methanethiosulfonate, **233**, 606
- INK4a* locus, detection in squamous cell carcinomas of skin (human), **232**, 38
- insertion/deletion, and mismatches, binding properties of *Thermus thermophilus* MutS homologue for, **233**, 834
- insulin receptor
- Asp59Gly and Leu62Pro, identification in type A syndrome of extreme insulin resistance (human), **234**, 764
- at serine residues, effect on receptor tyrosine kinase activity (human), **239**, 235
- interleukin-2 at positions 47 and 65, **233**, 309
- lysosomal  $\alpha$ -glucosidase gene, in glycogen storage disease type II, detection by RT-PCR and automated sequencing, **241**, 414
- missense, identification in PPAR $\gamma$ 2 isoform in diabetic Caucasians: peroxisome proliferator activated receptor  $\gamma$  gene, **241**, 270
- mitochondrial, impairment of signal transduction in *Dictyostelium discoideum* slugs, **234**, 39
- mitochondrial DNA
- in Alzheimer's disease, **241**, 221
- deletions, gross mosaic pattern in skeletal muscle tissue of adult (human), **233**, 56
- induction of cellular sensitivity to oxidant stress, partial rescue by calcium depletion and cyclosporin A, **239**, 139
- mitochondrial ND1 gene, T3308C mutation, association with bilateral striatal necrosis and MELAS syndrome (human), **238**, 323
- mitochondrial ND5 gene, G13513A mutation associated with MELAS syndrome, identification (human), **238**, 326
- mitochondrial tRNA<sup>Leu(UUR)</sup> gene, associated with mitochondrial encephalomyopathy (human), **233**, 637
- Na<sup>+</sup>/I<sup>-</sup> symporter gene, induction of iodide trapping defect leading to hypothyroidism in Brazilian kindred, **240**, 488
- neuromuscular disease, *mnd2*, p150<sup>Glued</sup> as candidate (mouse), **231**, 344
- p16<sup>INK4a</sup>* and *p53*, in sporadic dysplastic nevi (human), **237**, 667
- p53* gene in lung cancer from chromate-exposed workers, **239**, 95
- in *p67phox* gene, chronic granulomatous disease, identification (human), **231**, 861
- platelet-activating factor acetylhydrolase, Gln<sup>281</sup>→Arg, role in loss of enzyme activity in CVD (human), **236**, 772
- point
- and crossing-over events, in *O* alleles at blood group ABO locus in different populations, **234**, 779
- in *p16* gene, role in expression loss in malignant skin tumors (human), **230**, 85
- steroid 18-hydroxylase (P450<sub>C18</sub>) gene *CYP11B2* exon 8, as cause of corticosterone methyloxidase I deficiency (human), **234**, 382
- polymorphic missense and silent, identification in coding region of peripherin/RDS gene in patient with retinitis punctata albescens, **231**, 103
- ROMK gene in antenatal Bartter syndrome, association with impaired K<sup>+</sup> channel function (human), **230**, 641
- SH2 cysteine in myosin II, effect on actin filament sliding (*Dictyostelium*), **234**, 701
- somatic, in *hMSH3* in hereditary nonpolyposis colorectal cancers, and microsatellite instabilities (human), **236**, 248
- splice-site, in liver phosphorylase kinase  $\gamma$  subunit gene, role in autosomal recessive liver PhK deficiency (human), **236**, 544
- temperature-sensitive folding, sites in P22 tailspike protein, side-chain specificity, **233**, 857
- MutS**
- homologue in *Thermus thermophilus* HB8, mismatch and insertion/deletion binding properties, **233**, 834
- Mycobacterium aurum*
- recombinant, expressing *E. coli*  $\beta$ -galactosidase, in high-throughput screening of antituberculosis drugs, **240**, 536
- Mycophenolic acid
- glucuronidation by human UDP glucuronosyltransferase UGT1A10, **238**, 775

*Mycoplasma fermentans*

glycoglycerophospholipids GGPI-I and GGPI-II as species-specific major immunodeterminants of, **233**, 644

## Myelin

associated protein 2',3'-cyclic-nucleotide 3'-phosphodiesterase, epitope recognized by monoclonal antibody to, characterization, **237**, 266  
 proteolipid protein of, molecular evolution, **237**, 559

## Myelin basic protein

isoform detection by organic concentration, **238**, 498

## Myelogenous leukemia

chronic, transcriptional activation of LIM-HOX gene, effect of *cis*-acting effect of *Bcr-Abl* (human), **233**, 806; **234**, 742

## Myeloid leukemia

acute, insulin-like growth factor II gene imprinting (human), **231**, 466

## Myeloid leukemia cells

differentiation

induction by 2'-deoxycytosine in combination with 2'-deoxyadenosine (human), **238**, 100

induction by cotylenin A (human, mouse), **238**, 758

Jurkat, *see* Leukemia cells, Jurkat

M1, IL-6-induced growth arrest, association with stat3-dependent transcriptional activation of p19<sup>INK4D</sup>, **238**, 764

NB4, heterozygous for Taq I restriction enzyme polymorphism, mRNA stability of vitamin D receptor big T and small t alleles (human), **238**, 77

P39 and Jurkat, detection of Mg<sup>2+</sup>- and Mn<sup>2+</sup>-dependent endonucleases producing nucleosome-size DNA fragmentation (human), **233**, 133

## Myeloma cells

NS-1, apoptosis, replication factor C large subunit cleavage in, mediation by CPP32-like protease (mouse), **233**, 343

RPMI 8226, doxorubicin-resistant variant Dox1V, transcriptional downregulation of topoisomerase II $\alpha$  in, role of decreased CP-1 activity (human), **237**, 217

U266B1, expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437

## Myelomonocytic cells

pertussis toxin-induced adhesion, signaling mechanisms: role of tyrosine phosphorylation, **236**, 479

Myeloperoxidase, *see* Peroxidase

## Myoblasts

apoptosis, induction in C2C12 cells by 2-chloroadenosine via alteration of actin cytoskeleton, **238**, 361

C2C12, osteoblast differentiation, BMP-2 signalings inducing, role of Smad1 and Smad5, **238**, 574

L6, TNF- $\alpha$ -induced activation of NF- $\kappa$ B, regulation by glutathione, **237**, 645  
 proliferation in muscle cultures, effect of ED2+ macrophages (rat), **235**, 754  
 skeletal

differentiation, stimulation by interleukin-15 (C2 cells), **239**, 6

growth, effects of estrogen, **232**, 373

taurine efflux, activation by hypotonicity and thrombin and downregulation during differentiation (mouse), **232**, 74

## Myocardium

antisense oligonucleotide *in vivo* transfer efficiency, with HVJ-liposome method (rat), **231**, 540

hypertrophied, role of phospholamban phosphorylation (rat), **239**, 701

preconditioned, ecto-5'-nucleotidase activation in, role of protein kinase C- $\alpha$  (dog), **239**, 171

ventricular, failing, suppression of alternative splicing of primary Fas transcript generating soluble Fas antagonists (human), **239**, 794

## Myocytes

cardiac

activation of p65<sup>PAK</sup>, p38 MAP kinase, and stress-activated protein kinase by hypoxia and hypoxia/reoxygenation *in vitro* (rat), **239**, 840

intracellular Ca<sup>2+</sup> sparks in, 2D millisecond analysis by rapid scanning confocal microscopy and effect of isoproterenol (rat), **233**, 413

mitochondrial Ca<sup>2+</sup> transients during contractile cycle, demonstration after selective loading of Rhod 2 (rabbit), **236**, 738

cyclophilin induction by hypoxia and heat stress (rat), **237**, 6

## Myofibrils

cardiac, expression of myosin-binding phosphatase (bovine), **236**, 570

## Myofibroblasts

isolated from rat palatal mucosa, apoptosis induction by basic fibroblast growth factor, **240**, 21

## Myoglobin

structure, effects of aqueous hexafluoroisopropanol media: formation of molten globule state, **233**, 687

## Myometrium

prostaglandin E<sub>2</sub> and F<sub>2 $\alpha$</sub>  receptor gene expression (human), **238**, 838

rho A and rho kinase mRNA upregulation during pregnancy (rat), **230**, 356

## Myosin

C109 peptide derived from, binding to GLUT4-vesicles and inhibition of insulin-induced glucose transport and GLUT4 recruitment in adipocytes (rat), **240**, 409

glass beads coated with, suspended from actin paracrystals, accelerative sliding, **237**, 427

subfragment 1, bound to glass surface, role in sliding velocity of actin filaments (chicken), **230**, 76

-tropomyosin interaction, role of 40-50 loop in actin subdomain 2: restoration of defective mechanochemical properties of cleaved actins by native tropomyosin, **237**, 121

## Myosin II

SH2 cysteine, mutation effects on actin filament sliding (*Dictyostelium*), **234**, 701

## Myosin IIA

nonmuscle, copurification with chloride channel-enriched membranes from epithelium (bovine), **231**, 369

## Myosin-binding phosphatase

expression in heart myofibrils (bovine), **236**, 570

## Myosin-binding subunit

in smooth muscle myosin phosphatase, role in cell-cell adhesion sites in MDCK cells, **230**, 552

## Myosin heavy chain

smooth muscle, embryonic form, gene isolation and characterization of 5'-flanking region (rabbit), **239**, 598

smooth muscle isoforms SM1 and SM2, molecular cloning and expression (mouse), **232**, 313

 $\beta$ -Myosin heavy chain

divergent expression in fetal rat cardiomyocytes *in vitro* and adult rat heart *in vivo*, **230**, 340

## Myosin light chain kinase

calmodulin phosphorylation by, alteration by exchange or duplication of EF-hand pairs, **236**, 702

## Myosin light chain kinase inhibitor

role in cation influx in agonist-stimulated endothelial cells (pig), **235**, 657

## Myosin motor

related domain, chitin synthase with, isolation of fungal gene encoding, **236**, 75

## Myosin phosphatase

smooth muscle, myosin binding subunit, role in cell-cell adhesion sites in MDCK cells, **230**, 552

## Myotoxin a

cDNA, translated and untranslated regions, nucleotide sequence (rattlesnake), **230**, 607

from *Crotalus viridis viridis*, isomerization:role of Pro20: folding and structural characterization of synthetic myotoxin a and Pro20Gly homologue, **241**, 525

## Myristicin

- effects on *Cyp1a-1* induction in mouse hepatoma Hepa-1c1c7 cells, **233**, 619
- preferential overexpression of class  $\mu$  GST subunit in mouse liver by, **236**, 825

## N-Myristoylation

- cAMP-dependent protein kinase catalytic subunit (*Caenorhabditis elegans*), **238**, 523
- HIV-1 gag protein, effect on viral ineffectivity, **237**, 504

## N

Na<sup>+</sup>/Ca<sup>2+</sup> exchanger, *see* Sodium/calcium exchanger

NAD<sup>+</sup>-dependent 15-hydroxyprostaglandin dehydrogenase

- genomic structure and promoter characterization (mouse), **235**, 582

## NADH

- and succinate, competitive oxidation in mitochondria, effects of mild respiratory chain deficiency (human), **236**, 643

NADH:coenzyme Q oxidoreductase, *see* NADH dehydrogenase (ubiquinone)

NADH coenzyme Q reductase

- protonophoric activity in platelet coupled submitochondrial particles (horse), **235**, 469

NADH-cytochrome b<sub>5</sub> reductase

- encoding gene, first exon identification (human), **235**, 779

NADH dehydrogenase (ubiquinone)

- deficiency in cardiac mitochondria from vitamin A-deficient rat, effect of increased coenzyme Q, **233**, 451
- first energy-coupling site, cherimolin-I as selective inhibitor of, **240**, 234
- five subunits, identification and primary structure (human), **241**, 589
- mutational analysis in patients with Lebers hereditary optic neuropathy, **234**, 511

NADH-dependent disulfide reductase

- endoplasmic reticulum (*Dicystostelium discoideum*), **234**, 313

NADH:ubiquinone oxidoreductase, *see* NADH dehydrogenase (ubiquinone)

NAD(P)<sup>+</sup>

- hydrogen transfer to, catalyzed by lactol dehydrogenases, stereospecificity, **233**, 681

NADPH-cytochrome P450 oxidoreductase

- fusion protein with human cytochrome P450, characterization in *Escherichia coli* (rat), **230**, 211

NAD(P)H:menadione oxidoreductase

- mRNA, extrahepatic expression in *chlch* and *l4CoS/l4CoS* mice, **233**, 631

NADPH oxidase

- neutrophil, activation in cell-free system, effect of actin (human), **230**, 206
- phagocyte, activation *in vitro*, role of proline-rich regions of p47*phox* and p67*phox*, **241**, 226

NADPH:quinone oxidoreductase

- and other cell cycle-regulating genes and aryl hydrocarbon receptor gene, mRNA coregulation by TGF- $\beta_1$  in human cancer cell lines, **241**, 86

NAD(P)H:quinone oxidoreductase

- gene induction, mediation by Nrf1/small Maf heterodimer through antioxidant response elements, **236**, 313

Na<sup>+</sup>.K<sup>+</sup>-ATPase

- $\alpha 1$  subunit gene, synergism between ATF/CRE site and GC box in, role in constitutive expression, **241**, 169
- $\alpha 2L111R.N122D$  and  $\alpha 1$  isoforms, comparative response to insulin in HeLa cells, **236**, 444
- $\beta$  isoforms, extracellular domain, role in complex stability with  $\alpha 1$ , **231**, 755
- cardiac, phosphorylation by Ca<sup>2+</sup>/calmodulin-dependent protein kinase (rat), **238**, 544
- in lower airway epithelium from cystic fibrosis and non-cystic fibrosis lung (human), **232**, 464
- neuronal, 5-HPETE as inhibitor, **235**, 374

Naloxone

- antiplatelet activity in platelets, mechanism (human), **231**, 12
- insensitive mechanism, role in [Tyr<sup>1</sup>]-nociceptin reduction of systemic arterial pressure (rat), **234**, 309

Nanocrystallites

- ZnS, glutathione-capped, characteristics, **237**, 16

NAP4

- ligand for SH3 domain of adaptor protein Nck, presence of SH2 domain and nuclear signaling motifs, **239**, 488

Naphthalene dioxygenase

- oxygenase component, purification and crystallization in native and selenomethionine-derivatized forms, **241**, 553

$\beta$  Naphthoflavone

- induction of CYP1A1 in IEC-18 rat intestinal epithelial cells, and potentiation by dibutyl cAMP, **233**, 623

Nasal cavity

- abnormalities caused by *Gooseoid* gene mutation (mouse), **233**, 161
- epithelial sodium channels, amiloride-sensitive, variation from classical epithelial Na<sup>+</sup> channels (human), **237**, 488

Nasopharyngeal cancer cells

- NPC-076, telomerase inhibition by PKC inhibitors in culture (human), **241**, 730

Natriuretic peptides

- isolation and immunoaffinity purification (ivy), **235**, 722

Natural killer cells

- activating receptor NKR-PIA, binding to chitobiose core of incompletely glycosylated N-linked glycans and to linear chitooligomers, **238**, 149
- granule exocytosis, role of adenosine (mouse), **231**, 264
- low-molecular-weight granule protein enhancing perforin activity: perforin-enhancing protein, **236**, 34
- stromal-derived factor-1 $\alpha$ -induced chemotaxis and Ca<sup>2+</sup> mobilization, role of heterotrimeric G proteins, **236**, 270; *erratum* **237**, 759

Nck adaptor protein

- SH3 domain, ligand for, presence of SH2 domain and nuclear signaling motifs: NAP4, **239**, 488

ND4 protein

- recombinant fusion protein, functional complementation of membrane transport deficiency in *Saccharomyces cerevisiae*, **238**, 811

Necrosis

- and apoptosis: breakthroughs and views, **236**, 1

Nef protein

HIV

- activation of V $\beta$ , detection by simple amplification, **230**, 509
- acyl-CoA thioesterase hACTE-III binding, activity enhancement by direct binding with Nef, **238**, 234
- HIV-1, N-terminal peptides, cytotoxicity to yeast and bacterial cells, **232**, 707

Neocarzinostatin. *see* Zinostatin

Neocortical explant

- culture, neurite outgrowth in, role of amino-terminal region of  $\beta$ -amyloid precursor protein, **236**, 59

Neoplasms

- Epstein-Barr virus-associated, targeted gene therapy, use of EBV-based vector/HVJ-liposome complex vector for, **241**, 112

Neopterin

- antioxidant properties, spin trapping study, **234**, 774

Nerve growth cone

- detection of dynactin complex 50-kDa subunit (mouse), **233**, 295

Nerve growth factor

- deprivation
  - effects on tau phosphorylation, cytoarchitecture, and cell death in PC12 cells, **240**, 687
  - induced apoptosis, role in CPP32 activation in embryo (mouse), **231**, 770; *erratum*, **237**, 202

- differentiated PC12 cells deprived of, TAFII<sub>31</sub> gene induction by apoptosis, **234**, 230
- effect on degradation of NCAM in PC12 cells, **234**, 686
- effect on giant cell transformation of trophoblast cells *in vitro* (mouse), **231**, 309
- synthesis by astrocytes in culture, upregulation by dopaminergic transmitters (mouse), **238**, 468
- treated PC12h cells, neurite formation and MAP kinase activation, effect of protein-tyrosine-phosphatase inhibitor 3,4-dephostatin, **238**, 213
- Neural cell adhesion molecule
- degradation in PC12 cells, dependence on NGF, **234**, 686
- Neural cells
- BC1 RNA transcription, role of GCAAG/CTTGC motifs between Sprit promoter sequences for RNA polymerase III, mutational analysis, **239**, 407
- phenotype, differentiation of mouse embryonal carcinoma P19 cells into, enhancement of glycolipid sialyltransferases during, **241**, 327
- Neurite formation
- in growth factor-treated PC12h cells, effect of protein-tyrosine-phosphatase inhibitor 3,4-dephostatin, **238**, 213
- Neurite outgrowth
- in Neuro 2a cells, induction by brain gene norbin induced by tetraethylammonium in hippocampal slices, **240**, 766
- promotion, role of heparin-binding sites identified in midline (rat), **236**, 66
- in rat neocortical explant culture, role of amino-terminal region of  $\beta$ -amyloid precursor protein, **236**, 59
- Neurite retraction
- induced by sphingosine 1-phosphate in PC12 cells via cell surface receptor-like mechanism, **240**, 329
- and tau phosphorylation, abnormalities during NGF deprivation in PC12 cells, **240**, 687
- Neuro 2a cells
- neurite outgrowth, induction by brain gene norbin induced by tetraethylammonium in hippocampal slices, **240**, 766
- Neurobehavior
- Bsg* gene knockout mice: sensory and memory function abnormalities, **236**, 733
- Neuroblastoma cells
- C1300, functional activity of L-type  $\text{Ca}^{2+}$  channels, cooperative enhancement by activin A and all-*trans*-retinoic acid (mouse), **241**, 363
- cisplatin-induced nitric-oxide synthase expression, mediation by  $\text{TNF-}\alpha$  (human), **233**, 788
- CPP32-like protease activity, inhibition by nitric oxide under redox regulation (human), **236**, 365
- expression of retinoic acid receptor cofactors SMRT and Trip-1 (human), **234**, 278
- gene expression, regulation by 1,25-dihydroxyvitamin  $\text{D}_3$  (mouse), **235**, 15
- NB-2a,  $\alpha$ -ketoisocaproate transport in, **237**, 63
- production of sleep inducing factor oleamide (mouse), **239**, 473
- SH-SY5Y
- erbB4 tyrosine phosphorylation, stimulation by aurintricarboxylic acid (human), **230**, 266
- stably transfected, presenilin 2 cleavage site determination (human), **240**, 728
- SK-N-SH
- growth inhibition, induction by upregulation of type II protein kinase A (human), **232**, 469
- Hox gene expression, modulation by  $\text{TGF-}\beta$  superfamily (human), **233**, 365
- Neuroblastoma $\times$ glioma hybrid cells
- NG108-15
- depolarization-induced increase in intracellular free calcium, inhibition by 2-arachidonoylglycerol, **233**, 207
- modulation of protein kinase C and cAMP-dependent protein kinase by  $\delta$ -opioid, **236**, 626
- proliferation, inhibition by expression of POU transcription factor Brn-5, **236**, 693
- NH15-CA2, isolation of G-protein coupled receptor with homology to neuro-peptide and chemoattractant receptors, **233**, 336
- Neurodegeneration
- in Parkinson's disease and incidental Lewy body disease, Bcl-2 upregulation as early event in, **240**, 84
- protective effects of endogenous IL-1 receptor antagonist (rat), **234**, 211
- Neurodegenerative diseases
- with distinct tau-related pathology, cerebrospinal fluid tau levels, **236**, 262
- Neuroectodermal cells
- expression of retinoic acid receptor cofactors SMRT and Trip-1 (human), **234**, 278
- Neuroendocrine tumors
- marker IA-1, molecular characterization of promoter region (human), **236**, 776
- Neurofibromas
- plexiform and dermal, in NF1 patients, loss of heterozygosity at NF1 locus, **234**, 346
- Neurofibromatosis type 1
- gene, in melanocytes derived from café au lait macules of patients, analysis for loss of heterozygosity, **237**, 138
- plexiform and dermal neurofibromas in patients with, loss of heterozygosity at NF1 locus, **234**, 346
- Neurogenesis
- role of Fringe and C-Fringe 1 cDNA (chicken), **234**, 754
- Neuromuscular disease
- mutation *mind2*, p150<sup>Glned</sup> as candidate (mouse), **231**, 344
- Neuronal tissue
- expression of gene encoding CCT-1 chaperonin containing TCP-1 (*Caenorhabditis elegans*), **241**, 687
- Neurons
- Alzheimer's disease and aged, lipofuscin pigments of, immunohistochemical localization of AGEs pentosidine and carboxymethyllysine, **236**, 327
- apoptosis
- in absence of poly(ADP-ribose) polymerase (mouse), **233**, 518
- in brains of Alzheimer's disease patients, role of p53, **232**, 418
- in Parkinson's disease, role of mtDNA, **235**, 158
- tamoxifen-induced, stimulation by estrogens *in vitro*, nongenomic mechanism (GT1-7 cells), **240**, 464
- cortical
- angiotensin receptor type 2 mRNA expression, upregulation by angiotensin II (rat), **239**, 633
- $\text{Na}^+/\text{Ca}^{2+}$  exchange activity in primary culture, inhibition by genistein (rat), **233**, 86
- dopaminergic, tenascin gene knockout mouse, tyrosine hydroxylase mRNA level, **231**, 356
- granular, from rat cerebellum
- MAP kinase activation by HIV-1 Tat protein, **238**, 800
- MAP kinase activity downregulation signalled by HIV-1 gp120, **240**, 683
- hippocampal, channel activities, voltage-dependent effects of  $\text{Al}^{3+}$  (rabbit, rat), **232**, 84
- $\text{H}_2\text{O}_2$ -induced apoptosis, processing of Alzheimer's amyloid precursor protein (human), **235**, 845
- phenotype, PC12 differentiation to, induction by hyperoxia via production of reactive oxygen species, **241**, 347
- retinal,  $\text{Na}^+$  channel, tetrodotoxin resistivity (newt), **240**, 651
- sensory, CPP32 expression (mouse), **231**, 770; *erratum*, **237**, 202
- specific expression of human dopamine transporter gene, role of intronic sequences, **240**, 807
- teratocarcinoma-derived, GABA<sub>A</sub> receptor expression (human), **237**, 719
- Neuropeptide-binding proteins
- soluble, identification in *Helicoverpa zea*, **238**, 925

## Neuropeptides

central nervous system of desert locust *Schistocerca gregaria*, identification, **241**, 530

Cyanea-RFamide, isolation from scyphomedusae, **236**, 743

## Neuropeptide Y

carboxy-terminal fragment, structure and function, effect of covalent dimerization, **241**, 737

enhancement of ATP-induced formation of inositol phosphates in chromaffin cells (bovine), **239**, 287

## Neuropeptide Y receptor

subtype zYc, cloning, sequence, and pharmacologic profile (zebrafish), **241**, 749

## Neurotrophic growth factors

secretion by AIDS-associated Kaposi's sarcoma cells (human), **233**, 408

## Neutral cholesterol ester hydrolase

suppression by antisense DNA of hormone-sensitive lipase, **233**, 655

Neutral sphingomyelinase. *see* Sphingomyelin phosphodiesterase

## Neutrophil-activating peptide 2

interleukin-8 type B receptor extracellular region binding to, mapping (human), **232**, 663

## Neutrophil chemotactic protein

HCCT2, expression in human hepatocytes: immunochemical analysis using antibodies to recombinant protein, **237**, 116

## Neutrophils

CD18-mediated adhesion to fibrinogen, role of phosphatidylinositol 4,5-bisphosphate 3-kinase (human), **232**, 719

cell-free system from, superoxide generation in, inhibition by synthetic peptides to hydrophilic regions of cytochrome  $b_{558}$  large subunit (human), **234**, 531

cytokine-induced neutrophil chemoattractant-3 receptor identification and characterization (rat), **232**, 562

expression of apoptosis-related genes (human), **233**, 700

granulocytes, myeloperoxidase release after activation by f-Meth-Leu-Phe (human), **232**, 209

integrin-mediated adhesion and rigidity, regulation by actin polymerization (human), **238**, 910

intracellular calcium, regulation by midkine (human), **241**, 756

NADPH oxidase, activation in cell-free system, effect of actin (human), **230**, 206

phagocytosis in, inhibition by NO-releasing particles (human), **233**, 492

platelet activating factor primed responses in, effect of receptor-mediated calcium entry (human), **240**, 763

responses to chemotactic factors, differential effects of MAP kinase inhibitor PD 98059 (human), **232**, 474

SNAP-23 identification (human), **231**, 808

SNAP-25 intracellular location (human), **239**, 592

TNF-stimulated, effect of tyrosine phosphorylation of p38 and extracellular signal-regulated kinase (human), **235**, 42

translocation of protein kinase C isoforms (rat), **234**, 412

undergoing CD11b/CD18 integrin engagement, pulsatile  $\text{Ca}^{2+}$  influx (human), **230**, 258

## Nevoid basal cell carcinoma syndrome cells

abnormal DNA synthesis activity in, induction by X rays (human), **240**, 269

## NFATc

cDNA, molecular cloning and functional characterization (mouse), **240**, 314

NF- $\kappa$ B. *see* Nuclear factor  $\kappa$ B

## NFY

binding to regulatory element AIC and transactivation of apolipoprotein A-I promoter in HEPG2 cells (human), **231**, 140

NGF. *see* Nerve growth factor

## Nicotinamide nucleotides

nitric oxide-stimulated metabolism, role in NO gating of fertilization channels in oocytes (*Ciona intestinalis*), **239**, 723

## Niemann-Pick type II disease

heterozygous, increased expression of caveolin-1 in fibroblasts (human), **236**, 189

## Nifedipine

effect on prevention of cell lysis and recovery of respiration and ion transport after anoxia/reoxygenation (rabbit proximal tubule cells), **234**, 275

## [NiFe] hydrogenase

from sulfate reducer *Desulfovibrio vulgaris*, characterization, **240**, 75

## Niflumic acid

effect on prevention of cell lysis and recovery of respiration and ion transport after anoxia/reoxygenation (rabbit proximal tubule cells), **234**, 275

## Nim1-like kinase

pathway acting at G0-1/S transition (human fibroblasts), **236**, 130

## Nim1 protein kinase

role in cell cycle response to nutritional signals in fission yeast, **232**, 204

## Nitrate reductase

periplasmic, enzymatic properties and effect of ionic strength (*Desulfovibrio desulfuricans* ATCC 27774), **239**, 816

## Nitration

tyrosine, mediated by peroxynitrite, inhibition by catechin polyphenols, **232**, 164

## Nitric oxide

caspase-3 inhibition by S-nitrosation and oxidation caused by, analysis (U937 cells), **238**, 387

and citrulline, enzyme producing, detection in kidney (rat), **232**, 672

and cyclooxygenase, role in isoprostane release by human pulmonary artery in organ culture, **233**, 668

dissociation from soluble guanylate cyclase (bovine lung), **239**, 284

endothelial formation, stimulation by 2-(allylthio)pyrazine, role in protective effect of 2-AP in murine model of endotoxemia, **239**, 310

gating of fertilization channels in oocytes via nicotinamide nucleotide metabolism (*Ciona intestinalis*), **239**, 723

guanylyl cyclase responsiveness, effects of cardiomyocyte treatment with S-nitroso-D,L-acetylpenicillamine and sodium nitroprusside (rat), **238**, 351

hepatocyte sensitivity to, *in vitro* study (human), **233**, 545

and hydrogen sulfide, role in smooth muscle relaxation (guinea pig, rat), **237**, 527

## inhibition of

antigenic epitope formation in oxidized LDL (human), **232**, 613

capping in HL-60 cells, **232**, 827

CPP32-like activity under redox regulation, **236**, 365

intracellular multiplication of human strains of *Chlamydia trachomatis*, **232**, 595

insulin secretion inhibition dependent on, temporal relationship to tetrahydrobiopterin synthesis in INS-1 pancreatic  $\beta$ -cells (rat), **233**, 66

and interleukin-2, counter-regulation of T helper 1 cell proliferation (mouse), **233**, 14

lack of role in LPS/cytokine mixture-induced cellular injuries in cultured hepatocytes (mouse), **240**, 664

## LPS/cytokine mixture-mediated synthesis in hepatocytes

inhibition by dimethyl sulfoxide (mouse), **239**, 517

role of metabolic intermediates (mouse), **236**, 379

mediated keratinocyte proliferation, role of heme oxygenase-carbon monoxide pathway, **241**, 215

nonenzymatic generation by reaction of hydrogen peroxide and D- or L-arginine, **233**, 150

## production in

alveolar macrophages of ethanol and endotoxin-treated rat, effect of ceramide, **234**, 738

cultured endothelial cells, enhancement by eicosapentaenoic acid (human), **232**, 487

LPS-stimulated macrophages, regulation by scavenger receptors (mouse), **237**, 601

- macrophages, modulation by apolipoprotein-E and amyloid-beta peptide (human), **240**, 391
- peritoneal macrophages, LPS-induced, enhancement by phosphatidylinositol-3-kinase inhibitor wortmannin (mouse), **240**, 692
- RAW 264.7 macrophages, effect of L929 and L1210 cell lines (mouse), **230**, 636
- retinal pigmented epithelial and Müller glial cells, control by endogenous TNF- $\alpha$  (mouse), **240**, 132
- subcutaneous tumor, stimulation by flavone acetic acid (mouse), **235**, 509
- regulation by glucorticoids in model of endotoxic shock (mouse), **240**, 298
- release by hypoxic astroglial cells, modulation by interleukin-1 $\beta$  (human), **238**, 916
- reversible inhibition of caspase by S-nitrosylation, **240**, 419
- role in
- elevated prostacyclin release from shear-stressed aortic endothelial cells (bovine), **233**, 748
  - IL-1 $\beta$ -induced degradation of equine articular cartilage, analysis, **238**, 81
  - LPS induction of cell proliferation and collagen synthesis in small intestinal lamina propria fibroblasts (human), **240**, 458
  - melanogenesis (*Sepia officinalis*), **235**, 429
  - stimulation of endogenous ADP-ribosylation of G<sub>m</sub> protein in ciliary body (bovine), **235**, 482
  - and superoxide, generation by recombinant endothelial nitric-oxide synthase, regulation by tetrahydrobiopterin, **237**, 340
  - synthesis in J774 macrophages, induction by lipoteichoic acid from *Staphylococcus aureus*, role of CD14-dependent pathway, **233**, 375
  - transport by hemoglobin in fetal circulation, role in blood pressure regulation (human), **239**, 875
  - yeast particles releasing, inhibition of phagocytosis in neutrophils (human), **233**, 492
- Nitric-oxide synthase
- Ca<sup>2+</sup>-dependent, identification in ink gland (*Sepia officinalis*), **235**, 429
  - competitive inhibition by *p*-aminobenzamidine (murine brain), **232**, 88
  - constitutive
    - downregulation by skin tumor promoters (mouse), **232**, 328
    - and inducible, gastric mucosal, role in development of stress-induced gastric mucosal lesions (rat), **236**, 275
  - cytokine-induced, expression regulation by hairpin oligonucleotide in cerebral endothelial cells (mouse), **235**, 394
  - endothelial
    - caveolin-1 detergent solubility and association with, modulation by tyrosine phosphorylation, **236**, 155
    - gene transfer, inhibition of PDGF-BB-stimulated focal adhesion kinase and paxillin phosphorylation in VSMC (guinea pig), **236**, 706
    - recombinant, superoxide and nitric oxide generation by, regulation by tetrahydrobiopterin, **237**, 340
  - expression in VSMC, liposomal induction (bovine), **231**, 780
  - gene expression, effect of heat shock response, **231**, 257
  - gene transcription and protein activity in heart during endotoxemia (rat), **231**, 211
  - inducible
    - and constitutive, gastric mucosal, role in development of stress-induced gastric mucosal lesions (rat), **236**, 275
    - gene transcriptional activation by LPS plus IFN- $\gamma$  in RAW 264.7 macrophages, role of upstream NF- $\kappa$ B site, **236**, 655
    - gene transcription and promoter activity in hepatocytes, effect of oxidative stress (rat), **234**, 289
  - inducible, expression
    - in hepatocellular carcinoma cells (human), **232**, 702
    - in human neuroblastoma cell line after treatment with cisplatin and IFN- $\gamma$ , mediation by TNF- $\alpha$ , **233**, 788
    - induction by IL-1 $\alpha$  in uterine smooth muscle (human, rat), **238**, 12
    - inhibition by 2-(allylthio)pyrazine, role in protective effect of 2-AP in murine model of endotoxemia, **239**, 310
    - inhibition by benzoquinones (C6 glial cells), **239**, 367
    - regulation by promoter and 3'-regions (human), **233**, 523
    - mRNA, expression in fetal membranes: role in parturition (human), **233**, 276
    - neuronal
      - Ca<sup>2+</sup>-dependent inactivation: stabilization/activation factor (rat), **234**, 476
      - protein inhibitor of, distribution in brain (rat), **238**, 617
      - in *Staphylococcus aureus*, identification, **237**, 554
- Nitrobenzene
- reduction by ferredoxin NADP oxidoreductase from spinach leaves, **241**, 794
- 6-[N-(7-Nitro-2,1,3-benzoxadiazol-4-yl)amino]hexanoyl glucosylsphingosine
- bulk-membrane endosomal flow, effects of perturbations, comparison with fluid-phase and receptor-mediated tracers (fetal rat fibroblasts), **236**, 661
- Nitrogen starvation
- fission yeast cell cycle response to, role of nim1 protein kinase, **232**, 204
- S-Nitrosation
- and oxidation, in NO-mediated inhibition of caspase-3 (U937 cells), **238**, 387
- S-Nitroso-D,L-acetylpenicillamine
- treatment of cardiomyocytes, effects on guanylyl cyclase responsiveness to NO (rat), **238**, 351
- S-Nitroso-N-acetylpenicillamine-amine
- effects on hepatocytes in culture (human), **233**, 545
- S-Nitrosohemoglobin
- in fetal circulation, role in blood pressure regulation (human), **239**, 875
- S-Nitrosylation
- alteration of NF- $\kappa$ B p50 DNA binding kinetics, **238**, 703
  - caspase by nitric oxide, effect on enzymatic activity, **240**, 419
- Nitrotyrosine
- $\beta$ -VLDL-apoprotein-bound, evaluation as biomarker of peroxynitrite formation in experimental atherosclerosis (rabbit), **232**, 332
- Nitroxyl radicals
- from superoxide radical and peroxynitrite spin trapping, stability to biological reductants, **231**, 701
- NKR-P1A
- activating receptor of rat NK cells, binding to chitobiose core of incompletely glycosylated N-linked glycans and to linear chitooligomers, **238**, 149
- NMDA receptor, *see* N-Methyl-D-aspartate receptor
- N-myc
- expression in neuroblastoma cells, regulation by 1,25-dihydroxyvitamin D<sub>3</sub> (mouse), **235**, 15
- Nociceptin
- solution conformation, **233**, 640
- [Tyr<sup>1</sup>]-Nociceptin
- reduction of systemic arterial pressure by naloxone-insensitive mechanism (rat), **234**, 309
- Nociceptin/orphanin FQ
- activation of protein kinase C via phospholipase C/Ca<sup>2+</sup> pathway (CHO cells), **240**, 304
- Nociceptin/orphanin FQ receptor
- biochemical evidence for heterogeneity in brain (mouse), **230**, 462
- Nogalamycin
- effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- Non-amyloid- $\beta$  component precursor
- differential regulation during megakaryocyte differentiation (hamster, human), **237**, 611
- Non-Hodgkin's lymphoma
- lymphotoxin beta isoforms expressed in, identification (human), **238**, 273
- NOR-1
- and related nuclear receptor genes, in MCF-7 cells, effect of retinoic acids (human), **231**, 417

## Subject Index

- Norbin  
gene induced by tetraethylammonium treatment in rat hippocampal slices, induction of neurite outgrowth in Neuro 2a cells, **240**, 766
- Norepinephrine  
biosynthesis and turnover in adrenal medulla, modification by atrial natriuretic factor (rat), **238**, 343  
induction of expression of K99 pilus adhesin of enterotoxigenic *Escherichia coli*, **232**, 682
- Northern blotting  
rapid protocol with lower toxicity, **238**, 277
- NOS, *see* Nitric-oxide synthase
- Nostoc ellipsosporum*  
cyanovirin-N isolation, primary sequence, and disulfide bond structure: anti-HIV protein, **238**, 223
- Novobiocin  
effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- (±)NPS 568  
and divalent cations, effects on adrenocorticotrophic hormone release in pituitary tumor cells, **238**, 866
- Nrf/Small Maf heterodimer  
mediation of induction of phase II detoxifying enzyme genes through antioxidant response elements, **236**, 313
- NS3  
hepatitis C virus  
N-terminal region, role in enzymatic integrity, **231**, 738  
nuclear accumulation, effect of wild-type and mutant p53, **230**, 431
- NS5A  
hepatitis C virus nonstructural protein, amino terminal deletion mutants, function as transcriptional activators in yeast, **236**, 360
- Nuclear envelope  
association with p53 (mouse testis), **235**, 689  
inner membrane, zinc and calcium channels (rat), **235**, 236
- Nuclear factor 1-A  
transcriptional repression domain, identification, **238**, 744
- Nuclear factor  $\kappa$ B  
activation  
by cycloheximide and anisomycin (human), **233**, 507  
Der p1 allergen-induced, via interference with I $\kappa$ B $\alpha$  function in asthmatic bronchial epithelial cells (human), **236**, 522  
inhibition by A20 independently of binding to 14-3-3 proteins, **238**, 590  
by interleukin-18 in murine T helper type 1 cells, **234**, 454  
opposite effects of cyclosporin A-sensitive Ca<sup>2+</sup> signaling in human bronchial epithelial and Jurkat T cells, **234**, 424  
role in mitogenesis of VSMC (bovine), **235**, 365  
signal-induced, in alveolar macrophages, effect of tetrandrine (rat), **231**, 99  
sphingosine-1-phosphate-induced, in U937 cells, role of intracellular Ca<sup>2+</sup> mobilization, **234**, 121  
TNF- $\alpha$ -induced, in L6 myoblasts, regulation by glutathione, **237**, 645  
and AP-1, LPS-induced interleukin-8 gene expression mediated by, redox regulation in astrocytoma U373 cells (human), **232**, 568  
and I $\kappa$ -B, role in heat shock response effect on NO synthase gene expression, **231**, 257  
p50, DNA binding kinetics, alteration by S-nitrosylation, **238**, 703  
role in oxidant-initiated apoptosis in glomerular mesangial cells (rat), **240**, 496  
role in transcriptional control of COX-2 gene expression by IL-1 $\beta$ , **237**, 28  
and STAT3, competitive binding on overlapping DNA binding site, **237**, 90  
upstream site, role in transcriptional activation of iNOS gene by LPS plus IFN- $\gamma$  in RAW 264.7 macrophages, **236**, 655
- Nuclear localization signal  
in adenovirus-mediated gene expression via tetracycline-controllable transactivator, **230**, 426  
for BLM protein translocation into nucleus, **240**, 348  
nucleoplasmic, distinct domain, effect on transport, **235**, 19
- Nuclear magnetic resonance  
in analysis of DnaB helicase N-terminal domain, **231**, 126  
based intercalation model of interaction of mutagenic tryptophan pyrrolisate with d(CGATCT)<sub>2</sub>, **240**, 803  
<sup>1</sup>H, mobile lipids detectable by, generation in stimulated lymphocytes, relationship to cellular activation, cell cycle, and phosphatidylcholine-specific phospholipase C (mouse), **239**, 868  
*Saccharomyces cerevisiae* during simultaneous <sup>192</sup>Ir gamma irradiation, radiobiological probe for, **233**, 238  
study of interaction of HIV-1 Tat(32–72) with target RNA, **241**, 31
- Nuclear proteins  
65-kDa, binding to vitamin D receptor, bacterial-expressed histidine-tagged receptor study (human), **232**, 806  
binding by conserved region in first intron of insulin receptor gene during adipocyte differentiation, **240**, 701  
and cytoplasmic proteins, O-glycosylation regulation, **231**, 237  
ventricular, from failing and nonfailing human hearts, quantification of cAMP-response element binding protein, **236**, 351
- Nuclear receptor corepressor  
SMRT, inhibition of interstitial collagenase transcription through HRE-independent mechanism (rabbit synovial fibroblasts), **237**, 52
- Nuclear receptors  
and ELP isoforms, role in transcriptional regulation, **230**, 407  
genes related to NOR-1, in MCF-7 cells, effect of retinoic acids (human), **231**, 417  
inhibition by mutant thyroid hormone receptor  $\beta$ 1 identified in patient with resistance to thyroid hormone, **238**, 39; *erratum*, **240**, 507
- Nuclear signaling motifs  
and SH2 domain, presence in ligand for SH3 domain of adaptor protein Nck: NAP4, **239**, 488
- Nuclear translocation  
angiogenin in cultured umbilical artery endothelial cells, via microtubule- and lysosome-independent mechanisms (human), **238**, 305  
BLM protein by nuclear localization signal, **240**, 348  
MAD, upon stimulation of *dpp* pathway (*Drosophila*), **238**, 595  
MAP kinase in HL-60 cells, 1,25-dihydroxyvitamin D<sub>3</sub>-induced, upstream regulation by protein kinase C, **241**, 419
- Nuclear transport  
active, lipovitellin-2 (chicken), **234**, 760  
angiogenin in cultured umbilical artery endothelial cells via microtubule- and lysosome-independent mechanisms (human), **238**, 305  
MAD, upon stimulation of *dpp* pathway (*Drosophila*), **238**, 595
- Nucleases  
precursor tRNA 3'-end-processing, purification and characterization (*Aspergillus nidulans*), **233**, 354
- Nucleic acids  
binding of zinc finger-containing initiation factor eIF-5 to, zinc dependence (*Zea mays*), **236**, 510
- Nucleolysin  
alternative form, binding to T-cluster DNA in silencer element of platelet factor 4 gene (human), **235**, 625
- Nucleoplasmic  
nuclear localization sequence, distinct domain, effect on transport, **235**, 19
- Nucleoporin  
p62, interaction with trimerization domain of human heat shock factor 2, **240**, 228
- Nucleoproteins  
influenza virus, gene expression, inhibition by liposomally endocapsulated antisense phosphorothioate oligonucleotides in clone 76 cells, **232**, 545
- Nucleoside transport  
in liver, correlation with expression of sodium-dependent purine nucleoside carrier mRNA (rat), **233**, 572

## Subject Index

## Nucleoside triphosphates

effects on luminescent reaction catalyzed by firefly luciferase, **237**, 445

## Nucleosomes

role of oligoadenosine tract in formation, **235**, 663

## Nucleotides

binding by aldehyde dehydrogenase, role of conserved glycine residues 229 and 234 (*Vibrio harveyi*), **238**, 448

binding by autotaxin: identification of photoaffinity attachment sites, **236**, 449

effects on denaturation of F-actin, **236**, 798

extracellular, induction of Mac-1 surface expression on peripheral blood leukocytes (human), **233**, 71

promoted second messenger signaling responses, in 1321N1 cells expressing P2Y receptor (human), **235**, 717

second messenger responses promoted by, lack of mediation by 6H1 orphan receptor proposed for p2y5 receptor, **236**, 455

## L-Nucleotides

chiral discrimination by deoxycytidine kinase (mouse), **239**, 329

## Nucleotide sequence

15-kDa protein gene (*Cryptosporidium parvum*), **230**, 164

16S rRNA (*Xanthomonas campestris*), **235**, 276

56–58-kDa antigen cDNA, transplant coronary artery disease-associated (human), **236**, 716

ACTH receptor gene (human), **230**, 7

activin  $\beta_C$  and  $\beta_E$  genes (mouse), **231**, 655

adenosine kinase gene (human, rat), **231**, 645

adrenomedullin receptor homologue cDNA (human), **240**, 183

aldehyde dehydrogenase cDNA, hepatic cytosolic (rat), **236**, 527

apoptosis signal-regulating kinase 1 cDNA (mouse), **239**, 905

aquaporin 8 cDNA (rat testis), **237**, 714

aquaporin 9 cDNA: glycerol permeability (human adipose tissue), **241**, 53

bfp cDNA: RING finger protein (rat brain), **240**, 8

bicistronic cDNA transcript encoding dentin-specific proteins (rat), **231**, 425

BMAL-1 cDNA (human), **233**, 258

bone morphogenetic protein type II receptor cDNA (mouse), **235**, 499

$\kappa$ -bungarotoxin cDNA (snake venom), **230**, 192

Ca<sup>2+</sup>/calmodulin-dependent protein kinase II  $\gamma_E$  isoform cDNA (human pancreatic islets), **236**, 473

carboxylesterase cDNA in intestine, putative (human), **233**, 117

cardiotoxin 4 gene (Taiwan cobra), **239**, 756

catechol 2,3-dioxygenase gene (*Achromobacter xylosoxidans* KF701), **238**, 430

$\alpha$ E-catenin clone 3'UTR extension (human), **237**, 177

CCAAAT-enhancer binding protein-delta gene promoter (rat), **231**, 30

CCK-A receptor gene (mouse), **236**, 630

CDEP cDNA: protein with ezrin-like and Dbl homology domains (human), **241**, 369

ceramide galactosyltransferase cDNA (human), **232**, 449

chemoattractant-like receptor CMKRL3 cDNA (rat), **241**, 390

cobrotoxin gene (Taiwan cobra), **239**, 756

CREM $\tau\alpha$  cDNA (dog), **237**, 74

$\gamma$ S-crystallin cDNAs:  $\gamma$ S1 and  $\gamma$ S2 (lip shark), **240**, 51

*p*-cymene methyl hydroxylase gene (*Pseudomonas aureofaciens*), **233**, 502

cytochrome b<sub>5</sub> cDNAs

homologous forms (rat brain), **236**, 641

soluble and membrane-bound forms (pig), **240**, 80

cytochrome P450 3A30 cDNA (*Fundulus heteroclitus*), **236**, 306

cytochrome P450 4C8 cDNA from termite *Mustotermes darwiniensis*, **241**, 579

cytochrome P450 4T1 cDNA-derived ORF (rainbow trout liver), **236**, 302

DEC1 bHLH protein cDNA expressed in differentiated embryo chondrocytes (human), **236**, 294

diastrophic dysplasia sulfate transporter gene 5'-flanking region (mouse), **238**, 738

1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>-inducible cDNA (human), **235**, 407

DJ-1 cDNA (mouse), **231**, 509

*dnaJ* homologue gene (*Synechococcus* sp. PCC7942), **236**, 461

DNA polymerase  $\alpha$  gene (*Leishmania donovani*), **234**, 95

DNase cDNA (human), **231**, 499

dopamine D4 receptor gene 5'-flanking region (human), **235**, 321

DVL-3: *dishevelled* gene (human), **239**, 510

eIF-4A1 5'-noncoding region (human), **233**, 844

endo-1,4- $\beta$ -glucanase genes (*Erwinia carotovora* subsp. *carotovora* LY34), **241**, 636

endothelin receptor type B-like gene enriched in brain (human), **233**, 559

eotaxin gene immediate upstream region (human), **237**, 537

ES1 cDNA: photoreceptor-specific gene (zebrafish), **237**, 84

estrogen-responsive finger protein gene proximal upstream region (human), **236**, 765

FEG-1 gene: G protein-coupled receptor (human endothelial cells), **240**, 737

FKBP51 cDNA (human), **232**, 437

Fringe and C-Fringe 1 cDNA (chicken), **234**, 754

*ftsZ* gene (*Brevibacterium flavum*), **236**, 383

galanin-1 receptor gene 5' untranslated and flanking region (human), **241**, 558

GB virus/hepatitis C virus 5' noncoding region, **231**, 606

geranylgeranyl transferase  $\alpha$ -subunit gene (human), **235**, 10

$\alpha$ -globin genes (pigeon), **234**, 450

glucose-regulated zinc finger protein cDNA (human mesangial cells), **238**, 179

GLUT4 glucose transporter gene: regulatory elements (human, mouse), **241**, 1

glutathione reductase gene exon 1 (mouse), **237**, 419

GP-1 cDNA (human), **231**, 360

G protein-coupled receptor cDNA

bovine kidney, **238**, 107

GPR41 (rat lung), **234**, 190

G protein-coupled receptor family related to peptide receptor (human), **231**, 651

GRB-7 cDNA (human), **232**, 5

Gu/RNA helicase II-binding protein cDNA (human), **234**, 335

heat shock cognate protein HSC70 cDNA (*Pleurodeles waltl*), **238**, 159

hedgehog cDNA (ATDC5 cell), **235**, 142

helix-loop-helix Id1 gene (human), **231**, 628

hepatic rhodanese cDNA (human), **231**, 56

hepatitis C virus genotype 5a, complete coding sequence, **236**, 44

hepatitis C virus genotype 6a, complete coding sequence, **234**, 393

hepatoma-derived growth factor cDNA (murine testis), **238**, 26

HiAT1 cDNA: hippocampus abundant gene transcript 1 (mouse), **238**, 126

HMG-like protein Pf16 gene (*Plasmodium falciparum*), **234**, 101

H<sup>+</sup>/peptide cotransporter regulatory factor, pH-sensitive (human), **237**, 577

hPOP1 promoter fragment (human), **241**, 59

HRP-1 and -2 cDNAs (murine testis), **238**, 26

5-HT<sub>5A</sub> receptor gene, variation (human), **233**, 6

human homologue of *Drosophila* translocation protein 1 cDNA, **230**, 100

human homologue of mouse jerky gene, **236**, 389

25-hydroxyvitamin D<sub>3</sub> 1 $\alpha$ -hydroxylase cDNA (human), **239**, 527

inducible and noninducible carbonyl reductase genes (rat), **230**, 518

inositol 1,3,4-trisphosphate 5/6 kinase cDNA (*Arabidopsis thaliana*), **232**, 678

integrin  $\alpha 6$  subunit gene 5'-flanking region (human), **241**, 258

integrin variant  $\beta 4E$  cDNA (human), **235**, 826

interferon- $\beta$  gene (rat), **232**, 698

intestinal trefoil factor receptor, putative (rat), **237**, 673

iodothyronine deiodinase cDNA, chicken type I, **241**, 459

*lep* gene: leader peptidase I (*Azotobacter vinelandii*), **239**, 393

Limk2 gene 5'-upstream region (mouse), **241**, 243

long-chain acyl-CoA hydrolase cDNAs from brain and liver cytosol (rat), **232**, 198

lysosomal  $\alpha$ -mannosidase cDNA (human), **200**, 239; *erratum*, **232**, 583

## Nucleotide sequence (continued)

- major histocompatibility complex class I-related gene cDNA: murine homolog of human gene, **238**, 697
- MAN2B2 mouse homologue cDNA:  $\alpha$ -D-mannosidase, **241**, 439
- mBSSP-3 cDNA: murine brain-specific serine protease with Kringle-like domain and scavenger receptor cysteine-rich motifs, **239**, 386
- metronidazole resistance locus (*Helicobacter pylori*), **236**, 785
- monocyte-macrophage differentiation-dependent gene (human), **235**, 4
- MRF4* gene distal regulatory region (rat), **237**, 170
- MUC3 cDNA: novel 59-amino acid tandem repeat region (human), **238**, 143
- mucin homologue clone rMuc5AC, 3' noncoding region (rat), **236**, 789
- multidrug resistance protein homologue *SMRP* cDNA (human), **238**, 790
- myotoxin *a* cDNA (rattlesnake), **230**, 607
- NAD<sup>+</sup>-dependent 15-hydroxyprostaglandin dehydrogenase gene (mouse), **235**, 582
- NADH:ubiquinone oxidoreductase subunit cDNAs (human), **241**, 589
- neural Ca<sup>2+</sup> channel  $\alpha_1$ -subunit cDNA (squid), **230**, 147
- oxygen-regulated protein ORP150 cDNA (human), **230**, 94
- P2Y<sub>4</sub>-like receptor DNA (human), **236**, 106
- p14.5 promoter fragment (human), **241**, 59
- p150<sup>fract</sup> cDNA (mouse), **231**, 344
- Pax6* mRNA alternative splice forms (bovine eye), **240**, 196
- peptidylglycine  $\alpha$ -hydroxylating monooxygenase cDNA (sea anemone), **241**, 509
- peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2 cDNAs (bovine), **239**, 857
- phnD* gene: 2-hydroxymuconic semialdehyde hydrolase (*Pseudomonas* sp. strain DJ77), **232**, 288
- phnG* gene: 2-hydroxymuconic semialdehyde dehydrogenase (*Pseudomonas* sp. DJ77), **240**, 41
- phnH* gene: 2-hydroxy-pent-2,4-dienoate hydratase (*Pseudomonas* sp. strain DJ77), **238**, 56
- 6-phosphogluconate dehydrogenase *gnd* gene (*Actinobacillus actinomycetem-comitans*), **230**, 220
- pkI* gene encoding pyruvate kinase I (*Photobacterium leiognathi*), **239**, 228
- plasmid pXV64 encoding Rep protein (*Xanthomonas campestris* pv. *vesicatoria*), **231**, 121
- PMP69 cDNA: putative peroxisomal ABC-transporter (human), **237**, 152
- presenilin 1 gene (*Microcebus murinus*), **228**, 430; *erratum*, **231**, 520
- proopiomelanocortin cDNA (white sturgeon), **230**, 452
- proteasomal subunit *GPROS-28* clone (chicken), **234**, 216
- protein phosphatase 2A B $\beta$ ' subunit cDNA (*Xenopus laevis*), **232**, 218
- protein-tyrosine-phosphatase cDNA (human), **231**, 77
- Rub3B open reading frame (rat), **236**, 719
- reticulocalbin cDNA (human), **231**, 283
- rfbG* gene: CDP-D-glucose 4,6-dehydratase (*Azotobacter vinelandii*), **240**, 153
- Rgs12* and *Rgs14* cDNAs (rat), **233**, 770
- RNA helicase gene encoding DEAH-box protein family member (human), **240**, 335
- RNase H1 gene (*Drosophila melanogaster*), **240**, 844
- RNB6 cDNA: protein highly expressed in neonatal brain (rat), **237**, 307; *erratum*, **241**, 611
- rspD* gene encoding primary sigma factor of *Xanthomonas campestris*, **232**, 712
- salt-tolerant protein cDNA (rat), **229**, 134; *erratum*, **240**, 244
- scavengase p20 gene (*Escherichia coli*), **233**, 848
- scavenger receptor class B type I cDNA (rat ovary), **234**, 499
- secretory leukocyte protease inhibitor cDNA (mouse), **232**, 687
- seminal vesicle autoantigen gene (mouse), **231**, 106
- SH3BGR gene promoter region (human), **241**, 321
- SH3 domain-containing proline-rich protein cDNA (mouse), **235**, 794
- SHP substrate-1 cDNA (mouse), **231**, 61
- sigma receptor type 1 cDNA and gene 5' flanking region (mouse), **241**, 535

- SMemb/NMHC-B gene: smooth muscle myosin heavy chain embryonic form (rabbit), **239**, 598
- smooth muscle myosin heavy chain cDNAs (mouse), **232**, 313
- SMT3 cDNA (*Caenorhabditis elegans*), **234**, 788
- SNAP-23 cDNA (mouse adipocytes), **234**, 257
- snoRNA genes from *Naja n. atra* and *Bungarus multicinctus*, **236**, 782
- somatolactin cDNA clone (goldfish), **232**, 282
- spermatogenesis-associated protein RSP29 cDNA (rat), **241**, 714
- spleen cell-expressed gene mediating immunity to malaria (mouse), **230**, 167
- steroidogenic acute regulatory protein cDNA (rat), **230**, 528
- steroid receptor coactivator-1 splicing variant cDNAs, **236**, 83
- TAFII<sub>11</sub> cDNA (rat PC12 cells), **234**, 230
- TATA-binding protein mRNA cDNAs (chicken embryo), **234**, 406
- TBP-binding repressor Dr1 cDNA (*Xenopus laevis*), **231**, 561
- TBP-interacting protein 49 (rat), **235**, 64
- T-cluster binding protein gene (human), **235**, 625
- tec* promoter region (mouse), **234**, 376
- Tetrahymena* 14-nm filament protein/citrate synthase gene expressed in *E. coli*, **237**, 205
- threonine dehydrogenase gene (*Xanthomonas campestris*), **235**, 300
- thyrotropin receptor cDNA, ovine brain-derived, **238**, 173
- TMEM1 gene on chromosome 21q22.3 (human), **235**, 185
- transcription factor NFATc cDNA (mouse), **240**, 314
- transglutaminase 1 gene (human), **235**, 10
- tsc-1* cDNAs expressed specifically in adult testis (mouse), **240**, 261
- TT virus: DNA virus associated with posttransfusion hepatitis (human), **241**, 92
- VAFl cDNA: mouse homologue of ERC-55, **233**, 765
- vascular endothelial growth factor gene promoter region (human), **230**, 413
- vitamin D<sub>3</sub> 25-hydroxylase cDNA (porcine liver), **241**, 491
- X-linked hypophosphatemia cDNA (human), **231**, 635
- ZF3 cDNA clone of maize encoding eukaryotic initiation factor 5, **236**, 510
- zinc finger protein cDNA (human, mouse), **231**, 481
- Nucleus**
- apoptotic human leukemia cells, shifts in DNA polymerase  $\alpha$  distribution and activity, **234**, 303
- Ca<sup>2+</sup> signals, gene regulation by: breakthroughs and views, **236**, 541
- CHO cells, p70 S6 kinase, effect of insulin, **234**, 681
- and cytoplasm, distribution of androgen receptor and prostate-specific antigen in LNCaP cells, role of 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **235**, 539
- and cytosol, rat kidney inner medullary collecting duct cells, Ca<sup>2+</sup> signaling induced by extracellular ATP, **234**, 224
- differential migration of acylphosphatase isoenzymes from cytoplasm during apoptosis (K562 and Jurkat cells), **231**, 717
- Dvrk* nuclear localization (mouse), **231**, 640
- endothelin-1-induced signaling cascades, role of Rho GTPase (Rat-2 cells), **232**, 223
- Friend cells, DMSO-induced differentiation, effect on association of phosphatidylinositol-transfer protein with nucleus (mouse), **230**, 302
- G-actin accumulation, induction by adenine nucleotides in isolated rat hepatocytes, **240**, 697
- hepatic, calcium concentration, increase by sphingolipids (rat), **238**, 347
- localization of MCM/P1 proteins (human), **236**, 118
- NS3 protein of hepatitis C virus accumulation, effect of wild-type and mutant p53, **230**, 431
- Nutrients**
- regulation of intestinal Na<sup>+</sup>/glucose cotransporter gene expression (lamb), **230**, 624
- Nutrition**
- enteral and parenteral, effects on leptin gene expression and hormone release (rat), **237**, 98
- Nutritional signals**
- fission yeast cell cycle response to, role of nim1 protein kinase, **232**, 204

## O

## Obesity

- and hyperglycemia and fasting, genes regulating, in Otsuka Long-Evans Tokushima fatty rat model for obese NIDDM, **241**, 200
- and hypertriglyceridemia and insulin resistance, relationship to TNF- $\beta$  gene Ncl I polymorphism (human), **236**, 829; *erratum*, **240**, 507
- juvenile onset, lack of association with amino acid variants of leptin receptor (human), **233**, 248
- leptin binding factor in human serum, **233**, 818
- visceral, relationship to serum leptin levels (human), **239**, 340

Obtusifoliol 14 $\alpha$ -demethylase

- cDNA cloning and expression in yeast (wheat), **230**, 381

## Ofloxacin

- inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536

## Okadaic acid

- CHO cells resistant to, unstable expression of multi-drug resistance phenotype, **232**, 398
- downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328
- effect on phosphorylation of dynactin (Rat2 cells), **232**, 810
- stimulation of H ferritin transcription by okadaic acid by increased interaction between p300 and transcription factor Bbf, **240**, 179

## Oleic acid

- mobilization of intracellular calcium independent of IP<sub>3</sub> generation and via insertion at plasma membrane (Ehrlich ascites tumor cells), **241**, 312

## Oleimide

- production by mouse neuroblastoma cells, **239**, 473

## Olfactory mucosa

- expression of metallothioneins 1 and 2 in untreated tissue and during epithelial regeneration (mouse), **232**, 136

## Olfactory receptors

- expressed in male germ line, molecular cloning and chromosomal mapping (human), **237**, 283

## Oligoadenosine tracts

- role in nucleosome formation, **235**, 663

## Oligodeoxynucleotides

- antisense, *see* Antisense oligodeoxynucleotides

## Oligomerization

- apolipoprotein A-I, levels in HDLs from hypercholesterolemic chickens, **239**, 570
- calsequestrin in normal and transformed skeletal muscle (dog, rabbit), **240**, 721
- expanded-polyglutamine domain fluorescent fusion proteins in cultured mammalian cells, **238**, 599
- p53, role in p53 effects on growth of 53-deficient osteosarcoma Saos-2 cells (human), **232**, 54

## Oligonucleotides

- antisense, *see* Antisense oligonucleotides
- hairpin, regulation of cytokine-induced nitric-oxide synthase expression in cerebral endothelial cells (mouse), **235**, 394
- ligands to chloroaromatics, *in vitro* selection using magnetic bead-based affinity separation and fluorescence detection, **234**, 117
- mismatched, minimal domain in hMSH-2 sufficient for binding of, mapping, **232**, 10
- phosphorothioate-containing triple-helix-forming, targeted to polypurine tract, inhibition of HIV-1 replication, **233**, 742

## Oligoproline

- regions in *Listeria* ActA surface protein and human vasodilator-stimulated phosphoprotein, docking sites for actin-based motility, **231**, 686

## Oligosaccharides

- branched, building block 3-O- $\alpha$ -L-fucopyranosyl-2-acetamido-2-deoxy-D-glucopyranose, all-aqueous regiospecific synthesis, **234**, 358
- N-linked, of glycoproteins, elements involved in reactivity of rat NKR-PIA with, **238**, 149

## ONO-5046

- prevention of stress-induced decrease in gastric prostaglandin I<sub>2</sub> (rat), **231**, 52

## Oocytes

- coexpression of excitatory or inhibitory G protein-coupled receptors for ligand identification (*Xenopus laevis*), **233**, 853
- cytosol and plasma membrane receptors, binding of progesterone (frog), **232**, 213
- development, fibroblast growth factor-8 expression during, analysis (mouse, rat), **232**, 173
- expressing rat brain cortex poly (A)<sup>+</sup> RNA, Gs-coupled receptor-mediated cAMP production, enhancement by baclofen (*Xenopus laevis*), **241**, 476
- expression of non-MDR2-coded hepatic phosphatidylcholine membrane transport protein (*Xenopus laevis*), **231**, 277
- fertilization channels, gating by NO via nicotinamide nucleotide metabolism (*Ciona intestinalis*), **239**, 723
- maturation, pre-maturation-promoting factor activation during, mediation by proteasome (starfish), **236**, 40
- mature, Cre recombinase activity irrespective of *cre* transgene transmission, transgenic mouse line retaining, **237**, 318
- plasma membrane, functional incorporation of P-glycoprotein into, relationship to swelling-evoked conductance (*Xenopus laevis*), **237**, 407
- protein phosphatase 2A B $\beta$ ' subunit activity (*Xenopus laevis*), **232**, 218
- TBP-binding repressor Dr1 expression (*Xenopus laevis*), **231**, 561

## Oogenesis

- presenilin- $\alpha$  and - $\beta$  cDNA expression (*Xenopus laevis*), **231**, 392

## Operons

- mex*, gene products, role in antibiotic extrusion in *Pseudomonas aeruginosa*, **233**, 611
- SRP pathway-related, encoded 13-kDa protein with helix-turn-helix motif (*Mycoplasma mycoides*), **231**, 839

## Ophthalmopathy

- Graves', pathogenesis, link to full length and splice variant thyrotropin receptor expression in skeletal muscle of extraocular origin (human), **230**, 493

 $\delta$ -Opioid

- modulation of protein kinase C and cAMP-dependent protein kinase, **236**, 626

 $\delta$ -Opioid receptor

- agonist-dependent activation, role of receptor carboxyl terminus (mouse), **232**, 513
- agonist-dependent phosphorylation, role of receptor carboxyl terminus (NG108-15 cells), **238**, 71

 $\mu$ -Opioid receptor

- endogenous agonists endomorphin 1 and 2, hypotensive activity in rabbit, **235**, 567
- gene expression under control of dual promoters (mouse), **234**, 351

## Opioids

- binding on T47D breast cancer cells, effect of taxol, **235**, 201

*Oplophorus* luciferase

- as bioluminescent reporter protein using coelenterazine analogues as substrate, **233**, 349

## OprM

- role in antibiotic extrusion in *Pseudomonas aeruginosa*, **233**, 611

## Optical anisotropy

- cooperativity-induced changes during photocycle of bacteriorhodopsin, **233**, 532

## Oreganic acid

- inhibition of Ras farnesyl-protein transferase (human), **232**, 478

## Organogenesis

- hepatocyte growth factor as tissue organizer for, analysis, **239**, 639
- internal, in *Xenopus* embryo, role of Met tyrosine kinase activation by HGF, **234**, 8

## Organoids

- embryonic lung, bronchoalveolar structure formation in, role of HGF (rat), **241**, 98

## Subject Index

- Organophosphorus hydrolase  
enzymatic hydrolysis of Russian-VX by, **241**, 294
- Organotin compounds  
effects on trout hemoglobin, **238**, 301
- Ornithine decarboxylase  
induction in leukemia L1210 cells stimulated to growth, role of phosphatidylinositol 3-kinase, **239**, 729  
mRNA, translation, and polyamine transport, suppression in *ras*-transformed CREF cells by depletion of eIF-4E, **240**, 15
- Orphanin FQ/nociceptin  
activation of protein kinase C via phospholipase C/Ca<sup>2+</sup> pathway (CHO cells), **240**, 304
- Orphanin FQ/nociceptin receptor  
biochemical evidence for heterogeneity in brain (mouse), **230**, 462
- Osmosensors  
EnvZ, periplasmic domain, purification and characterization (*Escherichia coli*), **231**, 68
- Osteoblasts  
cell populations rich in, from calvariae, stimulation by angiotensin II (rat), **230**, 176  
clonal line from p53 null mouse calvariae, role of bone morphogenetic protein-2 for mature phenotype, **231**, 196  
human, ERK1 and -2 activation by FGF-2 and PDGF-BB, and differences in ERK1 mobility and in-gel renaturation in human, mouse, and rat cells, **238**, 134  
marrow stromal, protein expression, effects of estrogen (mouse), **233**, 30  
MC3T3-E1  
fluoroaluminate-induced pertussis toxin-sensitive protein phosphorylation (mouse), **235**, 680  
increased TGF- $\beta$ 1 mRNA levels, induction by electrical stimulation by mechanism involving Ca<sup>2+</sup>/calmodulin pathway (mouse), **237**, 225  
osteogenic differentiation, induction by hedgehog proteins, **237**, 465  
MG-63 HOS and UMR106-01, steroid sulfatase activity (human, rat), **231**, 42  
parathyroid hormone-related peptide expression, upregulation with kinetics of immediate early gene by parathyroid hormone (human), **239**, 155  
ROS17/2.8, MAP kinase, activation by estrogen (rat), **235**, 99
- Osteoblast-specific factor-1  
mRNA, expression, regulation by dual promoters (mouse), **238**, 831
- Osteoblast stimulating factor-1  
effect on bone mass loss due to estrogen deficiency in transgenic mouse overexpressing OSF-1, **238**, 528
- Osteocalcin  
gene expression and protein production by marrow stromal adipocytes (mouse), **231**, 442
- Osteoclast-like cells  
formation in cocultures of mouse bone marrow cells and calvarial cells, stimulatory effects of Ca<sup>2+</sup>-ATPase inhibitors and calcium ionophore, **237**, 111
- Osteoclastogenesis inhibitory factor  
from human fibroblasts, isolation, **234**, 137
- Osteoclasts  
bone resorption  
effect of concanavalin A (rabbit), **234**, 600  
regulation by glucose (chicken), **235**, 646  
generation  
cytokine from human fibroblasts inhibiting, isolation, **234**, 137  
induced by synovial fibroblasts, role in bone destruction in rheumatoid arthritis (human), **240**, 279  
role of M-CSF (pig), **231**, 231  
pH, regulation, dependence on culture substrate and stage of resorption cycle (rat), **235**, 838
- Osteogenesis  
related differentiation, induction by hedgehog proteins, **237**, 465
- Osteogenic protein-1  
mRNA, expression in kidney, ovary, and uterus, effects of pregnancy and estrogen (mouse), **234**, 242
- Osteoinduction  
ectopic, by recombinant human BMP-2 and *Xenopus* BMP-4/T heterodimer *in vivo*, comparison, **239**, 575
- Osteopontin  
gene expression and protein synthesis in cultured mesangial cells (rat), **233**, 81  
phosphorylation by Golgi apparatus casein kinase, **240**, 602  
upregulation in ischemia-induced renal failure in rat, and role of ET-1, **241**, 212
- Osteosarcoma cells  
143BTK, mtDNA-less, isolation and characterization using ditercalinium (human), **239**, 257  
biglycan gene promoter, regulation by cAMP (human), **235**, 413  
HOS, radiation-induced cell cycle arrest and apoptosis, promotion by GML overexpression (human), **241**, 481  
MG63, expression of WAF1/Cip1, effects of histone deacetylase inhibitor trichostatin A (human), **241**, 142  
Saos-2 cells deficient in p53, growth suppression by p53, role of p53 oligomerization (human), **232**, 54  
U-2 OS, Hox gene expression, modulation by TGF- $\beta$  superfamily (human), **233**, 365
- Ovalbumin  
soluble, immunoadjuvancy of liposomes in induction of immune responses to, relationship to surface charge, **240**, 793
- Ovarian carcinoma cells  
endotoxin tolerance of OVCAR-3 cells, role of LPS-inducible I $\kappa$ B kinase (human), **232**, 602  
radiation-resistant phenotype, role of signal transduction pathway (human), **230**, 196
- Ovary  
developmentally regulated expression of fibroblast growth factor-8 (mouse, rat), **232**, 173  
expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279  
heat-stable serine protease inhibitor protein purification (desert locust), **238**, 357  
peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857  
scavenger receptor class B type I cloning, characterization, and cellular distribution (rat), **234**, 499  
and uterus and kidney, osteogenic protein-1 mRNA, effects of pregnancy and estrogen (mouse), **234**, 242
- Oviduct  
estrogen and progesterone receptors, identification and characterization (alligator), **232**, 308
- Oxalate  
effects on manganese peroxidase activity (*Phanerochaete chrysosporium*), **239**, 645
- Oxidability  
JL 13, comparison with clozapine and loxapine, **238**, 252
- Oxidase  
conversion from xanthine dehydrogenase in liver, role of peroxynitrite (rabbit), **230**, 476
- Oxidation  
caffeine to theobromine and theophylline, catalysis by flavin-containing monooxygenase in hepatic microsomes (rat), **235**, 685  
1,2-dimethylhydrazine auto-oxidation, induced proliferation of mouse fibroblasts: role of iron and free radicals, **234**, 44  
high-density lipoprotein, status in hypercholesterolemic chicken: lipid peroxide content, apo A-I oligomerization, and *in vitro* oxidation, **239**, 570

- induced damage  
 DNA, protective effects of electrolyzed-reduced water, **234**, 269  
 mitochondrial DNA, after chronic ethanol consumption (rat), **235**, 286  
 low-density lipoprotein, copper ion-mediated, protective effect of lipoic acid analogue 1,2-diselenolane-3-pentanoic acid, **240**, 819  
 metal-catalyzed, extracellular matrix proteins, effect on integrin-mediated adhesion of mesangial cells (mouse), **233**, 50  
 modification of tryptophan residues exposed to peroxynitrite, **234**, 82  
 and S-nitrosation, in NO-mediated inhibition of caspase-3 (U937 cells), **238**, 387  
 substrate competitive, in mitochondria, effects of mild respiratory chain deficiency (human), **236**, 643
- $\alpha$ -Oxidation  
 phytanic acid, pathway resolution: pristanal as product of decarboxylation of 2-hydroxyphytanoyl-CoA, **237**, 33
- Oxidative burst  
 plant, role of phospholipase D, **237**, 10
- Oxidative phosphorylation  
 yield, control by force and flux (rat), **232**, 532
- Oxidative response  
 differential, to particulate air pollutants in human and rat alveolar macrophages, **240**, 669
- Oxidative stress  
 cellular sensitivity conferred by mtDNA mutations, partial rescue by calcium depletion and cyclosporin A, **239**, 139  
 detection in amyloid deposits in systemic amyloidosis (human), **232**, 497  
 effect on hepatocyte iNOS gene transcription and promoter activity (rat), **234**, 289
- Oxim derivatives  
 inhibition of HIV-1 protease, **230**, 557
- Oxophenylarsine  
 inhibition of insulin activation of phosphatidylinositol 3'-kinase (3T3-L1 cells), **239**, 316
- 3-Oxo-pristanoyl-CoA  
 specific reaction with sterol carrier protein X: SCPx as peroxisomal branched-chain  $\beta$ -ketothiolase, **236**, 565
- Oxygen  
 cellular consumption, effect of oncogene transformation of embryo cells (rat), **235**, 739  
 hemocyanin functional unit binding, complete amino acid sequence (*Rapana thomasiana*), **238**, 403  
 metabolism, tracing with positron emitter oxygen-15, **231**, 131  
 singlet, photochemical formation in illuminated 6-methylcoumarin solutions, **235**, 615  
 tolerance of membrane-bound hydrogenase from *Hydrogenovibrio marinus*, **232**, 766
- Oxygenase  
 component of naphthalene dioxygenase, purification and crystallization in native and selenomethionine-derivatized forms, **241**, 553
- Oxygen radicals  
 monocyte chemotactic protein-4-induced production in human eosinophils via pertussis toxin-sensitive G protein, **240**, 32  
 role in lactoferricin-induced apoptosis in leukemic cells (human), **237**, 624
- Oxygen-regulated protein  
 ORP150, cDNA cloning and expression (human), **230**, 94
- Oxytocin  
 and ATP, electrophysiological responses in human sweat gland cell line monolayers, **234**, 30
- P
- PI RepA  
 interaction with replication origin of plasmid Rts1, **241**, 570
- p2<sup>src</sup> peptide  
 AEAMSQVTNTATIM, processed from HIV-1 Pr55<sup>src</sup>, identification as suicide inhibitor of viral protease, **241**, 275
- P2 receptor  
 agonists ATP $\gamma$ S,  $\alpha,\beta$ -methylene-ATP, and AMP-PNP, inhibition of ecto-ATPase in endothelial cells (bovine pulmonary artery), **233**, 442
- P2X receptor  
 extracellular domain, structural motif and characteristics (rat), **236**, 670
- P2X<sub>2</sub> receptor  
 molecular assembly of extracellular domain, **240**, 618
- P2Y receptor  
 1321N1 cells expressing, nucleotide-promoted second messenger signaling response (human), **235**, 717
- P2Y<sub>3</sub> receptor  
 6H1 orphan receptor proposed for, lack of mediation of nucleotide-promoted second messenger responses, **236**, 455  
 cloning of human heptahelical receptor closely related to, **236**, 106
- P2Y<sub>6</sub> receptor  
 cloning of three cDNAs, and pseudogene identification: comparison of P2Y subtype expression in bone and brain tissues (human), **237**, 297; *erratum*, **240**, 507
- p14.4  
 gene promoter, isolation and characterization: p14.5-hPOP1 region bidirectional promoter function (human), **241**, 59
- p16  
 gene expression, loss in malignant skin tumors (human), **230**, 85
- p16<sup>INK4a</sup>  
 effect on unbounded and anchorage-independent growth of glioblastoma cell line lacking p16<sup>INK4a</sup> protein, **231**, 743  
 exogenous, effects on growth of cells with various status of cell-cycle regulators, **234**, 386
- p17  
 HIV-1, antibodies against, cross-reaction with human superoxide dismutase-2, **230**, 184
- p19<sup>INK4D</sup>  
 stat3-dependent transcriptional activation, association with IL-6-induced growth arrest (M1 cells), **238**, 764
- p20 scavengase  
 gene isolation: relationship to peroxiredoxins (*Escherichia coli*), **233**, 848
- p21  
 expression in HT-29 colonic epithelial cells, stimulation by butyrate, **232**, 169  
 promoter, *in vitro* transcriptional activation by p53, **234**, 300
- p21<sup>CIP</sup>  
 cell cycle inhibitor, phosphorylation by cyclin A-cdk2 complexes, **241**, 434
- p21<sup>Cip1/WAF1</sup>  
 expression in BALB/c 3T3 fibroblasts, upregulation by loss of cell adhesion to substratum, **238**, 169
- p21 Ras  
 farnesylated, GTP loading by insulin at plasma membrane (3T3-L1 cells), **239**, 42  
 geranylgeranyl and farnesyl moiety transfer (rat), **231**, 789
- p21<sup>WAF1/CIP1</sup>  
 gene, functional expression in rat glioma cells, effect on growth *in vivo* and induction of radiosensitivity (human), **233**, 329
- p21<sup>Waf1/Cip1</sup>  
 promoter, activation by *ets* oncogene family transcription factor E1AF (human), **236**, 79
- p21<sup>WAF/CIP1</sup>  
 promoter activity in NIH3T3 cells, p53-independent enhancement by sodium butyrate, **237**, 457
- p27<sup>Kip1</sup>  
 overexpression, effect on cell cycle regulation in HeLa cells, **238**, 534

- p34<sup>cdc2</sup> kinase substrate peptides  
and MAP kinase, effects on motility and phosphorylation status of demembrated fowl spermatozoa, **240**, 116
- p38  
activation by hypoxia and hypoxia/reoxygenation in cultured cardiac myocytes (rat), **239**, 840  
activation in A431 and Swiss 3T3 cells, induction by low extracellular pH, **241**, 236  
-CSBP, homologs, activation, substrate specificity, and sensitivity to inhibition by pyridinyl imidazoles, **235**, 533  
regulation of endothelial VCAM-1 expression at post-transcriptional level (human), **230**, 44  
related signaling cascade, mediation of intestinal epithelial wound-induced signal transduction (IEC-6 cells), **233**, 389  
role in p70S6 kinase activation by sodium arsenite in adult rat cardiomyocytes, **238**, 207  
tyrosine phosphorylation in TNF-stimulated neutrophils (human), **235**, 42
- p44/p42  
CREB phosphorylation at Ser-133 via pathway dependent on, induction in PC12 cells by elevated amyloid  $\beta$  protein(1-40) levels, **232**, 637
- p47phox  
and p67phox, proline-rich regions, role in phagocyte NADPH oxidase activation *in vitro*, **241**, 226
- p53  
apoptosis mediated by, telomerase activity in immortalized endothelial cells undergoing, analysis (human), **241**, 642  
association with nuclear envelope in testis (mouse), **235**, 689  
effect on sodium butyrate-induced p21<sup>WAF/CIP1</sup> promoter activity in NIH3T3 cells, **237**, 457  
endogenous mutant p53<sup>273His</sup> in MDA-468 breast cancer cells, regulation of DNA binding and transcription, **232**, 14  
gene expression by human neutrophils, **233**, 700  
gene mutations in lung cancer from chromate-exposed workers, **239**, 95  
gene promoter, transcription, effect of CpG methylation (human), **235**, 403  
gene transfer into glioblastoma expressing wtp53 *in vivo*, intracavitary liposome-mediated, tumor-suppressing effect and effect on survival (mouse), **233**, 359  
growth inhibition independent of, and apoptosis, 2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone-induced in tumor cells: synergism with genistein, **239**, 467  
*in vitro* transcriptional activation of p21 promoter, **234**, 300  
knockout mice, aortic smooth muscle cell line from, differentiation characteristics, **238**, 154  
and mda-6/WAF1/CIP1 and cyclin-dependent kinases, role in antitumor effects of interferons on B16 melanoma cells, **233**, 678  
negative regulation of estrogen receptor signaling pathways, **239**, 617  
null mouse calvariae, clonal osteoblastic cell lines from, role of bone morphogenetic protein-2 for phenotypic maturation, **231**, 196  
role in SV40 large T antigen transcriptional activation of human c-myc gene, **235**, 153  
suppression of growth of p53-deficient osteosarcoma Saos-2 cells, role of p53 oligomerization (human), **232**, 54  
targeted antibody scFv-421, characterization, **230**, 242  
wild-type, binding by topoisomerase II, and overexpression of topoisomerase II in human hepatocellular carcinoma, **234**, 194  
wild-type and mutant, effect on nuclear accumulation of NS3 protein of hepatitis C virus, **230**, 431
- p56<sup>lck</sup>  
and MAPK, activation and association in murine Th1 clone, induction by IL-18, **237**, 126  
messenger turnover upon T cell activation, regulation, role of 3' untranslated region (human), **233**, 419
- p59<sup>lck</sup>  
interaction with interferon-activated Jak kinases (human), **235**, 83
- p62  
interaction with trimerization domain of human heat shock factor 2, **240**, 228
- p65<sup>lck</sup>  
activation by hypoxia and hypoxia/reoxygenation in cultured cardiac myocytes (rat), **239**, 840
- p67phox  
gene mutation, in chronic granulomatous disease, identification (human), **231**, 861  
and p47phox, proline-rich regions, role in phagocyte NADPH oxidase activation *in vitro*, **241**, 226
- p70S6 kinase  
activation by sodium arsenite in adult rat cardiomyocytes: roles for PI 3-kinase and p38 MAP kinase, **238**, 207  
in CHO nucleus, effect of insulin, **234**, 681  
wortmannin-sensitive activation by G protein-coupled receptor G/CCK<sub>B</sub>, **238**, 202
- p75  
binding sites of TRAF1, 2, and 3, **233**, 592
- p90  
tyrosine-phosphorylated, in FGF-stimulated cells, direct association of SHP2 with, **238**, 261
- p125FAK  
tyrosine phosphorylation, suppressive effect on hydrogen peroxide-induced apoptosis of T98G cells, **241**, 769
- p150<sup>cas</sup>  
as candidate for neuromuscular disease mutation *mmd2*, cDNA sequence (mouse), **231**, 344
- p300  
and transcription factor Bbf, increased interaction between, okadaic acid stimulation of H ferritin transcription by, **240**, 179
- PAF, *see* Platelet-activating factor
- PAK-104P  
reversal of heavy metal resistance in multidrug-resistant human KB carcinoma cells, **236**, 586
- Palate  
mucosa, isolated myofibroblastic cells, apoptosis induction by basic fibroblast growth factor (rat), **240**, 21
- Palmitoylation  
A33 antigen (human), **236**, 682  
tubulin in PC12 cells, **239**, 650
- Palmitoyl-CoA  
stimulation of cellular uptake and plasma membrane binding of carnitine (S49 lymphoma cells), **233**, 752
- Palmitoyl-CoA hydrolase  
cDNAs of hydrolases from brain and liver cytosol, molecular cloning and expression (rat), **232**, 198
- Palmitylation  
Src kinases, regulation of functional interaction with B cell substrate, **234**, 325
- Pancreas  
cerulein-induced pancreatitis, amelioration by transgenic Cu/Zn-superoxide dismutase (mouse), **233**, 177  
gastrin, cholecystokinin, and somatostatin gene expression, effect of fasting (rat), **231**, 835  
glutamic acid decarboxylase gene expression, ontogeny (mouse), **233**, 227  
wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102  
zymogen granule membrane, Go $\alpha$ , Gq $\alpha$ , and Gs $\alpha$  immunoreactivity associated with (rat), **237**, 235
- Pancreastatin  
effect on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580

## Pancreatic acinar cells

## AR4-2J

differentiation, associated differential expression of Rab3 isoforms (rat), **236**, 719

tyrosine phosphorylation of insulin receptor substrate-1 and activation of PI-3-kinase pathway by glycine-extended gastrin precursors (rat), **236**, 687

intracellular pH, effect of free cytosolic  $\text{Ca}^{2+}$  levels (rat), **230**, 652

## Pancreatic acini

amylase secretion, effect of sphingosine and ceramide (rat), **235**, 197

## Pancreatic islets

arginine-induced glucagon secretion, effects of insulin secretagogues with imidazoline structure (rat), **236**, 162

cyclic ADP-ribose measurement (rat), **231**, 546

cytosolic  $\text{Ca}^{2+}$  gradients in cells, stimulation by glucose and carbachol (mouse), **235**, 465

delayed  $\text{Ca}^{2+}$  response to glucose in diabetic GK rat, **239**, 129

energy-dependent release of insulin, role of ascorbic acid (guinea pig), **231**, 820

expression of multiple isoforms of  $\text{Ca}^{2+}$ /calmodulin-dependent protein kinase II (human), **236**, 473

glucose-stimulated insulin secretion, role of MAP kinase activation (rat), **239**, 447

glycerol-1,2,3-trimethylsuccinate metabolism (rat), **236**, 26

5-hydroxytryptamine/insulin secretion, real time electrochemical detection: effects of glucose and  $\text{K}^+$  depolarization (mouse), **228**, 100; *erratum*, **231**, 519

intact, cAMP-dependent protein kinase in, pseudosubstrate inhibition: effects on cAMP- and glucose-dependent insulin secretion (rat), **232**, 648

isolated, insulin secretion and mRNA levels, effects of leptin (rat), **238**, 267  
Zucker diabetic fatty rats, uncoupling protein-2 mRNA induction by troglitazone, **237**, 359

## Pancreatitis

acute, cerulein-induced, GAPDH gene expression (rat), **235**, 636

## PAP1 protein

-DNA complex, DNA bending, detection by fluorescence resonance energy transfer, **231**, 553

## Papillomavirus

E6 oncoprotein, mouse homologue of ERC-55 binding protein for, specific interaction with vitamin D receptor among nuclear receptors, **233**, 765

## Paracrystals

actin, myosin-coated glass beads suspended from, accelerative sliding, **237**, 427

Paraoxonase, *see* Aryldialkylphosphatase

## Parathyroid cells

dispersed, flickery block of  $\text{K}^+$  channel, mediation by extracellular  $\text{Ca}^{2+}$  and  $\text{Ca}^{2+}$ -sensing receptor agonists (bovine), **230**, 616

## Parathyroid gland

PTH secretion *in vitro*, inhibition by IL-1 $\beta$ , association with upregulation of calcium-sensing receptor mRNA (bovine), **238**, 880

## Parathyroid hormone

secretion by parathyroid glands *in vitro*, inhibition by IL-1 $\beta$ , association with upregulation of calcium-sensing receptor mRNA (bovine), **238**, 880

upregulation of parathyroid hormone-related peptide expression in osteoblasts with kinetics of immediate early gene (human), **239**, 155

## Parathyroid hormone-related peptide

expression in osteoblasts, upregulation with kinetics of immediate early gene by parathyroid hormone (human), **239**, 155

## Parkinson's disease

apoptotic neuronal cell death in, role of mtDNA, **235**, 158

and incidental Lewy body disease, Bcl-2 levels: upregulation as early event in neurodegeneration, **240**, 84

pathogenesis, implications of 1-methyl-1,2,3,4-tetrahydroisoquinoline-synthesizing enzyme isolated from rat brain, **236**, 676

## Parotid acinar cells

permeabilized,  $\text{Ca}^{2+}$  release from intracellular stores in, monitoring with Mag-fura-2 and Calcium Green  $\text{C}_{18}$  (rat), **240**, 189

## Parotid acinar secretory granules

Cl<sup>-</sup> conductance in, modulation by GTP-binding protein  $\text{G}_s$  (rat), **238**, 638

## Particles

air pollutants, exposure in human and rat alveolar macrophages, differential oxidative response to, **240**, 669

## Parturition

role of nitric-oxide synthase mRNA expression in fetal membranes (human), **233**, 276

## Paxillin

PDGF-BB-stimulated phosphorylation in VSMC, inhibition by eNOS gene transfer (guinea pig), **236**, 706

## PC12 cells

CREB phosphorylation at Ser-133 via p44/p42 MAP kinase-dependent pathway, induction by elevated amyloid  $\beta$  protein(1-40) levels (rat), **232**, 637

exocytotic mechanisms of acetylcholine- and catecholamine-containing vesicles, comparison (rat), **239**, 57

growth factor-treated, neurite formation and MAP kinase activation, effect of protein-tyrosine-phosphatase inhibitor 3,4-dephosstatin, **238**, 213

morphologically distinct lines resistant to 25-OH-cholesterol toxicity, establishment, **239**, 429

NCAM degradation, dependence on NGF, **234**, 686

neurite retraction induced by sphingosine 1-phosphate via cell surface receptor-like mechanism, **240**, 329

neuronal differentiation, induction by hyperoxia via production of reactive oxygen species, **241**, 347

NGF-deprived differentiated, TAFII<sub>31</sub> gene induction by apoptosis, **234**, 230  
tau phosphorylation, cytoarchitecture, and cell death during NGF deprivation, **240**, 687

tubulin palmitoylation, **239**, 650

PCNA, *see* Proliferating cell nuclear antigen

## PD 98059

differential effects on neutrophil responses to chemotactic factors (human), **232**, 474

## Pdd1p protein

hydrophobic cluster analysis (*Tetrahymena*), **235**, 103

PDGF, *see* Platelet-derived growth factor

## Pentachlorophenol

DNA ligands to, *in vitro* selection using magnetic microbead-based affinity separation and fluorescence detection, **234**, 117

## Pentosidine

immunohistochemical localization in lipofuscin pigments of Alzheimer's disease and aged neurons, **236**, 327

## Pentostatin

in combination with 2'-deoxyadenosine, induction of differentiation of myeloid leukemia cells (human), **238**, 100

## Peplomycin

DNA damaged by, effect of mitochondrial endonuclease G (bovine), **235**, 291

## Pepsinogen C

gene product, possible role as growth factor during gastric mucosal healing (rat), **238**, 17

## PepT1

mammalian intestinal, expression and functional characterization in *Pichia pastoris*, **232**, 656

## Peptide cotransporters

human H<sup>+</sup>, PEPT1, pH-sensing regulatory factor modulating transport activity of, cloning and characterization, **237**, 577

## Peptide nucleic acids

hydrophobic tetrapeptide, -biotin chimeric molecule, synthesis, uptake, and intracellular metabolism, **236**, 323

Peptide nucleic acids (*continued*)

spermine-conjugated: UV and fluorescence studies of PNA-DNA hybrids with improved stability, **240**, 778

## Peptide receptor

related G protein-coupled receptor family, cloning (human), **231**, 651

## Peptides

 $\alpha$ -helical

anionic, effect on cationic peptide-mediating transfection systems, **235**, 726  
DnaK interaction with, potentiation by DnaJ, **233**, 627

antibacterial, detection on laid egg chorion of Medfly *Ceratitis capitata*, **240**, 657

beta cell granule, effects on human islet amyloid polypeptide fibril formation *in vitro*, **236**, 580

core, of heparin, effect on pulmonary artery smooth muscle cell antiproliferative activity, **241**, 18

cortistatin-like, identification and characterization (human), **232**, 157

D-amino acid-containing, isolation from heart, structural determination, and bioactivity (*Aplysia kurodai*), **240**, 354

fibronectin-related, bifunctional poly(ethylene glycol) hybrid of, **241**, 595

high-affinity ligands to prostate-specific antigen, identification by polysome selection, **232**, 578

HIV-1 protease inhibitors, screening with *Escherichia coli* cell assay, **233**, 36

HIV-1 Tat(32-72), interaction with target RNA, fluorescence and NMR study, **241**, 31

involved in autotaxin binding to nucleotides, identification, **236**, 449

model,  $\beta$ -helical fibrils from, **235**, 675

mutant 410 Cys→Tyr and 141 Asn→Ile, amyloid fibril formation, in Alzheimer's disease-associated presenilins 1 and 2, **235**, 249

myosin-derived C109, binding to GLUT4-vesicles and inhibition of insulin-induced glucose transport and GLUT4 recruitment in adipocytes (rat), **240**, 409

natriuretic, isolation and immunoaffinity purification (ivy), **235**, 722

p34<sup>cdc2</sup> kinase substrate, and MAP kinase, effects on motility and phosphorylation status of demembranated fowl spermatozoa, **240**, 116

perforin N-terminus, induced channel formation and  $[Ca^{2+}]$ , accumulation in PN71 lymphocytes, comparison with perforin and whole lytic granules, **240**, 647

proopiomelanocortin-derived, isolation from pituitary and structural characterization (rainbow trout), **238**, 653

RGD-containing, role in apoptosis in glomerular mesangial cells of adult kidney (human), **234**, 594

SS-A/Ro, 60-kDa, from infiltrating salivary gland lymphocytes of Sjögren's syndrome patient, Fab fragments binding, molecular cloning, **232**, 101

substrates, cleavage specificity of rhinovirus-2 2A proteinase (human), **235**, 562

## synthetic

of biological origin, induction of apoptosis and abrogation of tumorigenesis in mice *in vivo*, **240**, 208

casein kinase 2  $\beta$  regulatory subunit N-terminus, effect on CKII activity, **232**, 178

cytochrome b<sub>558</sub> large subunit hydrophilic regions, inhibition of superoxide generation in cell-free system from neutrophils, **234**, 531

FN-C/H-V, from C-terminal heparin-binding domain of fibronectin, promotion of adhesion of PMA-stimulated U937 cells, **239**, 205

MAP kinase activation loop, phosphorylation-sensitive secondary structure in, **236**, 243

principal neutralizing domain sequence of HIV-1 MN gp120, binding with sCD4, analysis using photoaffinity labeled analogues, **241**, 584

SAG1 of *Toxoplasma gondii*, direct binding to HLA-A2 and antigenicity for infected cell-specific CTL, **236**, 257

transglutaminase-inhibiting tetramers, effect on formation of cornified cell envelope, **233**, 39

vitronectin, with hemopexin-like repeats, binding to *Streptococcus pyogenes*, **234**, 445

## Peptide transporter

mammalian intestinal, PepT1, expression and functional characterization in *Pichia pastoris*, **232**, 656

## Peptidyl-dipeptidase A

inhibition effect on endothelial regrowth *in vivo* (rabbit), **231**, 577

limited proteolysis and generation of catalytically active N- and C-terminal domains (human kidney), **236**, 16; *erratum*, **238**, 271

Peptidylglycine  $\alpha$ -hydroxylating monooxygenase

molecular cloning (sea anemone), **241**, 509

## Perchlorate ion

and  $I^-$  and  $SCN^-$ , differential electrophysiological character in transport by Na<sup>+</sup>/I<sup>-</sup> symporter, **231**, 731

## Perforin

dependent cytotoxicity, and Fas-dependent cytotoxicity, dissociation (mouse), **235**, 461

and perforin N-terminus peptides and whole lytic granules, induced channel formation and  $[Ca^{2+}]$ , accumulation in lymphocytes, comparison, **240**, 647

## Perforin-enhancing protein

cytotoxic lymphocyte granule, isolation and enhancement of perforin lysis, **236**, 34

## Perillic acid

inhibition of Ras/MAP kinase-driven IL-2 production in T cells (human), **241**, 720

## Periodic polymers

modeled on repetitive domain of wheat gliadins, synthetic genes specifying, conception and expression, **239**, 240

## Peripheral blood mononuclear cells

distribution of plus- and minus-stranded hepatitis G virus RNA (human), **237**, 288

interleukin-2 in, hammerhead ribozyme against (human), **231**, 397

proliferation and cytokine production, impairment by oxidized LDLs (human), **232**, 359

## Perlecan

sulfation and fine structure, correlation with enterocytic differentiation in HT29 colon carcinoma cells, **238**, 874

## Permeability

glycerol, aquaporin with, molecular cloning and expression from adipose tissue (human), **241**, 53

passive,  $Ca^{2+}$ , erythrocyte plasma membrane, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451

## Permeability transition

## mitochondrial

cytochrome c release during, analysis (rat liver), **232**, 669

enhanced activation in lymphocytes from old mice, **240**, 68

## Peroxidase

activation by f-Meth-Leu-Phe before release from neutrophil granulocytes (human), **232**, 209

-catalase, homodimeric, purification and characterization (*Anacystis nidulans*), **235**, 545

soybean, resonance Raman spectroscopy, **240**, 65

## Peroxidation

eicosapentaenoic acid, formation of F<sub>2</sub>-isoprostanes during, **236**, 467

## Peroxiredoxins

related bacterial scavengase p20, isolation, **233**, 848

## Peroxisomal membrane protein 69

putative peroxisomal ABC-transporter, primary structure (human), **237**, 152

## Peroxisome proliferator-activated receptor

agonists, upregulation of UCP-2 gene expression in preadipose and adipose cells (mouse), **238**, 606

heterodimer with retinoid X receptor, DNA binding preferences, **233**, 91

Peroxisome proliferator-activated receptor  $\alpha$ 

mediation of PP-induced transcriptional repression of nonperoxisomal gene expression in mouse, **230**, 155

- regulation of thiobarbituric acid-reactive substance plasma level (rat), **237**, 606
- transcriptional activity, role of amino acid residues in DNA- and ligand-binding domains (human), **239**, 522
- Peroxisome proliferator-activated receptor  $\gamma$
- $\gamma 1$  and  $\gamma 2$ 
    - differential expression in adipose tissue (human), **233**, 320
    - genetic mapping and differential expression of isoforms (bovine), **239**, 857
  - $\gamma 2$ , transcription from promoter, direct modulation by CAAT/enhancer binding proteins, **240**, 99
  - and CBP, interaction, stimulation by antidiabetic agent thiazolidinedione, **240**, 61
  - gene chromosomal localization and partial genomic structure (human), **233**, 756
  - gene molecular scanning in diabetic Caucasians: identification of Pro12Ala PPAR $\gamma 2$  missense mutation, **241**, 270
- Peroxisome proliferators
- induced transcriptional repression of nonperoxisomal gene expression in mouse, mediation by PP-activated receptor  $\alpha$ , **230**, 155
  - suppression of *Cyp2f2* mRNA levels by diethylhexylphthalate (mouse), **239**, 660
- Peroxisomes
- branched-chain fatty acid metabolism, role of sterol carrier protein X: specific reaction with 3-oxo-pristanoyl-CoA (rat), **236**, 565
  - hepatic fractions, phosphorylation of farnesol (rat), **230**, 562
  - $\beta$ -oxidation of linoleate and arachidonate, metabolites produced during, movement to microsomes for conversion into linoleate (rat), **233**, 438
- Peroxisome targeting signal-1 receptor
- defective CHO cell mutant, isolation, **230**, 402
- Peroxyl radicals
- plasmid DNA damaged by, formation of C<sup>1</sup>-oxidized abasic sites in, **237**, 1
  - quantification by spin trap hydroxylamine, **230**, 54
- Peroxynitrite
- ergothioneine as scavenger, **231**, 389
  - formation in experimental atherosclerosis, nitrotyrosine bound to  $\beta$ -VLDL-apoproteins as biomarker of, evaluation (rabbit), **232**, 332
  - hepatocyte sensitivity to, *in vitro* study (human), **233**, 545
  - induced apoptosis in HL-60 cells, role of reactive oxygen species, **230**, 115
  - production in subcutaneous tumor, stimulation by flavone acetic acid (mouse), **235**, 509
  - protection of Raw 264.7 macrophages from LPS/IFN- $\gamma$ -induced cell death, **241**, 37
  - quantification by spin trap hydroxylamine, **230**, 54
  - role in conversion of xanthine dehydrogenase to oxidase in rabbit liver, **230**, 476
  - scavenging by flavonoids, **236**, 591
  - spin trapping and stability of corresponding nitroxyl radicals to biological reductants, **231**, 701
  - tryptophan residues exposed to, oxidative modification, **234**, 82
  - tyrosine nitration mediated by, inhibition by catechin polyphenols, **232**, 164
- Pertussis toxin
- G protein sensitive to, role in monocyte chemotactic protein-4 effects on oxygen radical production, actin, and CD11b expression in human eosinophils, **240**, 32
  - induced myelomonocytic cell adhesion, signaling mechanisms: role of tyrosine phosphorylation, **236**, 479
  - protein phosphorylation sensitive to, induction by fluoroaluminate, **235**, 680
- Pesticides
- estrogenic, induced growth of breast cancer MCF-7 cells, synergistic inhibitory effects of curcumin and genistein, **233**, 692
- PET, *see* Positron emission tomography
- PF16
- HMG-like protein, cDNA cloning (*Plasmodium falciparum*), **234**, 101
- P-glycoprotein
- ATPase of, modulation by C219, **230**, 398
  - expressed in placenta and mole, function (human), **235**, 849
  - functional incorporation into *Xenopus* oocyte plasma membrane, relationship to swelling-evoked conductance, **237**, 407
  - mdr1b*, domain organization (mouse), **230**, 442
- pH
- effect on substrate selection of human GLUT5, **238**, 503
  - intracellular
    - in pancreatic acini, effect of free cytosolic Ca<sup>2+</sup> levels (rat), **230**, 652
    - regulation in osteoclasts, dependence on culture substrate and stage of resorption cycle (rat), **235**, 838
  - low extracellular, activation of ERK 2, JNK, and p38 in A431 and Swiss 3T3 cells, **241**, 236
- Phagocytes
- interaction with apoptotic cells, associated production of pro-inflammatory cytokines (mouse), **239**, 799
  - NADPH oxidase activation *in vitro*, role of proline-rich regions of p47phox and p67phox, **241**, 226
- Phagocytosis
- Escherichia coli* *in vitro*, and release of LPS, by silkworm adhering hemocytes, **231**, 623
  - inhibition by NO-releasing particles in human neutrophils, **233**, 492
  - macromolecular activators of, from platelets and precursors, transferrin as constituent (human), **230**, 270
  - promotion by cytotoxic necrotizing factor 1 in epithelial cells, relationship to inhibition of apoptosis, **241**, 341
- Pharynx
- abnormalities caused by *Gooseoid* gene mutation (mouse), **233**, 161
- Phase separation
- and biological membranes: structure of detergent-resistant membrane domains, **240**, 1
- Phase transition
- first-order, in large single duplex DNA, induction by nonionic surfactant, **230**, 514
- Phenobarbital
- induced benzophenanthridine alkaloid formation via gene transcript accumulation in California poppy, **241**, 606
- Phenol sulfotransferase
- pharmacogenetics in human: association of common SULT1A1 alleles with thermal stable PST phenotype, **239**, 298
- Phenotype
- clonal osteoblastic cell line from p53 null mouse calvariae, maturation, role of bone morphogenetic protein-2, **231**, 196
  - in diabetes-prone BB/OK rat, effects of restoration of lymphopenia, **239**, 106
  - Indian Bombay, of ABO blood group system, role of *FUT1* missense mutation and *FUT2* deletion, **238**, 21
  - phenol sulfotransferase, thermal stable, association of common *SULT1A1* alleles with, **239**, 298
  - radiation-resistant, in human tumor cells, role of signal transduction pathway, **230**, 196
- Phentolamine
- effect on Arg-induced glucagon secretion from isolated islets (rat), **236**, 162
- Phenylalanine
- Phe<sup>1486</sup> in III-IV linker of Na<sup>+</sup> channels, role in inactivation gate closure, **233**, 606
- Phenylarsine oxide, *see* Oxophenylarsine
- Pheochromocytoma PC12 cells, *see* PC12 cells
- Pheromone biosynthesis-activating neuropeptide
- soluble binding proteins for, identification in *Helicoverpa zea*, **238**, 925
- Phorbol ester
- downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328
  - effects in atypical NIH3T3 cells overexpressing protein kinase C  $\zeta$ , **237**, 336

## Subject Index

Phorbol ester (*continued*)

- induced sensitization of adenylyl cyclase type II, relationship to phosphorylation of Thr 1057, **237**, 251
- induction of hematopoietic prostaglandin-D synthase in human megakaryocytic cells, **241**, 288
- induction of transglutaminase C and inhibition of growth in colon carcinoma SW620 cells (human), **232**, 737
- modulation of dynactin phosphorylation (Rat2 cells), **232**, 810
- protein kinase C isoforms sensitive to, role in lymphokine-activated killer cell-mediated cytotoxicity (mouse), **235**, 461
- regulation of protein tyrosine phosphatase receptor gene expression in Jurkat T lymphoma cells, **231**, 77
- transcriptional activation, impairment by dominant-negative Smad3 protein, **232**, 517
- U937 cell adhesion stimulated by, promotion by synthetic peptide FN-C/H-V from C-terminal heparin-binding domain of fibronectin, **239**, 205

Phorbol 12-myristate 13-acetate, *see* Phorbol ester

## Phosducin

- interaction with  $\beta\gamma$ -transducin, effects of post-translational modifications (bovine retina), **233**, 370

## Phosphatase

- cardiac, endogenous, inhibition for studies of sarcoplasmic reticulum calcium uptake and role of phospholamban phosphorylation in hypertrophied myocardium (rat), **239**, 701
- reversible activation in mitotic HeLa cells and mitosis-released cells (human), **235**, 704

## Phosphate

- dietary, regulation of renal vitamin D-24-hydroxylase: effects of hypophysectomy, growth hormone, and insulin-like growth factor I (rat), **233**, 813

## Phosphatidate cytidylyltransferase

- mammalian, extraction and stabilization (rat liver), **239**, 166

## Phosphatidate phosphohydrolase-1

- activity in hepatocytes, effect of transforming growth factor  $\beta$  (rat), **230**, 365

## Phosphatidylcholine

- behavior at LDL surface (human), **234**, 733
- membrane transport protein, non-*MDR2*-coded, expression in oocyte (*Xenopus laevis*), **231**, 277

## Phosphatidylcholine-specific phospholipase C

- relationship to generation of  $^1\text{H}$  NMR-detectable mobile lipids in stimulated lymphocytes (mouse), **239**, 868

Phosphatidylcholine-sterol *O*-acyltransferase

- activation by disulfide-linked apolipoprotein A-I dimer, **232**, 345
- domain involved in interfacial recognition, identification, **232**, 783

## Phosphatidylethanolamine

- as molecular chaperone, **238**, 687

## Phosphatidylinositol 4,5-bisphosphate

- Shc Tyr-239 and Tyr-240 phosphorylation by c-Src dependent on, analysis, **240**, 399

## Phosphatidylinositol 4,5-bisphosphate 3-kinase

- role in CD18-mediated adhesion of neutrophils to fibrinogen (human), **232**, 719

## Phosphatidylinositol 3-kinase

- activity in skeletal muscle, augmentation by treadmill running (rat), **236**, 647
- inhibitor wortmannin, effect on LPS-induced NO production and TNF- $\alpha$  secretion in murine peritoneal macrophages, **240**, 692
- pathway, activation by glycine-extended gastrin precursors, and tyrosine phosphorylation of insulin receptor substrate-1 (AR4-2J cells), **236**, 687
- role in activation of c-Jun N-terminal kinases by PDGF (COS-7 cells), **232**, 273
- role in induction of ornithine decarboxylase in leukemia L1210 cells stimulated to growth, **239**, 729
- role in p70S6 kinase activation by sodium arsenite in adult rat cardiomyocytes, **238**, 207

## Phosphatidylinositol 3'-kinase

- activation by insulin, inhibition by phenylarsine oxide (3T3-L1 cells), **239**, 316

## Phosphatidylinositol polyphosphate 5-phosphatase

- SHIP, related SH2-domain-containing protein, identification (human), **239**, 697

## Phosphatidylinositol-transfer protein

- association with nucleus in Friend cells, reduction by DMSO-induced differentiation (mouse), **230**, 302

## Phosphatidylserine

- externalization, rare inherited disorder, inference of link between phospholipid transmembrane migration and ABC transporter gene family, **241**, 548
- synthesis increase, role of positive charge: modulation of serine base exchange enzyme activity by sphingosine and other amphiphilic compounds (rat), **241**, 73

## Phosphocholine

- glycoglycerolipids containing, GGPI-I and GGPI-II, identification as species specific major immunodeterminants of *Mycoplasma fermentans*, **233**, 644

## 2'-Phospho-cyclic ADP ribose

- natural occurrence in mammalian tissues, **236**, 723

## Phosphodiesterase

- cAMP-specific, *see* 3',5'-Cyclic-nucleotide phosphodiesterase

## Phosphoenolpyruvate carboxykinase (ATP)

- gene expression in kidney, effect of maternal dietary glucose (newborn rat), **231**, 187
- role in LPS/cytokine-induced NO synthesis in hepatocytes (mouse), **236**, 379

## Phosphoenolpyruvate synthase

- 2.25-MDa homomultimeric, 3D cryoelectron microscopic reconstruction (*Staphylothermus marinus*), **241**, 599

## Phosphofructokinase

- cardiac muscle, phosphorylation site, identification (rabbit), **234**, 582

## 6-Phosphofructo-2-kinase/fructose-2,6-bisphosphatase

- M promoter, activation by C/EBP (rat), **232**, 247

## Phosphogluconate dehydrogenase (decarboxylating)

- gnd* gene encoding, sequence (*Actinobacillus actinomycetemcomitans*), **230**, 220

## Phosphoinositide 3-kinase

- C2 domain-containing HsC2-PI3K, identification and cDNA cloning (human), **233**, 537

- identification (human), **235**, 130

## Phosphoinositides

- binding by pleckstrin homology domain of Btk, **236**, 333
- hydrolysis, mediation of insulin-stimulated sodium transport (*Xenopus laevis*), **231**, 156

## Phosphokinase A

- dependent phosphorylation sites, role in inhibition of L-type cardiac  $\text{Ca}^{2+}$  channels by 2,3-butanedione monoxime (human), **230**, 489

## Phospholamban

- cloning, structure, and regulatory effects, **239**, 1
- phosphorylation
  - role in hypertrophied myocardium (rat), **239**, 701
  - in sarcoplasmic reticulum membranes, effects of zinc (swine), **232**, 394

Phospholipase A<sub>2</sub>

- cytosolic, gene expression and biosynthesis in LPS-stimulated U937 cells and adherent rheumatoid synovial cells, inhibition by interleukin-4 (human), **230**, 40

- LDL-PLA<sub>2</sub> gene for, systematic screening for polymorphic variants and case-control analysis in schizophrenia (human), **241**, 630

- secretory, binding of melittin: inhibition of enzymatic activity, **238**, 436

## Phospholipase C

- phosphatidylcholine-specific, relationship to generation of  $^1\text{H}$  NMR-detectable mobile lipids in stimulated lymphocytes (mouse), **239**, 868

## Subject Index

- phospholipase C/Ca<sup>2+</sup> pathway, mediation of protein kinase C activation by nociceptin/orphanin FQ (CHO cells), **240**, 304
- Phospholipase C $\beta_1$   
expression, control by Lac repressor system: relationship between nuclear PLC $\beta_1$  overexpression and growth factor stimulation, **241**, 122
- Phospholipase C $\beta_2$   
intracellular translocation during HL-60 myeloid differentiation (human), **235**, 831
- Phospholipase C $\gamma$   
binding by Flt-1 kinase, phosphorylated 1169-tyrosine-containing region of Flt-1 as site of, identification, **238**, 487  
interactions of Flt-1 and KDR with, and identification of phosphotyrosine binding sites, **240**, 635
- Phospholipase C $\gamma_1$   
angiotensin II-mediated tyrosine phosphorylation and dephosphorylation, role of intracellular calcium (rat), **232**, 540
- Phospholipase D  
regulation of early endosome fusion, **236**, 285  
role in plant oxidative burst, **237**, 10
- Phospholipase D $_1$   
Arf-responsive, PIP $_2$ -dependent, interaction with RalA GTPase (mouse), **235**, 854
- Phospholipid membranes  
Ca<sup>2+</sup> transport activity of annexins I, II, V, and VI, **237**, 499
- Phospholipids  
membrane, selective interaction of protein kinase F $_A$ /glycogen synthase kinase 3 $\alpha$  with, **237**, 331  
transmembrane migration, link to ABC transporter gene family, evidence from rare inherited disorder of phosphatidylserine externalization, **241**, 548
- Phospholipid transfer protein  
gene encoding, transcription in HepG2 cells, DNA sequences essential for, **232**, 574
- Phosphoprotein phosphatase-1  
regulation of sperm flagellar motility (chicken), **235**, 108
- Phosphoprotein phosphatase-1 $\delta$   
association with retinoblastoma protein and reversible phosphatase activation (human), **235**, 704
- Phosphoprotein phosphatase-2A  
B $\beta'$  subunit, cDNA cloning and activity in oocytes (*Xenopus laevis*), **232**, 218
- Phosphoproteins  
nucleolar  
conserved motifs, detection in mouse TCOF1, **238**, 1  
p130, identification as GTPase/ATPase with intrinsic property to form large complexes triggered by F and Mg<sup>2+</sup>, **230**, 370
- Phosphorothioates  
triple-helix-forming oligonucleotides containing, targeted to polypurine tract, inhibition of HIV-1 replication, **233**, 742
- Phosphorylase kinase  
 $\gamma$  subunit, regulatory domain, subunit-dependent structural changes, antipeptide antibodies as probes (rabbit), **230**, 179  
liver, autosomal recessive deficiency caused by splice-site mutation in liver  $\gamma$  subunit gene (human), **236**, 544
- Phosphorylation  
A170 stress protein by casein kinase II-like activity in macrophages (mouse), **241**, 157  
actin, induction by LPS in monocytes (human), **241**, 670  
adenylyl cyclase type II at threonine 1057, relationship to phorbol ester-induced AC II sensitization, **237**, 251  
by  $\beta$ -adrenergic-receptor kinase I, role of Asp278 (human), **239**, 548  
agonist-dependent,  $\delta$ -opioid receptor, role of receptor carboxyl terminus (NG108-15 cells), **238**, 71  
calmodulin by myosin light chain kinase, alteration by exchange or duplication of EF-hand pairs, **236**, 702  
cardiac muscle phosphofructokinase, site of, identification (rabbit), **234**, 582  
cardiac Na<sup>+</sup>-K<sup>+</sup> ATPase by Ca<sup>2+</sup>/calmodulin-dependent protein kinase (rat), **238**, 544  
cell cycle-dependent, cyclin-dependent kinase inhibitor p27 by cyclin E/Cdk2 (human), **240**, 386  
cell cycle inhibitor p21<sup>Cip</sup> by cyclin A-cdk2 complexes, **241**, 434  
CREB at Ser-133 via p44/42 MAP kinase-dependent pathway in PC12 cells, induction by elevated amyloid  $\beta$  protein(1-40) levels, **232**, 637  
different sets of RNA binding proteins, effects on association with *Vg1* localization signal RNA, **234**, 419  
*N,N*-dimethylsphingosine in platelets (human), **231**, 848  
DNA topoisomerase II $\alpha$  by protein kinase CKII, stimulation by CKII  $\beta$  subunit interaction with ribosomal protein L41, **238**, 462  
domain-specific, vimentin and glial fibrillary acidic protein by PKN (human, mouse), **234**, 621  
dynactin, modulation in response to cellular effectors (Rat2 cells), **232**, 810  
endothelial actin-binding protein 71-kDa domain with cAMP-dependent protein kinase (human), **232**, 555  
farnesol by hepatic microsomal and peroxisomal fractions (rat), **230**, 562  
focal adhesion kinase and paxillin in VSMC, PDGF-BB-stimulated, inhibition by eNOS gene transfer (guinea pig), **236**, 706  
Fyn on N-terminal Tyr28, PDGF-induced, effect on Fyn activation (NIH3T3 cells), **241**, 355  
G $_i$  and adenylyl cyclase, GTPase, protein kinase A activities, in chick muscle cells, effects of 1 $\alpha$ ,25-dihydroxyvitamin D $_3$ , **234**, 125  
as model of regulation of O-glycosylation of nuclear and cytoplasmic proteins, **231**, 237  
and motility, demembranated fowl spermatozoa, effects of MAP kinase and p34<sup>cdc2</sup> kinase substrate peptides, **240**, 116  
osteopontin by Golgi apparatus casein kinase, **240**, 602  
pertussis toxin-sensitive protein, induction by fluoroaluminate, **235**, 680  
phospholamban  
role in hypertrophied myocardium (rat), **239**, 701  
in sarcoplasmic reticulum membranes, effects of zinc (swine), **232**, 394  
PKA-dependent sites, role in inhibition of L-type cardiac Ca<sup>2+</sup> channels by 2,3-butanedione monoxime (human), **230**, 489  
protein, effect on ligand binding efficiency of cytochrome P450c17 and proteolytic degradation (rat), **231**, 403  
by protein kinase C, regulation of zinc-binding transcription regulatory protein binding to c-Jun (human), **230**, 331  
RB, and c-myc expression, during TNF-mediated growth arrest in human endothelial cells, **236**, 819  
recombinant *N*-syndecan core protein, **240**, 502  
ribosomal proteins by ribosome-associated protein kinase (*Streptomyces collinus*), **238**, 370  
SNAP-25 by glucose and GLP-1 in RIN 1046-38 cells, **238**, 297  
tau protein, relationship to cell morphology and apoptosis, analysis in NGF-deprived PC12 cells, **240**, 687  
tyrosine, *see* Tyrosine phosphorylation
- Phosphotyrosine  
motif containing, alternative for binding to SH2 domain, **234**, 675  
PLC $\gamma$  binding sites on Flt-1 and KDR, identification, **240**, 635  
*Photinus*-luciferin 4-monooxygenase (ATP-hydrolysing)  
expression from human *c-erbB* gene promoter, inhibition by retroviral vector expressing anti-gene RNA, **240**, 203  
synthesis of dehydroluciferin: effect of dehydroluciferin, CoA, and nucleoside triphosphates on luminescent reaction, **237**, 445
- Photoaffinity labeling  
in analysis of binding of HIV-1 MN gp120 principal neutralizing domain and sCD4, **241**, 584  
in characterization of hepatic microsomal UDP-glucuronosyltransferase with activity toward retinoic acid (rat), **230**, 497

Photoaffinity labeling (*continued*)

- multidrug resistance protein with quinoline-based drug *N*-{4-[1-hydroxy-2-(dibutylamino)ethyl] quinolin-8-yl}-4-azidosalicylamide, **241**, 104
- yeast farnesyl protein transferase, **235**, 377

*Photobacterium leiognathi*

- pkI* gene encoding pyruvate kinase I, linkage to *luxZ* gene enhancing bioluminescence of *lux* operon, **239**, 228

## Photocycles

- bacteriorhodopsin, cooperativity-induced optical anisotropy changes during, **233**, 532

## Photodynamic therapy

- photodynamic effect of free radicals generated in cell cultures (mouse), **233**, 173

## Photofrin II

- excited molecules, effect on zymosan-stimulated and luminol-dependent chemiluminescence of macrophages (mouse), **233**, 173

## Photoreceptors

- calcium-binding proteins specific for, functional characterization and expression (frog), **234**, 173
- retinal, ES1 gene specifically expressed in, cloning (zebrafish), **237**, 84

## Phylogenetic analysis

- CYP3A* genes, **236**, 306

## Physical map

- high-resolution, SH3BGR in Down syndrome chromosomal region (human), **241**, 321

## Phytanic acid

- $\alpha$ -oxidation pathway, resolution: pristanal as product of decarboxylation of 2-hydroxyphytanoyl-CoA, **237**, 33

*Pichia pastoris*

- expression and functional characterization of mammalian intestinal PepT1, **232**, 656
- rat Golgi sialoglycoprotein MG160 expressed in, secretion and bFGF binding: role of complex carbohydrates and sialic acid, **234**, 68
- recombinant caspase-3 expressed in, comparison to native enzyme, **238**, 920
- reconstitution of human heart muscle carnitine palmitoyltransferase I highly expressed in, **239**, 498

## Pigmentation

- Xanthomonas campestris*, role of *gumD* gene, **233**, 265

PI-3-kinase, *see* Phosphatidylinositol 3-kinase

## Pineal gland

- arachidonate 12-lipoxygenase, diurnal change (rat), **238**, 229
- D-aspartate immunohistochemical localization (rat), **231**, 505

## Pioglitazone

- effect on insulin signaling defects in skeletal muscle from Wistar fatty rat, **223**, 439; *erratum*, **236**, 833

## Pituitary

- arginase II mRNA expression (human), **233**, 487
- glycoprotein in colloid, identification as clusterin and glycosylated albumin fragments (pig), **234**, 712
- proopiomelanocortin-derived peptides, isolation and structural characterization (rainbow trout), **238**, 653

## Pituitary adenoma cells

- GH<sub>1</sub>, proliferation inhibition by Krüppel-type zinc finger protein ZBP-89 (rat), **237**, 230

## Pituitary cells

- anterior, proliferation *in vitro*, stimulation by angiotensin IV (rat), **232**, 292
- GH<sub>1</sub>, Ca<sup>2+</sup> action potential frequency, effect of Rab3A (rat), **235**, 331

## Pituitary tumor cells

- adrenocorticotrophic hormone release, effects of divalent cations and calcimimetic ( $\pm$ )NPS 568, **238**, 866

## Placenta

- expression of aquaporin with permeability to water and urea (mouse), **240**, 324

- expression of prostaglandin endoperoxide H synthase 1 and 2 at term (human), **233**, 496

- and mole, P-glycoprotein expressed in, function (human), **235**, 849
- and plasma and adipose tissue, leptin gestational profile (rat), **240**, 798

## Placenta growth factor

- generated by RNA alternative splicing, identification and characterization (human), **235**, 493

## Planobispora rosea

- elongation factor Tu1, resistance against EF-Tu-targeted antibiotics, **230**, 320

## Plant cells

- Ca<sup>2+</sup> oscillations, effect of cytosolic free Ca<sup>2+</sup> levels (poppy), **234**, 690
- oxidative burst, role of phospholipase D (soybean), **237**, 10

## Plasma

- and adipose tissue and placenta, leptin gestational profile (rat), **240**, 798
- clearance of cobra venom factor (mouse), **231**, 316
- glutamyl aminopeptidase, reduction in sporadic Alzheimer's disease, **231**, 526
- hyaluronidase, purification, cloning, and expression (human), **236**, 10
- lipid levels, in mice lacking APOBEC-1, effects of apo E deficiency, **236**, 375
- maternal, leptin concentration, and maternal adiposity, relationship to leptin in human milk, **240**, 742
- paraoxonase activity, inhibition by cigarette smoke extract by modification of enzyme's free thiols, **236**, 289

## Plasma membrane

- aortic smooth muscle cell, spontaneously hypertensive rat, Ca<sup>2+</sup> pump mRNA levels, **230**, 344
- ascorbate stabilization, stimulation in  $\rho^0$ HL-60 cells by CoQ<sub>10</sub> increase at plasma membrane, **234**, 79
- binding by carnitine in S49 lymphoma cells, stimulation by palmitoyl-CoA, **233**, 752
- bivalve mollusk sperm, nonglycosylated  $\alpha$ -L-fucosidase, comparison with glycosylated seminal fluid form (*Unio elongatulus*), **234**, 54
- Ca<sup>2+</sup>-ATPase, and calmodulin, in brain, protein half-lives (rat), **237**, 163
- carnitine binding, regulation by ATP-dependent mechanism, **231**, 249
- erythrocyte, Ca<sup>2+</sup> pump, effect of 4-hydroxy-2,3-*trans*-nonenal (human), **235**, 451
- GTP loading of farnesylated p21Ras by insulin (3T3-L1 cells), **239**, 42
- oocyte

- functional incorporation of P-glycoprotein into, relationship to swelling-evoked conductance (*Xenopus laevis*), **237**, 407

- receptor binding of progesterone (frog), **232**, 213

- phospholipid transmembrane migration, link to ABC transporter gene family, evidence from rare inherited disorder of phosphatidylserine externalization, **241**, 548

- presynaptic, and synaptic vesicle, proteins of, differential role in Alzheimer's disease, **236**, 239

- and sarcoplasmic reticulum, distinct types of ADP-ribosyl cyclase: PKC regulation of SR-associated form (dog, rat), **234**, 252

- skeletal muscle, localization of polypeptide derived from mitochondrial dihydrolipoamide succinyltransferase (human, rat), **241**, 151

- synaptic, vesicles, fusion with brain synaptic vesicles, role of synaptobrevin (rat), **236**, 184

- unsaturated fatty acid insertion into, role in intracellular Ca<sup>2+</sup> mobilization (Ehrlich ascites tumor cells), **241**, 312

## Plasmids

- delivery into mammalian cells, cationic lipid for, **236**, 126

- DNA, alkylperoxyl radical-damaged, formation of C<sup>1</sup>-oxidized abasic sites in, **237**, 1

- instability of regions with expanded CAG repeats during replication in *Escherichia coli*, **240**, 471

- intramuscular injection of expression plasmid for long-term systemic delivery of interleukin-5 (mouse), **233**, 527

- pXV64, encoding Rep protein similar to gene II protein, sequence analysis (*Xanthomonas campestris* pv. *vesicatoria*), **231**, 121

- RtsI replication origin, interaction of P1 RepA with, **241**, 570
- TOM, catechol 2,3-dioxygenase gene structure (*Pseudomonas cepacia* G4), **234**, 578
- Plasminogen
- normal and variant genes, induction by interleukin-6 (human), **230**, 129
  - t-plasminogen activator-catalyzed activation, modulation by glycated proteins, **240**, 595
- Plasminogen activator inhibitor-1
- induction as early growth response in hepatocytes in primary culture (rat), **239**, 123
  - promoter, stimulation by multiple agonists, impairment by dominant-negative Smad3 protein, **232**, 517
- Plasmalipin
- identification as part of MAL proteolipid-related protein family, **232**, 618
- Plastocyanin
- divergent, reconstitution and characterization (*Prochlorothrix hollandica*), **235**, 631
- Platelet-activating factor
- induced chemotaxis in eosinophils from asthmatic patients treated with or without prednisolone, **237**, 146
  - modulatory effect on Fcγ receptor-induced MAPK activation in murine macrophages, **238**, 256
  - primed responses in human neutrophils, effect of receptor-mediated calcium entry, **240**, 763
  - release during shear-stress-induced platelet aggregation, mechanism (human), **239**, 101
  - stimulation of calcium-dependent activation of protein-tyrosine kinase Syk in human B cell line ASK.O, **239**, 23
- Platelet-activating factor acetylhydrolase
- cytosolic, isoform Iβ and γ subunits, differential tissue distribution (human), **233**, 10
  - deficiency in CVD, role of Gln<sup>281</sup>→Arg mutation (human), **236**, 772
  - LDL-PLA<sub>2</sub> gene for, systematic screening for polymorphic variants and case-control analysis in schizophrenia (human), **241**, 630
- Platelet-derived growth factor
- A-chain, encoding gene, transcription regulation by first intron elements (human), **230**, 569
  - activation of c-Jun N-terminal kinases, role of phosphatidylinositol-3 kinase (COS-7 cells), **232**, 273
  - induced phosphorylation of Tyr28 in N-terminus of Fyn, effect on Fyn activation (NIH3T3 cells), **241**, 355
  - stimulated NIH3T3 cells, STAT1 and STAT3 activation by c-Src, **239**, 493
  - TGF-β-modulated effects in rat VSMC, role of catalase and glutathione peroxidase, **232**, 1
  - transcriptional activation, impairment by dominant-negative Smad3 protein, **232**, 517
- Platelet-derived growth factor BB
- and FGF-2, activation of extracellular signal-regulated kinases 1 and 2 in human osteoblastic and bone marrow cells, **238**, 134
  - stimulated focal adhesion kinase and paxillin phosphorylation in VSMC, inhibition by eNOS gene transfer (guinea pig), **236**, 706
- Platelet-derived growth factor receptor β
- association with coatmer protein, **235**, 455
- Platelet factor 4
- encoding gene, silencer element, T-cluster DNA, binding to alternative form of nucleolysin (human), **235**, 625
- Platelets
- adhesion to collagen, inhibition by cGMP-elevating agents (human), **231**, 412
  - aggregation induced by shear stress, platelet-activating factor release during, mechanism (human), **239**, 101
  - agonist-induced GPIIb/IIIa-mediated aggregation, attenuation by high shear stress combined with blocking of von Willebrand factor binding to GPIb/IX, **233**, 796
  - antiplatelet activity of naloxone, mechanism (human), **231**, 12
  - CD36 formation of covalently associated dimers and multimers in, **240**, 812
  - coupled submitochondrial particles, protonophoric activity of NADH Coenzyme Q reductase and ATP synthase (horse), **235**, 469
  - N,N-dimethylsphingosine phosphorylation (human), **231**, 848
  - glycoprotein IIb-IIIa interaction with disagregin (*Ornithodoros moubata*), **241**, 744
  - integrin α2β1, affinity modulation after ligand binding (human), **232**, 724
  - macromolecular activators of phagocytosis from, transferrin as constituent (human), **230**, 270
  - thrombin-activated, integrin-dependent tyrosine phosphorylation and cytoskeletal translocation (human), **238**, 247
  - trimeric G proteins, α-subunits, subcellular localization (human), **234**, 439
- Pleckstrin homology domain
- Btk, inositol polyphosphate and phosphoinositide binding, **236**, 333
  - role in membrane binding and enzymatic activation of neighboring Dbl homology domain, **234**, 183
- Plk1
- regulation and function: effects of overexpression on cell cycle progression (HeLa cells), **239**, 375
- PML
- DNA damage-induced gene expression, cell cycle regulation (HeLa cells), **240**, 640
- PMP69
- putative peroxisomal ABC-transporter, primary structure (human), **237**, 152
- Poliovirus
- and hepatitis A virus, proteinase 3C, susceptibility to degradation by ubiquitin-mediated proteolytic system, **238**, 119
- Pollen
- Bet v 4 allergen from, molecular characterization, expression in *Escherichia coli*, and epitope analysis (birch), **239**, 197
- Polo-like kinase
- constitutive expression, initiation of malignant transformation of mammalian cells, **234**, 397
- Polo-like kinase 1
- regulation and function: effects of overexpression on cell cycle progression (HeLa cells), **239**, 375
- Poly (A)<sup>+</sup>
- RNA, rat brain cortex, Gs-coupled receptor-mediated cAMP production in *Xenopus* oocytes expressing, enhancement by baclofen, **241**, 476
- Polyadenylation
- alternative, two forms of avian TATA-binding protein mRNA generated by, **234**, 406
  - and capping, effects on mRNA expression and antisense RNA mediated inhibition of gene expression, **241**, 193
  - stationary phase-specific mRNA in *Escherichia coli*, **239**, 46
- Poly(ADP-ribose)
- catabolism, role in DNA repair, **236**, 265
- Poly(ADP-ribose) polymerase
- apoptosis in absence of, analysis (mouse), **233**, 518
  - downregulation during cellular senescence (WI-38 cells), **238**, 712
- Poly(ADP-ribosyl) transferase
- interaction of transcription factor YY1 with, **240**, 108
- Polyamine transport
- antizyme region necessary for negative regulation of, identification, **238**, 415
  - and translation of ornithine decarboxylase mRNA, suppression in *ras*-transformed CREF cells by depletion of eIF-4E, **240**, 15
- Polyanions
- effect on mammalian lymphocyte, **234**, 783
- Polyarginine
- gene transfer mediated by, role of formation of big carrier complex of DNA aggregate, **231**, 421
- Polycyclic aromatic hydrocarbons
- diol epoxides, activity of four allelic forms of glutathione S-transferase hGSTP1-1 for, analysis, **238**, 397

- Polycyclic aromatic hydrocarbons (*continued*)  
inhibition of acetylcholinesterase purified from electric eel, **238**, 367
- Poly d(A-T)  
primer/template-independent synthesis by Taq polymerase, **238**, 113
- Polyethylene glycol  
bifunctional hybrid of fibronectin-related peptides, **241**, 595  
 $\alpha$ -galactosyl oligosaccharides conjugated with, evaluation as inhibitors of hyperacute rejection upon xenotransplantation (human, pig), **232**, 731
- Polyglutamine domain fluorescent fusion proteins  
expanded, oligomerization in cultured mammalian cells, **238**, 599
- PolyHEMA  
anchorage-independent growth of *ras*-transformed cells, inhibition by antisense oligodeoxynucleotides against K-*ras*, **231**, 735
- Polymerase chain reaction  
differential display, in cloning of mRNA identical to connective tissue growth factor preferentially expressed in chondrocytes (human), **234**, 206  
quantitative, with internal standard fragment, in assay of estrogen receptor mRNA (human, rat), **228**, 358; *erratum*, **231**, 520
- RT-PCR  
and automated sequencing, mutation detection in glycogen storage disease type II by, **241**, 414  
detection of dual promoters regulating mRNA expression of osteoblast-specific factor-1 (mouse), **238**, 831  
detection of mouse skeletal muscle-specific product with ZF5 zinc fingers and VP16 acidic domain, **236**, 20  
in localization of leptin receptor mRNA splice variants in peripheral tissues (mouse), **232**, 383  
nested competitive, mRNA, **231**, 813  
semiquantitative, of serum hepatitis B virus DNA, in monitoring of efficacy of anti-HBV drugs in transgenic mouse, **241**, 43  
suppression effect, in construction of cDNA libraries from small amounts of total RNA, **230**, 285
- Polymerization  
actin  
regulation by L-selectin via activation of G protein Rac2 (human), **231**, 802  
regulation of integrin-mediated adhesion and rigidity of neutrophils (human), **238**, 910  
serpin, effects of reactive center loop length, **241**, 264
- Polymers  
periodic, modeled on repetitive domain of wheat gliadins, synthetic genes specifying, conception and expression, **239**, 240
- Polymorphisms, *see also* Restriction fragment length polymorphisms  
 $\gamma$ -aduccin gene, identification in genetic hypertension and mapping to rat chromosome 1q55, **237**, 685  
in coding part of IL4-receptor gene (human), **231**, 696  
Taq I restriction enzyme, cells heterozygous for, mRNA stability of vitamin D receptor big T and small t alleles (human), **238**, 77  
TNF- $\beta$  gene, *Nco* I-defined, relationship to hypertriglyceridemia and insulin resistance in lean and obese subjects, **236**, 829; *erratum*, **240**, 507
- Polynucleotides  
nontarget, inhibitory effect on ribozyme-mediated cleavage of TNF- $\alpha$  mRNA *in vivo*, **236**, 205
- Polypeptides  
derived from mitochondrial dihydrolipoamide succinyltransferase, localization on plasma membrane in skeletal muscle (human, rat), **241**, 151  
gastric inhibitory, effect on MAP kinase via wortmannin-sensitive and -insensitive pathways (CHO cell), **235**, 171
- Polypheol oxidase  
pluripotent, with tyrosinase and laccase activities, characterization from melanogenic marine *Alteromonas* sp., **240**, 787
- Polypurine tract  
triple-helix-forming phosphorothioate oligonucleotides targeted to, inhibition of HIV-1 replication, **233**, 742
- Polyribosomes  
binding by ribozyme and antisense RNAs, effect on coupled transcription translation (rabbit), **230**, 226
- Polysome selection  
identification of high-affinity peptide ligands to prostate-specific antigen, **232**, 578
- Polyunsaturated fatty acids  
conversion of linoleic acid to, in adult rat cardiomyocytes, effects of aging, **237**, 142
- Porphobilinogen deaminase  
nonerythroid, promoter, characterization and regulation (human), **231**, 409
- Porphyrin  
derivative, structural characterization of mouse monoclonal antibody 13-1 against: disulfide bond in CDR-H3, **240**, 566
- Porphyromonas gingivalis*  
fimbriin polypeptides, secretion by recombinant *Streptococcus gordonii*, **238**, 313
- Positron emission tomography  
in analysis of cerebral uptake of [2- $^{11}$ C]acetyl-L-carnitine (rhesus monkey), **231**, 488
- Postsynaptic potential  
production in electric organ, associated rapid volume expansion of organ (*Torpedo californica*), **233**, 305
- Post-translational modification  
A33 antigen, characterization (human), **236**, 682  
hemoglobin, in hyperinsulinism with hypoglycemia: covalent binding of glycoinositolphospholipid, **239**, 435
- Potassium  
depletion, and other perturbations, effects on fluid, bulk-membrane, and receptor endosomal flow in fetal rat fibroblasts, **236**, 661  
depolarization by, effect on secretion of 5-hydroxytryptamine/insulin from pancreatic islets: real time electrochemical detection (mouse), **228**, 100; *erratum*, **231**, 519
- Potassium channels  
ATP-sensitive  
modulation by insulin in skeletal muscle fibers (rat), **232**, 536  
subunit Kir6.1 localization in mitochondria (rat), **241**, 693  
Ca $^{2+}$ -activated, complementation of N- and C-terminal domains, effects of mutations and deletions in S8-S9 interdomain region, **240**, 623  
flickery block, mediation by extracellular Ca $^{2+}$  and Ca $^{2+}$ -sensing receptor agonists in parathyroid cells (bovine), **230**, 616  
in hippocampal neurons, voltage-dependent effects of Al $^{3+}$  (rabbit, rat), **232**, 84  
impaired function, association with ROMK gene mutations in antenatal Bartter syndrome (human), **230**, 641  
kH1 and kH2, isolation, characterization, and mapping (human), **241**, 675  
Kv1.5 gene, expression in left ventricle, effects of thyroid and glucocorticoid hormones (rat), **237**, 521  
voltage-sensitive, cytoplasmic domains, role in mediation of protein-protein interactions, **232**, 585
- Potassium currents  
Ca $^{2+}$ -dependent, apamin-sensitive, and hyperpolarization, in human endothelial cells, **236**, 340
- POU  
Brn-5, inhibition of NG108-15 cell proliferation by expression of, **236**, 693
- PPAR, *see* Peroxisome proliferator-activated receptor
- P protein  
human hepatitis B virus, expressed in *Escherichia coli*, RNase H activity, **233**, 401
- pRB  
expression in HL-60 cells infected with agent of human granulocytic ehrlichiosis, **232**, 298
- Preadipocytes  
3T3F42A,  $\alpha$ 2A-adrenergic receptor expression (human), **235**, 765

- 3T3-L1, adipogenesis, homeobox gene expression during, **237**, 470
- OB17, adipose differentiation, induction by calcitriol: relationship to adipogenic action of triiodothyronine, **232**, 771
- UCP-2 gene expression, upregulation by PPAR agonists (mouse), **238**, 606
- Pre-B cell acute lymphoblastic leukemia cells
- Nalm-6
- lymphotoxin beta isoforms expressed in, identification (human), **238**, 273
- $\alpha\text{v}\beta 3$ -mediated migration, support by L1 adhesion molecule (human), **232**, 236
- Prednisolone
- effect on PAF-induced chemotaxis in eosinophils from asthmatic patients, **237**, 146
- Pregnancy
- estrogen effects on osteogenic protein-1 mRNA expression in uterus, kidney, and ovary (mouse), **234**, 242
- leptin level in serum and on leptin receptor mRNA levels in uterus and other organs (rat), **237**, 476
- leptin profile in plasma, adipose tissue, and placenta (rat), **240**, 798
- leptin profile in serum: increase after midpregnancy (mouse), **240**, 213
- multidrug resistance mRNA polymorphic expression in lung parenchyma: comparison with CFTR mRNA expression (rat), **239**, 606
- prostaglandin  $E_2$  and  $F_{2\alpha}$  receptor gene expression downregulation (human), **238**, 838
- rho A and rho kinase mRNA upregulation in myometrium (rat), **230**, 356
- Pre-maturation-promoting factor
- activation during starfish oocyte maturation, mediation by proteasome, **236**, 40
- Presenilin
- types  $\alpha$  and  $\beta$ , cDNA cloning and expression in oogenesis and embryogenesis (*Xenopus laevis*), **231**, 392
- Presenilin 1
- Alzheimer's disease-associated, amyloid fibril formation of mutant peptides, **235**, 249
- gene cloning, sequencing, and expression in brain (*Microcebus murinus*), **228**, 430; *erratum*, **231**, 520
- human, direct binding to amyloid precursor protein in yeast cells, **239**, 480
- Presenilin 2
- Alzheimer's disease-associated, amyloid fibril formation of mutant peptides, **235**, 249
- cleavage site, determination in stably transfected SH-SY5Y human neuroblastoma cells, **240**, 728
- Pressure, high
- modulation of *E. coli* DNA gyrase activity, **239**, 552
- reversible inhibition of lambda exonuclease, **230**, 140
- Primer
- or template, poly d(A-T) synthesis by Taq polymerase independent of, **238**, 113
- Principal neutralizing domain
- gp120 of HIV-1 MN, binding with sCD4, analysis using photoaffinity labeled analogues, **241**, 584
- Prion protein
- dimerization, species barriers in model for, **232**, 508
- molecular structure, and TSE strains, **238**, 185
- mRNA
- alternative usage of exon 1 (bovine), **233**, 650
- expression in human fibroblasts, regulation by MRP8 fragment, **234**, 59
- Pristanal
- identification as product of decarboxylation of 2-hydroxyphytanoyl-CoA: phytanic acid oxidation pathway, **237**, 33
- Pro20
- role in isomerization of myotoxin *a* from *Crotalus viridis viridis*: folding and structural characterization of synthetic myotoxin *a* and Pro20Gly homologue, **241**, 525
- Procathepsin L
- recombinant, processing properties (human), **230**, 143
- Profilaggrin
- cytoplasmic processing by active  $\mu$ -calpain (human), **235**, 652
- Progesterone
- binding to plasma membrane and cytosol receptors in oocyte (frog), **232**, 213
- inhibition of monocyte chemotactic protein-1 synthesis in choriodecidual and breast cancer cell line, **239**, 557
- Progesterone receptor
- forms A and B, differential expression by estrogen *in vivo* (chicken), **231**, 573
- mediated transactivation in yeast, synthetic chemicals inhibiting, identification, **233**, 139
- from oviduct, identification and characterization (alligator), **232**, 308
- Programmed cell death, *see also* Apoptosis
- and apoptosis and necrosis, breakthroughs and views, **236**, 1
- Progressive supranuclear palsy
- and other neurodegenerative diseases with distinct tau-related pathology, cerebrospinal fluid tau levels, **236**, 262
- Prohormone convertase 2
- recombinant, cleavage of cholecystokinin 33 *in vitro*, **231**, 149
- Prolactin
- role in inhibition of 20 $\alpha$ -hydroxysteroid dehydrogenase gene expression and tyrosine kinase system (rat), **235**, 587
- stimulation of MAP kinase in leiomyoma cells (human), **238**, 473
- Proliferating cell nuclear antigen
- and DNA polymerase  $\delta$  catalytic subunit, interaction (*Schizosaccharomyces pombe*), **231**, 321
- expression in HL-60 cells infected with agent of human granulocytic ehrlichiosis, **232**, 298
- Proliferative diabetic retinopathy
- vitreous of patients, AGE and VEGF concentrations, **236**, 712
- Proline-rich protein
- p85SPR, SH3 domain-containing, cloning and localization (mouse), **235**, 794
- Proline-rich regions
- p47 $\text{phox}$  and p67 $\text{phox}$ , role in phagocyte NADPH oxidase activation *in vitro*, **241**, 226
- Prolyl endopeptidase inhibitor
- suppression of amyloid  $\beta$  protein generation in NG108-15 cells, **235**, 641
- Polyphosphorylated cells
- FL5.12, heat-induced apoptosis and hsp70, bcl-2, and Bax protein levels, effects of *Bcl-x<sub>L</sub>* overexpression (mouse), **241**, 164
- Promoters
- and 3'-regions, regulation of iNOS expression (human), **233**, 523
- ACTH receptor gene, characterization (human), **230**, 7
- S-adenosylhomocysteine hydrolase, activity in transiently transfected CHO cells, **240**, 580
- amyloid precursor protein gene promoter constructs preferentially expressed in CNS and testis of transgenic mice, **240**, 759
- angiotensinogen, hepatic activation, role of ATF-like element (human), **237**, 158
- apolipoprotein A-I, transactivation in HEPG2 cells by NFY transcription factor (human), **231**, 140
- bidirectional, connection of p14.4 gene to gene for RNase P and RNase MRP protein subunit hPOPI (human), **241**, 59
- biglycan gene, in osteosarcoma cells, regulation by cAMP (human), **235**, 413
- carboxylesterase gene, binding by transcription factor (human), **230**, 215
- CCAAT-enhancer binding protein-delta gene, structure and function (rat), **231**, 30
- c-erbB gene, gene expression from, inhibition by retroviral vector expressing anti-gene RNA (human), **240**, 203
- c-fos gene, identification of 1 $\alpha$ ,25-dihydroxyvitamin D $_3$  response element (mouse), **230**, 646

Promoters (*continued*)

- DNA topoisomerase II $\alpha$  gene, cell cycle-dependent regulation (mouse), **230**, 105
- dual, regulation of osteoblast-specific factor-1 mRNA expression (mouse), **238**, 831
- dynorphin gene, effect of upstream regulatory element (rat), **231**, 172
- E-cadherin, E boxes of, role in repression of E-cadherin expression, **241**, 453
- ERE context, role in agonistic effect of tamoxifen (human), **236**, 140
- estrogen-responsive finger protein gene, multiple regulatory elements and binding proteins (human), **236**, 765
- IA-1 neuroendocrine tumor marker, molecular characterization (human), **236**, 776
- initiation factor 4A1 gene, cloned, characterization (human), **233**, 844
- iNOS gene, activity in hepatocytes, effect of oxidative stress (rat), **234**, 289
- $\alpha 6$  integrin subunit gene, characterization (human), **241**, 258
- MDR-1* gene, transactivation by Tax protein of human T-lymphotropic virus type 1, **238**, 482
- metallothionein-1 gene, activation in response to Cd and upstream stimulatory factor *in vitro*, **230**, 159
- NAD<sup>+</sup>-dependent 15-hydroxyprostaglandin dehydrogenase gene, characterization and genomic structure (mouse), **235**, 582
- Na<sup>+</sup>/I<sup>-</sup> symporter gene, characterization (rat), **239**, 34
- NF-1A domain repressing, identification, **238**, 744
- nonerythroid porphobilinogen deaminase, characterization and regulation (human), **231**, 409
- $\mu$ -opioid receptor gene, dual, mediated expression (mouse), **234**, 351
- p14.4 gene, isolation and characterization: p14.5-hPOP1 region bidirectional promoter function (human), **241**, 59
- p21, *in vitro* transcriptional activation by p53, **234**, 300
- p21<sup>Waf1/Cip1</sup>, activation by *ets* oncogene family transcription factor E1AF (human), **236**, 79
- p21<sup>Waf1/Cip1</sup>, activity in NIH3T3 cells, p53-independent enhancement by sodium butyrate, **237**, 457
- p53 tumor suppressor gene, transcription, effect of CpG methylation (human), **235**, 403
- peroxisome proliferator-activated receptor  $\gamma 2$ , transcription from, direct modulation by CAAT/enhancer binding proteins, **240**, 99
- 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase M promoter, activation by C/EBP (rat), **232**, 247
- plasminogen activator inhibitor-1, stimulation by multiple agonists, impairment by dominant-negative Smad3 protein, **232**, 517
- RNA polymerase III, GCAAG/CTTGC motifs between Sprit sequences for, role in neural BC1 RNA transcription, mutational analysis, **239**, 407
- ompB*, mutants, alteration in stringent response (*Escherichia coli*), **230**, 582
- SH3BGR gene, sequencing and identification of potential regulatory elements (human), **241**, 321
- sigma receptor type 1 gene, analysis (mouse), **241**, 535
- smooth muscle myosin heavy chain embryonic form gene, characterization (rabbit), **239**, 598
- tec* gene, activity of, Sp1 and PU.1 as essential transcription factors (mouse), **234**, 376
- testis, GATA-1 transcripts, expression in hematopoietic cells during development and cell differentiation (mouse), **231**, 299
- topoisomerase II $\alpha$ , inverted CCAAT boxes in, potential regulatory role (HL-60 cells), **232**, 608
- vascular endothelial growth factor gene, analysis (human), **230**, 413
- WAF1/Cip1 gene, activation by histone deacetylase via Sp1 sites in MG63 osteosarcoma cells, **241**, 142
- Xist* gene, methylated region, recognition by methylation-dependent DNA-binding (mouse), **235**, 730
- Promyelocytic leukemia cells
- acute, NB4, retinoic acid-induced differentiation and retinoylation of proteins, enhancement by *N*-4-hydroxyphenylretinamide (human), **232**, 432
- HL-60, *see* HL-60 cells
- Pronectin
- or laminin, JNK/SAPK and ERK activation by mechanical strain in rat VSMC cultured on, **237**, 239
- Proopiomelanocortin
- cDNA sequence (white sturgeon), **230**, 452
- derived peptides, isolation from pituitary and structural characterization (rainbow trout), **238**, 653
- Propenals
- basic, formation by hydroxyl radical damage of DNA, **238**, 317
- Propeptides
- synthetic, inhibition of tobacco hornworm midgut trypsin *in vitro*, **235**, 606
- Prophage P1
- RepA, interaction with replication origin of plasmid Rts1, **241**, 570
- Prosaposin receptor
- characterization as G-protein-associated receptor (baboon), **240**, 415
- Prostacyclin
- elevated release from shear-stressed aortic endothelial cells, role of nitric oxide (bovine), **233**, 748
- gastric, stress-induced decrease, prevention by leukocyte depletion and ONO-5046 (rat), **231**, 52
- production in bovine aortic endothelial cells, effects of eicosapentaenoic and docosahexaenoic acids, **241**, 513
- Prostaglandin D<sub>2</sub>
- production in LPS-stimulated peritoneal macrophages, effect of concordant induction of PGE<sub>2</sub> synthase with cyclooxygenase-2 (rat), **230**, 110
- Prostaglandin-D synthase
- hematopoietic, induction in human megakaryocytic cells by phorbol ester, **241**, 288
- Prostaglandin E<sub>2</sub>
- production in LPS-stimulated peritoneal macrophages, effect of concordant induction of PGE<sub>2</sub> synthase with cyclooxygenase-2 (rat), **230**, 110
- release by hypoxic astroglial cells, modulation by interleukin-1 $\beta$  (human), **238**, 916
- secretion by adrenal gland, regulation by Substance P, cellular mechanism (newt), **233**, 395
- Prostaglandin E<sub>2</sub> receptor
- gene expression in myometrium and downregulation during pregnancy (human), **238**, 838
- Prostaglandin-endoperoxide H synthase
- isoforms 1 and 2, expression in placenta at term (human), **233**, 496
- Prostaglandin-endoperoxide synthase 1
- expression in bovine aortic endothelial cells, reduction by eicosapentaenoic and docosahexaenoic acids, **241**, 513
- Prostaglandin EP3 receptor
- isoforms in Rho-mediated stress fiber formation (MDCK II cells), **234**, 631
- Prostaglandin-E synthase
- microsomal, glutathione-dependent and -independent, tissue distribution (rat), **235**, 148
- Prostaglandin-E<sub>2</sub> synthase
- concordant induction with cyclooxygenase-2, effect on PGE<sub>2</sub> production in peritoneal macrophages (rat), **230**, 110
- Prostaglandin F<sub>2a</sub>
- enhancement of LIF stimulation of DNA synthesis in fibroblasts via PKC-independent signaling pathway, **236**, 814
- Prostaglandin F<sub>2a</sub> receptor
- agonists, inhibition of adipose differentiation of primary culture of adipocyte precursors in defined medium (rat), **233**, 200
- gene expression in myometrium and downregulation during pregnancy (human), **238**, 838
- Prostaglandin I<sub>2</sub>, *see* Prostacyclin
- Prostate
- arginase II mRNA expression (human), **233**, 487
- epithelial cells, spermidine-spermine *N*<sup>1</sup>-acetyltransferase, effect of gossypol (dog), **231**, 383

- transcript abundance, increase by luteinizing hormone independently of androgens (rat), **233**, 108
- tumor, 13-hydroxyoctadecadienoic acid production (human), **239**, 775
- Prostate cancer cells
- growth, stimulation by arachidonic acid, role of 5-lipoxygenase (human), **235**, 418
  - LNCaP, androgen-sensitive
    - apoptosis and altered nuclear/cytoplasmic distribution of androgen receptor and prostate-specific antigen by  $1\alpha,25$ -dihydroxyvitamin  $D_3$  (human), **235**, 539
    - growth and prostatic marker expression, regulation by activin A (human), **234**, 362
  - LNCaP and PC-3
    - gene transfer and expression in, effects of selective clinical ultrasound signals (human), **234**, 64
    - 13-hydroxyoctadecadienoic acid production (human), **239**, 775
  - PC-3 and DU 145, heterozygous for Taq I restriction enzyme polymorphism, mRNA stability of vitamin D receptor big T and small t alleles (human), **238**, 77
- Prostate-specific antigen
- expression in androgen-sensitive prostate cancer cell line LNCaP, regulation by activin A (human), **234**, 362
  - gene 5' far upstream flanking region, androgen responsive element (human), **231**, 784
  - high-affinity peptide ligands to, identification by polysome selection, **232**, 578
  - nuclear-cytoplasmic distribution in androgen-responsive LNCaP cells, role of  $1\alpha,25$ -dihydroxyvitamin  $D_3$  (human), **235**, 539
  - zymogen form, activation by human glandular kallikrein 2, **238**, 549
- Prostatic acid phosphatase
- expression in androgen-sensitive prostate cancer cell line LNCaP, regulation by activin A (human), **234**, 362
- Protease Q
- stability against autolysis and in SDS and urea solutions, **240**, 839
- Proteasome inhibitors
- induction of 60-kDa A170 stress protein in peritoneal macrophages (mouse), **232**, 33
- Proteasomes
- inhibition in HepG2 cells by insulin (human), **234**, 671
  - role in geldanamycin-induced destabilization of Raf-1 (NIH3T3 cells), **239**, 655
  - role in pre-maturation-promoting factor activation during starfish oocyte maturation, **236**, 40
  - subunit, differential expression during chick development, **234**, 216
- Protein 7.2b
- from erythrocyte membranes, binding to calpromotin (human), **232**, 294
- Proteinase
- characterization of energy-dependent proteases in bacteria, **241**, 613
  - degradation, protein constituents of dialysis-associated amyloidosis, protection by  $\alpha_2$ -macroglobulin (human), **231**, 48
  - domain of aqualysin I, folding on secretion by yeast, effect of carboxy terminal pro-sequence, **231**, 535
  - hepatitis C virus, inhibitory effects of thiazolidine derivatives, **238**, 643
  - HIV-1, *see* Human immunodeficiency virus type 1, protease
  - human foamy virus, recombinant, expression and molecular characterization, **237**, 548
  - for lamin proteolysis during apoptosis, characteristics and localization, **233**, 96
  - mitochondrial, inducing calmitine deficiency in skeletal muscle of Duchenne's muscular dystrophy patients and dy/dy dystrophic mice, inhibition by IP96, **232**, 559
  - substrates, stereospecificity, activity of thioesterase I (*Escherichia coli*), **231**, 452
- Proteinase 3
- human leukocyte, inhibition by recombinant serine proteinase inhibitor LEX032, **233**, 697
- Proteinase-activated receptor-2
- selective activation, induction of vascular smooth muscle cell growth (human), **241**, 762
- Proteinase inhibitor 9
- human, inhibition of bacterial subtilisin A, **238**, 329
- Protein disulfide-isomerase
- depletion, lethality of, suppression in CXXC sequence-dependent manner by Mpd2p overproduction (*Saccharomyces cerevisiae*), **239**, 710
- Protein folding
- aqualysin I protease domain, on secretion by yeast, effect of carboxy terminal pro-sequence, **231**, 535
  - chromatin fiber, role of histones H3-H4 (chicken), **230**, 136
  - recombinant membrane protein, stably transformed Sf9 cell line showing improvement in, generation, **238**, 823
  - role of chaperonin containing TCP-1 (*Caenorhabditis elegans*), **241**, 687
- Protein hydrolysis
- comparative, in evaluation of coupling efficiency of LDLs for macrophage-specific drug targeting, comparison with other methods, **240**, 112
- Protein isoprenylation
- salvage pathway with farnesol and geranylgeraniol, **237**, 483
- Protein kinase
- association with putative B-lymphocyte surface molecule B7.3 (human), **228**, 489; *erratum*, **231**, 868
  - cAMP-dependent, *see* Protein kinase A
  - with high homology to protein kinase N, identification (*Drosophila melanogaster*), **232**, 126
  - mitogen-activated, in articular chondrocytes, effect of interleukin-1 (rabbit), **230**, 573
  - ribosome-associated, phosphorylation of ribosomal proteins (*Streptomyces collinus*), **238**, 370
- Protein kinase A
- and adenylyl cyclase and GTPase and phosphorylation of  $G_i$ , in chick muscle cells, effects of  $1\alpha,25$ -dihydroxyvitamin  $D_3$ , **234**, 125
  - catalytic subunit, N-myristoylation (*Caenorhabditis elegans*), **238**, 523
  - dual action on granulocyte movement (HL-60 cell), **235**, 445
  - modulation by  $\delta$ -opioid, **236**, 626
  - phosphorylation of endothelial actin-binding protein 71-kDa domain (human), **232**, 555
  - pseudosubstrate inhibition in intact pancreatic islets, effects on cAMP- and glucose-dependent insulin secretion (rat), **232**, 648
  - role in genistein induction of cardiac CFTR chloride current in ventricular myocytes (guinea pig), **235**, 74
- type II
- regulatory subunit, purification from heads (*Drosophila*), **235**, 223
  - upregulation: induction of growth inhibition in SK-N-SH neuroblastoma cells (human), **232**, 469
- Protein kinase C
- activation by nociceptin/orphanin FQ via phospholipase C/ $Ca^{2+}$  pathway (CHO cells), **240**, 304
  - activation pathway in thrombopoietin signal transduction (human), **231**, 290
  - early and late activation in inflammatory macrophages, induction by LPS by selective activation of PKC- $\epsilon$ , **240**, 629
  - expression in neuroblastoma cells, regulation by  $1,25$ -dihydroxyvitamin  $D_3$  (mouse), **235**, 15
  - inhibitors of, inhibition of telomerase in nasopharyngeal cancer cells in culture (human), **241**, 730
  - isoforms, translocation in rat neutrophils, **234**, 412
  - modulation by  $\delta$ -opioid, **236**, 626
  - phorbol ester-sensitive isoforms, role in lymphokine-activated killer cell-mediated cytotoxicity (mouse), **235**, 461

Protein kinase C (*continued*)

- phosphorylation, regulation of zinc-binding transcription regulatory protein binding to c-Jun (human), **230**, 331
- rapid activation and cytosolic-to-particulate translocation of  $\alpha$  and  $\beta$  isoforms, induction by interleukin-11 in K562 cells, **232**, 61
- regulation of sarcoplasmic reticulum-associated ADP-ribosyl cyclase in cardiac muscle (dog, rat), **234**, 252
- role in activation of extracellular signal-regulated kinase 1/2 by UVC irradiation (NIH3T3 cells), **240**, 273
- role in serum factor potentiation of ACh receptor currents (*Xenopus* oocytes), **238**, 565
- tyrosine phosphorylation-dependent activation, in direct activation of T cells by CD40 ligand (human), **239**, 11
- upstream regulation of 1,25-dihydroxyvitamin D<sub>3</sub>-induced activation and nuclear translocation of MAPK in HL-60 cells, **241**, 419

Protein kinase C- $\alpha$ 

- role in activation of ecto-5'-nucleotidase in preconditioned myocardium (dog), **239**, 171

Protein kinase C- $\epsilon$ 

- selective activation, role in LPS-induced early and late activation of PKC in inflammatory macrophages, **240**, 629

Protein kinase C- $\zeta$ 

- atypical NIH3T3 cells overexpressing, effects of phorbol 12-myristate 13-acetate, **237**, 336

## Protein kinase CKII

- activity modulation by synthetic peptide corresponding to N-terminus of  $\beta$  regulatory subunit, **232**, 178
- $\beta$  subunit, interaction with ribosomal protein L41: stimulation of phosphorylation of DNA topoisomerase II $\alpha$  by CKII, **238**, 462
- downregulation by sodium butyrate in tumor cell line, **233**, 673
- related activity, phosphorylation of A170 stress protein in macrophages (mouse), **241**, 157

Protein kinase F<sub>1</sub>/glycogen synthase kinase 3 $\alpha$ 

- selective interaction with membrane phospholipids, **237**, 331

## Protein kinase N

- protein kinase with high homology to, identification (*Drosophila melanogaster*), **232**, 126

Protein phosphatase, *see* Phosphoprotein phosphataseProtein phosphorylation, *see* Phosphorylation

## Proteins

- 13-kDa, with helix-turn-helix motif, encoding by bacterial operons related to SRP pathway, **231**, 839
- 14-3-3  $\zeta$ , binding to carboxyl half of weel kinase (mouse), **230**, 262
- 15-kDa, encoding gene, sequencing, analysis, and expression in *Escherichia coli* (*Cryptosporidium parvum*), **230**, 164
- 16S, rRNA, gene sequence and copy number (*Xanthomonas campestris*), **235**, 276
- 40-kDa, overexpression in human multidrug resistant cells, **236**, 483
- 41-kDa, tyrosine phosphorylation in LPS-stimulated macrophages, inhibition by negatively charged liposomes (mouse), **231**, 827
- 70-kDa, facilitation of interleukin-4 signal transduction in absence of common gamma receptor chain (human), **233**, 279
- 72-kDa, tyrosine phosphorylation downstream of Syk, induction by Fc $\epsilon$ RI aggregation (RBL-2H3 cells), **239**, 670
- 140-kDa, in human gastric cell lines AZ-521 and AGS, binding of *Helicobacter pylori* vacuolating cytotoxin, **238**, 629
- aggregated, limited proteolysis *in vivo* (*Escherichia coli*), **237**, 325
- with aluminum tolerance activity, ALU1-P gene encoding, isolation (*Arthrobacter viscosus*), **239**, 835
- B30.2-like domain, family members (human), **235**, 162
- binding by glutathione peroxidase RNA and manganese superoxide dismutase RNA (rat), **222**, 590; *erratum*, **238**, 686
- Dbl homology domain membrane binding and enzymatic activation, role of neighboring pleckstrin homology domain, **234**, 183

filamentous phage  $\phi$ Lf 10-kDa minor coat protein, gene VI coding for, identification, **239**, 752

galactosylation, UDP-galactose transporter homolog required for, encoding by *gms1*<sup>+</sup> gene (*Schizosaccharomyces pombe*), **232**, 121

glycated, modulation of t-plasminogen activator-catalyzed plasminogen activation, **240**, 595

## glycosylation

in Golgi apparatus, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682

in heat-resistant rat fibroblast model expressing human HSP70, **232**, 26

inhibitor of neuronal nitric-oxide synthase, distribution in brain (rat), **238**, 617

insolubility in long-term postconfluent MDCK epithelial cell culture (canine), **234**, 719

Maillard reaction with glucose, formation of vesperlysines A, B, and C as crosslinked products, **232**, 227

mammary, synthesis, regulation by cellular hydration state (rat), **230**, 351

mitochondrial, encoded by nuclear gene within DFNB8/10 critical region on 21q22.3, immunochemical characterization (human), **238**, 806

–mitochondrial DNA interaction upstream of Ori-L, in *organello* footprint analysis (rat), **231**, 856

nuclear and cytoplasmic, O-glycosylation, regulation, **231**, 237

pertussis toxin-sensitive phosphorylation, induction by fluoroaluminate, **235**, 680

phase-specific expression in *Saccharomyces cerevisiae*, **233**, 480

protein–protein interactions, role of cytoplasmic domains of voltage-sensitive K<sup>+</sup> channels, **232**, 585

related to mammalian arrestin, immunodetection in *Euglena gracilis*, **233**, 601

retinoylation, enhancement by *N*-4-hydroxyphenylretinamide in acute promyelocytic leukemia NB4 cells (human), **232**, 432

ribosomal, *see* Ribosomal proteins

–RNA interaction, selection system for analysis, **235**, 806

skeletal muscle, in Fe-nitroacetate-treated rat, free radical-mediated effects, **231**, 37

soluble, immunoadjuvancy of liposomes in induction of immune responses to, relationship to surface charge, **240**, 793

synaptic vesicle and presynaptic plasma membrane, differential role in Alzheimer's disease, **236**, 239

synthesis by pelvic cartilage, effect of boric acid solution (chicken embryo), **234**, 263

tryptophan residues exposed to peroxynitrite, oxidative modification, **234**, 82

Protein synthesis

initiation complexes, mammalian, binding constants of formation and role of mRNA, **230**, 27

Protein-tyrosine kinase

cascade, signaling components, identification with phosphopeptide affinity chromatography (HL-60 cells), **234**, 748

dependent signal pathway, in *Helicobacter pylori* induction of IL-8 expression in endothelial cells, **240**, 561

erbstatin-sensitive, functioning in ascidian egg activation, **238**, 130

human insulin receptor deficient in, hyperinsulinemia in transgenic mouse homozygous for, **240**, 446

inhibition by 5-S-GAD: insect antibacterial substance, **237**, 423

inhibitor of, role in cation influx in agonist-stimulated endothelial cells (pig), **235**, 657

insulin receptor-associated activity, effects of mutations at receptor serine residues (human), **239**, 235

p125FAK-phosphorylating, suppressive role in hydrogen peroxide-induced apoptosis of T98G cells, **241**, 769

prolactin-mediated inhibition (rat), **235**, 587

role in genistein induction of cardiac CFTR chloride current in ventricular myocytes (guinea pig), **235**, 74

signaling at fertilization, **240**, 519

- Src, *see* Src kinase
- Syk, *see* Syk kinase
- Protein-tyrosine kinase receptor
- Flt-1, in vascular endothelial growth factor, extracellular domains mediating ligand interactions, identification, **231**, 596
- Protein-tyrosine-phosphatase
- inhibitor 3,4-dephosphatin, effect on neurite formation and MAP kinase activation in growth factor-treated PC12h cells, **238**, 213
- LAR
- role in insulin receptor dephosphorylation (rat), **235**, 709
- suppression, effect on apolipoprotein B secretion by McA-RH7777 rat hepatoma cells, **237**, 367
- low-molecular-weight, negative regulation of insulin-mediated mitotic and metabolic signaling (NIH-3T3 cells), **238**, 676
- modulation by interleukin-1 in brain endothelial cells (pig), **239**, 804
- SAP-1, overexpression in colorectal cancer (human), **231**, 705
- Protein-tyrosine-phosphatase  $\gamma$
- receptor-like isoforms, characterization (rat), **230**, 419
- Protein-tyrosine-phosphatase receptor
- gene cloning and characterization (human), **231**, 77
- Proteoglycans
- macrophage colony-stimulating factor, identification of basic fibroblast growth factor binding domains (human), **230**, 392
- metabolism in mature bovine articular cartilage explants, effects of continuous cyclic mechanical loading, **240**, 216
- oxidized LDL uptake in pathway mediated by, effect of angiotensin II injection (mouse), **239**, 63
- synthesis by pelvic cartilage, effect of boric acid solution (chicken embryo), **234**, 263
- Proteoglycogen
- biosynthesis: modulation of glycogenin expression in developing chicken, **240**, 142
- Proteolipid protein
- myelin, molecular evolution, **237**, 559
- Proteolipids
- MAL, and caveolin, detection in distinct lipid microenvironments in internal detergent-insoluble membranes in MDCK cells, **233**, 707
- Proteolysis
- associated cellular machinery, role in apoptosis, review, **230**, 481
- effect of protein phosphorylation (rat), **231**, 403
- endothelial actin-binding protein 71-kDa domain by calpain (human), **232**, 555
- lamin during apoptosis, two proteases involved in, characteristics and localization, **233**, 96
- limited, angiotensin-converting enzyme, and characterization of catalytically active N and C domains (human kidney), **236**, 16; *erratum*, **238**, 271
- limited *in vivo*, aggregated proteins (*Escherichia coli*), **237**, 325
- ricin A chain, as requirement for cytotoxicity, analysis in Vero cells and murine macrophages, **241**, 617
- saporin resistance to, **234**, 129
- ubiquitin-mediated system
- in soleus muscle, effect of TNF- $\alpha$  (rat), **230**, 238
- susceptibility of proteinase 3C of hepatitis A virus and poliovirus to degradation by, **238**, 119
- Proteomes
- map construction with 2D gel electrophoresis, review, **231**, 1
- $\alpha$ -Prothymosin
- overexpression concomitant with c-myc during hepatic carcinogenesis (rat), **232**, 817
- Protonmotive force
- control of oxidative phosphorylation yield (rat), **232**, 532
- Protoporphyrin IX
- gene regulation of heme-binding protein 23 in liver and hepatocyte cultures (rat), **231**, 667
- Proximal tubule cells
- effects of cryoprotectants: prevention of cell lysis and promotion of recovery of respiration and ion transport (rabbit), **234**, 275
- hypoxia- and mitochondrial inhibitor-induced injury and death, protective effects of depletion of ER calcium stores (rabbit), **240**, 57
- Pseudoalteromonas denitrificans*
- cycloprodigiosin hydrochloride isolated from, effects on T cell proliferation, **237**, 543
- Pseudogenes
- P2Y6 receptor, identification (human), **237**, 297; *erratum*, **240**, 507
- Pseudomonas aeruginosa*
- antibiotic diffusion pathways in outer membrane, **238**, 457
- antibiotic extrusion, role of *mex* operon-encoded proteins, **233**, 611
- isogenic strains susceptible and resistant to imipenem, ATR-FTIR spectroscopic study, **232**, 240
- Pseudomonas* exotoxin
- conjugate with cyanovirin-N, construction and toxicity to HIV-infected H9 cells, **239**, 884
- Pseudomonas hydrogenothermophila*
- cbbQ* and *cbbO* genes downstream from RubisCO genes, effects on conformational states and activity of RubisCO, **241**, 565
- Pseudomonas* sp. DJ77
- phnG* gene encoding 2-hydroxyruconic semialdehyde dehydrogenase, nucleotide sequence, **240**, 41
- phnH* gene encoding 2-hydroxy-2,4-dienate hydratase, localization and sequence analysis, **238**, 56
- Pseudomonas* sp. HH35
- biosynthesis of cyclic tautomer of (3-methylmaleyl)acetone from 4-hydroxy-3,5-dimethylbenzoate, **238**, 197
- Pseudopeptides
- HIV-1 protease inhibitors, screening with *Escherichia coli* cell assay, **233**, 36
- Psychosine
- effect on calcium concentration in isolated liver nuclei (rat), **238**, 347
- Pterin-6-aldehyde
- superoxide radical scavenging activity, **233**, 447
- PTH, *see* Parathyroid hormone
- PU.1
- and Sp1, role in promoter activity of mouse *tec* gene, **234**, 376
- Pulmonary artery
- isoprostane release in organ culture, role of cyclooxygenase and NO (human), **233**, 668
- Pupa
- specific antigens, *Sarcophaga peregrina* hemocyte surface, monoclonal antibodies against, **236**, 497
- Purinergic receptors, *see specific receptors*
- Pylorus ligation
- conscious rat, in study of effect of *Helicobacter pylori* LPS on gastric acid secretion, **236**, 532
- Pyrethroid resistance
- association with Val421 to Met mutation in IS6 of *hscp* voltage-gated sodium channel in *Heliothis virescens* F., **239**, 688
- Pyridine analog
- PAK-104P, reversal of heavy metal resistance in multidrug-resistant human KB carcinoma cells, **236**, 586
- Pyridinyl imidazole
- inhibition sensitivity of CSBP-p38 MAP kinase homologs, **235**, 533
- Pyruvate kinase I
- gene encoding, linkage to *luxZ* gene enhancing bioluminescence of *lux* operon from *Photobacterium leiognathi*, **239**, 228
- Pyruvate, water dikinase, *see* Phosphoenolpyruvate synthase
- Q
- Qip1
- cDNA cloning and comparison with Rch1 and hSpr1 in interaction with DNA helicase Q1/RecQL: importin- $\alpha$  homologue (human), **234**, 48

## Subject Index

- Quinine  
deficient diet, effect on germfree mouse, **230**, 233
- Quercetin  
effects on heat shock protein induction and heat shock factor DNA-binding in breast carcinoma cells, **239**, 851
- Quinoline  
based drug, *N*-(4-[1-hydroxy-2-(dibutylamino)ethyl] quinolin-8-yl)-4-azido-salicylamide, interactions with multidrug resistance protein, **241**, 104
- R
- Rab3  
isoforms, differential expression during differentiation of pancreatic acinar cell line AR42J, **236**, 719
- Rab3A  
effect on  $Ca^{2+}$  action potential frequency in pituitary GH<sub>3</sub> cells (rat), **235**, 331
- Rab11  
association with transferrin-containing recycling compartments in K562 cells, **239**, 612
- Rabson-Mendenhall syndrome  
insulin receptor mutant alleles associated with, identification, **237**, 516
- Rac1  
expression in crypt-villus axis of small intestine, relationship to insulin (rat), **233**, 455  
regulation of cell-cell adhesion of MDCK cells, **240**, 430
- Rac2  
activation in L-selectin regulation of actin polymerization (human), **231**, 802
- Raclopride  
binding to dopamine D<sub>2</sub> receptor Ser<sup>3</sup> →Cys variant *in vitro* and *in vivo* (human), **232**, 143
- Radiation  
induced cell cycle arrest and apoptosis in human tumor cells, promotion by GML overexpression, **241**, 481  
induced micronuclei formation in breast cancer cells, role of serum concentration and cell cycle distribution, **237**, 678  
ionizing, and dexamethasone, induced apoptosis in murine T cells, mediation by *c-fos* proto-oncogene, **241**, 510  
resistant phenotype, in human tumor cells, role of signal transduction pathway, **230**, 196
- Radiometry  
in evaluation of coupling efficiency of LDLs for macrophage-specific drug targeting, comparison with other methods, **240**, 112
- Radiosensitization  
by functional expression of human p21<sup>WAF1</sup> gene in rat glioma cells *in vivo*, **233**, 320  
hyperthermic, mechanism, role of hyperthermic lability of Ku subunits in DNA-dependent protein kinase, **234**, 568
- Raf-1  
geldanamycin-induced destabilization, role of proteasome (NIH3T3 cells), **239**, 655
- Raf-1-MAP kinase  
Ras-dependent, role in protooncogene Crk-II effect on apoptosis in HEK cells (human), **234**, 616
- RAGE protein  
role in  $\beta$ -amyloid toxicity (rat), **237**, 37
- Raloxifene  
binding and bioeffects on human leukemic cell line FLG 29.1, **240**, 573
- Rap1 protein  
cell cycle-regulated expression in regenerating liver (rat), **230**, 888
- Rapamycin  
effect on dexamethasone-induced apoptosis and c-Jun amino terminal kinase in lymphoblastoid cells, **230**, 386  
mammalian target of, expression, enzyme activity, and subcellular localization in insulin-responsive 3T3-L1 cells, **241**, 704
- Ras  
antagonist *S*-farnesylthiosalicylic acid, induction of inhibition of MAP kinase activation (EJ, Rat-1 cells), **239**, 900  
incorporating photoactive isoprenoid, enzymatic synthesis, **235**, 377  
and MAP kinase, IL-2 production in T cells driven by, inhibition by perillic acid (human), **241**, 720
- p21  
farnesylated, GTP loading by insulin at plasma membrane (3T3-L1 cells), **239**, 42  
geranylgeranyl and farnesyl moiety transfer (rat), **231**, 789  
Rlf protein domain binding, characterization, **238**, 425  
transformed NIH3T3 cells, association of dynamin II with Grb2 SH3 domain, **234**, 539
- Ras farnesyl-protein transferase  
inhibition by oreganic acid (human), **232**, 478
- RB  
phosphorylation, and c-myc expression, during TNF-mediated growth arrest in human endothelial cells, **236**, 819  
role in SV40 large T antigen transcriptional activation of human c-myc gene, **235**, 153
- RBM3  
glycine-rich RNA-binding protein, increased mRNA levels in human cells in response to cold stress, **236**, 804
- Rch1  
and hSrp1 and cloned human importin- $\alpha$  homologue Qip1, interaction with DNA helicase Q1 RecQ, **234**, 48
- Reactive center loop  
length, effects on serpin polymerization, **241**, 264
- Reactive oxygen species  
effect of troglitazone, **235**, 113  
generation from advanced glycation end-products under UV A irradiation, **235**, 306  
levels in NIH-3T3-ras cells, control by large aggregates of unphosphorylated hsp27 mutants, **241**, 187  
production, role in hyperoxia-induced neuronal differentiation in PC12 cells, **241**, 347  
role in *N*-(carboxymethyl)lysine formation from Amadori product, **234**, 167  
role in peroxynitrite-induced apoptosis in HL-60 cells, **230**, 115  
scavenging by electrolyzed-reduced water, and protective effects against oxidative DNA damage, **234**, 269
- Receptor for advanced glycation end products  
gene expression in type II alveolar epithelial cells (rat), **238**, 512
- Receptor-mediated calcium entry  
effect on PAF primed responses in human neutrophils, **240**, 763
- Receptor-mediated endosomal flow  
and bulk-membrane and fluid-phase flow, effects of perturbations (fetal rat fibroblasts), **236**, 661
- Receptor tyrosine kinase, *see also specific name*  
signal transduction in breast epithelial cells, effects of Fas-signaling (human), **230**, 89
- Reconstitution  
human heart muscle carnitine palmitoyltransferase I highly expressed in yeast, **239**, 498
- Recycling  
fluid-phase, bulk-membrane, and receptor-mediated tracers, effects of perturbations (fetal rat fibroblasts), **236**, 661  
transferrin-containing compartments in K562 cells, association of Rab11 with, **239**, 612
- Red algae  
thermophilic, detection of ribulose-1,5-bisphosphate carboxylase/oxygenase with strong specificity for CO<sub>2</sub> fixation, **233**, 568
- Redox status  
cysteines in HIV-1 Vif in infected cells and in virions, **240**, 257  
in lymphocytes, effects of aging (mouse), **240**, 68

- regulation, inhibition of CPP32-like activity by nitric oxide under, **236**, 365
- Red pigment-concentrating hormone  
AKH/RPCH family  
distinct sequences in corpus cardiacum (beetle), **230**, 16  
identification of adipokinetic hormone isolated from *Melanoplus sanguinipes* as member, **239**, 763
- Ref-1  
mRNA and protein, thyrotropin-induced increase in rat thyroid FRTL-5 cells, **236**, 71
- Regulatory elements  
AIC, binding by NFY transcription factor, in HEPG2 cells (human), **231**, 140  
and binding proteins, of estrogen-responsive finger protein gene promoter region (human), **236**, 765  
in insulin-responsive glucose transporter GLUT4 gene, **241**, 1  
integrin  $\alpha 6$  subunit gene, identification (human), **241**, 258  
posttranscriptional, hepatitis B virus, RNA secondary structure, **231**, 864  
potential, for SH3BGR protein in Down syndrome chromosomal region, identification (human), **241**, 321  
upstream, effect on dynorphin gene promoter (rat), **231**, 172
- Regulatory light chain  
smooth muscle, fusion protein with biotin-dependent transcarboxylase, replacement in myosin subfragment 1 for binding to glass surface, **230**, 76
- Regulatory regions  
distal, of rat *MRF4* gene, **237**, 170
- Renal carcinoma  
in *Tsc2* gene mutant rat model, AP-1 mRNA and protein expression during development of, and effects of overexpression of antisense oligonucleotides, **241**, 24
- Renal carcinoma cells  
UOK130, haloenol lactone synergistic effect with cisplatin and inactivation of GST (human), **241**, 13
- Renaturation  
in-gel, ERK1 in human, mouse, and rat osteoblasts, **238**, 134  
*Renilla* luciferase  
as bioluminescent reporter protein using coelenterazine analogues as substrate, **233**, 349
- RepA  
P1, interaction with replication origin of plasmid Rts1, **241**, 570
- Reperfusion  
induced endothelial cell injury, role of ICE-like proteinases, **231**, 844
- Repetitive sequences  
hemopexin-like, in human vitronectin, recognition by *Streptococcus pyogenes*, **234**, 445
- Replication  
hepatitis G virus in human cells with susceptibility to hepatitis C virus infection, **235**, 505  
HIV-1, Gag protein roles, domain mapping analysis, **241**, 317  
HIV-1 competent for, expressing jellyfish green fluorescent protein, generation, **233**, 288  
initiation in aldose B locus, sequence requirement for, functional correlation with transcriptional regulation (rat hepatoma cells), **237**, 707  
plasmid DNA in *Escherichia coli*, instability of regions with expanded CAG repeats during, **240**, 471
- Replication factor C  
large subunit, specific cleavage in apoptosis, mediation by CPP32-like protease, **233**, 343
- Replication origin  
plasmid Rts1, interaction of P1 RepA with, **241**, 570
- Rep protein  
similar to gene II protein of phage I2-2, plasmid pXV64 encoding, sequence analysis (*Xanthomonas campestris* pv. *vesicatoria*), **231**, 121
- Resistance  
elongation factor Tu1 against EF-Tu-targeted antibiotics (*Planobispora rosea*), **230**, 320  
heavy metal, reversal in multidrug-resistant human KB carcinoma cells, **236**, 586  
insulin, *see* Insulin resistance  
metronidazole, in *Helicobacter pylori*, isolation of associated genetic locus, **236**, 785  
STa-induced intestinal secretion, in mice lacking guanylyl cyclase C receptor, **239**, 463  
to thyroid hormone, mutant thyroid hormone receptor  $\beta 1$  identified in patient with, inhibition of wild-type TRs and other nuclear receptors, **238**, 39; *erratum*, **240**, 507
- Resonance Raman spectroscopy  
soybean peroxidase, **240**, 65
- Resorption  
bone marrow cells, role of M-CSF (pig), **231**, 231  
stage in cycle, dependence of pH, regulation in osteoclasts (rat), **235**, 838
- Respiration  
and ion transport, recovery after anoxia/reoxygenation in proximal tubule cells, promotion by cryoprotectants (rabbit), **234**, 275  
in lymphocytes, effects of aging (mouse), **240**, 68
- Respiratory chain deficiency  
mild, effects on substrate competitive oxidation in human mitochondria, **236**, 643
- Respiratory complex I, *see* NADH dehydrogenase (ubiquinone)
- Respiratory flux  
control of oxidative phosphorylation yield (rat), **232**, 532
- Response elements  
1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>, identification in *c-fos* promoter (mouse), **230**, 646
- Restriction enzyme mapping  
*tec* promoter (mouse), **234**, 376
- Restriction enzymes  
single, recognizing 4-bp sequence, amplified RFLP-based mRNA fingerprinting using, **234**, 516
- Restriction fragment length polymorphisms  
amplified, based RNA fingerprinting, using single restriction enzyme recognizing 4-bp sequence, **234**, 516  
flanking alternatively spliced 8-amino-acid exon of  $\gamma 2$  subunit gene for GABA<sub>A</sub> receptor, detection, **238**, 683
- Reticulocalbin  
crotoxin-binding protein related to, purification and partial amino acid sequence (guinea pig, pig), **239**, 18  
differential display in MDA-MB-435 and MCF-7 cells (human), **231**, 283
- Reticuloplasmin  
secretion, and KDEL receptor expression, in HeLa cells, effect of perturbation of endoplasmic reticulum function, **240**, 36
- Retina  
*Drosophila retinal degeneration B* genes, molecular cloning and characterization of mammalian homologues, **236**, 559  
embryonic, choline acetyltransferase stimulation by insulin, role of jun protein (chicken), **232**, 788  
5-methoxytryptamine and 5-methoxyindole-3-acetic acid, diurnal rhythms and interspecies differences (quail, rat), **239**, 353  
*NeuroD* mRNA cloning and expression analysis (rat), **233**, 459  
neuronal Na<sup>+</sup> channel, tetrodotoxin resistivity (newt), **240**, 651  
photoreceptors, ES1 gene specifically expressed in, cloning (zebrafish), **237**, 84  
physiology, role of *N*-acetylserotonin: inhibition of lipid peroxidation, **233**, 778
- Retinal  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48

- 9-*cis*-Retinal  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48
- Retinal pigmented epithelial cells  
and Müller glial cells, NO production in, control by endogenous TNF- $\alpha$  (mouse), **240**, 132
- Retinitis punctata albescens  
affected patient, peripherin/RDS gene coding region, identification of mutations, **231**, 103
- Retinoblastoma protein  
association with protein phosphatase-1 $\delta$  (human), **235**, 704  
binding of phosphorylated forms of E2F-1 in cells overexpressing E2F-1 cDNA (mouse), **232**, 336
- Retinoic acid  
differential effects on Na<sup>+</sup>/I<sup>-</sup> symporter mRNA levels in human thyroid cancer cell lines and nontransformed FRTL-5 rat thyroid cells, **240**, 832  
effect on NOR-1 and related nuclear receptor genes in MCF-7 cells (human), **231**, 417  
hepatic microsomal UDP-glucuronosyltransferase with activity toward, characterization by photoaffinity labeling (rat), **230**, 497  
induced differentiation in HL-60 cells, effects of DIF-1 from *Dictyostelium discoideum*, **236**, 418  
induction of neuronal differentiation of P19 cells, CPP32-like protease activity during, enhancement by wortmannin, **232**, 192  
inhibition of growth of HPV-negative cervical carcinoma cells via induction of insulin-like growth factor binding protein-5 secretion (human), **239**, 706  
regulation of CCAAT/enhancer binding protein  $\alpha$  and  $\beta$  genes during liver development (rat), **234**, 605  
treatment of embryo *in vivo*, post-treatment expression of *goosecoid* gene, role of middle ear bones (mouse), **235**, 748
- 9-*cis*-Retinoic acid  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48
- all-*trans*-Retinoic acid  
and activin A, cooperative enhancement of functional activity of L-type Ca<sup>2+</sup> channels in C1300 neuroblastoma cells, **241**, 363  
complex with RAR $\gamma$  ligand-binding domain, crystallization (human), **230**, 293  
<sup>3</sup>H-labeled at 11 and 12 positions, in photoaffinity labeling characterization of hepatic microsomal UDP-glucuronosyltransferase with activity toward retinoic acid (rat), **230**, 497  
induction of differentiation and retinoylation of proteins in NB4 acute promyelocytic leukemia cells, enhancement by *N*-4-hydroxyphenylretinamide (human), **232**, 432  
induction of Src-like adapter protein mRNA expression, **230**, 81  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48  
stimulation of ADP-ribosyl cyclase in VSMC (rat), **238**, 847
- Retinoic acid receptor  
cofactors SMRT and Trip-1, expression in human neuroectodermal cell lines, **234**, 278  
inhibition by mutant thyroid hormone receptor  $\beta$ 1 identified in patient with resistance to thyroid hormone, **238**, 39; *erratum*, **240**, 507  
mediation of transcription regulatory effects of HX600 dibenzodiazepine, **233**, 121  
RAR $\gamma$ , ligand-binding domain, purification and crystallization of complex with all-*trans* retinoic acid (human), **230**, 293
- Retinoids  
dibenzodiazepines synergistic with, action mechanism, **233**, 121  
effect on expression of retinoic acid receptor cofactors SMRT and Trip-1 in human neuroectodermal cell lines, **234**, 278  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48  
synthetic, inhibition of IL-1-induced IL-6 production (mouse), **231**, 243
- Retinoid X receptor  
heterodimer with peroxisome proliferator activated receptor, DNA binding preferences, **233**, 91  
mediation of transcription regulatory effects of HX600 dibenzodiazepine, **233**, 121
- Retinoid X receptor  $\alpha$   
induction of apoptosis in HL-60 cells, role of Bcl-2 pathway (human), **230**, 251  
inhibition by mutant thyroid hormone receptor  $\beta$ 1 identified in patient with resistance to thyroid hormone, **238**, 39; *erratum*, **240**, 507
- Retinol  
inhibition of hepatocyte lipoprotein(a) levels (macaque), **238**, 48
- Retinoylation  
decrease in NIH 3T3 cells transformed with activated Ha-ras, **239**, 80  
proteins, enhancement by *N*-4-hydroxyphenylretinamide in acute promyelocytic leukemia NB4 cells (human), **232**, 432
- Retroviral packaging  
pseudotyped, vesicular stomatitis virus G protein through adenovirus-mediated inducible gene expression, **232**, 379
- Retroviruses  
based on Gibbon ape leukemia virus, transduction of human hematopoietic progenitor cells, **231**, 477  
mediated gene transfer in primary hematopoietic cells and cell lines, green fluorescent protein variants as markers of, **234**, 371  
reverse tetracycline-regulated vector system, control of gene expression, **234**, 769  
vector expressing *c-erbB* anti-gene RNA, inhibition of gene expression from human *c-erbB* promoter, **240**, 203
- Ret-Shc-GRB2 complex  
induced by MEN 2A and 2B and GDNF mutations, characterization, **237**, 747
- Reverse transcriptase, *see* RNA-directed DNA polymerase
- Reverse transcription  
differential display, identification of semaphorin E gene upregulation in rheumatoid synovial cells by, **234**, 153
- Reye's syndrome  
cultured fibroblasts from patients with, visualization of mitochondria with green fluorescent protein, **239**, 580
- RGS4  
mRNA, distribution in mouse brain, *in situ* hybridization analysis, **241**, 281
- RGS proteins  
*Rgs12* and *Rgs14* cDNAs encoding, cloning and expression analysis (rat), **233**, 770
- Rheumatoid arthritis  
bone destruction in, role of osteoclastogenesis induced by synovial fibroblasts (human), **240**, 279  
implications of SMRT inhibition of interstitial collagenase transcription via HRE-independent mechanism, **237**, 52  
synovial cell gene expression, analysis by mRNA differential display: semaphorin E gene upregulation, **234**, 153  
synovial cell stromelysin production, induction by  $\beta_2$ -microglobulin, **239**, 621  
superantigen (human), **231**, 222
- Rhinovirus-2 2A proteinase  
cleavage specificity for peptide substrates (human), **235**, 562
- Rho  
and c-Src, close association with GM3 in GM3-enriched microdomains at B16 melanoma cell surface, **236**, 218  
Dbl homology domain, and ezrin-like domain of band 4.1 superfamily, molecular cloning and characterization of human CDEP protein containing, **241**, 369
- Rho A kinase  
mRNA upregulation in myometrium during pregnancy (rat), **230**, 356
- Rhod 2  
selective loading into mitochondria: mitochondrial Ca<sup>2+</sup> transients during contractile cycle in rabbit cardiac myocytes, **236**, 738

- Rhodanese  
hepatic, cDNA cloning and expression (human), **231**, 56
- Rhodobacter sphaeroides*  
wild-type WS8 and polyhook mutant PG, isolation of flagellar basal body complex, **238**, 733
- Rhodococcus rhodochrous* N75  
and *Pseudomonas* sp. HH35, differential catabolism of 4-hydroxy-3,5-dimethylbenzoate: synthesis of cyclic tautomer of (3-methylmaleyl)acetone by *Pseudomonas*, **238**, 197
- Rhodopsin  
interaction with 4-hydroxynonenal, **230**, 275
- Rho GTPase  
role in endothelin-1-induced nuclear signaling (Rat-2 cells), **232**, 223
- Rho kinase  
mRNA upregulation in myometrium during pregnancy (rat), **230**, 356
- Ribonuclease  
Mn<sup>2+</sup>-dependent, function in U16 snoRNA processing in *Xenopus laevis*, **233**, 514
- Ribonuclease A  
pancreatic, 5'-diphosphoadenosine 3'-phosphate as inhibitor (bovine), **231**, 671
- Ribonuclease H  
activity in human hepatitis B virus polymerase expressed in *Escherichia coli*, **233**, 401
- Ribonuclease H1  
*Drosophila melanogaster*, functional characterization, **240**, 844
- Ribonuclease MRP  
and RNase P, protein subunit hPOP1, connection to p14.4 gene by bidirectional promoter, **241**, 59
- Ribonuclease P  
and RNase MRP, protein subunit hPOP1, connection to p14.4 gene by bidirectional promoter, **241**, 59
- Ribonucleoproteins  
hnRNP A1, interaction with human cytomegalovirus immediate-early gene 2 protein in yeast two-hybrid system, **232**, 590
- Ribosomal protein kinase  
phosphorylation of ribosomal proteins (*Streptomyces collinus*), **238**, 370
- Ribosomal proteins  
L3, association with proline-rich region of adenylyl cyclase-associated protein CAP (*Saccharomyces cerevisiae*), **232**, 503  
L41, interaction with protein kinase CKII  $\beta$  subunit: stimulation of phosphorylation of DNA topoisomerase II $\alpha$  by CKII, **238**, 462  
phosphorylation by ribosome-associated protein kinase (*Streptomyces collinus*), **238**, 370
- Ribozymes  
hammerhead  
against interleukin-2 in human cells, **231**, 397  
mediated cleavage of TNF- $\alpha$  mRNA *in vivo*, factors affecting, **236**, 205  
RNA, effect on coupled transcription translation (rabbit), **230**, 226
- Ribulose-bisphosphate carboxylase  
active site, role of isoleucine-164 (*Rhodospirillum rubrum*), **232**, 482  
conformational states and activity, effect of *cbbQ* and *cbbO* genes downstream from RubisCO genes (*Pseudomonas hydrognothermophila*), **241**, 565  
with strong specificity for CO<sub>2</sub> fixation, detection in thermophilic red algae, **233**, 568
- Rice  
salinity-stressed seedlings of cultivar Bura Rata, transient expression of multiple genes, **233**, 663
- Ricin  
A chain, proteolysis, as requirement for cytotoxicity, analysis in Vero cells and murine macrophages, **241**, 617
- Rieske iron-sulfur protein II  
*Sulfolobus acidocaldarius*, expression with correctly inserted [2Fe-S] cluster in *E. coli*, **234**, 283
- Rifampicin  
inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536
- RING finger proteins  
bfp, predominant expression in brain (rat), **240**, 8
- Rlf protein  
Ras-binding domain, characterization, **238**, 425
- RNA. *see also* Messenger RNA; Transfer RNA  
antisense  
effect on coupled transcription translation (rabbit), **230**, 226  
MDR1, inhibition of growth of multidrug-resistant KB<sub>V200</sub> cells, **239**, 345  
mediated inhibition of CAT gene expression, effects of capping and adenylation, **241**, 193  
BC1, transcription in neural cells, role of GCAAG/CTTGC motifs between Sp1 promoter sequences for RNA polymerase III, mutational analysis, **239**, 407  
binding of zinc finger-containing initiation factor eIF-5 to, zinc dependence (*Zea mays*), **236**, 510  
*c-erbB* anti-gene, retroviral vector expressing, inhibition of gene expression from human *c-erbB* promoter, **240**, 203  
*c-fms*, expression in tissue macrophages, induction by TNF- $\alpha$  (mouse), **240**, 442  
chemokine receptor-like genes, tissue expression (human), **227**, 846; *erratum*, **231**, 519  
folding, chaperone targeting of, **238**, 687  
glutathione peroxidase, and Mn superoxide dismutase RNA, evidence for binding to same protein (rat), **222**, 590; *erratum*, **238**, 686  
GTP cyclohydrolase I, differential splicing in dopa-responsive dystonia (human), **234**, 316  
hepatitis B virus posttranscriptional regulatory element, secondary structure, **231**, 864  
hepatitis G virus, plus- and minus-stranded, distribution in serum, liver tissue, and peripheral blood mononuclear cells (human), **237**, 288  
HIV-1 splice site pairs D1-A2 and D2-A2, *in vitro* splicing efficiency, **237**, 182  
HIV-1 target, interaction of viral Tat(32-72) with, fluorescence and NMR study, **241**, 31  
manganese superoxide dismutase, and glutathione peroxidase RNA, evidence for binding to same protein (rat), **222**, 590; *erratum*, **238**, 686  
placenta growth factor, generated by alternative splicing, identification and characterization (human), **235**, 493  
poly (A)<sup>+</sup>, rat brain cortex, Gs-coupled receptor-mediated cAMP production in *Xenopus* oocytes expressing, enhancement by baclofen, **241**, 476  
positive-strand virus, induced cytopathic effect in WISH cell line, role of IL-8 (human), **235**, 774  
-protein interaction, selection system for analysis, **235**, 806  
ribosomal  
5S, extended sequence complementarity to snoRNAs from *Naja n. atra* and *Bungarus multicinctus*, **236**, 782  
23S, as molecular chaperone, **238**, 687  
large subunit gene mutations, impairment of signal transduction in *Dictyos- telium discoideum* slugs, **234**, 39  
ribozyme, effect on coupled transcription translation (rabbit), **230**, 226  
skeletal muscle, detection of fusion PCR product with ZF5 zinc fingers and VP16 acidic domain (mouse), **236**, 20  
small nucleolar, *see* Small nucleolar RNA  
structural modifications, effect on exoribonucleolytic hydrolysis (*Saccharo- myces cerevisiae*), **235**, 799  
telomerase, expression, relationship to telomere length in gliomas (human), **239**, 830  
total, small amounts, in construction of cDNA libraries with suppression PCR effect, **230**, 285

- RNA, *see also* Messenger RNA; Transfer RNA (*continued*)  
 tumor hexokinase, expression in cancer cells, induction by insulin-like growth factor I, **235**, 389  
*VgI* localization signal, association of different sets of RNA binding proteins with, effects of phosphorylation, **234**, 419
- RNA binding proteins  
 phosphorylation of different sets of, effects on association with *VgI* localization signal RNA, **234**, 419
- RNA-directed DNA polymerase  
 HIV-1, inhibition by (thio)carboxanilide derivatives, models, **234**, 458
- RNA-directed RNA polymerase  
 influenza virus, gene expression, inhibition by liposomally endocapsulated antisense phosphorothioate oligonucleotides in clone 76 cells, **232**, 545
- RNA fingerprinting  
 amplified RFLP-based mRNA fingerprinting using single restriction enzyme recognizing 4-bp sequence, **234**, 516
- RNA helicase  
 activity of SecA protein (*Escherichia coli*), **235**, 593  
 gene encoding DEAH-box protein family member, cloning and characterization (human), **240**, 335
- RNA helicase II  
 binding protein, *see* Gu/RNA helicase II-binding protein
- RNA polymerase, *see* DNA-directed RNA polymerase; RNA-directed RNA polymerase
- RNase, *see* Ribonuclease
- RNA-splicing ligase  
 in *Haloferax volcanii*, **237**, 588
- RNA 5'-triphosphatase  
 mRNA capping enzyme  $\beta$  subunit gene encoding, isolation and characterization (*Saccharomyces cerevisiae*), **239**, 116
- RNB6  
 highly expressed in neonatal brain, cDNA cloning: member of Ena/VASP family (rat), **237**, 307; *erratum*, **241**, 611
- Rotation  
 intramolecular, hyperthermophilic V-ATPase of *Desulfurococcus*, structure needed for, **234**, 341
- RpoS  
 regulation of overexpression of carotenoids from *Erwinia herbicola* in oxyr-deficient *Escherichia coli*, **239**, 305
- Rsk protein  
 pp90rsk, identification of serine 380 as autophosphorylation site (*Xenopus*), **235**, 398
- Rtrp3  
 rat, molecular cloning and sequence comparison with Htrp3, **240**, 167
- Rts1 replication origin  
 plasmid, interaction of P1 RepA with, **241**, 570
- Rubella virus  
 envelope proteins, baculoviral display, **238**, 717
- Rubisco, *see* Ribulose-bisphosphate carboxylase
- Rubredoxin  
 center, desulfuredoxin conversion into, **231**, 679
- Russian-VX  
 enzymatic hydrolysis by organophosphorus hydrolase, **241**, 294
- RuvB recombination factor  
 bacterial, homologous TBP-interacting protein 49, molecular cloning, **235**, 64
- Ryanodine receptor  
 and dihydropyridine receptor, gene expression in long-term denervated muscles (rat), **240**, 612  
 intracellular  $\text{Ca}^{2+}$  release channel, effects of arachidonic acid and eicosanoids, **237**, 413
- S
- S(1-5)  
 epidermal growth factor-like protein, interaction with DAN-binding protein DA41 (rat), **237**, 245
- S6 kinase  
 70-kDa, regulation of thrombin-induced stress fiber formation in Swiss 3T3 cells, **233**, 193  
 $\text{Ca}^{2+}$ -stimulated, identification in rat liver, **239**, 451
- s26  
 and S-modulin,  $\text{Ca}^{2+}$ -binding, expression in *E. coli* and characterization (frog), **234**, 173
- Sac1p  
 role in ATP release to extracellular fluid (*Saccharomyces cerevisiae*), **236**, 50
- Saccharomyces cerevisiae*  
 aqualysin I secretion, protease domain folding, effect of carboxy terminal pro-sequence, **231**, 535  
 ATP efflux, effect of ATP-binding cassette-multidrug resistance proteins, **230**, 22  
 cell-free extracts, glucose 6-phosphate metabolism: irreversible metabolic transitions, **234**, 162  
 elongin C cDNA, cloning, comparison with fruitfly elongin B and C cDNAs, **241**, 334  
 expressed estrogen receptor, in study of clinical and environmental anti-estrogens, **235**, 669  
 functional complementation in, in molecular cloning of rat salt-tolerant protein, **229**, 134; *erratum*, **240**, 244  
 $\beta$ -1,4-galactosyltransferase expression and purification using His<sub>6</sub>-tag technology, analysis, **240**, 586  
 G1 cyclin expression and cell proliferation, role of ALG7 N-glycosylation gene, **237**, 562  
 G-protein coupled receptor gene isolation, **240**, 287  
 membrane transport deficiency, functional complementation by recombinant ND4 fusion protein, **238**, 811  
 Mpd2p overproduction, suppression of lethality of protein disulfide isomerase depletion in CXXC sequence-dependent manner, **239**, 710  
 mRNA capping enzyme  $\beta$  subunit gene encoding RNA 5'-triphosphatase, isolation and characterization, **239**, 116  
 nitric oxide-releasing particles, inhibition of phagocytosis in neutrophils (human), **233**, 492  
 phase-specific protein expression, **233**, 480  
 protein glycosylation in Golgi apparatus, membrane protein complexes for, analysis, **241**, 682  
 Sac1p, role in ATP release to extracellular fluid, **236**, 50  
 simultaneous NMR and  $^{192}\text{Ir}$  gamma irradiation, radiobiological probe for, **233**, 238
- Salinity  
 stressed seedlings of rice cv. Bura Rata, transient expression of multiple genes, **233**, 663
- Salt-tolerant protein  
 molecular cloning by functional complementation in yeast (rat), **229**, 134; *erratum*, **240**, 244
- Saporin  
 unusual stability; candidate for synthesis of immunotoxins, **234**, 129
- Sarcoma cells  
 expression of testis-specific transcripts, **241**, 653
- Sarcoplasmic reticulum  
 aortic smooth muscle cell, spontaneously hypertensive rat,  $\text{Ca}^{2+}$  pump mRNA levels, **230**, 344  
 calcium uptake, measurement: role of phospholamban phosphorylation in hypertrophied myocardium (rat), **239**, 701  
 phospholamban phosphorylation in membranes, effects of zinc (swine), **232**, 394  
 and plasma membrane, distinct ADP-ribosyl cyclase types: PKC regulation of SR-associated form (dog, rat), **234**, 252  
 vesicles, luminal  $\text{Ca}^{2+}$  kinetics during  $\text{Ca}^{2+}$  uptake and release, fluorescence probe study (rabbit), **241**, 181

- Scanning force microscopy  
study of interaction events between single molecule of heavy meromyosin and actin, **234**, 178
- Scatter factor  
–hepatocyte growth factor, expression effect on glioblastoma tumorigenicity and growth (human), **235**, 743  
regulation of endothelial CD44 expression and endothelium–tumor cell interactions (human), **233**, 1
- Scavengase p20  
gene isolation: relationship to peroxiredoxins (*Escherichia coli*), **233**, 848
- Scavenger receptor  
class B type I, cloning, characterization, and cellular distribution in ovary (rat), **234**, 499  
cysteine-rich motifs, and Kringle-like domain, molecular cloning of murine brain-specific serine protease with, **239**, 386  
regulation of no production by LPS-stimulated macrophages (mouse), **237**, 601
- Scavenging  
peroxynitrite by flavonoids, **236**, 591
- Schistomyotropin  
Scg-MT-1 and -2, identification in central nervous system of desert locust *Schistocerca gregaria*, **241**, 530
- Schizophrenia  
LDL-PLA<sub>2</sub> gene association with, analysis by systematic screening for polymorphic variants and case-control studies (human), **241**, 630
- Schizosaccharomyces pombe*  
*gms1*<sup>+</sup> gene, encoding of UDP-galactose transporter homolog required for protein galactosylation, **232**, 121
- Scott syndrome  
lymphoblasts derived from B cells in, lack of expression of *MDR* genes: link between phospholipid transmembrane migration and ABC transporter gene family, **241**, 548
- Screening  
high-throughput, antituberculosis drugs, recombinant *Mycobacterium aurum* expressing *E. coli*  $\beta$ -galactosidase in, **240**, 536  
yeast two hybrid, identification of c-Cbl interactions with 14-3-3 isoforms and cytoskeletal components, **240**, 46
- SecA protein  
RNA helicase activity (*Escherichia coli*), **235**, 593
- Secretory cells  
angiogenin localization (bovine), **232**, 323
- Secretory leukocyte protease inhibitor  
cDNA, cloning and characterization (mouse), **232**, 687
- Seedlings  
salinity-stressed, rice cv. Bura Rata, transient expression of multiple genes, **233**, 663
- Seizures  
associated mouse jerky gene, human homologue of, cloning, mapping, and tissue distribution, **236**, 389
- E-Selectin  
cytokine-induced expression in human endothelial cells, effects of dimethylfumarate, **234**, 19  
metabolic changes caused by binding of mucin carrying sialylLewis A antigens (human), **234**, 559
- L-Selectin  
binding by 6-sulfated Sialyl Lewis X series: enhancement due to de-*N*-acetylation of sialic acid, **240**, 748  
regulation of actin polymerization, role of G protein Rac2 activation (human), **231**, 802
- Selenium  
equimolar complex with Hg, binding to selenoprotein P (rat), **231**, 7  
inhibitory effect on biliary secretion of methyl mercury (rat), **239**, 862
- Selenium deficiency  
effect on thioredoxin reductase activity in liver, kidney, and brain (rat), **234**, 293
- Selenomethionine  
derivatized oxygenase component of naphthalene dioxygenase, and native form, purification and crystallization, **241**, 553
- Selenoprotein P  
binding to equimolar Hg–Se complex (rat), **231**, 7
- SELEX  
with magnetic bead-based affinity separation, for *in vitro* selection of DNA ligands to chloroaromatics, **234**, 117
- Self-association domains  
N-terminal, role in dominant negative transcriptional activity of WT1 Denys-Drash mutant proteins, **233**, 723
- Semaphorin E  
gene expression upregulation in rheumatoid synovial cells, **234**, 153
- Seminal fluid  
bivalve mollusk, glycosylated  $\alpha$ -L-fucosidase, comparison with nonglycosylated sperm plasma membrane form (*Unio elongatulus*), **234**, 54
- Seminal vesicles  
autoantigen, genomic structure (mouse), **231**, 106
- Senescence  
A5DC7 cells, concomitant telomerase repression mechanism, analysis, **237**, 313  
associated rearrangement of mitochondrial DNA from deltoid muscle (human), **232**, 147  
fibroblasts, and gene transfer: efficient transfer of genes into senescent cells by adenovirus vectors via highly expressed  $\alpha v \beta 5$  integrin, **240**, 88  
related state in NIH3T3 cells, induction by sodium butyrate, and butyrate enhancement of p21<sup>WAF/CIP1</sup> promoter activity independently of p53, **237**, 457  
senescence-accelerated mouse-P/10, sphingomyelinase activity in cerebral cortex, enhancement with advancing age, **237**, 583  
WI-38 cells, associated downregulation of Ku autoantigen, DNA-dependent protein kinase, and poly(ADP-ribose) polymerase, **238**, 712
- Serial transfer  
epidermal keratinocytes in serum-free medium (human), **236**, 167
- Serine  
insulin receptor residues, mutations at, effect on receptor tyrosine kinase activity (human), **239**, 235  
residue 380 in pp90rsk, identification as autophosphorylation site (*Xenopus*), **235**, 398
- D-Serine  
cerebral, depletion in non-ketotic hyperglycemia (human), **231**, 793  
origin and turnover in brain (mouse, rat), **235**, 26
- Serine base exchange enzyme  
activity modulation by sphingosine and other amphiphilic compounds (rat), **241**, 73
- Serine proteinase  
brain-specific, with Kringle-like structure and three scavenger receptor cysteine-rich motifs, molecular cloning (mouse), **239**, 386  
inhibitory effects of thiazolidine derivatives (human), **238**, 643
- Serine proteinase inhibitor  
heat-stable protein, purification from ovaries of desert locust, **238**, 357  
LEX032, recombinant, inhibition of human leukocyte proteinase 3, **233**, 697
- Serine–threonine protein kinase  
PKN, domain-specific phosphorylation of vimentin and glial fibrillary acidic protein, **234**, 621
- Serotonin  
activation of electrolyte transport via 5-HT<sub>2A</sub> receptor in colonic crypt cells (rat), **230**, 437  
and insulin, secretion from pancreatic islets, real time electrochemical detection, effects of glucose and K<sup>+</sup> depolarization (mouse), **228**, 100; *erratum*, **231**, 519

Serotonin (*continued*)

transport, identification of cysteine residues in serotonin transporter essential for, **241**, 68

## Serotonin receptor

5-HT<sub>2A</sub>, role in serotonin activation of electrolyte transport in colonic crypt cells (rat), **230**, 437

5-HT<sub>2A</sub>, gene sequence variation and linkage mapping on chromosome 7q34–q36 (human), **233**, 6

## Serotonin transporter

cysteine residues important for substrate transport (rat), **241**, 68

## Serpins

LEX032, recombinant, inhibition of human leukocyte proteinase 3, **233**, 697

polymerization, effects of reactive center loop length, **241**, 264

role in apoptosis, review, **230**, 481

## Sertoli cells

interactions with germ cells, role in TGF- $\beta$ 1 expression and secretion *in vitro* (rat), **238**, 905

TM4, cAMP-dependent chloride conductance, activation by follicle-stimulating hormone, **233**, 203

## Serum

depletion, effect on radiation-induced micronuclei formation in breast cancer cells, **237**, 678

distribution of plus- and minus-stranded hepatitis G virus RNA (human), **237**, 288

fetal bovine, modulation of dynactin phosphorylation in Rat2 cells, **232**, 810

hepatitis B virus DNA, semiquantitative PCR for, monitoring of efficacy of anti-HBV drugs in transgenic mouse with, **241**, 43

leptin binding factor (human), **233**, 818

## leptin levels

during gestation: increase after midpregnancy (mouse), **240**, 213

relationship to hyperinsulinemia independent of body mass index and visceral obesity (human), **239**, 340

and uterine leptin receptor mRNA, increase during pregnancy (rat), **237**, 476

## Serum albumin

bovine, *see* Bovine serum albumin

## Serum factor

potentiation of ACh and AMPA receptor currents via differential signal transduction pathways (*Xenopus* oocytes), **238**, 565

## SH2 domain

alternative to phosphotyrosine-containing motifs for binding, **234**, 675

and nuclear signaling motifs, presence in ligand for SH3 domain of adaptor protein Nek: NAP4, **239**, 488

protein-tyrosine-phosphatase SHP-2 containing, EGF-stimulated association (CHO cells), **239**, 483

## SH2 domain proteins

related to phosphatidylinositol polyphosphate 5-phosphatase SHIP, identification (human), **239**, 697

## SH3BGR protein

in Down syndrome chromosomal region, high-resolution physical map and identification of potential regulatory sequences (human), **241**, 321

## SH3 domain

adaptor protein Nek, ligand for, presence of SH2 domain and nuclear signaling motifs: NAP4, **239**, 488

Grb2, association with dynamin II in RAS-transformed NIH3T3 cells, **234**, 539

proline-rich protein containing, cloning and localization (mouse), **235**, 794

## Shc

CrkL association with, and CrkL tyrosine phosphorylation, induction by erythropoietin and IL-3 in hematopoietic cells, **239**, 412

Tyr-239 and Tyr-240, phosphatidylinositol 4,5-bisphosphate-dependent phosphorylation by c-Src, **240**, 399

## Shear stress

aortic endothelial cells exposed to, elevated prostacyclin release, role of nitric oxide (bovine), **233**, 748

fluid, exposed endothelial cells, G protein-coupled receptor expressed in, cDNA cloning (human), **240**, 737

high, with blocking of von Willebrand factor binding to GPIb/IX, attenuation of agonist-induced GPIIb/IIIa-mediated platelet aggregation, **233**, 796

platelet aggregation induced by, associated platelet-activating factor release, mechanism (human), **239**, 101

## SHP-2

CrkL association with, and CrkL tyrosine phosphorylation, induction by erythropoietin and IL-3 in hematopoietic cells, **239**, 412

direct association with tyrosine-phosphorylated p90 protein in FGF-stimulated cells, **238**, 261

EGF-stimulated association with SHPS-1 in CHO cells, **239**, 483

## SHP substrate-1

cDNA cloning and chromosomal localization of genes (human, mouse), **231**, 61

tyrosine phosphorylation and association with SHP-2, stimulation by EGF (CHO cells), **239**, 483

## Sialic acid

role in secretion and bFGF binding of rat Golgi sialoglycoprotein MG160 expressed in *Pichia pastoris*, **234**, 68

sialyl Lewis X sequence, de-N-acetylation, enhancement of L-selectin binding, **240**, 748

## Sialoglycoproteins

MG160, rat Golgi, expressed in *Pichia pastoris*, secretion and bFGF binding: role of complex carbohydrates and sialic acid, **234**, 68

## Sialyl Lewis X

sulfated, detection on endothelial cells of high endothelial venules by antibodies (mouse), **230**, 546; *erratum*, **233**, 576

6-sulfated series, L-selectin binding studies: binding enhancement due to de-N-acetylation of sialic acid, **240**, 748

synthesizing enzyme  $\alpha$ 1 $\rightarrow$ 3 fucosyltransferase VII, transactivation by T-cell leukemia virus-I-encoded Tax protein (human), **231**, 183

 $\alpha$ 2,8-Sialyltransferase

cloning and expression (human), **235**, 327

## Sigma factor

primary, *rpoD* gene encoding, cloning, sequencing, and expression (*Xanthomonas campestris*), **232**, 712

## Sigma receptor type 1

cDNA and gene, cloning and structural analysis (mouse), **241**, 535

Signaling. *see also* Signal transduction

BMP-4, coexisting, inhibition of secondary axis induction by FK 506-binding protein homologue in *Xenopus* embryos, **239**, 585

## calcium

cyclosporin A-sensitive, opposite effects on NF- $\kappa$ B activation in human bronchial epithelial and Jurkat T cells, **234**, 424

nuclear and cytosolic, induced by extracellular ATP in rat kidney inner medullary collecting duct cells, **234**, 224

pathway, activation by cholinergic stimulation, relationship to cell proliferation in H69 cells (human), **230**, 501

components, identification in tyrosine kinase cascade with phosphopeptide affinity chromatography (HL-60 cells), **234**, 748

different pathways, selective enhancement of LIF induction of mitogenesis in Swiss 3T3 cells, **236**, 814

estrogen receptor, tumor suppressor p53 as negative regulator of, **239**, 617

Fc $\epsilon$ R1 and formyl peptide receptor pathways, cooperation in RBL<sup>FPR</sup> cells, **235**, 812

gene regulation by nuclear and cytoplasmic calcium signals: breakthroughs and views, **236**, 541

## insulin

defects in skeletal muscle from Wistar fatty rat, effect of pioglitazone, **223**, 439; *erratum*, **236**, 833

- effect of insulin degrading enzyme (rat), **231**, 167  
 pathway involving Stat1 $\alpha$  in Hep3B cells, **235**, 317  
 metabolic, insulin-mediated, negative regulation by low-molecular-weight phosphotyrosine protein phosphatase (NIH-3T3 cells), **238**, 676  
 in pertussis toxin-induced myelomonocytic cell adhesion, mechanisms: role of tyrosine phosphorylation, **236**, 479  
 Wnt proteins, effects of Frzb-1, **236**, 502
- Signal recognition particle  
 pathway, related operons, encoded 13-kDa protein with helix-turn-helix motif (*Mycoplasma mycoides*), **231**, 839
- Signal Transducer and Activator Transcription factor 3, *see* Stat3
- Signal transduction, *see also* Signaling  
 apoptotic, in endothelial cells, role of integrin  $\beta$ 4 (human umbilical vein), **233**, 182  
 in *Dictyostelium discoideum* slugs, impairment by mitochondrial mutations, **234**, 39  
 HIV-1 gp120-mediated, signaling of MAP kinase activity downregulation in granular neurons and glial cells from rat cerebellum, **240**, 683  
 interleukin-4, facilitation by 70-kDa protein in absence of common gamma receptor chain (human), **233**, 279  
 interleukin-15, role of LCK and MAP kinase (human), **232**, 754  
 intestinal epithelial wound-induced, mediation by ERK and p38 MAP kinase pathways, studies in IEC-6 cells, **233**, 389  
 nucleotide-promoted second messenger responses  
 in 1321N1 cells expressing P2Y receptor (human), **235**, 717  
 lack of mediation by 6H1 orphan receptor proposed for p2y5 receptor, **236**, 455  
 pathways involved in potentiation of ACh and AMPA receptor currents by serum factor (*Xenopus* oocytes), **238**, 565  
 protein-tyrosine kinase-dependent  
 in fertilization, **240**, 519  
 in *Helicobacter pylori* induction of IL-8 expression in endothelial cells, **240**, 561  
 receptor tyrosine kinase, in breast epithelial cells, effects of Fas-signaling (human), **230**, 89  
 role in radiation-resistant phenotype in tumor cells (human), **230**, 196  
 role of leptin receptor short form (rat), **231**, 26  
 Stat1, EGF-induced, in human epidermal carcinoma A431 cells, inhibition by lysophosphatidic acid, **240**, 856  
 STATS, in breast epithelial cells, stimulation by DDT (human), **231**, 17  
 thrombopoietin, protein kinase C and *c-myc* gene activation pathways (human), **231**, 290  
 transcriptional activator CooA containing heme-based CO sensor, **240**, 783  
 wortmannin-sensitive and -insensitive pathways, as mechanism for gastric inhibitory polypeptide activation of MAP kinase (CHO cell), **235**, 171
- Silencer element  
 platelet factor 4 gene, T-cluster DNA, binding to alternative form of nucleolysin (human), **235**, 625
- Silymarin  
 cancer chemopreventive effects and inhibition of TNF- $\alpha$  mRNA expression (mouse), **239**, 334
- Simian virus 40  
 large T antigen, transcriptional activation of human *c-myc* gene, **235**, 153  
 transformed human keratinocytes, ultraviolet B-induced apoptosis, role of CPP32 and interleukin-1 $\beta$ -converting enzyme, **236**, 194
- Simvastatin  
 effect on heat shock response and cytotoxicity mediated by oxidized LDL in endothelial smooth muscle cells (human), **231**, 437
- Single-strand conformers  
 from Huntington's locus, stalling of human DNA methyltransferase at, **234**, 73
- Site-directed mutagenesis  
 carnitine acyltransferase: role of serine-threonine-serine motif in carnitine binding and transition-state stabilization, **238**, 784; *erratum*, **241**, 803  
 identification of crucial carboxyl residues in 1,2- $\alpha$ -mannosidase (*Aspergillus phoenicis*), **238**, 779
- Sjögren's syndrome  
 infiltrating salivary gland lymphocytes from patient with, anti-SS-A/Ro 60-kDa peptide Fab fragments from, molecular cloning, **232**, 101
- Skeletal muscle  
 aging, L-type Ca<sup>2+</sup> channel receptor, modulation in response to insulin-like growth factor-1 receptor (rat), **235**, 784  
 alternative splicing of dystrophin gene 5' region: analysis of transcripts (human), **239**, 895  
 basic helix-loop-helix/PAS protein BMAL-1 expression (human), **233**, 258  
 and cardiac muscle, Na<sup>+</sup> isoforms, discrimination by antisense oligonucleotides (human), **234**, 235  
 degeneration resembling Duchenne muscular dystrophy, induction by targeted disruption of dystrophin gene exon 52 (mouse), **238**, 492  
 deltoid, mitochondrial DNA, extensive rearrangement in old age (human), **232**, 147  
 denervated, transcriptional regulation of hexokinase II (rat), **238**, 53  
 extraocular origin, expression of full length and splice variant thyrotropin receptor, link to pathogenesis of Graves' ophthalmopathy (human), **230**, 493  
 fast twitch, dihydropyridine receptor isoform expression, effect of chronic stimulation (rat), **235**, 217  
 fibers, ATP-sensitive K<sup>+</sup> channels in, modulation by insulin (rat), **232**, 536  
 GLUT4 expression, effect of diet and age (rat), **235**, 89  
 long-term denervated, dihydropyridine receptor and ryanodine receptor gene expression (rat), **240**, 612  
 membrane-associated fatty acid-binding protein, effect of endurance training (human), **231**, 463  
 mitochondrial DNA, wild-type, and 4.8-kb deletion, quantification (rat), **233**, 102  
 mitochondrial DNA deletions, gross mosaic pattern in adult tissues (human), **233**, 56  
 normal and transformed, oligomeric status of calsequestrin (dog, rabbit), **240**, 721  
 phosphatidylinositol 3-kinase activity, augmentation by treadmill running (rat), **236**, 647  
 plasma membrane, localization of polypeptide derived from mitochondrial dihydrolipoamide succinyltransferase (human, rat), **241**, 151  
 protein, in Fe-nitritoacetate-treated rat, free radical-mediated effects, **231**, 37  
 soleus, ubiquitin-dependent proteolytic system, effect of TNF- $\alpha$  (rat), **230**, 238  
 specific protein, with ZF5 zinc finger domain and VP16 acidic domain, detection by RT-PCR (mouse), **236**, 20  
 transcription factor NFATc expression (mouse), **240**, 314  
 triads, depolarization-induced Ca<sup>2+</sup> release, potentiation by cyclic ADP-ribose and inositol 1,4,5-trisphosphate (rabbit), **240**, 772  
 troponin and tropomyosin genes, mapping (human), **230**, 347  
 UCP3 expression (human), **235**, 79  
 UCP3 regulation in response to cold, thyroid hormone treatment, and high-fat feeding (rat), **240**, 222  
 Wistar fatty rat, insulin signaling defects, effect of pioglitazone, **223**, 439; *erratum*, **236**, 833
- Skeletal muscle cells  
 adenylyl cyclase, GTPase, and PKA activities and G<sub>i</sub> phosphorylation, effects of 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (chicken), **234**, 125  
 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub>-induced Ca<sup>2+</sup> entry, role of Ca<sup>2+</sup> release-activated Ca<sup>2+</sup> channels, **239**, 562
- Skin  
 cancer chemoprevention and TNF- $\alpha$  mRNA inhibition by silymarin (mouse), **239**, 334  
 electroporation-associated transdermal transport, effect of heparin (human), **234**, 637

Skin (*continued*)

subcutaneous tissue fibrosis induction in newborn mice by TGF- $\beta$  and cooperative effects of other growth factors, **237**, 292; *erratum*, **240**, 507

Skin tumors, *see also specific types*

malignant, loss of p16 gene expression (human), **230**, 85  
promoters of, downregulation of constitutive nitric-oxide synthase (mouse), **232**, 328

squamous cell carcinomas, associated mutations of *INK4a* locus, detection (human), **232**, 38

## Sleep inducing factor

oleimide, production by mouse neuroblastoma cells, **239**, 473

## Sliding

accelerative, myosin-coated glass beads suspended from actin paracrystals, **237**, 427

## SLP1 protein

secretion by human tracheal gland cells, cystic fibrosis-like alteration, induction by *Pseudomonas aeruginosa* LPS, **241**, 305

## Slugs

*Dictyostelium discoideum*, signal transduction, impairment by mitochondrial mutations, **234**, 39

## Smad1

role in intracellular BMP-2 signalings inhibiting myogenic differentiation and inducing osteoblast differentiation in C2C12 myoblasts, **238**, 574

## Smad3

dominant-negative, interference with transcriptional activation by multiple agonists, **232**, 517

## Smad5

role in intracellular BMP-2 signalings inhibiting myogenic differentiation and inducing osteoblast differentiation in C2C12 myoblasts, **238**, 574

## Small cell lung carcinoma cells

expression of testis-specific transcripts, **241**, 653

## Small nucleolar RNA

from *Naja n. atra* and *Bungarus multicinctus*, extended sequence complementarity to 5S rRNA, **236**, 782

## U16

biosynthesis in early development of *Xenopus laevis*, **241**, 486  
processing in *Xenopus laevis*, role of Mn<sup>2+</sup>-dependent ribonuclease, **233**, 514

## S-modulin

and s26, Ca<sup>2+</sup>-binding, expression in *E. coli* and characterization (frog), **234**, 173

Smooth muscle, *see also* Vascular smooth muscle cells

and cardiac muscle, ecto-ATPases from, comparison to ecto-ATPase from liver (chicken), **238**, 728

myometrial, phasic contractions, and cytosolic Ca<sup>2+</sup> oscillations, stimulation by (+)cis-dioxolane (rat), **231**, 722

myosin phosphatase, myosin binding subunit, role in cell-cell adhesion sites in MDCK cells, **230**, 552

relaxation, role of hydrogen sulfide and nitric oxide (guinea pig, rat), **237**, 527

uterine, iNOS induction by IL-1 $\alpha$  (human, rat), **238**, 12

## SMRT

inhibition of interstitial collagenase transcription through HRE-independent mechanism (rabbit synovial fibroblasts), **237**, 52

and Trip-I, expression in human neuroectodermal cell lines, **234**, 278

## Snake venom

cardiotoxin II, *see* Cardiotoxin II

## SNAP-23

binding to syntaxin 4, inhibition by Munc18c (mouse adipocytes), **234**, 257  
inability of botulinum E toxin light chain to cleave, and effect of toxin light chain on insulin stimulation of GLUT4 translocation in 3T3-L1 cells, **237**, 388

isoform identification in neutrophils and HL-60 cells (human), **231**, 808

tissue distribution and subcellular localization in 3T3-L1 cells (mouse), **230**, 64

## SNAP-25

intracellular location in human neutrophils, **239**, 592

and other synaptic proteins, differential role in Alzheimer's disease, **236**, 239  
phosphorylation by glucose and GLP-1 in RIN 1046-38 cells, **238**, 297

snoRNA, *see* Small nucleolar RNASOD, *see* Superoxide dismutase

## Sodium

L-glutamate transport dependent on, analysis in intestinal crypt-like IEC-17 cells (rat), **233**, 244

insulin-stimulated transport, mediation by phosphoinositide hydrolysis (*Xenopus laevis*), **231**, 156

Na<sup>+</sup>/Ca<sup>2+</sup> exchange activity in primary cortical neuron culture, inhibition by genistein (rat), **233**, 86

overload of hepatocytes, prevention, role of Na<sup>+</sup>/Ca<sup>2+</sup> exchanger (rat), **232**, 107

## Sodium arsenite

activation of p70S6 kinase in adult rat cardiomyocytes: roles for PI 3-kinase and p38 MAP kinase, **238**, 207

## Sodium butyrate

downregulation of protein kinase CKII in tumor cell line, **233**, 673

induction of senescence-related state in NIH3T3 cells, and enhancement of p21<sup>WAF/CIP1</sup> promoter activity independently of p53, **237**, 457

## Sodium/calcium exchanger

alternatively spliced isoforms in guinea pig cochlea, **233**, 737

cardiac, localization of exchange inhibitory peptide binding site (bovine), **236**, 113

role in prevention of Na<sup>+</sup> overload and hepatocyte injury (rat), **232**, 107

## Sodium channels

amiloride-sensitive, in human nasal epithelium, variation from classical epithelial Na<sup>+</sup> channels, **237**, 488

cardiac and skeletal muscle isoforms, discrimination by antisense oligonucleotides (human), **234**, 235

in hippocampal neurons, voltage-dependent effects of Al<sup>3+</sup> (rabbit, rat), **232**, 84

*hscp* voltage-gated, Val421 to Met mutation in IS6, association with pyrethroid resistance in *Heliothis virescens* F., **239**, 688

human heart, inactivation-defective, effects of methanethiosulfonate derivatives: analysis of IFM-ICM mutation, **233**, 606

retinal neuron, tetrodotoxin resistivity (newt), **240**, 651

## Sodium chloride

incubation of fetal rat fibroblasts in, and other perturbations, effects on fluid, bulk-membrane, and receptor endosomal flow, **236**, 661

## Sodium-dependent purine nucleoside carrier

mRNA, expression, correlation with nucleoside transport activity in liver (rat), **233**, 572

## Sodium dodecyl sulfate

SDS-stable multimers of insulin-like growth factor binding proteins-3 and -5, formation, **240**, 707

and urea, solutions, protease Q stability in, **240**, 839

## Sodium/glucose cotransporter

intestinal, nutrient regulation of gene expression (lamb), **230**, 624

## Sodium/iodide symporter

differential electrophysiological character of I<sup>-</sup>, ClO<sub>4</sub><sup>-</sup>, and SCN<sup>-</sup> in transport, **231**, 731

## gene

homozygous mutation causing iodide trapping defect leading to hypothyroidism in Brazilian kindred, **240**, 488

promoter characterization (rat), **239**, 34

mRNA levels in human thyroid cancer cell lines and nontransformed FRTL-5 rat thyroid cells, differential effects of retinoic acid, **240**, 832

## Sodium nitroprusside

inhibition of platelet adhesion to collagen (human), **231**, 412

- treatment of cardiomyocytes, effects on guanylyl cyclase responsiveness to NO (rat), **238**, 351
- Sodium (2-sulfonatoethyl)-methanethiosulfonate  
effect on fast inactivation in inactivation-defective human heart sodium channel: analysis of IFM-ICM mutation, **233**, 606
- Solubility  
5-O-( $\beta$ -glucopyranosyl)-2-nitrobenzyl-caged L-leucyl-L-leucine methyl ester in PBS containing 1% DMSO, **233**, 211
- Solutions  
illuminated, 6-methylcoumarin, photochemical formation of singlet molecular oxygen, **235**, 615  
SDS and urea, protease Q stability in, **240**, 839  
tear lipocalin, structural analysis by site-directed tryptophan fluorescence (human), **239**, 191
- Solution structure  
class II MHC superantigen binding domain (mouse), **234**, 660
- Somatolactin  
cDNA clone, sequence (goldfish), **232**, 282
- Somatostatin  
effect on interleukin 6 release from cortical type I astrocytes (rat), **235**, 242  
gene expression in pancreas and upper digestive tract, effect of fasting (rat), **231**, 835
- Somatostatin receptor  
binding of cortistatin-like peptide (human), **232**, 157
- Somatostatin receptor 4  
G-protein coupled receptor homologous to, isolation from mouse and NH15-CA2 cells and expression during bone development (human), **233**, 336
- Somatotropin  
role in phosphate regulation of renal vitamin D-24-hydroxylase (rat), **233**, 813
- Somitogenesis  
role of Fringe and C-Fringe 1 cDNA (chicken), **234**, 754
- Son of sevenless  
-Grb2 association, stimulation by DDT in breast epithelial cells (human), **231**, 17
- Sorbitol  
imprinting of lyophilized  $\alpha$ -chymotrypsin with, effect on reactivity of active-site imidazole, **240**, 27
- Soybean peroxidase  
resonance Raman spectroscopy, **240**, 65
- Sp1  
and PU.1, role in promoter activity of mouse *tec* gene, **234**, 376  
sites, role in trichostatin A activation of WAF1/Cip1 expression in MG63 osteosarcoma cells, **241**, 142
- Sparfloxacin  
inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536
- Spermatogenesis-associated protein  
RSP29, cDNA cloning and characterization (rat), **241**, 714
- Spermatogonia  
development, fibroblast growth factor-8 expression during, analysis (mouse, rat), **232**, 173  
morphology, and glucose transporter expression in testis, effect of unilateral abdominal cryptorchidism (rat), **236**, 407  
type A, stage-specific expression of mouse homologue of porcine 135-kDa  $\alpha$ -D-mannosidase, **241**, 439
- Spermatozoa  
binding to  $\beta$ -galactose residues on egg zona pellucida and asialofetuin-coupled beads (mouse), **238**, 95  
bivalve mollusk, plasma membrane nonglycosylated  $\alpha$ -L-fucosidase, comparison with glycosylated seminal fluid form (*Unio elongatulus*), **234**, 54  
demembranated, motility and phosphorylation status, effects of MAP kinase and p34<sup>cdc2</sup> kinase substrate peptides (chicken), **240**, 116  
-egg interaction, and protein-tyrosine kinase signaling, **240**, 519  
flagellar motility, regulation by protein phosphatase type 1 (chicken), **235**, 108  
immotile, sea urchin, method for preparation, storage, and activation of large populations of, **237**, 59  
mature, epididymal, distribution of 105-kDa sperm unique antigen (goat), **231**, 662  
olfactory receptor genes expressed in, molecular cloning and chromosomal mapping (human), **237**, 283
- Spermidine-spermine *N*<sup>1</sup>-acetyltransferase  
in prostate epithelial cells, effect of gossypol (dog), **231**, 383
- Spermine  
conjugation of peptide nucleic acids with, enhancement of solubility and DNA binding, **240**, 778
- Sphingomyelin  
behavior at LDL surface (human), **234**, 733
- Sphingomyelinase  
cerebrocortical activity, enhancement in senescence-accelerated mouse-P/10 with advancing age, **237**, 583
- Sphingomyelin phosphodiesterase  
detection in chromatin and role in hepatic regeneration (rat), **236**, 29
- Sphingosine  
effect on amylase secretion from pancreatic acini (rat), **235**, 197  
effect on calcium concentration in isolated liver nuclei (rat), **238**, 347  
and other amphiphilic compounds, modulation of serine base exchange enzyme activity (rat), **241**, 73
- Sphingosine 1-phosphate  
induction of neurite retraction in PC12 cells via cell surface receptor-like mechanism, **240**, 329  
mobilization of intracellular Ca<sup>2+</sup> and activation of transcription factor NF- $\kappa$ B in U937 cells, **234**, 121
- Sphingosylphosphorylcholine  
effect on calcium concentration in isolated liver nuclei (rat), **238**, 347
- Spi-1/PU.1  
interferon-induced upregulation in human leukemia K562 cells, **240**, 862
- Spinal cord  
very-long-chain fatty acid accumulation in adrenoleukodystrophy protein-deficient mouse, **232**, 631
- Spleen  
leptin receptor mRNA splice variants, localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383  
peroxisome proliferator-activated receptors  $\gamma$ 1 and  $\gamma$ 2, differential expression (bovine), **239**, 857  
wild-type mitochondrial DNA and 4.8-kb deletion, quantification (rat), **233**, 102
- Spleen cells  
expressed gene mediating acquired testosterone-resistant immunity to *Plasmodium chabaudi* malaria, identification (mouse), **230**, 167
- Splicing, *see also* Alternative splicing  
*IGF2* polymorphic region in adrenocortical carcinoma (human), **239**, 878  
*in vitro*, efficiency of HIV-1 D1-A2 and D2-A2 pairs of splice sites, **237**, 182
- Squamous cell carcinoma of head and neck  
cell lines, reversion to radiation-resistant phenotype, role of signal transduction pathway (human), **230**, 196
- Squamous cell carcinoma of skin  
associated mutations of *INK4a* locus, detection (human), **232**, 38  
src homology containing phosphatase 2, *see* SHP-2
- Src-like adapter protein  
mRNA expression, induction by all-*trans*-retinoic acid, **230**, 81
- Src protein  
non-transforming unmyristylated-SH3-deleted mutant, activation of gene expression, dependence on Tyr-527, **239**, 681

- Srk kinase  
activation upon stimulation of TK1 lymphoma cells via  $\alpha_4\beta_7$  integrin. **239**, 68  
CD24-associated, role in activation of cell aggregation. **234**, 330  
palmitoylation, regulation of functional interaction with B cell substrate. **234**, 325
- SSI-2  
cloning and functional analysis (human). **237**, 79
- SSI-3  
cloning and functional analysis (human). **237**, 79
- STa  
induced intestinal secretion, resistance in mice lacking guanylyl cyclase C receptor. **239**, 463
- Stabilization/activation factor  
for neuronal NOS, in cerebellum (rat). **234**, 476
- Staphylococcal enterotoxin B  
pulsed endothelial cells, CD4<sup>+</sup> T cell toxicity to, regulation by Fas/Fas ligand interaction (human). **239**, 782
- Staphylococcus aureus*  
nitric-oxide synthase in, identification. **237**, 554  
postulated isoxazolylnaphthoquinoneimine antibacterial mechanism in, simulation in membranes with *in vitro* system. **239**, 186
- STAT1  
activation by c-Src in PDGF-stimulated NIH3T3 cells. **239**, 493  
activation in hepatic stellate cells, regulation by cAMP (rat). **233**, 464  
EGF-induced signaling in human epidermal carcinoma A431 cells, inhibition by lysophosphatidic acid. **240**, 856
- STAT1 $\alpha$   
role in insulin signaling pathway in Hep3B cells. **235**, 317
- STAT3  
activation by c-Src in PDGF-stimulated NIH3T3 cells. **239**, 493  
activation in normal and regenerating liver, ethanol effects after short- and long-term exposures (rat). **239**, 666  
and NF- $\kappa$ B, competitive binding on overlapping DNA binding site. **237**, 90  
p19<sup>INK4D</sup> transcriptional activation dependent on, association with IL-6-induced growth arrest (M1 cells). **238**, 764
- STAT4 complex  
recognition of IFN- $\gamma$  activation site (GAS)-like sequence. **233**, 126
- STAT5  
role in erythropoietin-induced hemoglobin synthesis in murine hematopoietic cell line. **234**, 198
- STAT5a  
activation by IL-6-type cytokines in various cell types. **236**, 438
- STAT induced STAT inhibitor-1 family  
SSI-2 and SSI-3, cloning and functional analysis (human). **237**, 79
- Staurosporine  
induction of telophase arrest and apoptosis blocking mitosis exit in human Chang liver cells. **236**, 594
- Stearoyl-CoA desaturase  
gene  
stable transformation of mammalian cells with, modulation of lipid unsaturation and membrane fluid state. **237**, 362  
transcriptional regulation, role of AP1 element (*Histoplasma capsulatum*). **230**, 457
- SCD1 gene  
localization of negative thyroid hormone-response region (mouse liver). **233**, 838  
regulation by vitamin A (mouse liver). **231**, 206  
yeast, increased TNF sensitivity of tumor cells expressing. **241**, 465
- Stellate cells  
detection of cytochrome P4503A (human liver). **238**, 420  
hepatic, STAT1 activation in, regulation by cAMP (rat). **233**, 464
- Stereochemistry  
human lysosomal and jack bean  $\alpha$ -mannosidase: characterization as retaining glycosidases. **238**, 896
- Steroid dehydrogenase  
and homologs, motifs in, Markov model. **231**, 760
- Steroid hormone receptor  
identification of aldolase A gene as target for TR2 orphan receptor (human). **235**, 205
- Steroid hormones  
binding to murine glucocorticoid receptor, reversible inhibition by zinc. **238**, 86
- Steroid 18-hydroxylase  
*CYP11B2* gene encoding, point mutation in exon 8, as cause of corticosterone methyloxidase I deficiency (human). **234**, 382
- Steroidogenic acute regulatory protein  
cDNA sequence (rat). **230**, 528
- Steroid receptor coactivator-1  
splicing variant SRC-1E, identification: major isoform mediating thyroid hormone action. **236**, 83
- Steroid sulfatase  
activity in osteoblast cells (human, rat). **231**, 42
- Sterol carrier protein X  
role in branched-chain fatty acid metabolism in peroxisomes: specific reaction with 3-oxo-pristanoyl-CoA. **236**, 565
- $\Delta^7$ -Sterol-C5(6) desaturase  
cytochrome b<sub>5</sub> of maize microsomes as electron carrier for. **236**, 434
- Sterol precursors  
4 $\alpha$ -methyl-oxidation and C5(6) desaturation, role of cytochrome b<sub>5</sub> (maize). **236**, 434
- Sterol sulfatase  
inhibitory effects of daidzein and daidzein sulfoconjugates (hamster liver). **233**, 579
- Stomach  
epithelium, MUC5AC message detection (rat). **236**, 789  
mucosal healing, pepsinogen C gene product as possible growth factor during (rat). **238**, 17  
pylorus-ligated rat, gastric acid secretion, inhibition by *Helicobacter pylori* LPS. **236**, 532  
stress-induced mucosal lesions, development, role of gastric mucosal constitutive and inducible NOS (rat). **236**, 275
- Stomach cancer  
associated overexpression of zinc finger DNA-binding protein ZBP-89 (human). **233**, 154
- Stomach cells  
AZ-521 and AGS, 140-kDa protein, binding of *Helicobacter pylori* vacuolating cytotoxin (human). **238**, 629
- Storage  
immotile sea urchin sperm, and reactivation. **237**, 59
- Strain  
mechanical, JNK/SAPK and ERK activation in rat VSMC by, effect of extracellular matrix composition. **237**, 239
- Stratum corneum  
model, lipid domains and orthorhombic phases (bovine). **231**, 797
- Streptococcus gordonii*  
recombinant, secretion of *Porphyromonas gingivalis* fimbriin polypeptides. **238**, 313
- Streptococcus pyogenes*  
recognition by hemopexin-like repeats in human vitronectin. **234**, 445
- Streptodornase, *see* Deoxyribonuclease I
- Streptomyces collinus*  
ribosomal proteins, phosphorylation by ribosome-associated protein kinase. **238**, 370

## Streptomycin

inhibition of *E. coli*  $\beta$ -galactosidase production by recombinant *Mycobacterium aurum*, **240**, 536

Stress, *see also specific types*

endoplasmic reticulum-associated, in HeLa cells, effects on KDEL receptor expression and calreticulin secretion, **240**, 36

induced decrease in gastric prostaglandin I<sub>2</sub>, prevention by leukocyte depletion and ONO-5046 (rat), **231**, 52

induced gastric mucosal lesions, development, role of gastric mucosal constitutive and inducible NOS (rat), **236**, 275

related glycoproteins, intracellular distribution in heat-resistant cell model expressing human HSP70, **237**, 382

Stress-activated protein kinases, *see* c-Jun N-terminal kinase

## Stress fibers

actin, formation in dedifferentiated MDCK-C7 cell lines, **241**, 541

Rho-mediated formation, constitutive and agonist-dependent activity, role of prostaglandin EP3 receptor isoforms (MDCK II cells), **234**, 631

thrombin-induced formation in Swiss 3T3 cells, regulation by 70-kDa S6 kinase, **233**, 193

## Stress proteins

90-kDa, induced in fish cells by fish rhabdovirus infection, characteristics, **233**, 316

## A170

60-kDa, induction in peritoneal macrophages by low micromolar levels of H<sub>2</sub>O<sub>2</sub> and proteasome inhibitors (mouse), **232**, 33

phosphorylation by casein kinase II-like activity in macrophages (mouse), **241**, 157

heme oxygenase-1, regulation and immunohistochemical analysis in rat kidney with myoglobinuric acute renal failure, **240**, 93

## Stretch

associated stress, early cellular response, transient loss of  $\alpha$ B-crystallin (human), **235**, 69

uni-axial cyclic, upregulation of integrin  $\beta_3$  expression in human umbilical endothelial cells, **239**, 372

## Stringent responses

alteration for *Escherichia coli* *mpb* promoter mutants, **230**, 582

## STRL22

identification as receptor for CC chemokine MIP-3 $\alpha$  (human), **236**, 212

Stromal-derived factor-1 $\alpha$ 

induced NK cell chemotaxis and Ca<sup>2+</sup> mobilization, role of heterotrimeric G proteins, **236**, 270; *erratum* **237**, 759

## Stromelysin

$\beta_2$ -microglobulin-induced production by human synovial fibroblasts, **239**, 621

superantigen-induced production by human rheumatoid synovial cells, **231**, 222

## Strychnine

effect on prevention of cell lysis and recovery of respiration and ion transport after anoxia/reoxygenation (rabbit proximal tubule cells), **234**, 275

## Submandibular gland

human kallistatin expression and localization after intracapsular gene injection (rat), **231**, 494

transcription factor NFATc expression (mouse), **240**, 314

## Submitochondrial particles

coupled, protonophoric activity of NADH Coenzyme Q reductase and ATP synthase (horse), **235**, 469

## Substance P

regulation of corticosteroid secretion by adrenal gland, cellular mechanism (newt), **233**, 395

## Subtilisin A

inhibition by human proteinase inhibitor 9, **238**, 329

## Succinate

and NADH, competitive oxidation in mitochondria, effects of mild respiratory chain deficiency (human), **236**, 643

## Sugars

and glycoproteins, binding of glycosylation-inhibiting factor subunit (bovine, pig), **237**, 46

N-3 sugar moiety of coformycin, role in tight-binding interaction with adenosine deaminase, **236**, 88

## Sugar transporter

expressed in neonatal mouse hippocampus, cDNA cloning, **238**, 126

## Sulfated glycoprotein-2

and WDNM1, gene expression in mammary epithelial cells, inhibition by EGF, **240**, 104

## Sulfated lipids

inhibition of pancreatic trypsin and chymotrypsin, **237**, 262

## Sulfation

perlecan, correlation with enterocytic differentiation in HT29 colon carcinoma cells, **238**, 874

## 6-Sulfation

effect on sialyl Lewis X sequence binding of L-selectin: enhancement due to de-N-acetylation of sialic acid, **240**, 748

*Sulfolobus acidocaldarius*

Rieske iron-sulfur protein II, expression with correctly inserted [2Fe-S] cluster in *E. coli*, **234**, 283

*Sulfolobus* sp.

strain 7, acidothermophilic, group II chaperonin purification and molecular cloning, **236**, 727

## Sulfonyl fluorides

fatty acid, effect on anandamide metabolism and binding to cannabinoid receptor (rat), **231**, 217

## Sulfonylurea receptor

mitochondrial, identification and characterization (rat), **230**, 611

## 7-Sulfooxymethylbenz[a]anthracene

as electrophilic and carcinogenic form of 7-hydroxymethylbenz[a]anthracene, **231**, 712

## 6-Sulfooxymethylbenzo[a]pyrene

as electrophilic and carcinogenic form of intermediary metabolite 6-hydroxymethylbenzo[a]pyrene, **234**, 554

## 7-Sulfooxymethyl-12-methylbenz[a]anthracene

as electrophilic mutagen and carcinogen (rat), **231**, 144

## Superantigens

class II MHC, binding domain, solution structure (mouse), **234**, 660

induction of stromelysin production from rheumatoid synovial cells (human), **231**, 222

## Superoxide

## generation

in cell-free system from neutrophils, inhibition by synthetic peptides to hydrophilic regions of cytochrome b<sub>558</sub> large subunit, **234**, 531

PAF-stimulated, in human neutrophils, effect of receptor-mediated calcium entry, **240**, 763

and nitric oxide, generation by recombinant endothelial nitric-oxide synthase, regulation by tetrahydrobiopterin, **237**, 340

quantification by spin trap hydroxylamine, **230**, 54

role in N<sup>ε</sup>-(carboxymethyl)lysine formation from Amadori product, **234**, 167

## scavenging by

L-arginine (porcine endothelial cells), **234**, 35

electrolyzed-reduced water, and protective effect against oxidative DNA damage, **234**, 269

erythromycin-iron complex (human), **232**, 183

xanthine oxidase inhibitor pterin-6-aldehyde, **233**, 447

spin trapping and stability of corresponding nitroxyl radicals to biological reductants, **231**, 701

-superoxide dismutase system, regulation in thyroid by TSH: role in thyroid hormonogenesis (pigeon), **239**, 212

- Superoxide dismutase  
 Cu,Zn-containing  
   reduced crystalline, His61 imidazolate bridge rupture in, **241**, 119  
   transgenic, amelioration of cerulein-induced pancreatitis (mouse), **233**, 177  
 Mn-containing, RNA, and glutathione peroxidase RNA, evidence for binding to same protein (rat), **222**, 590; *erratum*, **238**, 686  
 related activity of electrolyzed-reduced water, and protective effects against oxidative DNA damage, **234**, 269  
 -superoxide anion system, regulation in thyroid by TSH: role in thyroid hormonogenesis (pigeon), **239**, 212
- Superoxide dismutase-1  
 FALS-associated mutant, stability, relationship to copper release and thioredoxin induction in erythrocytes, **241**, 251
- Superoxide dismutase-2  
 cross-reaction with antibodies to HIV-1 p17 protein (human), **230**, 184
- Surface charge  
 liposomes, and immunoadjuvancy in induction of immune responses to soluble proteins, relationship, **240**, 793
- Surface plasmon resonance  
 measurement of binding of synthetic *Toxoplasma gondii* SAG1 peptides to HLA-A2, correlation with antigenicity for infected cell-specific CTL, **236**, 257
- Surfactant convertase  
 pulmonary, identification as member of carboxylesterase family (mouse), **235**, 180
- Surfactants  
 nonionic, large single duplex DNA induced by, first-order phase transition, **230**, 514
- SV40, *see* Simian virus 40
- Sweat gland cells  
 NCL-SG3, monolayers, electrophysiological responses to oxytocin and ATP (human), **234**, 30
- Swelling  
 activated chloride conductance in *Xenopus* oocytes, relationship to functional incorporation of P-glycoprotein into plasma membrane, **237**, 407
- Syk kinase  
 72-kDa protein tyrosine phosphorylation downstream of, induction by Fc $\epsilon$ RI aggregation (RBL-2H3 cells), **239**, 670  
 activity during HL-60 cell differentiation into granulocyte or monocyte/macrophage lineage, **236**, 697  
 calcium-dependent activation, stimulation by platelet-activating factor in human B cell line ASK.0, **239**, 23
- Synapse formation  
 upregulation by synthetic ceramide analog L-PDMP in cortical neurons *in vitro* (rat), **237**, 595
- Synapsin I  
 and caldesmon, interaction, characterization (bovine), **231**, 852
- Synaptic vesicles  
 and presynaptic plasma membranes, proteins of, differential role in Alzheimer's disease, **236**, 239  
 and synaptic plasma membrane vesicles, fusion between, role of synaptobrevin (rat brain), **236**, 184
- Synaptobrevin  
 and other synaptic proteins, differential role in Alzheimer's disease, **236**, 239  
 role in fusion between synaptic vesicles and synaptic plasma membrane vesicles (rat brain), **236**, 184
- Synaptophysin  
 and other synaptic proteins, differential role in Alzheimer's disease, **236**, 239
- Synaptosomes  
 membranes, NMDA receptor-like complex isolated from, protein half-lives of 71-kDa glutamate-binding and 80-kDa CPP-binding protein subunits (rat brain), **241**, 132
- Synaptotagmin  
 -AP-2 interaction, regulation by inositol high polyphosphates, **240**, 128  
 and other synaptic proteins, differential role in Alzheimer's disease, **236**, 239
- N-Syndecan  
 recombinant, core protein phosphorylation, **240**, 502
- Synechococcus* sp. PCC7942  
*dnaJ* homologue gene, sequence and analysis, **236**, 461
- Synechocystis* PCC 6803  
 chaperonin genes, differential regulation under light-dark transition during heat stress, **239**, 291
- Synenkephalin  
 structure, determination by three disulfide bridges, **232**, 800
- Synovial cells  
 interstitial collagenase transcription, inhibition by SMRT through HRE-independent mechanism (rabbit), **237**, 52  
 osteoclastogenesis induced by, role in bone destruction in rheumatoid arthritis (human), **240**, 279
- rheumatoid  
 adherent, cytosolic phospholipase A2 gene expression and biosynthesis, inhibition by interleukin-4 (human), **230**, 40  
 gene expression analysis by mRNA differential display: semaphorin E gene upregulation, **234**, 153  
 stromelysin production, induction by  $\beta_2$ -microglobulin, **239**, 621  
 superantigen (human), **231**, 222
- Syntaxin 1/HPC-1  
 and other synaptic proteins, differential role in Alzheimer's disease, **236**, 239
- Syntaxin 1A/HPC-1  
 inhibition of insulin secretion, mechanism (rat), **231**, 89  
 interaction with tubulin (rat), **231**, 352
- Syntaxin 4  
 SNAP-23 binding to, inhibition by Munc18c (mouse adipocytes), **234**, 257
- Systemic amyloidosis  
 amyloid deposits in, detection of oxidative stress (human), **232**, 497
- T
- T<sub>3</sub>, *see* Triiodothyronine
- Tailspike protein  
 phage P22, temperature-sensitive folding mutation sites, side-chain specificity, **233**, 857
- Tamoxifen  
 agonistic effect, role of cell type, ERE-promoter context, and estrogen receptor subtype (human), **236**, 140  
 neuronal cell apoptosis induced by, stimulation by estrogens *in vitro*, nongenomic mechanism (GT1-7 cells), **240**, 464
- Tandem repeats  
 59-amino acid, identification in human MUC3 cDNA, **238**, 143  
 hemopexin-like, in human vitronectin, recognition by *Streptococcus pyogenes*, **234**, 445
- Taq DNA polymerase  
 primer/template-independent synthesis of poly d(A-T) by, **238**, 113
- Taq I restriction enzyme  
 polymorphisms, cells heterozygous for, mRNA stability of vitamin D receptor big T and small t alleles (human), **238**, 77
- TATA-binding protein  
 mRNA, two forms generated by alternative polyadenylation (chicken embryo), **234**, 406
- TATA-binding protein-associated factor  
 TAFII<sub>31</sub>, apoptosis-induced gene expression in differentiated PC12 cells deprived of NGF, **234**, 230
- TATA-binding protein-interacting protein  
 49-kDa, molecular cloning (rat), **235**, 64

## TATA sequence

- $\alpha$ B-crystallin, mutations: lens preference for proximal TATA box and distal TATA-like sequence in transgenic mice, **241**, 407

## Tat-binding protein-1

- effects on Tat, enhancement by TBP-1 interacting protein, **239**, 176

## Tat-binding protein-1 interacting protein

- cloning and characterization: enhancement of TBP-1 action on Tat by TBPIP, **239**, 176

## Tat protein

## HIV-1

- activation of B lymphocytes, **237**, 461
- activation of MAP kinase in granular neurons and glial cells from rat cerebellum, **238**, 800
- display in filamentous bacteriophage M13, **235**, 806
- effects of Tat-binding protein-1, enhancement by TBP-1 interacting protein, **239**, 176

## Tau protein

- cerebrospinal fluid levels in neurodegenerative diseases with distinct tau-related pathology, **236**, 262
- phosphorylation, relationship to cell morphology and apoptosis, analysis in NGF-deprived PC12 cells, **240**, 687

## Taurine

- efflux in myoblasts, activation by hypotonicity and thrombin and downregulation during differentiation (mouse), **232**, 74

## Taxol

- effect on opioid binding on T47D breast cancer cells, **235**, 201

## Tax protein

- human T-cell lymphotropic virus type I, transactivation of  $\alpha 1 \rightarrow 3$  fucosyltransferase VII (human), **231**, 183
- MDR-1* gene promoter, **238**, 482

TBP-1, *see* Tat-binding protein-1

## TBP-binding repressor

- Drl, cloning and expression in oocytes and early embryos (*Xenopus laevis*), **231**, 561

TBP-1 interacting protein, *see* Tat-binding protein-1 interacting proteinTBP-interacting protein, *see* TATA-binding protein-interacting proteinTCDD, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin

## T-cell leukemia cells

- adult, sialyl Lewis X-synthesizing enzyme  $\alpha 1 \rightarrow 3$  fucosyltransferase VII, transactivation by T-cell leukemia virus-1-encoded Tax protein (human), **231**, 183

## T-cell lymphoma cells

- J-77, lymphotoxin beta isoforms expressed in, identification (human), **238**, 273

## T-cell lymphotropic virus type I

- PH5CH, with hepatitis C virus infection susceptibility, hepatitis G virus replication (human), **235**, 505
- Tax protein, transactivation of  $\alpha 1 \rightarrow 3$  fucosyltransferase VII (human), **231**, 183

## T cell receptor

- $V\beta$  usage in Crohn's disease, **240**, 545

## T cells

- activated,  $\alpha v\beta 3$ -mediated migration, support by L1 adhesion molecule (human), **232**, 236
- activation, regulation of p56<sup>lck</sup> messenger turnover upon, role of 3' untranslated region (human), **233**, 419
- apoptosis induced by ionizing radiation and dexamethasone, mediation by *c-fos* proto-oncogene (mouse), **241**, 519
- apoptotic, CTLL-2, interaction with phagocytes, associated production of pro-inflammatory cytokines, **239**, 799
- CD4<sup>+</sup>, toxicity to staphylococcal enterotoxin B-pulsed endothelial cells, regulation by Fas/Fas ligand interaction (human), **239**, 782
- CD134-defined subsets, thiol levels in, implications for HgCl<sub>2</sub>-induced immune dysregulation (rat), **240**, 452

development, calmodulin-dependent protein kinase IV during, analysis (mouse), **241**, 383

direct activation by CD40 ligand via tyrosine phosphorylation-dependent protein kinase C activation (human), **239**, 11

HIV-infected, Nef function, role of specific interaction with human acyl-CoA thioesterase III, **238**, 234

HIV-1-infected H9 T lymphoblasts, toxic effects of [cyanovirin-N]-[*Pseudomonas* exotoxin] conjugate, **239**, 884

IL-2 production driven by Ras/MAP kinase, inhibition by perillic acid (human), **241**, 720

IL-13 receptor subunit composition, **238**, 90

Jurkat, *see* T-lymphoma Jurkat cells

lysophospholipid:acyl-CoA acyltransferase expression in, inhibitory action of hydrocortisone (human), **237**, 632

mature, role of transcription factor NFATc (mouse), **240**, 314

MT-2, lack of infectivity of HIV-1 with integrase zinc finger-like domain mutant and morphologically normal maturation, **239**, 715

proliferation, effects of cycloprodigiosin hydrochloride from *Pseudalteromonas denitrificans* (mouse), **237**, 543

$V\beta$ , activation by HIV Nef protein, detection by simple amplification, **230**, 509

## TCOF1

mouse homologue, expression, characterization, and chromosomal mapping, **238**, 1

## Tear lipocalin

solution structure, analysis by site-directed tryptophan fluorescence (human), **239**, 191

## Tec

integrin-dependent tyrosine phosphorylation and cytoskeletal translocation in thrombin-activated platelets, **238**, 247

## Telomerase

activity in human chorion, **241**, 498

activity in immortalized endothelial cells undergoing p53-mediated apoptosis (human), **241**, 642

analysis in cell cycle-synchronized CHO B11 cells: elevation in early S phase, **233**, 717

bidirectional regulation in human lung adenocarcinoma subline, **237**, 313

cell cycle-dependent activation, analysis in naturally synchronized culture of *Physarum polycephalum*, **232**, 492

in endometrium, proliferation-associated regulation and role in early cancer diagnosis (human), **231**, 610

## inhibition

differential, during induction of differentiation in hematopoietic, melanoma, and glioma cells in culture (human), **237**, 438

in human leukemic cell lines by antisense pentadecadeoxynucleotides targeted against *c-myc* mRNA, **241**, 775

by PKC inhibitors in nasopharyngeal cancer cells in culture (human), **241**, 730

RNA expression, activity, and relationship to telomere length in gliomas (human), **239**, 830

role in cancer cell evolution, **230**, 1

## Telomere crisis

role in cancer cell evolution, **230**, 1

## Telomeres

length, relationship to telomerase RNA expression and telomerase activity in gliomas (human), **239**, 830

## Telophase

arrest, and apoptosis, blocking mitosis exit, induction by staurosporine in human Chang liver cells, **236**, 594

## Template

or primer, poly d(A-T) synthesis by Taq polymerase independent of, **238**, 113

## Tenascin

TN gene knockout mouse, dopaminergic neurons, tyrosine hydroxylase mRNA level, **231**, 356

## Teratocarcinoma cells

NT2, neurons derived from, GABA<sub>A</sub> receptor expression (human), **237**, 719

## Testis

abdominal and scrotal, glucose transporter expression: effect of unilateral abdominal cryptorchidism (rat), **236**, 407

adult, cDNAs specifically expressed in, molecular cloning and analysis (mouse), **240**, 261

aquaporin-8 expressed in, cloning and functional expression (rat), **237**, 714 and CNS, of transgenic mice, amyloid precursor protein gene promoter constructs preferentially expressed in, **240**, 759

$\alpha$ -D-mannosidase homologue expression: stage-specific expression in spermatogonia (mouse), **241**, 439

expression of mammalian homologues of *trp* gene from *Drosophila* (rat), **239**, 279

fetal, transforming growth factor  $\beta$ 1 mRNA and protein expression and regulation *in vitro* (rat), **236**, 135

fibroblast growth factor-8 developmentally regulated expression (mouse, rat), **232**, 173

foreign gene expression by localized *in vivo* gene transfer (mouse), **233**, 45

leptin receptor mRNA splice variants, localization by RT-PCR and *in situ* hybridization (mouse), **232**, 383

stimulation in Djungarian hamster, retardation by weak magnetic fields, **234**, 707

transcripts specific to, identification and expression in tumor cells, **241**, 653

## Testosterone

acquired resistant immunity to *Plasmodium chabaudi* malaria, spleen cell-expressed gene mediating, identification (mouse), **230**, 167

and luteinizing hormone, effects in prostate, comparison (rat), **233**, 108

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin

CYP1A1, CYP1A2, and CYP1B1 induced by, differential time-course and dose-response relationships (rat), **233**, 20

effect on cell proliferation and c-myc and growth factor expression in placental choriocarcinoma cells (human), **231**, 117

effect on mRNA levels for IL-1 $\beta$ , TNF- $\alpha$ , and urokinase plasminogen activator in uterine endometrial adenocarcinoma RL95-2 cells, **238**, 338

hepatic sequestration, role of CYP1A2, knockout mouse studies, **236**, 431

induction of cytochrome P4501A1 in endothelial cells in culture, potentiation by glucocorticoids (human, porcine aorta), **232**, 749

## Tetracycline

accumulation in outer membrane of *Pseudomonas aeruginosa*, **238**, 457

controllable transactivator, adenovirus-mediated gene expression via nuclear localization signal, **230**, 426

12-*O*-Tetradecanoylphorbol 13-acetate, *see* Phorbol ester

## Tetraethylammonium

induced brain gene norbin, identification: induction of neurite outgrowth in Neuro 2a cells, **240**, 766

## Tetrahydrobiopterin

modulation of cyclooxygenase-2 expression in human mesangial cells, **241**, 7

regulation by glucocorticoids in model of endotoxic shock (mouse), **240**, 298

regulation of superoxide and NO generation by recombinant endothelial nitric-oxide synthase, **237**, 340

synthesis before nitric oxide-dependent inhibition of insulin secretion in INS-1 pancreatic  $\beta$ -cells (rat), **233**, 66

## Tetrahymena 14-nm filament protein/citrate synthase

expressed in *E. coli*, bifunctional property, **237**, 205

*meso*-Tetrakis(4-carboxyphenyl)porphyrin

mouse monoclonal antibody 13-1 against, structural characterization: disulfide bond in CDR-H3, **240**, 566

## Tetrandrine

effect on signal-induced NF- $\kappa$ B activation in rat alveolar macrophages, **231**, 99

## Tetrapeptides

antagonist, prevention of long-term elevation of Ca<sup>2+</sup> in astrocytes (rat), **235**, 479

## Tetrodotoxin

resistivity, of Na<sup>+</sup> channel in newt retinal neuron, **240**, 651

TGF- $\beta$ , *see* Transforming growth factor  $\beta$ 

## Thapsigargin

stimulatory effect on osteoclast-like cell formation in cocultures of mouse bone marrow cells and calvarial cells, **237**, 111

## T helper cells

## Th1

IL-18 activation of NF- $\kappa$ B (mouse), **234**, 454

IL-18 induction of p56lck and MAPK activation and association (mouse), **237**, 126

proliferation, counter-regulation by NO and IL-2 (mouse), **233**, 14

Th2, CD8<sup>+</sup>, role in development of smoking-related lung damage (human), **239**, 146

## Theobromine

caffeine oxidation to, catalysis by flavin-containing monooxygenase in hepatic microsomes (rat), **235**, 685

## Theophylline

caffeine oxidation to, catalysis by flavin-containing monooxygenase in hepatic microsomes (rat), **235**, 685

## Thermal stability

D-hydantoinase with, isolation from mesophilic *Bacillus* sp. AR9, **234**, 485; *erratum*, **237**, 759

membrane-bound hydrogenase from *Hydrogenovibrio marinus*, **232**, 766

## Thermophiles

red algae, detection of ribulose-1,5-bisphosphate carboxylase/oxygenase with strong specificity for CO<sub>2</sub> fixation, **233**, 568

*Thermus aquaticus* YT1

aspartate aminotransferase cloning and sequencing, **239**, 810

*Thermus thermophilus* HB8

MutS homologue, mismatch and insertion/deletion binding properties, **233**, 834

## Thiazolidine

derivatives, inhibitory effects on hepatitis C virus protease and other human serine proteases, **238**, 643

## Thiazolidinedione

antidiabetic agent, stimulation of interaction between peroxisome proliferator-activated receptor  $\gamma$  and CBP, **240**, 61

## Thin filaments

motility, Ca<sup>2+</sup> regulation of, effects of hypertrophic cardiomyopathy mutations Asp175Asn and Glu180Gly in  $\alpha$ -tropomyosin (rabbit), **236**, 760

## 2-Thiobarbituric acid

induced benzophenanthridine alkaloid formation via gene transcript accumulation in California poppy, **241**, 606

## Thiobarbituric acid-reactive substance

plasma level, regulation by peroxisome proliferator-activated receptor  $\alpha$  (rat), **237**, 606

## (Thio)carboxanilide derivatives

reverse transcriptase inhibition by, models, **234**, 458

## Thiocyanate ion

and I<sup>-</sup> and ClO<sub>4</sub><sup>-</sup>, differential electrophysiological character in transport by Na<sup>+</sup>/I<sup>-</sup> symporter, **231**, 731

## Thioesterase I

arylesterase activity and stereospecificity for protease substrates (*Escherichia coli*), **231**, 452

## Thiols

free, of plasma paraoxonase, modification by cigarette smoke extract, role in enzyme inhibition, **236**, 289

levels in CD134-defined subsets of T cells, implications for HgCl<sub>2</sub>-induced immune dysregulation (rat), **240**, 452

- vicinal, role in inositol 1,2,3,5,6-pentakisphosphate 5-phosphatase activity from fetal calf thymus, **240**, 146
- Thioredoxin**  
gene expression, effect of cyclic AMP (*Escherichia coli*), **234**, 564  
induction in erythrocytes, relationship to stability of mutant SOD-1 associated with FALS, **241**, 251  
membrane-associated, detection on cell lines (human), **230**, 602
- Thioredoxin reductase (NADPH)**  
in liver, kidney, and brain, effect of selenium deficiency (rat), **234**, 293
- Threonine**  
Thr 1057 in adenylyl cyclase type II, phosphorylation, relationship to phorbol ester-induced AC II sensitization, **237**, 251
- Threonine dehydrogenase**  
gene characterization (*Xanthomonas campestris*), **235**, 300  
gene transcriptional analysis (*Xanthomonas campestris*), **240**, 523
- Thrombin**  
activated platelets, integrin-dependent tyrosine phosphorylation and cytoskeletal translocation (human), **238**, 247  
cell proliferation stimulated by, inhibition by ceramide, role of extracellular signal-regulated protein kinase (CCL39 cells), **240**, 405  
and hypotonicity, activation of taurine efflux in myoblasts (mouse), **232**, 74  
stress fiber formation induced by, regulation by 70-kDa S6 kinase in Swiss 3T3 cells, **233**, 193
- Thrombin inhibitor**  
identification of glycyrrhizin as, **235**, 259; *erratum*, **237**, 203
- Thrombopoietin**  
signal transduction, protein kinase C and *c-myc* gene activation pathways (human), **231**, 290  
truncated variant, megakaryocytopoietic activity (mouse), **231**, 823
- Thromboxane**  
production in LPS-stimulated peritoneal macrophages, effect of concordant induction of PGE<sub>2</sub> synthase with cyclooxygenase-2 (rat), **230**, 110  
release in perfused lung, effect of phosphodiesterase inhibitors (rat), **231**, 22
- Thropomyosin**  
expression by marrow stromal osteoblasts, effects of estrogen (mouse), **233**, 30
- Thylakoid vesicles**  
with ability to integrate and import precursor proteins in *in vitro* system, isolation from *Chlamydomonas reinhardtii* chloroplasts, **237**, 532
- Thymidine**  
<sup>3</sup>H-labeled, coupling to LDL: LDLs as drug carriers in therapy of macrophage-associated disease, **240**, 112  
membrane transport deficiency in *Saccharomyces cerevisiae*, functional complementation by recombinant ND4 fusion protein, **238**, 811
- Thymidylate**  
insufficiency for DNA repair synthesis, glutathione depletion-induced (hamster), **234**, 470
- Thymidylate synthase**  
–dihydrofolate reductase, DHFR domain inhibitors (*Plasmodium falciparum*), **235**, 515
- Thymine-propenal**  
formation by hydroxyl radical damage of DNA, **238**, 317
- Thymocytes**  
apoptosis in absence of poly(ADP-ribose) polymerase (mouse), **233**, 518
- Thymus**  
fetal bovine, inositol 1,2,3,5,6-pentakisphosphate 5-phosphatase activity from, role of vicinal thiols, **240**, 146  
fetal mouse, Ca<sup>2+</sup>/calmodulin-dependent protein kinase IV during T cell development, **241**, 383  
transcription factor NFATc expression (mouse), **240**, 314
- Thyocytes**  
production of granulocyte–macrophage and macrophage colony-stimulating factors in culture (human), **238**, 191
- Thyroglobulin**  
FRTL-5 cell, effects of perturbation of cellular Ca<sup>2+</sup>: delay of secretion and alteration of glycosylation, **234**, 133
- Thyroid**  
arginase II mRNA expression (human), **233**, 487  
calcyphosine gene expression, loss in mouse and other rodents, **232**, 407  
Graves' disease, thyroid peroxidase purification and crystallization from, **234**, 366  
hypothyroidism due to iodide trapping defect caused by homozygous mutation in Na<sup>+</sup>/I<sup>−</sup> symporter gene in Brazilian kindred, **240**, 488  
superoxide anion–superoxide dismutase system, regulation by TSH: role in thyroid hormonogenesis (pigeon), **239**, 212
- Thyroid cancer cells**  
human, and nontransformed FRTL-5 rat thyroid cells, Na<sup>+</sup>/I<sup>−</sup> symporter mRNA levels, differential effects of retinoic acid, **240**, 832
- Thyroid FRTL-5 cells**  
nontransformed, and human thyroid cancer cell lines, Na<sup>+</sup>/I<sup>−</sup> symporter mRNA levels, differential effects of retinoic acid, **240**, 832  
Ref-1 mRNA and protein, thyrotropin-induced increase (rat), **236**, 71  
thyroglobulin in, effects of perturbation of cellular Ca<sup>2+</sup> (rat), **234**, 133  
thyroid transcription factor-1 gene transcription from start site nt−1902 and positive regulation by TTF-1 (rat), **238**, 748
- Thyroid hormone**, *see also* Thyroxine; Triiodothyronine  
major SRC-1 isoform mediating, steroid receptor coactivator-1 isoform SRC-1E identified as, **236**, 83  
regulation of CCAAT/enhancer binding protein  $\alpha$  and  $\beta$  genes during liver development (rat), **234**, 605
- Thyroid hormone nuclear receptors**  
gene regulating activity in hepatocellular carcinoma cells, modulation by cell-type specific factors (human), **238**, 280
- Thyroid hormone receptor  $\beta$ 1**  
mutant identified in patient with resistance to thyroid hormone, inhibition of wild-type TRs and other nuclear receptors, **238**, 39; *erratum*, **240**, 507
- Thyroid hormone-response region**  
negative, localization in hepatic stearoyl-CoA desaturase gene 1 (mouse), **233**, 838
- Thyroid peroxidase**  
purification and crystallization from human Graves' thyroid tissue, **234**, 366
- Thyroid transcription factor-1**  
gene transcription from start site nt−1902 and positive regulation by TTF-1 in thyroid (rat), **238**, 748
- Thyrotropin**  
induced increase in Ref-1 mRNA and protein in rat thyroid FRTL-5 cells, **236**, 71  
regulation of superoxide anion–superoxide dismutase system in thyroid: role in thyroid hormonogenesis (pigeon), **239**, 212
- Thyrotropin receptor**  
brain-derived, ovine, cloning and expression, **238**, 173  
full length and splice variant, expression in skeletal muscle of extraocular origin, link to pathogenesis of Graves' ophthalmopathy (human), **230**, 493
- Thyroxine**  
and glucocorticoid hormone, effect on Kv1.5 potassium channel gene expression in left ventricle (rat), **237**, 521  
regulation of leptin mRNA expression and secretion in 3T3-L1 adipocytes, **232**, 822
- TIMP-2**, *see* Tissue inhibitor of metalloproteinase-2
- Tissue culture**  
neocortical explant, neurite outgrowth in, role of amino-terminal region of  $\beta$ -amyloid precursor protein, **236**, 59
- Tissue inhibitor of metalloproteinase-2**  
C-terminal domain, role in cell binding and antimetalloproteinase activity, **236**, 100

## Tissue plasminogen activator

induction as early growth response in hepatocytes in primary culture (rat). **239**, 123

spatial orientation when bound at melanoma cell surface (human). **239**, 322

## Tissues

adenosine kinase gene, cloning and expression (human, rat). **231**, 645

adult, liver-specific expression pattern of activin  $\beta_C$  and  $\beta_E$  (mouse). **231**, 655

age-associated mtDNA deletions, comparison (human, rat). **230**, 630

amphiphysin II splice variant expression (human). **236**, 178

chemoattractant-like receptor CMKRL3 distribution (rat). **241**, 390

chicken type I iodothyronine deiodinase expression. **241**, 465

cobra venom factor targeting (mouse). **231**, 316

CREM transcription factor isoform expression (dog). **237**, 74

differential distribution of  $\beta$  and  $\gamma$  subunits of cytosolic platelet-activating factor acetylhydrolase isoform I (human). **233**, 10

distribution of human homologue of mouse jerky gene product. **236**, 389

DNA polymerase  $\alpha$  catalytic subunit purification at meiotic prometaphase I (*Coprinus cinereus*). **232**, 454

expression of orphan G protein-coupled receptor GPR41 cloned from rat lung. **234**, 190

extrahepatic, *14CoS/14CoS* mutant and wild-type *chl/ch* mice, expression of *Nmol*, *Ugr1a6*, *Ahd3*, and *Hnfl*  $\alpha$  genes. **233**, 631

FKBP51 distribution and abundance (human). **232**, 437

galanin receptor type 1 expression (human, rat). **233**, 823

mammalian, 2'-phospho-cyclic ADP ribose natural occurrence in. **236**, 723

MUC5AC gene distribution (human, mouse, rat). **236**, 789

regeneration, HGF as tissue organizer for, analysis. **239**, 639

SNAP-23 distribution, and subcellular localization in 3T3-L1 cells (mouse). **230**, 64

specific induction of cutaneous cytochrome P4502E1 by dexamethasone (mouse). **235**, 557

## Titin

-connectin, N-terminal Z repeat 5, binding to C-terminal region of  $\alpha$ -actinin. **235**, 1

## T lymphoblasts

HIV-1-infected H9 cells, toxic effects of [cyanovirin-N]-[*Pseudomonas* exotoxin] conjugate. **239**, 884

## T-lymphoma Jurkat cells

apoptosis, requirement of cell-cell contact for induction of, analysis. **238**, 670

and bronchial epithelial cells, NF- $\kappa$ B activation, opposite effects of cyclosporin A-sensitive  $Ca^{2+}$  signaling (human). **234**, 424

Fas-induced apoptotic cell death, inhibition by osmotic cell shrinkage (human). **236**, 517

protein tyrosine phosphatase gene expression, regulation by PMA and calcium ionophore (human). **231**, 77

TNF, *see* Tumor necrosis factor

## Tobacco acetolactate synthase

recombinant, expression, purification, and characterization. **234**, 549

## Topology

membrane, of membrane anchor of microsomal epoxide hydrolase (human, rabbit, rat). **236**, 754

P2X<sub>2</sub> receptor. **240**, 618

*Toxoplasma gondii*

synthetic SAG1 peptides, direct binding to HLA-A2 and antigenicity for infected cell-specific CTL. **236**, 257

TPA, *see* Phorbol estert-Plasminogen activator, *see* Tissue plasminogen activator

## TR2 orphan receptor

aldolase A gene as target, identification (human). **235**, 205

## Trabecular meshwork cells

early response to mechanical stretch: transient loss of  $\alpha$ B-crystallin (human). **235**, 69

## Tracheal gland cells

SLPI protein secretion, cystic fibrosis-like alteration, induction by *Pseudomonas aeruginosa* LPS (human). **241**, 305

## Tracheal mucosal cells

EBTr, InsP<sub>3</sub>-induced  $Ca^{2+}$  release, effect of cytosolic  $Ca^{2+}$  concentration ramp (bovine). **237**, 354

## TRAF proteins

TRAF1, -2, and -3, binding sites on CD30 and other TNF receptor superfamily members. **233**, 592

## Transactivation

by AP-1, glucocorticoid receptor repression of, alleviation by Bcl-2. **233**, 781  
functional association of CREB-binding protein and hepatocyte nuclear factor 4 in. **241**, 664

progesterone receptor-mediated, synthetic chemicals inhibiting, identification (yeast). **233**, 139

## Transactivator

tetracycline-controllable, adenovirus-mediated gene expression via nuclear localization signal. **230**, 426

## Transcription

aquaporin-2 gene, regulation by GATA-3 (rat). **232**, 65

BCI RNA in neural cells, role of GCAAG/CTTGC motifs between Sprit promoter sequences for RNA polymerase III, mutational analysis. **239**, 407

coupled translation, inhibition by ribozyme and antisense RNAs by binding to polyribosomes (rabbit). **230**, 226

COX-2 gene, control by IL-1 $\beta$ , role of NF- $\kappa$ B. **237**, 28

dominant negative regulation by WT1 Denys-Drash mutant proteins, role of N-terminal self-association domains. **233**, 723

ferritin H chain in HeLa cells, stimulation by okadaic acid by increased interaction between p300 and transcription factor Bbf. **240**, 179

galanin-1 receptor gene, regulation (human). **241**, 558

$\gamma$ -glutamylcysteine synthetase heavy subunit gene, cisplatin-induced upregulation in lung cancer cell line SBC-3, role of proximal 5'-flanking sequence (human). **236**, 616

hexokinase II, regulation in denervated skeletal muscle (rat). **238**, 53

inducible nitric-oxide synthase gene in hepatocytes, effect of oxidative stress (rat). **234**, 289

interstitial collagenase, inhibition by SMRT through HRE-independent mechanism (rabbit synovial fibroblasts). **237**, 52

mBMP-4 gene, regulatory role of E-box in 5'-flanking promoter region involving USF (mouse). **240**, 136

NF-1A domain repressing, identification. **238**, 744

nitric-oxide synthase gene in heart during endotoxemia (rat). **231**, 211

p19<sup>INK4D</sup>, stat3-dependent activation, association with IL-6-induced growth arrest (M1 cells). **238**, 764

PDGF A-chain gene, regulation by first intron elements (human). **230**, 569

peroxisome proliferator-activated receptor  $\alpha$ , role of amino acid residues in DNA- and ligand-binding domains (human). **239**, 522

from peroxisome proliferator-activated receptor  $\gamma$ 2 promoter, direct modulation by CAAT/enhancer binding proteins. **240**, 99

peroxisome proliferator-induced repression, nonperoxisomal gene expression in mouse, mediation by PP-activated receptor  $\alpha$ . **230**, 155

phospholipid transfer protein gene in HepG2 cells, DNA sequences essential for. **232**, 574

regulation by endogenous mutant p53<sup>273His</sup> in MDA-468 breast cancer cells. **232**, 14

regulation by HX600 dibenzodiazepine via retinoic acid and retinoid X receptors. **233**, 121

spinach chloroplast threonine tRNA gene in homologous *in vitro* system. **233**, 380

thyroid transcription factor-1 gene from start site nt-1902 and positive regulation by TTF-1 in thyroid (rat). **238**, 748

topoisomerase II $\alpha$ , downregulation in doxorubicin-resistant variant of human multiple myeloma RPMI 8226, role of decreased CP-1 activity. **237**, 217

- trophoblast-specific, leptin 5' flanking sequences involved in, identification (human), **241**, 658
- Transcriptional activation
- inducible NOS gene by LPS plus IFN- $\gamma$  in RAW 264.7 macrophages, role of upstream NF- $\kappa$ B site, **236**, 655
  - LIM-HOX gene *hLH-2* in chronic myelogenous leukemia, role of *cis*-acting effect of *Bcr-Abl* (human), **233**, 806; **234**, 742
  - by multiple agonists, impairment by dominant-negative Smad3 protein, **232**, 517
  - p21 promoter by p53 *in vitro*, **234**, 300
- Transcriptional activators
- for *Bacillus subtilis* multidrug transporter Bmr, broad ligand specificity, **239**, 269
  - CooA, containing heme-based CO sensor, signal transduction, **240**, 783
  - function of hepatitis C virus nonstructural protein amino terminal deletion mutants as, in yeast, **236**, 360
- Transcriptional analysis
- threonine dehydrogenase gene of *Xanthomonas campestris*, **240**, 523
- Transcription factors, *see also specific transcription factors*
- binding to carboxylesterase gene promoter (human), **230**, 215
  - expression in keratoconus (human), **235**, 253
  - heat-shock, *see* Heat shock transcription factors
- Transdermal transport
- electroporation-associated, effect of heparin (human), **234**, 637
- $\beta\gamma$ -Transducin
- interaction with phosducin, effects of post-translational modifications (bovine retina), **233**, 370
- Transduction
- Ad-mediated, with human glial-derived neurotrophic factor gene, prevention of MPTP-induced dopamine depletion in murine striatum, **238**, 569
- Transfection
- cationic peptide-mediating systems, effect of anionic  $\alpha$ -helical peptide, **235**, 726
  - COS-7 cells, subsequent formation of CD36 covalently associated dimers and multimers, **240**, 812
  - high-efficiency stable DNA, with cationic detergent and glycerol, **231**, 531
  - nonviral methods, for foreign gene expression in early chicken embryos *in ovo*, **230**, 376
  - stable, LLC-PK1 cells with human microsomal GST gene, effects on haloalkene glutathione S-conjugate formation and cytotoxicity, **234**, 481
- Transferrin
- as constituent of macromolecular activators of phagocytosis from platelets and precursors (human), **230**, 270
  - containing recycling compartments, in K562 cells, association of Rab11 with, **239**, 612
  - receptor-mediated endocytosis, effects of perturbations, comparison with fluid-phase and bulk-membrane tracers (fetal rat fibroblasts), **236**, 661
- Transfer RNA
- chloroplast tRNA<sup>Thr</sup> gene, transcription and processing in homologous *in vitro* system (spinach), **233**, 380
  - mitochondrial tRNA<sup>Leu(UUR)</sup>, gene mutation associated with mitochondrial encephalomyopathy (human), **233**, 637
  - mitochondrial tRNA<sup>Phe</sup>, gene evolution: import of cytosolic tRNA<sup>Phe</sup> into mitochondria (*Arabidopsis thaliana*), **237**, 432
  - precursor 3'-end, nuclease processing, purification and characterization (*Aspergillus nidulans*), **233**, 354
- Transformation
- fast-to-slow, of skeletal muscle, relationship to oligomeric status of calsequestrin (dog, rabbit), **240**, 721
  - giant cell, trophoblast cells *in vitro*, effect of nerve growth factor (mouse), **231**, 309
  - malignant, mammalian cells, initiated by constitutive expression of *polo*-like kinase, **234**, 397
  - stable, mammalian cells with stearoyl-CoA desaturase gene, modulation of lipid unsaturation and membrane fluid state, **237**, 362
- Transforming growth factor  $\alpha$
- mouse, gene encoding, integration of HTLV-1 provirus into, **233**, 792
  - stimulation of 13-hydroxyoctadecadienoic acid formation (human), **231**, 111
- Transforming growth factor  $\beta$
- cell-type-specific modulation of Hox gene expression in osteosarcoma and neuroblastoma cell lines (human), **233**, 365
  - effect on phosphatidate phosphohydrolase-1 in hepatocytes (rat), **230**, 365
  - enhancement of ob gene expression in 3T3-L1 adipocytes, **240**, 382
  - induced apoptosis, attenuation in hepatocytes by calpain inhibitors (human), **231**, 457
  - modulation of PDGF effects in rat VSMC, role of catalase and glutathione peroxidase, **232**, 1
  - modulatory effect on Fc $\gamma$  receptor-induced MAPK activation in murine macrophages, **238**, 256
  - and other growth factors, effects on induction of subcutaneous tissue fibrosis in newborn mice, **237**, 292; *erratum*, **240**, 507
  - synthesis in bone cells, increase by 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **239**, 734
- Transforming growth factor  $\beta$ 1
- coregulation of mRNA expression of aryl hydrocarbon receptor and cell cycle-regulating genes in human cancer cell lines, **241**, 86
  - effects on bone marrow stromal cell growth and differentiation, comparison to effects of BMP3 (human), **241**, 787
  - expression in JEG-3 cells, effect of benzo[a]pyrene and 2,3,7,8-tetrachlorodibenzo-p-dioxin (human), **231**, 117
  - expression and secretion, role of Sertoli cell-germ cell interactions *in vitro* (rat), **238**, 905
  - increased mRNA levels in murine osteoblastic cells, induction by electrical stimulation by mechanism involving Ca<sup>2+</sup>/calmodulin pathway, **237**, 225
  - mRNA and protein, expression and regulation in rat fetal testis *in vitro*, **236**, 135
  - regulation of cell cycle-related genes in hepatocytes (rat), **238**, 539
- Transforming growth factor  $\beta$ 2
- expression in neuroblastoma cells, regulation by 1,25-dihydroxyvitamin D<sub>3</sub> (mouse), **235**, 15
- Transforming growth factor  $\beta$  receptor
- types I and II, synthesis in bone cells, increase by 1 $\alpha$ ,25-dihydroxyvitamin D<sub>3</sub> (human), **239**, 734
- Transgenes
- cre*, transmission, Cre recombinase activity in mature oocytes irrespective of, transgenic mouse line retaining, **237**, 318
  - T7 RNA polymerase*, transient expression in zebrafish embryo, activation by T7 binary system, **237**, 492
- Transgenic mouse
- CNS and testis, amyloid precursor protein gene promoter constructs preferentially expressed in, **240**, 759
  - $\alpha$ B-crystallin TATA sequence mutations: lens preference for proximal TATA box and distal TATA-like sequence, **241**, 407
  - expression of 5'-deleted GLUT4 minigenes, effects of exercise training and high-fat diet, **239**, 503
  - HBV transgenic, efficacy of anti-hepatitis B virus drugs against, monitoring by semiquantitative PCR of serum viral DNA, **241**, 43
  - membrane cofactor protein expression, regulation by 3' untranslated region, **233**, 829
  - retaining Cre recombinase activity in mature oocytes irrespective of *cre* transgene transmission, development, **237**, 318
  - tenascin gene knockout mouse, dopaminergic neurons, tyrosine hydroxylase mRNA level, **231**, 356
- Transgenic rabbit
- human apo A-I transgenic, impaired endothelial derived vasorelaxation, **241**, 205

- Transglutaminase  
tetrameric peptides inhibiting, effect on formation of cornified cell envelope, **233**, 39  
tissue-type, activity and expression in CHO cells and cells transfected with inducible c-Myc with/without apoptosis inhibitor Bcl-2, **236**, 280
- Transglutaminase 1  
and geranylgeranyl transferase  $\alpha$ , genes encoding, functional relationship in terminally differentiating keratinocytes (human), **235**, 10
- Transglutaminase C  
induction by 12-*O*-tetradecanoylphorbol-13-acetate in colon carcinoma SW620 cells (human), **232**, 737
- Transglycosylation reaction  
in regiospecific synthesis of 3-*O*- $\alpha$ -1-fucopyranosyl-2-acetamido-2-deoxy-D-glucopyranose in aqueous medium, **234**, 358
- Transition states  
stabilization by serine-threonine-serine motif in carnitine acyltransferase, site-directed mutagenesis study, **238**, 784; *erratum*, **241**, 803
- Translation  
CAT mRNA in *E. coli*, function of  $\epsilon$  sequence of phage T7 as initiator of, **236**, 253  
coupled transcription, inhibition by ribozyme and antisense RNAs by binding to polyribosomes (rabbit), **230**, 226  
hepatic HMG-CoA reductase, regulation by dietary cholesterol (rat), **232**, 278  
mRNA, initiation, effect of food intake (rat), **240**, 825  
ornithine decarboxylase mRNA, and polyamine transport, suppression in *ras*-transformed CREF cells by depletion of eIF-4E, **240**, 15
- Translocation  
integrin-dependent, Tec to cytoskeleton in thrombin-activated platelets, **238**, 247  
intracellular, phospholipase C  $\beta$ 2, during HL-60 myeloid differentiation (human), **235**, 831  
nuclear  
BLM protein by nuclear localization signal, **240**, 348  
MAP kinase in HL-60 cells, 1,25-dihydroxyvitamin D<sub>3</sub>-induced, upstream regulation by protein kinase C, **241**, 419  
protein kinase C isoforms in rat neutrophils, **234**, 412
- Translocation protein 1  
human cDNA homolog, identification (*Drosophila*), **230**, 100
- Transmembrane channels  
formation, and [Ca<sup>2+</sup>], accumulation, induction by perforin N-terminus peptides (PN71 lymphocytes), **240**, 647
- Transmembrane migration  
phospholipids, link to ABC transporter gene family, evidence from rare inherited disorder of phosphatidylserine externalization, **241**, 548
- Transmissible spongiform encephalopathies  
strains, potential link with molecular structure, **238**, 185
- Transplantation  
allogeneic, SK2 hybridoma cells microencapsulated with alginate-poly(L)-lysine-alginate membrane, subsequent immunological studies (rabbit), **230**, 524
- Transplant coronary artery disease  
associated 56-58-kDa antigen, molecular cloning and expression (human), **236**, 716
- Treacher Collins syndrome  
associated TCOF1 gene, mouse homologue expression, characterization, and chromosomal mapping, **238**, 1
- Trefoil factor family 2  
mRNA, regulation in ovariectomized rat, role of estrogen receptor  $\alpha$  and  $\beta$  expression in upper gastrointestinal tract, **240**, 478
- Triacylglycerol lipase  
adipose tissue, partial purification and identification (chicken), **236**, 94  
antisense DNA, suppression of neutral cholesterol ester hydrolase, **233**, 655
- Tributyltin chloride  
effect on trout hemoglobin, **238**, 301
- 2,4,6-Trichloroaniline  
DNA ligands to, *in vitro* selection using magnetic microbead-based affinity separation and fluorescence detection, **234**, 117
- Trichoderma reesei*  
cellobiohydrolase I, expression in insect cells, **233**, 25
- Trichostatin A  
effects on expression of WAF1/Cip1 in MG63 osteosarcoma cells, **241**, 142
- Triiodothyronine  
adipogenic action, relationship to positive effector action of calcitriol in adipose differentiation in OB17 cell line, **232**, 771  
and cold and high-fat feeding, effects on UCP3 regulation in rat skeletal muscle and BAT, **240**, 222  
effects on  
cardiac cells, AT-1 cardiomyocytes as model for studies of, **237**, 303  
muscle cell differentiation and blood glucose level in hyperglycemic KK mouse, **235**, 790  
stearoyl-CoA desaturase gene 1 in mouse liver: localization of negative thyroid hormone-response region, **233**, 838  
regulation of leptin mRNA expression and secretion in 3T3-L1 adipocytes, **232**, 822  
resistance to, mutant thyroid hormone receptor  $\beta$ 1 identified in patient with, inhibition of wild-type TRs and other nuclear receptors, **238**, 39; *erratum*, **240**, 507  
stimulation of ADP-ribosyl cyclase in VSMC (rat), **238**, 847
- Trimerization domain  
heat shock factor 2, interaction with nucleoporin p62 (human), **240**, 228
- 2-(Trimethylammonium)ethyl methanesulfonate  
effect on fast inactivation in inactivation-defective human heart sodium channel: analysis of IFM-ICM mutation, **233**, 606
- Trinucleotide repeats  
CAG, genes containing, cloning in mouse brain, **240**, 239
- Triose-phosphate isomerase  
deficiency, metabolic correction *in vitro* by complementation (human), **232**, 528
- Trip-1  
and SMRT, expression in human neuroectodermal cell lines, **234**, 278
- Triphenyltin chloride  
effect on trout hemoglobin, **238**, 301
- Triple-helix-forming oligonucleotides  
containing phosphorothioates, targeted to polypurine tract, inhibition of HIV-1 replication, **233**, 742
- Triton X-100  
large single duplex DNA induced by, first-order phase transition, **230**, 514
- Troglitazone  
effect on reactive oxygen species, **235**, 113  
induction of uncoupling protein-2 mRNA in pancreatic islets of Zucker diabetic fatty rats, **237**, 359
- Trophoblast cells  
expression of interleukin-4 and IL-7 receptor complexes with common  $\gamma$  chain (human), **231**, 429  
giant cell transformation *in vitro*, effect of nerve growth factor (mouse), **231**, 309  
transcription specific to, leptin 5' flanking sequences involved in, identification (human), **241**, 658
- Tropomyosin  
native, restoration of defective mechanochemical properties of cleaved actins, **237**, 121
- $\alpha$ -Tropomyosin  
hypertrophic cardiomyopathy mutations Asp175Asn and Glu180Gly, effects on Ca<sup>2+</sup> regulation of thin filament motility (rabbit), **236**, 760  
skeletal muscle gene, chromosomal localization (human), **230**, 347
- $\beta$ -Tropomyosin  
skeletal muscle gene, chromosomal localization (human), **230**, 347

## Subject Index

- Troponin-C** fast  
skeletal muscle gene, chromosomal localization (human), **230**, 347
- Troponin-I** fast-twitch  
skeletal muscle gene, chromosomal localization (human), **230**, 347
- Troponin-I** slow-twitch  
skeletal muscle gene, chromosomal localization (human), **230**, 347
- Trypanosoma cruzi*  
cryptic protease activity detection by preincubation with kininogen at low temperatures, **240**, 540
- Trypsin**  
inhibition by synthetic pro-peptides *in vitro* (tobacco hornworm midgut), **235**, 606  
mammalian pancreatic, inhibition by sulfated lipids, **237**, 262  
role of disulfide bond C191–C220, **230**, 592  
stable partly denatured state, induction by high hydrostatic pressure (bovine), **239**, 150  
substrate pocket Asp<sup>189</sup>, distance to basic group of CMTI-III position P<sub>1</sub> residue side chain, role in CMTI-III trypsin inhibitory activity, **240**, 869
- Trypsin inhibitor**  
CMTI-III, inhibitory activity, role of distance between basic group of CMTI-III position P<sub>1</sub> residue side chain and Asp<sup>189</sup> in substrate pocket of trypsin, **240**, 869
- Tryptophan**  
residues exposed to peroxynitrite, oxidative modification, **234**, 82  
site-directed fluorescence, in analysis of tear lipocalin solution structure (human), **239**, 191
- Tryptophan pyrolysate**  
mutagenic, interaction with d(CGATCT)<sub>2</sub>: intercalation model based on NMR experiments, **240**, 803
- TSE**, *see* Transmissible spongiform encephalopathies
- TT virus**  
DNA virus associated with elevated transaminase levels in posttransfusion hepatitis of unknown etiology (human), **241**, 92
- Tuberculosis**  
drugs for therapy of, high-throughput screening, recombinant *Mycobacterium aurum* expressing *E. coli*  $\beta$ -galactosidase in, **240**, 536
- Tubulin**  
expression by marrow stromal osteoblasts, effects of estrogen (mouse), **233**, 30  
folding, role of chaperonin containing TCP-1 (*Caenorhabditis elegans*), **241**, 687  
interaction with HPC-1A/syntaxin 1A (rat), **231**, 352  
palmitoylation in PC12 cells, **239**, 650  
pretreatment effect on c-myc induction in colon carcinoma cells (human), **231**, 751
- $\beta$ -Tubulin  
assembly-independent GTPase activity of isoforms, differential effects of colchicine and analog MTPT (bovine brain), **231**, 698
- Tumor antigen 90K**  
domains recognized by monoclonal antibodies SP2 and L3, identification, and preparation and characterization of other anti-90K monoclonal antibodies, **232**, 367
- Tumor cells**, *see also specific tumor types*  
Bcl-2 apoptosis inhibition mechanisms: alleviation of trans-repressive function of glucocorticoid receptor and inhibition of activation of CPP32-like cysteine proteases, **233**, 781  
2,6-bis((3,4-dihydroxyphenyl)-methylene)cyclohexanone-induced apoptosis and p53-independent growth inhibition: synergism with genistein, **239**, 467  
DVL-3 expression: *dishevelled* gene (human), **239**, 510  
HL-60, *see* HL-60 cells  
human and rodent, inhibition by class of synthetic peptides inducing apoptosis, **240**, 208  
IL-13 receptor subunit composition, **238**, 90  
maspin expression and motility, regulation by gamma linolenic acid, **237**, 639  
MED-B1 and Nalm-6,  $\alpha\text{v}\beta 3$ -mediated migration, support by L1 adhesion molecule (human), **232**, 236  
membrane-associated thioredoxin, detection (human), **230**, 602  
multidrug-resistant, overexpression of 40-kDa protein (human), **236**, 483  
type, role in agonistic effect of tamoxifen (human), **236**, 140  
with various status of cell-cycle regulators, growth, effects of exogenous p16<sup>INK4a</sup>, **234**, 386
- Tumorigenesis**  
abrogation *in vivo*, and apoptosis induction, by class of synthetic peptides (mouse), **240**, 208  
 $\gamma$ -radiation-induced, in human cell hybrids, associated changes in *N*-glycosylation of glucose transporter-1, **240**, 395
- Tumor necrosis factor**  
increased sensitivity in tumor cells expressing yeast  $\Delta^9$ -desaturase gene, **241**, 465  
stimulated neutrophils, effect of tyrosine phosphorylation of p38 and extracellular signal-regulated kinase (human), **235**, 42
- Tumor necrosis factor  $\alpha$**   
alteration of cytotoxic effect of H<sub>2</sub>O<sub>2</sub> in hepatocytes (rat), **230**, 120  
bioconjugation with copolymer of divinyl ether and maleic anhydride, enhancement of antitumor potency in mice with solid tumors (human), **239**, 160  
control of NO production in mouse retinal pigmented epithelial and Müller glial cells, **240**, 132  
cytotoxicity in NIH-3T3-ras cells, protection by large aggregates of unphosphorylated hsp27 mutants, **241**, 187  
effect on expression of ubiquitin-dependent proteolytic system in soleus muscle (rat), **230**, 238  
effect on macrophage migration inhibitory factor (rat), **235**, 94  
induced NF- $\kappa$ B activation in L6 myoblasts, regulation by glutathione, **237**, 645  
induction of *c-fms* RNA expression in tissue macrophages (mouse), **240**, 442  
induction of human iNOS expression, regulation by promoter and 3' regions, **233**, 523  
inhibition of ob gene expression in 3T3-L1 adipocytes, **240**, 382  
and interferon- $\gamma$ , cytotoxicity to colon carcinoma cells, role of TNF-mediated apoptosis (mouse), **233**, 270  
–LPS–IFN- $\gamma$  combination  
induced cellular injuries in cultures hepatocytes, lack of role of NO (mouse), **240**, 664  
mediated hepatocyte NO synthesis, inhibition by dimethyl sulfoxide (mouse), **239**, 517  
LPS-induced secretion, and LPS-induced NO production, in murine peritoneal macrophages, effect of wortmannin, **240**, 692  
mediated growth arrest in human endothelial cells, c-myc expression and RB phosphorylation during, **236**, 819  
mediation of iNOS expression in human neuroblastoma cell line by cisplatin, **233**, 788
- mRNA**  
expression in skin, inhibition by silymarin (mouse), **239**, 334  
levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338  
ribozyme-mediated cleavage *in vivo*, factors affecting, **236**, 205
- production**  
by peripheral blood mononuclear cells, impairment by oxidized LDLs (human), **232**, 359  
by RAW 264.7 macrophages, effect of L929 and L1210 cell lines (mouse), **230**, 636  
production inhibition, effect on liver regeneration after partial hepatectomy (rat), **231**, 557
- release**  
during joint cultivation of human K-562 and mouse L-929 cells, **234**, 655  
by pelvic cartilage in response to boric acid (chicken embryo), **234**, 263

## Subject Index

Tumor necrosis factor  $\beta$ 

Nco I gene polymorphism, relationship to hypertriglyceridemia and insulin resistance in lean and obese subjects, **236**, 829; *erratum*, **240**, 507

## Tumor necrosis factor receptor

CD137, localization on chromosome 1p36, **235**, 699

p75, binding sites of TRAF1, 2, and 3, **233**, 592

## Tumors

neurofibromas, plexiform and dermal, in NF1 patients, loss of heterozygosity at NF1 locus, **234**, 346

solid, therapeutic effects of human tumor necrosis factor- $\alpha$  conjugated to copolymer of divinyl ether and maleic anhydride (mouse), **239**, 160  
subcutaneous, NO and peroxynitrite production, stimulation by flavone acetic acid (mouse), **235**, 509

## Tyrosinase

alternative transcripts, qualitative and quantitative catalog in normal murine skin melanocytes, **236**, 173

and laccase, pluripotent polyphenol oxidase with activities of, characterization from melanogenic marine *Alteromonas* sp., **240**, 787

## Tyrosine

deficient diet, effect on germfree mouse, **230**, 233

Fyn N-terminal residue Tyr28, PDGF-induced phosphorylation, effect on Fyn activation (NIH3T3 cells), **241**, 355

IGF-I receptor residue 1250, role in ligand-mediated internalization by R-cells (murine embryo), **239**, 182

metabolite fumarylacetoacetate, mutagenicity in V79 cells, enhancement by glutathione depletion, **232**, 42

nitration mediated by peroxynitrite, inhibition by catechin polyphenols, **232**, 164

in phospholipase C- $\gamma$ 1, angiotensin II-mediated phosphorylation and dephosphorylation, role of intracellular calcium (rat), **232**, 540

Src residue Tyr-527, role in activation of gene expression by non-transforming unmyristylated-SH3-deleted mutant of Src, **239**, 681

substitution in first position of nociceptin, effects on systemic arterial pressure (rat), **234**, 309

## Tyrosine aminotransferase

glucocorticoid-induced gene expression in cultured rat hepatocytes, enhancement by ursodeoxycholic acid, **240**, 732

## Tyrosine hydroxylase

mRNA level in dopaminergic neurons of tenascin gene knockout mouse, **231**, 356

Tyrosine kinase, *see* Protein-tyrosine kinase

## Tyrosine phosphorylation

41-kDa protein in LPS-stimulated macrophages, inhibition by negatively charged liposomes (mouse), **231**, 827

72-kDa protein, downstream of Syk, induction by Fc $\epsilon$ RI aggregation (RBL-2H3 cells), **239**, 670

CrkL, and association with Shc, SHP-2, and Cbl, induction by erythropoietin and IL-3 in hematopoietic cells, **239**, 412

erbB4, stimulation by aurintricarboxylic acid in neuroblastoma cells (human), **230**, 266

insulin receptor substrate-1, and activation of PI-3-kinase pathway by glycine-extended gastrin precursors (AR4-2J cells), **236**, 687

integrin-dependent, Tec in thrombin-activated platelets, **238**, 247

modulation of caveolin-1 detergent solubility and association with endothelial NOS, **236**, 155

p38, in TNF-stimulated neutrophils (human), **235**, 42

p125FAK, suppressive effect on hydrogen peroxide-induced apoptosis of T98G cells, **241**, 769

in PLC- $\gamma$ 1, angiotensin II-mediated, role of intracellular calcium (rat), **232**, 540

protein kinase C activation dependent on, in direct activation of T cells by CD40 ligand (human), **239**, 11

role in pertussis toxin-induced myelomonocytic cell adhesion, **236**, 479

Shc Tyr-239 and Tyr-240 by c-Src in phosphatidylinositol 4,5-bisphosphate-dependent manner, **240**, 399

SHPS-1, stimulation by EGF (CHO cells), **239**, 483

N-syndecan core protein, **240**, 502

## U

## U937 leukemia cells

## apoptosis

caspase-3-like activity during, induction by geranylgeraniol (human), **234**, 641

induced by adenosine A $_3$  receptor antagonists, protective effect of A $_3$  agonists, **232**, 317

PMA-stimulated adhesion, promotion by synthetic peptide FN-C/H-V from C-terminal heparin-binding domain of fibronectin, **239**, 205

sphingosine-1-phosphate mobilization of intracellular Ca $^{2+}$  and activation of NF- $\kappa$ B (human), **234**, 121

telomerase inhibition by antisense pentadecadeoxynucleotides targeted against c-myc mRNA, **241**, 775

## U937 lymphoma cells

expression of membrane-linked metalloproteinase family ADAM (human), **235**, 437

## U937 macrophages

heparin-binding EGF-like growth factor expression, effect of cilostazol, **238**, 478

LPS-stimulated, cytosolic phospholipase A2 gene expression and biosynthesis, inhibition by interleukin-4 (human), **230**, 40

## Ubiquitin

dependent proteolytic system in soleus muscle, effect of TNF- $\alpha$  (rat), **230**, 238

mediated proteolytic system, susceptibility of proteinase 3C of hepatitis A virus and poliovirus to degradation by, **238**, 119

pressure-assisted cold denatured state, structure (bovine), **238**, 289

## Ubiquitin conjugating enzyme

induction for degradation of topoisomerase II $\alpha$  during adenovirus E1A-induced apoptosis (MA1 cells), **239**, 823

## Ubiquitin-proteasome pathway

role in apoptosis, review, **230**, 481

## UCP3

regulation in rat skeletal muscle and BAT in response to cold, thyroid hormone treatment, and high-fat feeding, **240**, 222

## UDP-galactose transporter

homolog required for protein galactosylation, encoding by *gms1<sup>+</sup>* gene (*Schizosaccharomyces pombe*), **232**, 121

## UDP glucuronosyltransferase

hepatic microsomal, with activity toward retinoic acid, characterization by photoaffinity labeling (rat), **230**, 497

UGT1A10, glucuronidation of mycophenolic acid (human), **238**, 775

## UDP glucuronosyltransferase-1A6

mRNA, extrahepatic expression in *chlch* and *14CoS/14CoS* mice, **233**, 631

## Ulcer, gastric

pepsinogen C gene product as possible growth factor during healing (rat), **238**, 17

vascular endothelial growth factor expression at ulcer margin (human), **234**, 493

## Ultrasound

selective clinical signals, effects on gene transfer and expression in human prostate cancer cell lines LnCap and PC-3, **234**, 64

## Ultraviolet light

liver cell sensitization to, induction by hepatitis B virus X-protein, **232**, 255

UV-A, in generation of active oxygen species from advanced glycation end-products, **235**, 306

## UV-B

induced apoptosis in SV40-transformed human keratinocytes, role of CPP32 and interleukin-1 $\beta$ -converting enzyme, **236**, 194

- tubifex high sensitivity for, **231**, 818
- UV-C, activation of extracellular signal-regulated kinase 1/2, role of protein kinase C (NIH3T3 cells), **240**, 273
- Ultraviolet melting studies
- spPNA–DNA hybrids: spermine-conjugated peptide nucleic acids, **240**, 778
- Ultraviolet spectrophotometry
- in evaluation of coupling efficiency of LDLs for macrophage-specific drug targeting, comparison with other methods, **240**, 112
- Uncoupling protein 2
- Kupffer cells as dominant site (rat liver), **235**, 760
  - mRNA, induction by troglitazone in pancreatic islets of Zucker diabetic fatty rats, **237**, 359
- Uncoupling protein 3
- expression in skeletal muscle and brown adipose tissue (human), **235**, 79
  - regulation in rat skeletal muscle and BAT in response to cold, thyroid hormone treatment, and high-fat feeding, **240**, 222
- Unsaturation
- lipids, and membrane fluid state, modulation in mammalian cells by stable transformation with yeast  $\Delta^9$ -desaturase gene, **237**, 362
- Upstream regulatory element
- effect on dynorphin gene promoter (rat), **231**, 172
- Upstream stimulatory factor
- E-box in mBMP-4 gene 5'-flanking promoter region involving, role in mBMP-4 transcriptional regulation, **240**, 136
  - effect *in vitro* on metallothionein-I gene promoter, **230**, 159
- Upstream stimulatory factor 1
- suppression of CYP1A1 mRNA induction by 3-methylcholanthrene in HepG2 cells, **240**, 293
- Upstream stimulatory factor 2/FIP
- association with b-Zip transcription factor (yeast), **231**, 333; *erratum*, **233**, 293
- Urea
- activation of adenylate kinase by increasing conformational flexibility of active sites, **238**, 382
  - aquaporin permeable to, cloning (mouse), **240**, 324
  - and SDS, solutions, protease Q stability in, **240**, 839
- Uremia
- hyperparathyroidism, vitamin D receptor alleles as risk factors (human), **231**, 329
- Urinary trypsin inhibitor
- chondroitin sulfate chains, role in inhibition of LPS-induced increase of cytosolic free  $\text{Ca}^{2+}$  in HL60 and HUVEC cells, **238**, 560
- Urokinase plasminogen activator
- mRNA, levels in uterine endometrial adenocarcinoma RL95-2 cells, increase by TCDD, **238**, 338
- Ursodeoxycholic acid
- enhancement of glucocorticoid-induced tyrosine aminotransferase gene expression in cultured rat hepatocytes, **240**, 732
- USF, *see* Upstream stimulatory factor
- Uterine endometrial adenocarcinoma cells
- RL95-2, mRNA levels for IL-1 $\beta$ , TNF- $\alpha$ , and urokinase plasminogen activator, increase by TCDD, **238**, 338
- Uterus
- endometrium, and ovary and kidney, osteogenic protein-1 mRNA expression, effects of pregnancy and estrogen (mouse), **234**, 242
  - smooth muscle, iNOS induction by IL-1 $\alpha$  (human, rat), **238**, 12
- UTP
- effects on denaturation of F-actin, **236**, 798
- Utrophin/dystrophin related protein
- and dystrophin, antibodies, concomitant use for reduction of misdiagnosis of Duchenne/Becker muscular dystrophy, **241**, 232
- V
- Vacuolating cytotoxin
- from *Helicobacter pylori*, binding to 140-kDa protein in human gastric cell lines AZ-521 and AGS, **238**, 629
- VAF1
- mouse homologue of ERC-55 binding protein interacting with papillomavirus E6, specific interaction with vitamin D receptor among nuclear receptors, **233**, 765
- Valine
- Val208 and His211 role in ligand binding and receptor function of ovine Mel<sub>1aR</sub> melatonin receptor, **239**, 418
- Van1 protein
- glycosylation in Golgi apparatus, membrane protein complexes for, analysis (*Saccharomyces cerevisiae*), **241**, 682
- Variable domain
- glycosylation, in monoclonal antibody to gonadotropin-releasing hormone, modulation of antigen binding, **234**, 465
- Vascular cell adhesion molecule-1
- cytokine-induced expression in human endothelial cells, effects of dimethylfumarate, **234**, 19
  - endothelial, expression regulation at post-transcriptional level by p38 MAP kinase (human), **230**, 44
  - expression on endothelial cells, inhibition by reconstituted high-density lipoproteins (human), **238**, 61
  - expression on nasal microvascular endothelial cells, effect of eotaxin (human), **241**, 136
- Vascular endothelial growth factor
- effect on endothelin-converting enzyme expression in endothelial cells (bovine), **235**, 713
  - expression at gastric ulcer margin and in cultured gastric fibroblasts (human), **234**, 493
  - expression by retinal Müller cells, induction by AGEs (human), **236**, 712
  - gene promoter region, analysis (human), **230**, 413
  - ligand interactions, Flt-1 extracellular domains mediating, identification, **231**, 596
  - local delivery, endothelialization by, effect on in-stent intimal formation (human), **235**, 311
- Vascular smooth muscle cells
- ADP-ribosyl cyclase activity, stimulation by retinoic acid and triiodothyronine (rat), **238**, 847
- aortic
- A7r5, InsP<sub>3</sub>-induced  $\text{Ca}^{2+}$  release, effect of cytosolic  $\text{Ca}^{2+}$  concentration ramp (rat), **237**, 354
  - arginine vasopressin mRNA identification (rat), **231**, 831
  - cell line from p53 knockout mice, differentiation characteristics, **238**, 154
  - G1 growth inhibition induced by adenovirus-mediated gene transfer of C-type natriuretic peptide *in vitro* (rat), **239**, 889
  - growth, induction by selective activation of proteinase-activated receptor-2 (human), **241**, 762
  - spontaneously hypertensive rat, plasma membrane and sarcoplasmic reticulum  $\text{Ca}^{2+}$  pump mRNA levels, **230**, 344
  - TGF- $\beta$  modulated effects of PDGF, role of catalase and glutathione peroxidase (rat), **232**, 1
- brain,  $\text{Ca}^{2+}$  influx, regulation by voltage-dependent non-selective cation channel sensitive to efonidipine (bovine), **240**, 484
- heat shock response and cytotoxicity mediated by oxidized LDL, effect of simvastatin (human), **231**, 437
- heparin-binding EGF-like growth factor expression, effect of cilostazol (rat), **238**, 478
- hypertrophy in culture from hypertensive Ren-2 transgenic rat, mediation by angiotensin II, mechanism, **240**, 367
- JNK/SAPK and ERK activation by mechanical strain, dependence on extracellular matrix composition (rat), **237**, 239
- mitogen-activated protein kinase activity and cell proliferation, stimulation by AGEs (rabbit), **239**, 111
- mitogenesis, role of NF- $\kappa$ B activation (bovine), **235**, 365
- NO synthase expression, liposomal induction (bovine), **231**, 780

Vascular smooth muscle cells (*continued*)

- PDGF-BB-stimulated focal adhesion kinase and paxillin phosphorylation, inhibition by eNOS gene transfer (guinea pig), **236**, 706
- proliferation *in vitro* and *in vivo*, stimulation by immediated early gene of cytomegalovirus (human), **231**, 447
- pulmonary artery, heparin antiproliferative activity, effects of molecular weight, protein core, and charge (bovine), **241**, 18
- vasodilation, cell signaling role of ceramide (rat), **237**, 95

## Vasoactive intestinal peptide

- stimulated cAMP production, role of Asp196 in first extracellular loop of VIP1 receptor (human), **230**, 289

## Vasoconstriction

- endothelin-1-induced, in perfused lung, effect of phosphodiesterase inhibitors (rat), **231**, 22

## Vasodilation

- ceramide cell signaling role, in rat VSMC, **237**, 95

## Vasodilator-stimulated phosphoprotein

- oligoproline regions, defined docking sites for actin-based motility (human), **231**, 686

## Vasorelaxation

- endothelial derived, impairment in human apo A-I transgenic rabbits, **241**, 205

## V-ATPase

- hyperthermophilic, of *Desulfurococcus*, stabilizing residues and functional domains in, **234**, 341

## Vectors

- adenovirus, efficient transfer of genes into senescent cells via highly expressed  $\alpha\beta 5$  integrin, **240**, 88
- Epstein-Barr virus
- coupled with cationic or HVJ-liposomes, transduction of genes into human cells, **238**, 795
  - coupled with HVJ-liposome system, in targeted gene therapy of EBV-associated neoplasms, **241**, 112
- retroviral
- based on Gibbon ape leukemia virus, transduction of human hematopoietic cells with, **231**, 477
  - expressing anti-gene RNA in NIH3T3 cells, inhibition of gene expression from human *c-erbB* gene promoter, **240**, 203
  - reverse tetracycline-regulated, controlled gene expression with, **234**, 769

VEGF, *see* Vascular endothelial growth factor

## Venom

- snake, cardiotoxin II, role of N-terminal leucine residue (*Naja naja atra*), **233**, 713

## Venom factor

- tissue targeting and plasma clearance in mouse (cobra), **231**, 316

## Venom glands

- cDNA, snoRNAs amplified from, extended sequence complementarity to 5S rRNA (*Bungarus multicinctus*, *Naja naja atra*), **236**, 782

## Ventricle

- cardiac, nuclear protein extracts from failing and nonfailing hearts, cAMP-response element binding protein expression (human), **236**, 351

## Ventricular natriuretic peptide

- local synthesis in intestine (eel), **238**, 817

## Venuses

- endothelial cells, sulfated sialyl Lewis X on, detection by antibodies (mouse), **230**, 546; *erratum*, **233**, 576

## Vesicles

- acetylcholine- and catecholamine-containing, exocytotic mechanisms in pheochromocytoma cells, comparison (rat), **239**, 57
- GLUT4-vesicles, from adipocytes, binding of myosin-derived C109 peptide (rat), **240**, 409
- sarcoplasmic reticulum, lumenal  $\text{Ca}^{2+}$  kinetics during  $\text{Ca}^{2+}$  uptake and release, fluorescence probe study (rabbit), **241**, 181

- synaptic and synaptic plasma membrane, fusion between, role of synaptobrevin (rat brain), **236**, 184

- thylakoid membrane, from *Chlamydomonas reinhardtii* chloroplasts, with ability to integrate and import precursor proteins in *in vitro* system, isolation, **237**, 532

## Vesicular stomatitis virus

- G protein, pseudotyped retroviral packaging through adenovirus-mediated inducible gene expression, **232**, 379

## Vesperlysines

- formation as crosslinked products in Maillard reaction of lysine or proteins with glucose, **232**, 227

## VgI localization signal

- RNA, association of different sets of RNA binding proteins with, effects of phosphorylation, **234**, 419

## Vif protein

- HIV-1, redox state of cysteines in, analysis in infected cells and in virions, **240**, 257

## Vimentin

- domain-specific phosphorylation by PKN (mouse), **234**, 621
- related 56–58-kDa antigen associated with transplant coronary artery disease, cloning and expression (human), **236**, 716

## Vitamin A

- regulation of hepatic stearoyl-CoA desaturase gene 1 (mouse), **231**, 206

## Vitamin A deficiency

- associated increase in coenzyme Q, effect on respiratory complex I deficiency in cardiac mitochondria (rat), **233**, 451
- effect on expression of low-affinity glucocorticoid binding site activity and glucocorticoid-dependent induction of CYP3A2 in rat liver, **237**, 211

Vitamin C, *see* Ascorbic acid

## Vitamin D-24-hydroxylase

- renal, regulation by phosphate: effects of hypophysectomy, growth hormone, and insulin-like growth factor I (rat), **233**, 813

Vitamin D<sub>3</sub> 25-hydroxylase

- cDNA, cloning, structure, and expression (porcine liver), **241**, 491

## Vitamin D receptor

- alleles *a*, *b*, and *T*, as risk factors for hyperparathyroidism (human), **231**, 329
- big T and small t allele mRNA, stability in cells heterozygous for Taq I restriction enzyme polymorphism (human), **238**, 77
- binding of 65-kDa nuclear protein, bacterial-expressed histidine-tagged receptor study (human), **232**, 806
- among nuclear receptors, specific interaction of mouse homologue of binding protein ERC-55 for papillomavirus E6 oncoprotein, **233**, 765

Vitamin D<sub>3</sub> receptor

- inhibition by mutant thyroid hormone receptor  $\beta 1$  identified in patient with resistance to thyroid hormone, **238**, 39; *erratum*, **240**, 507

Vitamin Q<sub>10</sub>, *see* Coenzyme Q<sub>10</sub>

## Vitreous fluid

- proliferative diabetic retinopathy patients, AGE and VEGF concentrations, **236**, 712

## Vitronectin

- hemopexin-like repeats in, recognition by *Streptococcus pyogenes* (human), **234**, 445

## Voltage effects

- $\text{Al}^{3+}$  effects on channel activities in hippocampal neurons (rabbit, rat), **232**, 84

## von Willebrand factor

- blocking of binding to GPIIb/IX, high shear stress with, attenuation of agonist-induced GPIIb/IIIa-mediated platelet aggregation, **233**, 796
- monoclonal antibody GUR76-23, effects on vWf interaction with integrins  $\alpha_{IIb}\beta_3$  and  $\alpha_V\beta_3$  (mouse), **234**, 147

## VP-16

- acidic domain, and ZF5 fingers, skeletal muscle-specific product with, detection by RT-PCR (mouse), **236**, 20

## Subject Index

- effect on DNA unwinding and ATPase activities of DNA helicase II, **236**, 636
- Vpr protein  
HIV-1, prevention of murine fibroblast proliferation without G<sub>2</sub> arrest of cell cycle, **232**, 550
- VSMC, *see* Vascular smooth muscle cells
- VX  
Russian-VX, enzymatic hydrolysis by organophosphorus hydrolase, **241**, 294
- W
- WAF1/Cip1  
gene promoter, activation by histone deacetylase via Sp1 sites in MG63 osteosarcoma cells, **241**, 142
- Water  
electrolyzed-reduced, scavenging of active oxygen species and protection of DNA from oxidative damage, **234**, 269
- WDNM1  
and sulfated glycoprotein-2, gene expression in mammary epithelial cells, inhibition by EGF, **240**, 104
- Weel kinase  
carboxyl half, binding to 14-3-3  $\zeta$  protein (mouse), **230**, 262
- Werner's syndrome  
gene causing, defective transcripts, downregulation in cells of patients, **236**, 151
- Western blotting  
angiogenin (bovine), **232**, 323
- Wnt5a  
expression in mammary epithelial cell line MCF-10A, downregulation by extracellular matrix and mutated c-Ha-ras (human), **239**, 911
- Wnt proteins  
interactions with Frzb-1 (*Xenopus laevis*), **236**, 502
- Wortmannin  
effects on LPS-induced NO production and TNF- $\alpha$  secretion from murine peritoneal macrophages, **240**, 692  
enhancement of CPP32-like activity during retinoic acid-induced neuronal differentiation of P19 cells, **232**, 192  
sensitive and -insensitive pathways, as mechanism for gastric inhibitory polypeptide activation of MAP kinase (CHO cell), **235**, 171  
sensitivity of p70S6 kinase and MAP kinase activation by G protein-coupled receptor G/CCK<sub>B</sub> to, **238**, 202
- Wound healing  
gastric mucosal, pepsinogen C gene product as possible growth factor during (rat), **238**, 17  
palatal, apoptosis induction in myofibroblasts isolated from rats undergoing, effect of basic fibroblast growth factor, **240**, 21
- WT1 protein  
Denys-Drash mutant, dominant negative transcriptional activity, role of N-terminal self-association domains, **233**, 723
- X
- Xanthan gum  
synthesis, *gumD* gene required for, role in normal pigmentation and virulence causing black ROTATION (*Xanthomonas campestris*), **233**, 265
- Xanthine dehydrogenase  
conversion to oxidase in liver, role of peroxynitrite (rabbit), **230**, 476
- Xanthine oxidase  
inhibitor pterin-6-aldehyde, superoxide radical scavenging activity, **233**, 447
- Xanthomonas campestris*  
*gumD* gene, role in normal pigmentation and virulence in causing black rot, **233**, 265  
*rpoD* gene encoding primary sigma factor, cloning, sequencing, and expression, **232**, 712
- threonine dehydrogenase gene, transcriptional analysis, **240**, 523
- Xenotransplantation  
hyperacute rejection,  $\alpha$ -galactosyl oligosaccharides conjugated with polyethylene glycol as inhibitors of, evaluation (human, pig), **232**, 731
- X-protein  
hepatitis B virus, binding of damaged DNA and sensitization of liver cells to UV irradiation, **232**, 255
- X-ray absorption spectroscopy  
Cu,Zn-superoxide dismutase, evidence of His61 imidazolate bridge rupture in reduced crystalline enzyme, **241**, 119
- X-ray analysis  
intramolecular rotation in ATP synthase, **240**, 247  
left-handed Z-DNA molecular structure, comparison with simulated molecular dynamics structure, **236**, 146  
terminal oxygenase component of naphthalene dioxygenase, **241**, 553
- X rays  
induction of abnormal DNA synthesis activity in nevoid basal cell carcinoma syndrome cells (human), **240**, 269
- Xylose reductase  
cysteine residues, site and significance, deduction from fluorescence studies (*Neurospora crassa*), **239**, 789
- Y
- Yeast  
cloning and expression of wheat obtusifolios 14 $\alpha$ -demethylase cDNA, **230**, 381  
cytotoxicity of HIV-1 Nef N-terminal peptides, **232**, 707  
direct binding of human presenilin 1 to amyloid precursor protein in, **239**, 480  
fission yeast, cell cycle response to nutritional signals, role of nim1 protein kinase, **232**, 204  
progesterone receptor-mediated transactivation in, synthetic chemicals inhibiting, identification (yeast), **233**, 139  
transcriptional activator function of hepatitis C virus nonstructural protein amino terminal deletion mutants, **236**, 360
- Yeast two hybrid screen  
c-Cbl, identification of interactions with 14-3-3 isoforms and cytoskeletal components, **240**, 46
- Yin Yang 1  
identity of Leu-enkephalin-encoding sequence DNA-binding factor (rat), **231**, 135  
interaction with human poly(ADP-ribosyl) transferase, **240**, 108
- Z
- Z-DNA  
left-handed, comparison of molecular structure determined by X-rays and simulated by molecular dynamics, **236**, 146
- Zinc  
and copper, effects on interaction of human angiogenin with bovine endothelial cells, **236**, 604  
dependency of cAMP-specific phosphodiesterase activation on, **241**, 175  
effect on binding activity of human leukocyte leukotriene B<sub>4</sub> receptor, **236**, 355  
effects on phospholamban phosphorylation in sarcoplasmic reticulum membranes (swine), **232**, 394  
regulation of zinc-binding transcription regulatory protein binding to c-Jun (human), **230**, 331  
reversible inhibition of steroid binding to murine glucocorticoid receptor, **238**, 86  
role in binding of eukaryotic translation initiation factor eIF-5 to nucleic acids (*Zea mays*), **236**, 510
- Zinc-binding transcription regulatory protein

## Subject Index

- QM, binding to c-Jun, regulation by zinc ions and phosphorylation by protein kinase C (human), **230**, 331
- Zinc channels  
in inner membrane of nuclear envelope (rat), **235**, 236
- Zinc finger proteins  
cDNA cloning and expression in cerebellum and hippocampus (human, mouse), **231**, 481  
glucose-regulated, identification in human mesangial cells by mRNA differential display, **238**, 179
- ZBP-89  
inhibition of cell proliferation, **237**, 230  
overexpression in gastric cancer (human), **233**, 154
- Zinc fingers  
initiation factor eIF-5 containing, zinc-dependent binding to nucleic acids (*Zea mays*), **236**, 510
- ZF5, and VP16 acidic domain, skeletal muscle-specific product with, detection by RT-PCR (mouse), **236**, 20
- Zinc sulfide  
glutathione-capped nanocrystallites, characteristics, **237**, 16
- Zinostatin  
site-specific cleavage of DNA induced by, amplification by actinomycin D, **239**, 134
- Zona pellucida  
 $\beta$ -galactose residues, binding of mouse sperm to, **238**, 95
- Zymogen granules  
pancreatic, membrane, Go $\alpha$ , Gq $\alpha$ , and Gs $\alpha$  immunoreactivity associated with (rat), **237**, 235
- Zymography  
in detection of differences in hyaluronidase produced by human tumor cell lines and enzyme present in serum, **241**, 446

0006-291X(1997)\*;1-H
